

# Leading Innovation in Video Surveillance

Pelco Product Specifications | APAC Version | December 2010

Pelco, a proud member of the Schneider Electric family of businesses, is a world leader in the design, development and manufacture of video security systems and equipment ideal for any industry. With a long and prestigious history of offering high-quality products and exceptional customer service, Pelco has become the most sought-after product supplier in the security industry.

Pelco produces the most respected offering of discreet camera domes and enclosures, megapixel IP and HD cameras, video matrix systems, next generation digital video recorders, software-only video management solutions, and complete IP/HD end-to-end solutions – all in the never-ending pursuit of achieving 100-percent customer satisfaction.

Respected as a major product innovator, Pelco also manufactures a large number of special equipment items, including explosion-proof and pressurized camera enclosures, high-security housings, and thermal imaging pan-tilt-zoom positioning systems. Pelco produces the industry-acclaimed Spectra<sup>®</sup>, Sarix<sup>®</sup>, Esprit<sup>®</sup>, Camclosure<sup>®</sup>, Endura<sup>®</sup>, and Digital Sentry<sup>®</sup> product lines.

In addition, Pelco demonstrates its commitment to being an open systems provider with successful integrations and partnerships in such areas as Electronic Access Control, Video Analytics, Central Station Alarm Monitoring and Video Monitoring, Cellular Phone-Video Monitoring, Command and Control, Mobile Digital Video Recording, Point of Sale and Loss Prevention Systems.

From its impressive manufacturing facility located in Central California and through a responsive global network of professional sales representatives, Pelco continues to offer new technologies, products, and services that constantly confirm the company's position as the premier security systems and equipment manufacturer in the video security market.

## Camera Solutions

### Network Cameras

#### Sarix™ Cameras

##### Integrated Rugged Fixed Domes

IE30 Series, 3.1 Megapixel, High Definition	3
IEE20 Series, 2.1 Megapixel, Extended Platform	7
IEE10 Series, 1.3 Megapixel, Extended Platform	13
IE10 Series, 1.3 Megapixel, High Definition	19
IES0 Series, 0.5 Megapixel, Standard Definition	23

##### Network Cameras

IX30 Series, 3.1 Megapixel, High Definition	27
IXE20 Series, 2.1 Megapixel, Extended Platform	31
IXE10 Series, 1.3 Megapixel, Extended Platform	37
IX10 Series, 1.3 Megapixel, High Definition	43
IXS0 Series, 0.5 Megapixel, Standard Definition	47

##### Indoor Fixed Domes

ID30 Series, 3.1 Megapixel, High Definition	51
IDE20 Series, 2.1 Megapixel, Extended Platform	55
IDE10 Series, 1.3 Megapixel, Extended Platform	61
ID10 Series, 1.3 Megapixel, High Definition	67
IDS0 Series, 0.5 Megapixel, Standard Definition	71

##### Mini Indoor Fixed Domes

IM10 Series, 1.3 Megapixel, High Definition	75
IMS0 Series, 0.5 Megapixel, Standard Definition	79

#### Spectra® IP Series Domes

Spectra HD Series, Network Dome System	83
Spectra IV IP Series, H2.64 Network Dome System	89
Spectra IV IP Series, Network Dome System	99
Spectra Mini, IP Network Dome System	109

### Fixed Cameras

#### Camclosure® 2 Integrated Camera Systems

IS20/IS21 Series, Indoor Mini Dome	113
IS50/IS51 Series, Rugged Outdoor Mini Dome	117

#### Camclosure Integrated Camera Systems

IS90 Series, Indoor Mini Dome	121
IS110 Series, Rugged Outdoor Mini Dome	125

#### 1/3-Inch Box Cameras

CCC1390H Series, High Resolution Day/Night, WDR	129
C10DN Series, High Resolution Day/Night	131
C10CH Series, High Resolution Color	133

### Pan/Tilt/Zoom (PTZ) Cameras

#### Spectra Dome Systems

Spectra IV SL Series, Integrated Dome System	135
Spectra IV SE Series, Premier Integrated Dome System	141
Spectra IV SE Series, Pressurized Dome System	149
Spectra IV SE Series, Heavy Duty Dome System	151
Spectra IV SE Series, Stainless Steel Dome System	153
Spectra IV SE Series, Horizon Look-Up Dome System	155

#### Spectra Mini Dome Systems

Spectra Mini, Indoor Miniature Dome System	159
--	-----

#### Esprit® Integrated PTZ Systems

Esprit ES30C/ES31C Series, System with IOP	163
Esprit ES30PC/ES31PC Series, System with Pressurized IOC	167
Esprit ES3012 Series, P/T with Optional IOC	171

#### ExSite® Explosionproof Systems

ExSite IPSXM, Explosionproof Positioning System	175
ExSite EHXM, Explosionproof Fixed Camera System	181

# IE30 Series Sarix™ Integrated Rugged Fixed Dome

## INDOOR/OUTDOOR, NETWORK, 3.1 MEGAPIXEL HIGH DEFINITION DIGITAL CAMERA

### Product Features

- Up to 3.1 Megapixel Resolution (2048 x 1536)
- Up to 30 Images per Second (ips) at 1280 x 720
- Interchangeable CS-Mount Lenses (Optional)
- Auto Back Focus for High Precision Focusing
- H.264 and MJPEG Compression
- Day/Night Capability
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Focus Button with Delay Enables Precision Focus Through Bubble
- Web Viewing, up to 16 Cameras Simultaneously
- Up to 2 Simultaneous Video Streams
- Local Storage (Micro SD) for Alarm Capture
- Bi-directional Half-Duplex Audio

The **IE30 Series with Sarix™ technology** is a 3.1 megapixel (MPx) network indoor/outdoor rugged fixed dome camera designed with industry-leading image quality and high performance processing power. Its sturdy metal design is vandal and tamper resistant and is designed for worry-free use in a wide range of environmental operating conditions.

The **IE30 Series** is perfect for use in environmental air handling spaces. The back box is plenum rated per 2008 NEC article 300.22(C)(2).

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are considerably smaller making high definition video more affordable.

### Fixed Dome Camera

The **IE30 Series** are day/night cameras that can be ordered with or without lenses installed. All models include advanced low-light technology and a camera in an outdoor enclosure that is ready to install. These day/night models have a mechanical IR cut filter for increased sensitivity in low-light installations. These cameras accept a wide range of megapixel varifocal CS-mount lenses.

The **IE30 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

(SHOWN WITH OPTIONAL IE-S SURFACE MOUNT ADAPTER)

- Open IP Standards
- Motion Detection

### Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the IE30 Series. This behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

### Web Interface

The **IE30 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IE30 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **IE30 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) that enables third-party systems to interface with Pelco's network cameras.

# TECHNICAL SPECIFICATIONS

## GENERAL

Imaging Device	1/3-inch (effective)
Imager Type	CMOS
Imager Readout	Progressive scan
Maximum Resolution	2048 x 1536
Signal-to-Noise Ratio	50 dB
Auto Iris Lens Type	DC drive
Electronic Shutter Range	1 ~ 1/100,000 sec
Wide Dynamic Range	60 dB
White Balance Range	2,000° to 10,000°K
Sensitivity	f/1.2; 2850°K; SNR >24 dB
Color (1x/33 ms)	0.5 lux
Color SENS (15x/500 ms)	0.12 lux
Mono (1x/33 ms)	0.25 lux
Mono SENS (15x/500 ms)	0.03 lux
Dome Attenuation	
Clear	Zero light loss
Smoked	f/1.0 light loss
Construction	Cast aluminum body with polycarbonate bubble
Finish	Light gray powder coated
Weight (without lens)	
Unit	3.3 lb (1.5 kg)
Shipping	5.0 lb (2.3 kg)
Available Languages	Chinese, English, French, German, Italian, Portuguese, Russian, Spanish, and Turkish

## ELECTRICAL

Port	RJ-45 connector for 100Base-TX Auto MDI/MDI-X
Cable Type	Cat5 or better for 100Base-TX
Power Input	18 to 30 VAC; 24 VAC nominal or PoE (IEEE 802.3af class 3)
Power Consumption*	<7W; <40 W with heater operation
Current Consumption	
PoE	<140 mA maximum
24 VAC†	<510 mA without heater operation; <2.5 A maximum with heater operation
Local Storage	Micro SD
Alarm Input	10 VDC maximum, 5 mA maximum
Alarm Output	0 to 15 VDC maximum, 75 mA maximum
Service Port	External 3-connector, 2.5 mm provides NTSC/PAL video output
Accessory Port	Connects Pelco accessories
Audio	Bi-directional: half duplex Line level/external microphone input; 600 Ohm differential, 1 Vp-p max signal level
Compression	G.711 PCM 64 kbit/s

\*Does not include optional devices connected to the accessory port.

† Required for heater operation.

## MECHANICAL

Lens Mount	CS mount, adjustable
Pan/Tilt Adjustment	
Pan	368°
Tilt	160° (10° to 170°)
Rotate	355°

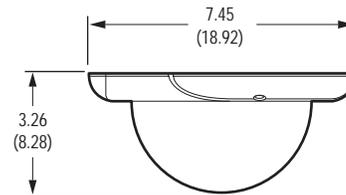

## ENVIRONMENTAL

Operational Temperature	-22° to 122°F (-30° to 50°C); PoE operates between 32° to 122°F (0° to 50°C), 24 VAC power is required for heater operation below 32°F (0°C)
Thermostat Operation	Heater thermostatically controlled to operate below <41°F (<5°C)
Operational Humidity	20% to 80%, noncondensing

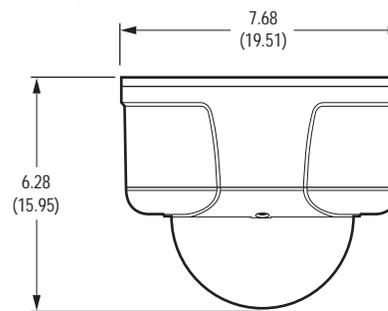

## IMPACT RESISTANCE

Impact Resistance	IK10++ per EN62262 (70J)
-------------------	--------------------------

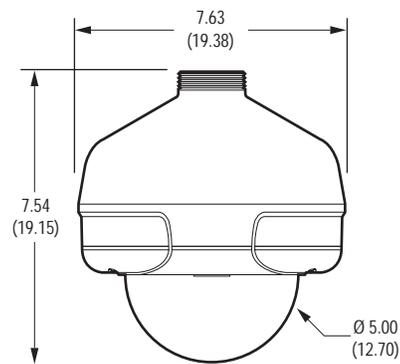

### IN-CEILING

### SURFACE MOUNT (Mounting Ring Is Available as an Accessory)

### PENDANT (Mount Is Available as an Accessory)

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# TECHNICAL SPECIFICATIONS

## VIDEO

Video Encoding H.264 base profile and MJPEG  
 Video Streams Up to 2 simultaneous streams; the second stream is variable based on the setup of the primary stream  
 Frame Rate Up to 30, 25, 24, 15, 12.5, 12, 10, 8, 7.5, 6, 5, 4, 3, 2, 1 (dependent upon coding, resolution, and stream configuration)

Available Resolutions	Resolution				MJPEG		H.264 Base Profile	
	MPx	Width	Height	Aspect Ratio	Maximum IPS	Recommended Bit Rate	Maximum IPS	Recommended Bit Rate
	3.1	2048	1536	4:3	12.0 ips	10.0 Mbps	3.0 ips	2.6 Mbps
	2.1	1920	1080	16:9	15.0 ips	10.0 Mbps	5.0 ips	2.7 Mbps
	1.9	1600	1200	4:3	15.0 ips	10.0 Mbps	6.0 ips	2.6 Mbps
	1.3	1280	1024	5:4	20.0 ips	10.0 Mbps	8.0 ips	2.5 Mbps
	1.2	1280	960	4:3	20.0 ips	9.8 Mbps	8.0 ips	2.4 Mbps
	0.9	1280	720	16:9	30.0 ips	10.0 Mbps	12.5 ips	2.5 Mbps
	0.5	800	600	4:3	30.0 ips	5.8 Mbps	25.0 ips	2.0 Mbps
	0.3	640	480	4:3	30.0 ips	3.7 Mbps	30.0 ips	1.6 Mbps
	0.1	320	240	4:3	30.0 ips	0.9 Mbps	30.0 ips	0.4 Mbps

Additional Resolutions 640 x 512, 640 x 352, 480 x 368, 480 x 272, 320 x 256, and 320 x 176

Supported Protocols TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)

Users  
 Unicast Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)

Multicast Unlimited users H.264

Security Access Password protected

Software Interface Web browser view and setup, up to 16 cameras

Pelco System Integration Endura 2.0 (or later) or Digital Sentry 4.3 (or later)

Open IP Integration Pelco IP camera API

### Minimum System Requirements

Processor Intel® Pentium® 4 microprocessor, 1.6 GHz

Operating System Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)

Memory 512 MB RAM

Network Interface Card 100 megabits (or greater)

Monitor Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution

Web Browser\* Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer® 8.0 (or later) is recommended for configuring analytics

Media Player† Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

\*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

# TECHNICAL SPECIFICATIONS

## MODELS

IE30DN-1	Sarix outdoor fixed dome network camera, 3.1 megapixel, day/night, no lens, clear dome
IE30DN8-1	Sarix outdoor fixed dome network camera, 3.1 megapixel, day/night, 2.8 - 8 mm varifocal megapixel lens, clear dome
IE30DN-0	Sarix outdoor fixed dome network camera, 3.1 megapixel, day/night, no lens, smoked dome

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class A
- FCC, Class A
- UL/cUL Listed
- C-Tick
- Meets IP66 standards

## OPTIONAL ACCESSORIES

IX-SC	4-foot service/monitor cable, compatible with any standard monitor BNC connector
POE20U560G	Single port PoE injector

## RECOMMENDED MOUNTS

IE-P	Pendant mount adapter, light gray
IE-S	Surface mount adapter, light gray
SWM-SR, IWM-SR*	Wall mounts, light gray
IWM24-SR*	Wall mount with cable feedthrough; includes integral 24 VAC, 100 VA transformer; light gray finish
PP350*	Parapet mount, gray
PP351*	Rooftop or horizontal surface mount, gray

\*Requires the IE-P pendant mount adapter.

## RECOMMENDED LENSES

13M2.2-6	Megapixel lens, varifocal, 2.2 - 6.0 mm, f/1.3 - 2.0
13M2.8-8	Megapixel lens, varifocal, 2.8 - 8.0 mm, f/1.2 - 1.9
13M2.8-12	Megapixel lens, varifocal, 2.8 - 12.0 mm, f/1.4 - 2.7
13M15-50	Megapixel lens, varifocal, 15.0 - 50.0 mm, f/1.5 - 2.1

Pelco megapixel lenses have been designed and tested to deliver optimal image quality for the IE30 Series dome. The use of standard definition lenses on IE30 Series megapixel cameras will limit the resolution of the camera, creating poor image quality.

Field of View in Degrees		High Resolution Streams (> 800 x 600) Aspect Ratio		
		16:9	4:3	5:4
2.2 mm	Horizontal	109	109	109
	Vertical	63	83	89
2.8 mm	Horizontal	89	89	89
	Vertical	48	66	70
6.0 mm	Horizontal	42	42	42
	Vertical	24	32	34
8.0 mm	Horizontal	32	32	32
	Vertical	18	24	25
12.0 mm	Horizontal	21	21	21
	Vertical	12	16	17
15.0 mm	Horizontal	16	16	16
	Vertical	9	12	13
50.0 mm	Horizontal	5	5	5
	Vertical	3	4	4

**Note:** For 800 x 600 (or lower) resolutions in 4:3 or 5:4 aspect ratios, the field of view is smaller than listed above. Refer to the Installation/Operation manual for details.

# IEE20 Series Sarix™ EP Integrated Rugged Fixed Dome INDOOR/OUTDOOR, NETWORK, 2.1 MPX HIGH DEFINITION DIGITAL CAMERA

## Product Features

- Up to 2.1 Megapixel Resolution (1920 x 1080)
- Up to 30 Images per Second (ips) at 1920 x 1080
- Optional CS-Mount Lenses
- Auto Back Focus for High Precision Focusing
- H.264 and MJPEG Compression
- Day/Night Capability
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Focus Button with Delay Enables Precision Focus Through Bubble
- Up to 2 Simultaneous Video Streams
- Local Storage (Micro SD) for Alarm Capture
- Bi-directional Half-Duplex Audio
- Built-in Analytics

The **IEE20 Series extended platform (EP) camera with Sarix™ technology** is a 2.1 megapixel (MPx) network indoor/outdoor rugged fixed dome camera designed with industry-leading image quality and high performance processing power. The **IEE20 Series** is also equipped with a mechanical IR cut filter for superior performance in low-light conditions. Its sturdy metal construction is vandal and tamper resistant and is designed for worry-free use in a wide range of environmental operating conditions.

The **IEE20 Series** is perfect for use in environmental air handling spaces. The back box is plenum rated per 2008 NEC article 300.22(C)(2).

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are considerably smaller making high definition video more affordable.

The **IEE20 Series** can be ordered with or without lenses. All models include a camera in an outdoor enclosure that can be recessed into a ceiling. Accessories are available to allow mounting directly to a surface or in pendant configuration. These cameras accept a wide range of megapixel varifocal CS-mount lenses.

The **IEE20 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The extended platform gives real-time video (30 ips) with HD resolution using H.264 compression for optimized bandwidth and storage efficiency. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

(SHOWN WITH OPTIONAL IE-S SURFACE MOUNT ADAPTER)

- Open IP Standards
- Motion Detection

The **IEE20 Series** is simple to install, and the automatic back focus control feature makes sharp scene focus setup easy with the bubble on or off. A convenient video setup jack eliminates the need to use a laptop for viewing video when installing the camera.

**Pelco® Analytics and ObjectVideo® (OV) Analytic Suites** enhance the flexibility and performance of the IEE20 Series camera. Eight Pelco behaviors are preloaded and included as standard features of the IEE20DN models. Pelco behaviors can be configured and enabled using a standard Web browser, and they are compatible with Endura® or a third-party system that supports Pelco's Analytics API system.

Camera models are also available with preloaded **OV Analytic Suites**. These behaviors can be configured and enabled using a standard Web browser and are compatible with an OV ready-compliant system with an OV Ready™ video management system.

The **IEE20 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

The **IEE20 Series** supports up to four blanked windows. Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. A blanked area will appear on the screen as a solid gray window.

The **IEE20 Series** easily connects to Pelco IP and hybrid systems such as Endura version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an API that enables third-party systems to interface with Pelco's network cameras.

by Schneider Electric

C2971 / REVISED 9-7-10

## PELCO ANALYTICS

The IEE20 Series includes eight user-configurable behaviors. The camera is capable of running up to three behaviors at the same time; although, the number of behaviors is limited to the available processing power of the camera and the type of analytic being used.

**Note:** Available processing power is determined by the settings for compression standards, resolution, image rate, bit rate, and analytic configuration.

For each behavior, you can create several custom profiles that contain different camera settings. With these profiles, you can set up different scenarios for the behavior, which will automatically detect and trigger alarms when specific activity is detected.

Pelco Analytics are configured and enabled using a standard Web browser, and Pelco behaviors are compatible with Endura® or a third-party system that supports Pelco's Analytics API system. Multiple Pelco analytics can be scheduled to work during a certain time or condition. For example, during the day, a camera can be configured with Object Counting to count the number of people that enter a lobby door. At night, the operator can change the profile to Camera Sabotage to trigger an alarm if a camera is moved or obstructed. Each suite includes the following behaviors:

- **Abandoned Object:** Detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows. An airport terminal is a typical installation for this behavior. This behavior can also detect objects left behind at an ATM, signaling possible card skimming.
- **Adaptive Motion:** Detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a user-defined zone. This behavior is primarily used in outdoor environments with light traffic to reduce the number of false alarms caused by environmental changes.
- **Camera Sabotage:** Detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.
- **Directional Motion:** Generates an alarm in a high traffic area when a person or object moves in a specified direction. Typical installations for this behavior include an airport gate or tunnel where cameras can detect objects moving in the opposite direction of the normal flow of traffic or an individual entering through an exit door.
- **Loitering Detection:** Identifies when people or vehicles remain in a defined zone longer than the user-defined time allows. This behavior is effective in real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- **Object Counting:** Counts the number of objects that enter a defined zone or cross a tripwire. This behavior might be used to count the number of people at a store entrance/exit or inside a store where the traffic is light. This behavior is based on tracking and does not count people in a crowded setting.
- **Object Removal:** Triggers an alarm if an object is removed from a defined zone. This behavior is ideal for customers who want to detect the removal of high value objects, such as a painting from a wall or a statue from a pedestal.
- **Stopped Vehicle:** Detects vehicles stopped near a sensitive area longer than the user-defined time allows. This behavior is ideal for airport curbside drop-offs, parking enforcement, suspicious parking, traffic lane breakdowns, and vehicles waiting at gates.

## OBJECTVIDEO (OV) ANALYTIC SUITES

ObjectVideo Analytics Suites are preloaded on selected IEE20 Series cameras and require an OV Ready system to configure the behaviors for alarm notification.

### OV Security Suite

The OV Security Suite is easy to use and includes Tripwire Detection, Inside Area Detection, and Camera Tamper Detection behaviors.

- Tripwire Detection identifies objects that cross a user-defined line drawn within the camera's field of view.
- Inside Area Detection identifies objects entering, appearing, or moving within a user-defined area.
- Camera Tamper Detection identifies significant contrast changes in the camera's field of view; for example, if the lens is obstructed by spray paint, a cloth, or a lens cap.

### OV Security Suite Plus

The OV Security Suite Plus includes the behaviors of the OV Security Suite, plus Multi-Line Tripwire Detection, Loitering Detection, and Leave Behind Detection behaviors.

- Multi-Line Tripwire Detection identifies objects that cross two defined lines and generates an event based on defined parameters, including directionality. Defined parameters for this behavior include direction, sequential order, and time between crossing each tripwire.
- Loitering Detection identifies when people or vehicles remain within a user-defined area beyond a specified period of time. This behavior is effective for real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- Leave Behind Detection detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows.

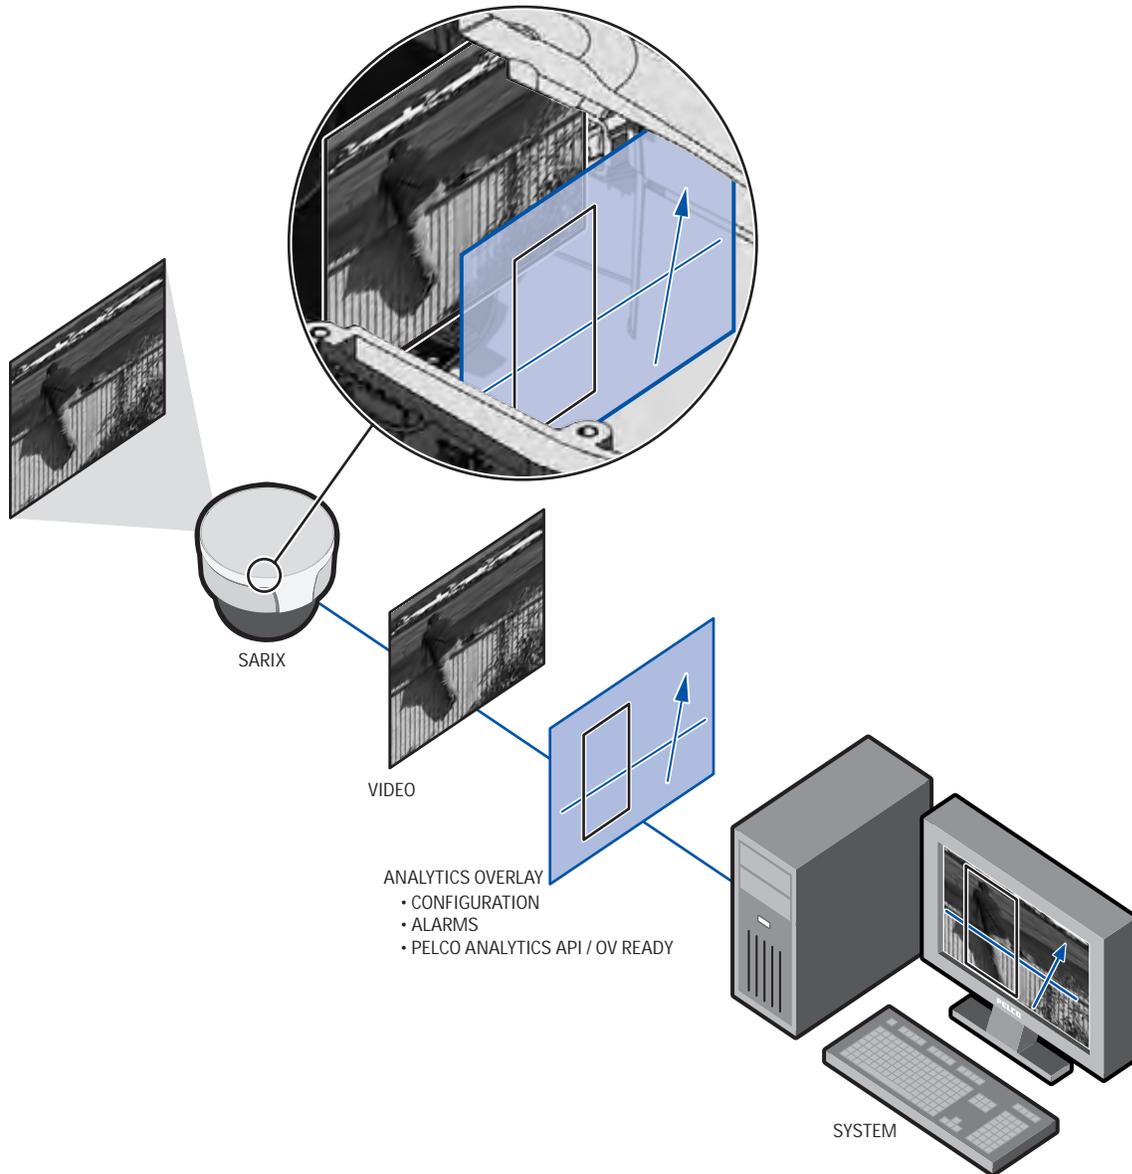

### OV Event Counting Suite

The OV Event Counting Suite uses advanced object calibration and additional features for schedules, parameters, and multiple rules. The suite includes behaviors for Tripwire Counting, Enters/Exits Counting, Loiter Counting, Occupancy Sensing, and Dwell-Time Monitoring.

- Tripwire Counting counts people or objects that cross a user-defined line.
- Enters/Exits Counting calculates the number of people that enter and exit an area without using a tripwire.
- Loiter Counting is useful in analyzing how frequently people stop in front of a product, display, or other area of interest. This feature is also useful in assessing promotion effectiveness and product interest.
- Occupancy Sensing counts people and generates a new value every time the occupancy level changes. Since each occupancy output is time-stamped, the data can be used to determine average occupancy levels or to correlate data to point-of-sale or other business scenarios.
- Dwell-Time Monitoring rules can be set up to record the length of time it takes an object to enter and exit an area. Along with queue size information, wait times can also be assessed. This behavior can be used to evaluate consumer interaction for a point-of-sale display or digital advertisement.

# TECHNICAL SPECIFICATIONS

The following diagram illustrates how the camera system interprets streaming video when embedded analytics are configured and enabled.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

## GENERAL

Imaging Device	1/3-inch (effective)
Imager Type	CMOS
Imager Readout	Progressive scan
Maximum Resolution	1920 x 1080
Signal-to-Noise Ratio	50 dB
Auto Iris Lens Type	DC drive
Electronic Shutter Range	1 ~ 1/100,000 sec
Wide Dynamic Range	60 dB
White Balance Range	2,000° to 10,000°K
Sensitivity	f/1.2; 2850°K; SNR >24 dB
Color (1x/33 ms)	0.5 lux
Color SENS (15x/500 ms)	0.12 lux
Mono (1x/33 ms)	0.25 lux
Mono SENS (15x/500 ms)	0.03 lux
Dome Attenuation	
Clear	Zero light loss
Smoked	f/1.0 light loss
Construction	Cast aluminum body with polycarbonate bubble
Finish	Light gray powder coated
Weight (without lens)	
Unit	3.3 lb (1.5 kg)
Shipping	5.0 lb (2.3 kg)
Available Languages	Chinese, English, French, German, Italian, Portuguese, Russian, Spanish, and Turkish

## ELECTRICAL

Port	RJ-45 connector for 100Base-TX Auto MDI/MDI-X
Cable Type	Cat5 or better for 100Base-TX
Power Input	18 to 30 VAC; 24 VAC nominal or PoE (IEEE 802.3af class 3)
Power Consumption*	<7W; <40 W with heater operation
Current Consumption	
PoE	<140 mA maximum
24 VAC†	<510 mA without heater operation; <2.5 A maximum with heater operation
Local Storage	Micro SD
Alarm Input	10 VDC maximum, 5 mA maximum
Alarm Output	0 to 15 VDC maximum, 75 mA maximum
Service Port	External 3-connector, 2.5 mm provides NTSC/PAL video output
Accessory Port	Connects Pelco accessories
Audio	Bi-directional: half duplex Line level/external microphone input; 600 Ohm differential, 1 Vp-p max signal level
Compression	G.711 PCM 64 kbit/s

\*Does not include optional devices connected to the accessory port

† Required for heater operation

## MECHANICAL

Lens Mount	CS mount, adjustable
Pan/Tilt Adjustment	
Pan	368°
Tilt	160° (10° to 170°)
Rotate	355°

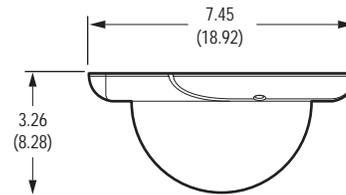

## ENVIRONMENTAL

Operational Temperature	-22° to 122°F (-30° to 50°C); PoE operates between 32° to 122°F (0° to 50°C), 24 VAC power is required for heater operation below 32°F (0°C)
Thermostat Operation	Heater thermostatically controlled to operate below <41°F (<5°C)
Operational Humidity	20% to 80%, noncondensing

## IMPACT RESISTANCE

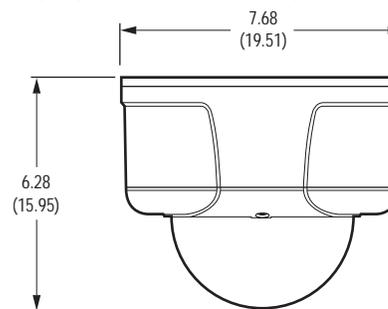

Impact Resistance	IK10++ per EN62262 (70J)

## VIDEO

Video Encoding	H.264 high, main, or base profile and MJPEG
Video Streams	Up to 2 simultaneous streams; the second stream is variable based on the setup of the primary stream
Frame Rate	Up to 30, 25, 24, 15, 12.5, 12, 10, 8, 7.5, 6, 5, 4, 3, 2, 1 (dependent upon coding, resolution, and stream configuration)

Available Resolutions	Resolution				MJPEG		H.264 High Profile	
	MPx	Width	Height	Aspect Ratio	Maximum IPS	Recommended Bit Rate	Maximum IPS	Recommended Bit Rate
	2.1	1920	1080	16:9	30.0 ips	10.0 Mbps	30.0 ips	6.0 Mbps
	1.9	1600	1200	4:3	20.0 ips	10.0 Mbps	20.0 ips	4.0 Mbps
	1.3	1280	1024	5:4	20.0 ips	10.0 Mbps	20.0 ips	3.3 Mbps
	1.2	1280	960	4:3	20.0 ips	10.0 Mbps	20.0 ips	3.0 Mbps
	0.9	1280	720	16:9	30.0 ips	10.0 Mbps	30.0 ips	2.9 Mbps
	0.5	800	600	4:3	30.0 ips	7.7 Mbps	30.0 ips	2.0 Mbps
	0.3	640	480	4:3	30.0 ips	4.9 Mbps	30.0 ips	1.5 Mbps
	0.1	320	240	4:3	30.0 ips	1.2 Mbps	30.0 ips	0.5 Mbps

Additional Resolutions	640 x 512, 640 x 352, 480 x 368, 480 x 272, 320 x 256, and 320 x 176
Supported Protocols	TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)
Users	
Unicast	Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)
Multicast	Unlimited users H.264
Security Access	Password protected
Software Interface	Web browser view and setup, up to 16 cameras
Pelco System Integration	Endura 2.0 (or later) or Digital Sentry 4.2 (or later)
Open IP Integration	Pelco IP camera API
Minimum System Requirements	
Processor	Intel® Core® 2 Duo microprocessor, 2.6 GHz
Operating System	Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)
Memory	2 GB RAM
Network Interface Card	100 megabits (or greater)
Monitor	Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution
Web Browser*	Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer® 8.0 (or later) is recommended for configuring analytics
Media Player†	Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

## ANALYTICS

Required Systems for Pelco Analytics	
Pelco Interface	WS5200 Advanced System Management Software on an Endura 2.0 (or later) system
Open API	Pelco analytics allow streaming information to communicate through Pelco's API Guide for Video Analytics version 0.55.30 (or later), available at <a href="http://Pelco.com/IP">Pelco.com/IP</a>
Required System for Object Video Suites	OV ready-compliant system with OV Ready video management system

\*Internet Explorer is not supported by Mac OS X 10.4.

† This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

# TECHNICAL SPECIFICATIONS

## MODELS

IEE20DN-0	Sarix outdoor fixed dome network camera, extended platform with built-in Pelco Analytics, 2.1 megapixel, day/night, no lens, smoked dome
IEE20DN-1	Sarix outdoor fixed dome network camera, extended platform with built-in Pelco Analytics, 2.1 megapixel, day/night, no lens, clear dome
IEE20DN8-1	Sarix outdoor fixed dome network camera, extended platform with built-in Pelco Analytics, 2.1 megapixel, day/night, 2.8 ~ 8 mm varifocal megapixel lens, clear dome
IEE20DN-OCPO	Sarix outdoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, smoked dome, with built-in OV Event Counting Plus Suite
IEE20DN-OSO	Sarix outdoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, smoked dome, with built-in OV Security Suite
IEE20DN-OSPO	Sarix outdoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, smoked dome, with built-in OV Security Plus Suite
IEE20DN-OCPI	Sarix outdoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, clear dome, with built-in OV Event Counting Plus Suite
IEE20DN-OS1	Sarix outdoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, clear dome, with built-in OV Security Suite
IEE20DN-OSP1	Sarix outdoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, clear dome, with built-in OV Security Plus Suite

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class A
- FCC, Class A
- UL/cUL Listed
- C-Tick
- Meets IP66 standards

## OPTIONAL ACCESSORIES

IX-SC	4-foot service/monitor cable, compatible with any standard monitor BNC connector
POE20U560G	Single port PoE injector

## RECOMMENDED MOUNTS

IE-P	Pendant mount adapter, light gray
IE-S	Surface mount adapter, light gray
SWM-SR, IWM-SR*	Wall mounts, light gray
IWM24-SR*	Wall mount with cable feedthrough; includes integral 24 VAC, 100 VA transformer; light gray finish
PP350*	Parapet mount, gray
PP351*	Rooftop or horizontal surface mount, gray

\*Requires the IE-P pendant mount adapter.

## RECOMMENDED LENSES

13M2.2-6	Megapixel lens, varifocal, 2.2 ~ 6.0 mm, f/1.3 ~ 2.0
13M2.8-8	Megapixel lens, varifocal, 2.8 ~ 8.0 mm, f/1.2 ~ 1.9
13M2.8-12	Megapixel lens, varifocal, 2.8 ~ 12.0 mm, f/1.4 ~ 2.7
13M15-50	Megapixel lens, varifocal, 15.0 ~ 50.0 mm, f/1.5 ~ 2.1

Pelco megapixel lenses have been designed and tested to deliver optimal image quality for the IEE20 Series dome. The use of standard definition lenses on IEE20 Series megapixel cameras will limit the resolution of the camera, creating poor image quality.

Field of View in Degrees		High Resolution Streams (> 800 x 600) Aspect Ratio		
		16:9	4:3	5:4
2.2 mm	Horizontal	109	109	109
	Vertical	63	83	89
2.8 mm	Horizontal	89	89	89
	Vertical	48	66	70
6.0 mm	Horizontal	42	42	42
	Vertical	24	32	34
8.0 mm	Horizontal	32	32	32
	Vertical	18	24	25
12.0 mm	Horizontal	21	21	21
	Vertical	12	16	17
15.0 mm	Horizontal	16	16	16
	Vertical	9	12	13
50.0 mm	Horizontal	5	5	5
	Vertical	3	4	4

**Note:** For 800 x 600 (or lower) resolutions in 4:3 or 5:4 aspect ratios, the field of view is smaller than listed above. Refer to the Installation/Operation manual for details.

# IEE10 Series Sarix™ EP Integrated Rugged Fixed Dome INDOOR/OUTDOOR, NETWORK, 1.3 MEGAPIXEL HIGH DEFINITION DIGITAL CAMERA

## Product Features

- Up to 1.3 Megapixel Resolution (1280 x 1024)
- Up to 30 Images per Second (ips) at 1280 x 720
- Interchangeable CS-Mount Lenses (Optional)
- Auto Back Focus for High Precision Focusing
- H.264 and MJPEG Compression
- Day/Night Capability
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Focus Button with Delay Enables Precision Focus Through Bubble
- Web Viewing, up to 16 Cameras Simultaneously
- Up to 2 Simultaneous Video Streams
- Local Storage (Micro SD) for Alarm Capture
- Bi-directional Half-Duplex Audio

The **IEE10 Series extended platform (EP) camera with Sarix™ technology** is a 1.3 megapixel (MPx) network indoor/outdoor rugged fixed dome camera designed with industry-leading image quality and high performance processing power. Its sturdy metal design is vandal and tamper resistant and is designed for worry-free use in a wide range of environmental operating conditions.

The **IEE10 Series** is perfect for use in environmental air handling spaces. The back box is plenum rated per 2008 NEC article 300.22(C)(2).

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to considerably smaller making high definition video more affordable.

### Fixed Dome Camera

The **IEE10 Series** can be ordered with or without lenses. All models include a camera in an outdoor enclosure that is ready to install. These cameras accept a wide range of megapixel varifocal CS-mount lenses. This day/night model has a mechanical IR cut filter for increased sensitivity in low-light situations.

The **IEE10 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The extended platform gives real-time video (30 ips) with HD resolution at 720p using H.264 compression for optimized bandwidth and storage efficiency. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

(SHOWN WITH OPTIONAL IE-S SURFACE MOUNT ADAPTER)

- Built-in Analytics
- Open IP Standards
- Motion Detection

### Built-In Analytics

**Pelco Analytics** enhance the flexibility and performance of the IEE10 Series camera. Eight Pelco behaviors are preloaded and included as standard features of the IEE10DN models. Pelco behaviors can be configured and enabled using a standard Web browser, and they are compatible with Endura® or a third-party system that supports Pelco's Analytics API system.

Camera models are also available with preloaded **OV Analytic Suites**. These behaviors can be configured and enabled using a standard Web browser and are compatible with an OV ready-compliant system with an OV Ready™ video management system.

### Web Interface

The **IEE10 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IEE10 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **IEE10 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) that enables third-party systems to interface with Pelco's network cameras.

by Schneider Electric

C2974 / REVISED 9-7-10

## PELCO ANALYTICS

The IEE10 Series includes eight user-configurable behaviors. The camera is capable of running up to three behaviors at the same time; although, the number of behaviors is limited to the available processing power of the camera and the type of analytic being used.

**Note:** Available processing power is determined by the settings for compression standards, resolution, image rate, bit rate, and analytic configuration.

For each behavior, you can create several custom profiles that contain different camera settings. With these profiles, you can set up different scenarios for the behavior, which will automatically detect and trigger alarms when specific activity is detected.

Pelco Analytics are configured and enabled using a standard Web browser, and Pelco behaviors are compatible with Endura® or a third-party system that supports Pelco's Analytics API system. Multiple Pelco behaviors can be scheduled to work during a certain time or condition. For example, during the day, a camera can be configured with Object Counting to count the number of people that enter a lobby door. At night, the operator can change the profile to Camera Sabotage to trigger an alarm if a camera is moved or obstructed. Available Pelco behaviors include:

- **Abandoned Object:** Detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows. An airport terminal is a typical installation for this behavior. This behavior can also detect objects left behind at an ATM, signaling possible card skimming.
- **Adaptive Motion:** Detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a user-defined zone. This behavior is primarily used in outdoor environments with light traffic to reduce the number of false alarms caused by environmental changes.
- **Camera Sabotage:** Detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.
- **Directional Motion:** Generates an alarm in a high traffic area when a person or object moves in a specified direction. Typical installations for this behavior include an airport gate or tunnel where cameras can detect objects moving in the opposite direction of the normal flow of traffic or an individual entering through an exit door.
- **Loitering Detection:** Identifies when people or vehicles remain in a defined zone longer than the user-defined time allows. This behavior is effective in real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- **Object Counting:** Counts the number of objects that enter a defined zone or cross a tripwire. This behavior might be used to count the number of people at a store entrance/exit or inside a store where the traffic is light. This behavior is based on tracking and does not count people in a crowded setting.
- **Object Removal:** Triggers an alarm if an object is removed from a defined zone. This behavior is ideal for customers who want to detect the removal of high value objects, such as a painting from a wall or a statue from a pedestal.
- **Stopped Vehicle:** Detects vehicles stopped near a sensitive area longer than the user-defined time allows. This behavior is ideal for airport curbside drop-offs, parking enforcement, suspicious parking, traffic lane breakdowns, and vehicles waiting at gates.

## OBJECTVIDEO (OV) ANALYTIC SUITES

ObjectVideo Analytics Suites are preloaded on selected IEE10 Series cameras and require an OV Ready system to configure the behaviors for alarm notification.

### OV Security Suite

The OV Security Suite is easy to use and includes Tripwire Detection, Inside Area Detection, and Camera Tamper Detection behaviors.

- Tripwire Detection identifies objects that cross a user-defined line drawn within the camera's field of view.
- Inside Area Detection identifies objects entering, appearing, or moving within a user-defined area.
- Camera Tamper Detection identifies significant contrast changes in the camera's field of view; for example, if the lens is obstructed by spray paint, a cloth, or a lens cap.

### OV Security Suite Plus

The OV Security Suite Plus includes the behaviors of the OV Security Suite plus Multi-Line Tripwire Detection, Loitering Detection, and Leave Behind Detection behaviors.

- Multi-Line Tripwire Detection identifies objects that cross two defined lines and generates an event based on defined parameters, including directionality. Defined parameters for this behavior include direction, sequential order, and time between crossing each tripwire.
- Loitering Detection identifies when people or vehicles remain within a user-defined area beyond a specified period of time. This behavior is effective for real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- Leave Behind Detection detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows.

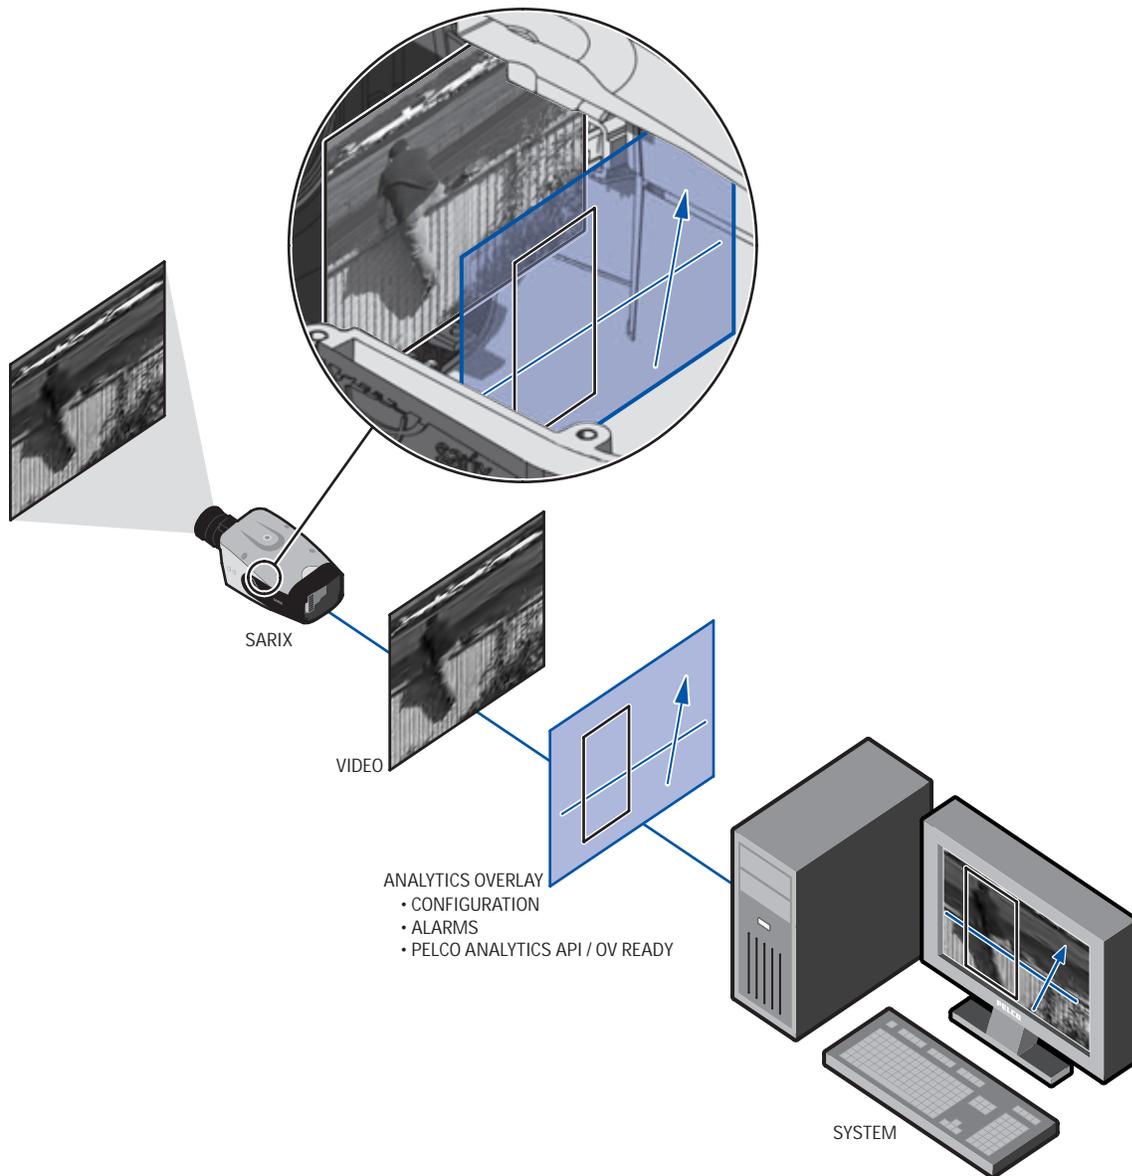

### OV Event Counting Suite

The OV Event Counting Suite uses advanced object calibration and additional features for schedules, parameters, and multiple rules. The suite includes behaviors for Tripwire Counting, Enters/Exits Counting, Loiter Counting, Occupancy Sensing, and Dwell-Time Monitoring.

- Tripwire Counting counts people or objects that cross a user-defined line.
- Enters/Exits Counting calculates the number of people that enter and exit an area without using a tripwire.
- Loiter Counting is useful in analyzing how frequently people stop in front of a product, display, or other area of interest. This feature is also useful in assessing promotion effectiveness and product interest.
- Occupancy Sensing counts people and generates a new value every time the occupancy level changes. Since each occupancy output is time-stamped, the data can be used to determine average occupancy levels or to correlate data to point-of-sale or other business scenarios.
- Dwell-Time Monitoring rules can be set up to record the length of time it takes an object to enter and exit an area. Along with queue size information, wait times can also be assessed. This behavior can be used to evaluate consumer interaction for a point-of-sale display or digital advertisement.

	0.1	320	240	4:3	30.0 ips	1.2 Mbps	30.0 ips	0.5 Mbps

Additional Resolutions 640 x 512, 640 x 352, 480 x 368, 480 x 272, 320 x 256, and 320 x 176

Supported Protocols TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)

### Users

Unicast Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)  
 Multicast Unlimited users H.264

Security Access Password protected

Software Interface Web browser view and setup, up to 16 cameras

Pelco System Integration Endura 2.0 (or later) or Digital Sentry 4.3 (or later)

Open IP Integration Pelco IP camera API

### Minimum System Requirements

Processor Intel® Core® 2 Duo microprocessor, 2.6 GHz

Operating System Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)

Memory 2 GB RAM

Network Interface Card 100 megabits (or greater)

Monitor Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution

Web Browser\* Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer® 8.0 (or later) is recommended for configuring analytics

Media Player† Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

## ANALYTICS

### Required Systems for Pelco Analytics

Pelco Interface WS5200 Advanced System Management Software on an Endura 2.0 (or later) system  
 Open API Pelco analytics allow streaming information to communicate through Pelco's API Guide for Video Analytics version 0.55.30 (or later), available at [Pelco.com/IP](http://Pelco.com/IP)

Required System for Object Video Suites OV ready-compliant system with OV Ready video management system

\*Internet Explorer is not supported by Mac OS X 10.4.

† This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

# TECHNICAL SPECIFICATIONS

## MODELS

IEE10DN-0	Sarix environmental network dome camera, extended platform, 1.3 megapixel, day/night, no lens, smoked dome, with built-in Pelco analytics
IEE10DN-1	Sarix environmental network dome camera, extended platform, 1.3 megapixel, day/night, no lens, clear dome, with built-in Pelco analytics
IEE10DN8-1	Sarix environmental network dome camera, extended platform, 1.3 megapixel, day/night, 2.8 ~ 8 mm varifocal megapixel lens, clear dome, with built-in Pelco analytics
IEE10DN-OC1	Sarix environmental network dome camera, extended platform, 1.3 megapixel, day/night, no lens, clear dome, with built-in OV Event Counting Plus Suite
IEE10DN-OS1	Sarix environmental network dome camera, extended platform, 1.3 megapixel, day/night, no lens, clear dome, with built-in OV Security Suite
IEE10DN-OSP1	Sarix environmental network dome camera, extended platform, 1.3 megapixel, day/night, no lens, clear dome, with built-in OV Security Plus Suite

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class A
- FCC, Class A
- UL/cUL Listed
- C-Tick
- Meets IP66 standards

## OPTIONAL ACCESSORIES

IX-SC	4-foot service/monitor cable, compatible with any standard monitor BNC connector
POE20U560G	Single port PoE injector

## RECOMMENDED MOUNTS

IE-P	Pendant mount adapter, light gray
IE-S	Surface mount adapter, light gray
SWM-SR, IWM-SR*	Wall mounts, light gray
IWM24-SR*	Wall mount with cable feedthrough; includes integral 24 VAC, 100 VA transformer; light gray finish
PP350*	Parapet mount, gray
PP351*	Rooftop or horizontal surface mount, gray

\*Requires the IE-P pendant mount adapter.

## RECOMMENDED LENSES

13M2.2-6	Megapixel lens, varifocal, 2.2 ~ 6.0 mm, f/1.3 ~ 2.0
13M2.8-8	Megapixel lens, varifocal, 2.8 ~ 8.0 mm, f/1.2 ~ 1.9
13M2.8-12	Megapixel lens, varifocal, 2.8 ~ 12.0 mm, f/1.4 ~ 2.7
13M15-50	Megapixel lens, varifocal, 15.0 ~ 50.0 mm, f/1.5 ~ 2.1

Pelco megapixel lenses have been designed and tested to deliver optimal image quality for the IEE10 Series dome. The use of standard definition lenses on IEE10 Series megapixel cameras will limit the resolution of the camera, creating poor image quality.

Field of View in Degrees		High Resolution Streams (> 800 x 600) Aspect Ratio		
		16:9	4:3	5:4
2.2 mm	Horizontal	109	109	109
	Vertical	63	83	89
2.8 mm	Horizontal	89	89	89
	Vertical	48	66	70
6.0 mm	Horizontal	42	42	42
	Vertical	24	32	34
8.0 mm	Horizontal	32	32	32
	Vertical	18	24	25
12.0 mm	Horizontal	21	21	21
	Vertical	12	16	17
15.0 mm	Horizontal	16	16	16
	Vertical	9	12	13
50.0 mm	Horizontal	5	5	5
	Vertical	3	4	4

**Note:** For 800 x 600 (or lower) resolutions in 4:3 or 5:4 aspect ratios, the field of view is smaller than listed above. Refer to the Installation/Operation manual for details.

# IE10 Series Sarix™ Integrated Rugged Fixed Dome

## INDOOR/OUTDOOR, NETWORK, 1.3 MEGAPIXEL HIGH DEFINITION DIGITAL CAMERA

### Product Features

- Open IP Standards
- Up to 1.3 Megapixel Resolution (1280 X 1024)
- Up to 30 Images per Second (ips) at 1280 x 720
- Interchangeable CS-Mount Lenses (Optional)
- Auto Back Focus for High Precision Focusing
- H.264 and MJPEG Compression
- Day/Night Capability
- Video Setup Jack
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Focus Button with Delay Enables Precision Focus Through Bubble
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously

The **IE10 Series with Sarix™ technology** is a 1.3 megapixel (MPx) network indoor/outdoor rugged fixed dome camera designed with industry-leading image quality and high performance processing power. Its sturdy metal design is vandal and tamper resistant and is designed for worry-free use in a wide range of environmental operating conditions.

The **IE10 Series** is perfect for use in environmental air handling spaces. The back box is plenum rated per 2008 NEC article 300.22(C)(2).

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are considerably smaller making high definition video more affordable.

### Fixed Dome Camera

The **IE10 Series** can be ordered in either color or day/night models, with or without lenses installed. All models include advanced low-light technology and a camera in an outdoor enclosure that is ready to install. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations. These cameras accept a wide range of megapixel varifocal CS-mount lenses.

The **IE10 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

(SHOWN WITH OPTIONAL IE-S SURFACE MOUNT ADAPTER)

- Local Storage (Micro SD) for Alarm Capture
- Motion Detection
- Bi-directional Half-Duplex Audio

### Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the IE10 Series. This behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

### Web Interface

The **IE10 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IE10 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **IE10 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) that enables third-party systems to interface with Pelco's network cameras.

C2969 / REVISED 9-7-10

# TECHNICAL SPECIFICATIONS

## GENERAL

Imaging Device	1/3-inch (effective)
Imager Type	CMOS
Imager Readout	Progressive scan
Maximum Resolution	1280 x 1024
Signal-to-Noise Ratio	50 dB
Auto Iris Lens Type	DC drive
Electronic Shutter Range	1 ~ 1/100,000 sec
Wide Dynamic Range	60 dB
White Balance Range	2,000° to 10,000°K
Sensitivity	f/1.2; 2850°K; SNR >24 dB
Color (1x/33 ms)	0.5 lux
Color SENS (15x/500 ms)	0.12 lux
Mono (1x/33 ms)	0.25 lux
Mono SENS (15x/500 ms)	0.03 lux
Dome Attenuation	
Clear	Zero light loss
Smoked	f/1.0 light loss
Construction	Cast aluminum body with polycarbonate bubble
Finish	Light gray powder coated
Weight (without lens)	
Unit	3.3 lb (1.5 kg)
Shipping	5.0 lb (2.3 kg)
Available Languages	Chinese, English, French, German, Italian, Portuguese, Russian, Spanish, and Turkish

## ELECTRICAL

Port	RJ-45 connector for 100Base-TX Auto MDI/MDI-X
Cable Type	Cat5 or better for 100Base-TX
Power Input	18 to 30 VAC; 24 VAC nominal or PoE (IEEE 802.3af class 3)
Power Consumption*	<7W; <40 W with heater operation
Current Consumption	
PoE	<140 mA maximum
24 VAC†	<510 mA without heater operation; <2.5 A maximum with heater operation
Local Storage	Micro SD
Alarm Input	10 VDC maximum, 5 mA maximum
Alarm Output	0 to 15 VDC maximum, 75 mA maximum
Service Port	External 3-connector, 2.5 mm provides NTSC/PAL video output
Accessory Port	Connects Pelco accessories
Audio	Bi-directional: half duplex Line level/external microphone input; 600 Ohm differential, 1 Vp-p max signal level
Compression	G.711 PCM 64 kbit/s

\* Does not include optional devices connected to the accessory port

† Required for heater operation

## MECHANICAL

Lens Mount	CS mount, adjustable
Pan/Tilt Adjustment	
Pan	368°
Tilt	160° (10° to 170°)
Rotate	355°

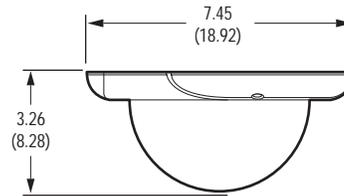

## ENVIRONMENTAL

Operational Temperature	-22° to 122°F (-30° to 50°C); PoE operates between 32° to 122°F (0° to 50°C), 24 VAC power is required for heater operation below 32°F (0°C)
Thermostat Operation	Heater thermostatically controlled to operate below <41°F (<5°C)
Operational Humidity	20% to 80%, noncondensing

## IMPACT RESISTANCE

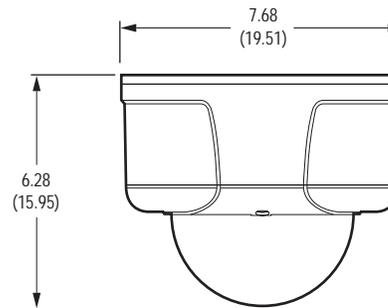

Impact Resistance	IK10++ per EN62262 (70J)
-------------------	--------------------------

### IN-CEILING

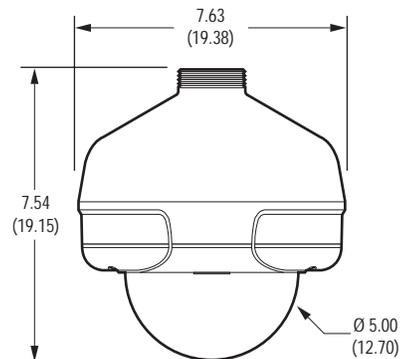

### SURFACE MOUNT

(Mounting Ring Is Available as an Accessory)

### PENDANT

(Mount Is Available as an Accessory)

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS;  
ALL OTHERS ARE INCHES.

# IES0 Series Sarix™ Integrated Rugged Fixed Dome

## INDOOR/OUTDOOR, NETWORK, 0.5 MPX STANDARD DEFINITION DIGITAL CAMERA

### Product Features

- Up to SVGA Resolution (800 x 600)
- Up to 30 Images per Second (ips) at All Resolutions
- Auto Back Focus for High Precision Focusing
- H.264, MPEG4, and MJPEG Compression
- Day/Night Capability
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Focus Button with Delay Enables Precision Focus Through Bubble
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously
- Local Storage (Micro SD) for Alarm Capture
- Motion Detection

The **IES0 Series with Sarix™ technology** is a standard definition network indoor/outdoor rugged fixed dome camera designed with industry-leading image quality and high performance processing power. Its sturdy metal design is vandal and tamper resistant and is designed for worry-free use in a wide range of environmental operating conditions.

The **IES0 Series** is perfect for use in environmental air handling spaces. The back box is plenum rated per 2008 NEC article 300.22(C)(2).

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are considerably smaller making high definition video more affordable.

### Fixed Dome Camera

The **IES0 Series** can be ordered in either color or day/night models, with or without lenses installed. All models include advanced low-light technology and a camera in an outdoor enclosure that is ready to install. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations. These cameras accept a wide range of varifocal CS-mount lenses.

The **IES0 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG, MPEG-4, and H.264 formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

(SHOWN WITH OPTIONAL IE-S SURFACE MOUNT ADAPTER)

Open IP Integration Pelco IP camera API

Minimum System Requirements  
 Processor Intel®, Pentium® 4 microprocessor, 1.6 GHz  
 Operating System Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)  
 Memory 512 MB RAM  
 Network Interface Card 100 megabits (or greater)  
 Monitor Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution  
 Web Browser\* Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer 8.0 (or later) is recommended for configuring analytics  
 Media Player† Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

\*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

# TECHNICAL SPECIFICATIONS

## MODELS

IES0C12-1	Sarix outdoor fixed dome network camera, 0.5 megapixel, color, 2.8 - 12 mm varifocal lens, clear dome
IES0DN12-1	Sarix outdoor fixed dome network camera, 0.5 megapixel, day/night, 2.8 - 12 mm varifocal lens, clear dome
IES0C-0	Sarix outdoor fixed dome network camera, 0.5 megapixel, color, no lens, smoked dome
IES0C-1	Sarix outdoor fixed dome network camera, 0.5 megapixel, color, no lens, clear dome
IES0DN-0	Sarix outdoor fixed dome network camera, 0.5 megapixel, day/night, no lens, smoked dome
IES0DN-1	Sarix outdoor fixed dome network camera, 0.5 megapixel, day/night, no lens, clear dome

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class A
- FCC, Class A
- UL/cUL Listed
- C-Tick
- Meets IP66 standards

## OPTIONAL ACCESSORIES

IX-SC	4-foot service/monitor cable, compatible with any standard monitor BNC connector
POE20U560G	Single port PoE injector

## RECOMMENDED MOUNTS

IE-P	Pendant mount adapter, light gray
IE-S	Surface mount adapter, light gray
SWM-SR, IWM-SR*	Wall mounts, light gray
IWM24-SR*	Wall mount with cable feedthrough; includes integral 24 VAC, 100 VA transformer; light gray finish
PP350*	Parapet mount, gray
PP351*	Rooftop or horizontal surface mount, gray

\*Requires the IE-P pendant mount adapter.

## RECOMMENDED LENSES

13VD2.5-6	Varifocal lens, 2.5 - 6.0 mm, f/1.4 - 2.1
13VD2.8-12	Varifocal lens, 2.8 - 12.0 mm, f/1.4 - 2.9
13VD5-50	Varifocal lens, 5.0 - 50.0 mm, f/1.4 - 2.9

# IX30 Series Sarix™ Network Camera

## 3.1 MEGAPIXEL HIGH DEFINITION DIGITAL CAMERAS

### Product Features

- Open IP Standards
- Up to 3.1 Megapixel Resolution (2048 x 1536)
- Up to 30 Images per Second (ips) at 1280 x 720
- Auto Back Focus
- H.264 and MJPEG Compression Capability
- Color and Day/Night Models
- Video Setup Jack
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously
- Local Storage (Mini SD) for Alarm Capture
- Motion Detection
- Audio Accessory Available

The **IX30 Series with Sarix™ technology** is a 3.1 megapixel (MPx) network camera designed with industry-leading image quality and high performance;ht capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

### Camera

The **IX30 Series** has two 3.1 megapixel models: color and day/night. Both models feature advanced low light technology capabilities. The day/night model has a mechanical IR cut filter for increased sensitivity in low light installations.

The **IX30 Series** can support two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The streams can be configured to a variety of frame rates, bit rates, and GOP (group of pictures) structures for additional bandwidth administration.

The **IX30 Series** is simple to install, and the automatic back focus control feature makes sharp scene focus setup easy. A convenient video setup jack eliminates the need to use a laptop for viewing video when installing the camera.

The **IX30 Series** features built-in Power over Ethernet (PoE) IEEE 802.3af, which supplies power to the camera over the network, eliminating the need for a separate power supply. If PoE is not available, 24 VAC can be used to power the camera.

(LENS NOT SUPPLIED WITH CAMERA)

### Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the IX30 Series. This behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

### Web Interface

The **IX30 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IX30 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Systemization

The **IX30 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.2 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) for interfacing with Pelco's network cameras

Supported Protocols TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)

Users  
 Unicast Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)  
 Multicast Unlimited users H.264

Security Access Password protected

Software Interface Web browser view and setup, up to 16 cameras

Pelco System Integration Endura 2.0 (or later) or Digital Sentry 4.2 (or later)

Open IP Integration Pelco IP camera API

### Minimum System Requirements

Processor Intel® Pentium® 4 microprocessor, 1.6 GHz  
 Operating System Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)  
 Memory 512 MB RAM  
 Network Interface Card 100 megabits (or greater)  
 Monitor Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution  
 Web Browser\* Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer® 8.0 (or later) is recommended for configuring analytics  
 Media Player† Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

\*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

# TECHNICAL SPECIFICATIONS

## MODELS

IX30C	Sarix 3.1 megapixel network color camera
IX30DN	Sarix 3.1 megapixel network day/night camera

## CERTIFICATIONS

- CE, Class B
- FCC, Class B
- UL/cUL Listed
- C-Tick

## ACCESSORIES

IX-SC	4-foot Sarix service cable; compatible with standard BNC connectors
IA-A	Audio accessory; supplied with two USB extension cables: 1 ft (0.3 m) and 3 ft (0.9 m)

## RECOMMENDED MOUNTS

C10-UM	Universal camera mount
--------	------------------------

## RECOMMENDED ENCLOSURES

EH1512	Indoor/outdoor enclosure
EH3512	Outdoor enclosure
DF8	8-inch fixed mount dome

## RECOMMENDED LENSES

13M2.2-6	Megapixel lens, varifocal, 2.2 - 6.0 mm, f/1.3 - 2.0
13M2.8-8	Megapixel lens, varifocal, 2.8 - 8.0 mm, f/1.2 - 1.9
13M2.8-12	Megapixel lens, varifocal, 2.8 - 12.0 mm, f/1.4 - 2.7
13M15-50	Megapixel lens, varifocal, 15.0 - 50.0 mm, f/1.5 - 2.1

Pelco lenses have been designed and tested to deliver optimal image quality for the IX30 Series camera. The use of standard definition lenses on IX30 Series megapixel camera will limit the resolution of the camera, creating poor image quality.

Field of View in Degrees		Aspect Ratio		
		16:9	4:3	5:4
2.2 mm	Horizontal	109	109	109
	Vertical	63	83	89

# IXE20 Series Sarix™ EP Network Camera

## 2.1 MEGAPIXEL EXTENDED PLATFORM HIGH DEFINITION DIGITAL CAMERAS

### Product Features

- Open IP Standards
- Up to 2.1 Megapixel Resolution (1920 x 1080)
- Up to 30 Images per Second (ips) at 1920 x 1080
- Auto Back Focus
- H.264 and MJPEG Compression Capability
- Color and Day/Night Models
- Video Setup Jack
- Sensitivity Down to 0.03 Lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Up to 2 Simultaneous Video Streams
- Built-in Analytics
- Local Storage (Mini SD) for Alarm Capture

The **IXE20 Series extended platform (EP) camera with Sarix™ technology** is a 2.1 megapixel (MPx) network camera designed with industry-leading image quality and high performance processing power. Designed to install quickly, the camera includes automatic back focus control, built-in analytics, and other advanced features needed for demanding security applications.

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

### Camera

The **IXE20 Series** has two 2.1 megapixel models: color and day/night. Both models feature advanced low-light technology capabilities. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations.

The **IXE20 Series** can support two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The extended platform gives real-time video (30 ips) with HD resolution using H.264 compression for optimized bandwidth and storage efficiency. The streams can be configured to a variety of frame rates, bit rates, and GOP (group of pictures) structures for additional bandwidth administration.

- Motion Detection
- Audio Accessory Available

### Built-in Analytics

**Pelco Analytics** enhance the flexibility and performance of the IXE20 Series camera. Eight Pelco behaviors are preloaded and included as standard features of the IXE20C and IXE20DN models. Pelco behaviors can be configured and enabled using a standard Web browser, and they are compatible with Endura® or a third-party system that supports Pelco's Analytics API system.

Camera models are also available with preloaded **OV Analytic Suites**. These behaviors can be configured and enabled using a standard Web browser and are compatible with an OV ready-compliant system with an OV Ready™ video management system.

### Web Interface

The **IXE20 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IXE20 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **IXE20 Series** easily connects to Pelco IP and hybrid systems such as Endura version 2.0 (or later) and Digital Sentry® version 4.2 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an API for interfacing with Pelco's network cameras.

by Schneider Electric

C2955 / REVISED 8-25-10

## PELCO ANALYTICS

The IXE20 series includes eight user-configurable behaviors. The camera is capable of running up to three behaviors at the same time; although, the number of behaviors is limited to the available processing power of the camera and the type of analytic being used.

**Note:** Available processing power is determined by the settings for compression standards, resolution, image rate, bit rate, and analytic configuration.

For each behavior, you can create several custom profiles that contain different camera settings. With these profiles, you can set up different scenarios for the behavior, which will automatically detect and trigger alarms when specific activity is detected.

Pelco Analytics are configured and enabled using a standard Web browser, and Pelco behaviors are compatible with Endura® or a third-party system that supports Pelco's Analytics API system. Multiple Pelco behaviors can be scheduled to work during a certain time or condition. For example, during the day, a camera can be configured with Object Counting to count the number of people that enter a lobby door. At night, the operator can change the profile to Camera Sabotage to trigger an alarm if a camera is moved or obstructed. Available Pelco behaviors include:

- **Abandoned Object:** Detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows. An airport terminal is a typical installation for this behavior. This behavior can also detect objects left behind at an ATM, signaling possible card skimming.
- **Adaptive Motion:** Detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a user-defined zone. This behavior is primarily used in outdoor environments with light traffic to reduce the number of false alarms caused by environmental changes.
- **Camera Sabotage:** Detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.
- **Directional Motion:** Generates an alarm in a high traffic area when a person or object moves in a specified direction. Typical installations for this behavior include an airport gate or tunnel where cameras can detect objects moving in the opposite direction of the normal flow of traffic or an individual entering through an exit door.
- **Loitering Detection:** Identifies when people or vehicles remain in a defined zone longer than the user-defined time allows. This behavior is effective in real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- **Object Counting:** Counts the number of objects that enter a defined zone or cross a tripwire. This behavior might be used to count the number of people at a store entrance/exit or inside a store where the traffic is light. This behavior is based on tracking and does not count people in a crowded setting.
- **Object Removal:** Triggers an alarm if an object is removed from a defined zone. This behavior is ideal for customers who want to detect the removal of high value objects, such as a painting from a wall or a statue from a pedestal.
- **Stopped Vehicle:** Detects vehicles stopped near a sensitive area longer than the user-defined time allows. This behavior is ideal for airport curbside drop-offs, parking enforcement, suspicious parking, traffic lane breakdowns, and vehicles waiting at gates.

## OBJECTVIDEO (OV) ANALYTIC SUITES

ObjectVideo Analytics Suites are preloaded on selected IXE20 Series cameras and require an OV Ready system to configure the behaviors for alarm notification.

### OV Security Suite

The OV Security Suite is easy to use and includes Tripwire Detection, Inside Area Detection, and Camera Tamper Detection behaviors.

- Tripwire Detection identifies objects that cross a user-defined line drawn within the camera's field of view.
- Inside Area Detection identifies objects entering, appearing, or moving within a user-defined area.
- Camera Tamper Detection identifies significant contrast changes in the camera's field of view; for example, if the lens is obstructed by spray paint, a cloth, or a lens cap.

### OV Security Suite Plus

The OV Security Suite Plus includes the behaviors of the OV Security Suite plus Multi-Line Tripwire Detection, Loitering Detection, and Leave Behind Detection behaviors.

- Multi-Line Tripwire Detection identifies objects that cross two defined lines and generates an event based on defined parameters, including directionality. Defined parameters for this behavior include direction, sequential order, and time between crossing each tripwire.
- Loitering Detection identifies when people or vehicles remain within a user-defined area beyond a specified period of time. This behavior is effective for real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- Leave Behind Detection detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows.

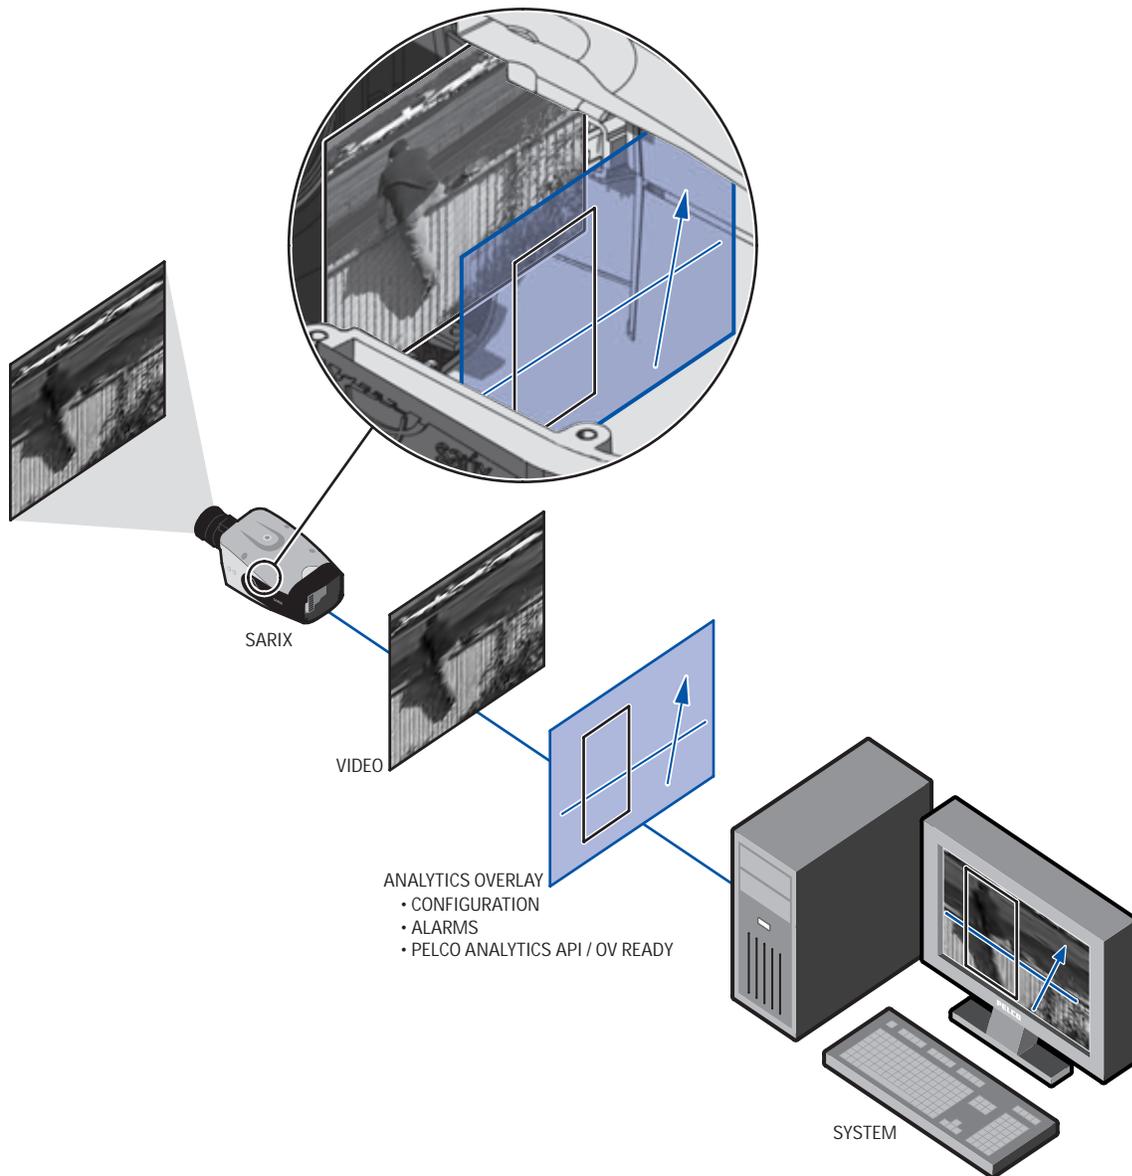

### OV Event Counting Suite

The OV Event Counting Suite uses advanced object calibration and additional features for schedules, parameters, and multiple rules. The suite includes behaviors for Tripwire Counting, Enters/Exits Counting, Loiter Counting, Occupancy Sensing, and Dwell-Time Monitoring.

- Tripwire Counting counts people or objects that cross a user-defined line.
- Enters/Exits Counting calculates the number of people that enter and exit an area without using a tripwire.
- Loiter Counting is useful in analyzing how frequently people stop in front of a product, display, or other area of interest. This feature is also useful in assessing promotion effectiveness and product interest.
- Occupancy Sensing counts people and generates a new value every time the occupancy level changes. Since each occupancy output is time-stamped, the data can be used to determine average occupancy levels or to correlate data to point-of-sale or other business scenarios.
- Dwell-Time Monitoring rules can be set up to record the length of time it takes an object to enter and exit an area. Along with queue size information, wait times can also be assessed. This behavior can be used to evaluate consumer interaction for a point-of-sale display or digital advertisement.

# TECHNICAL SPECIFICATIONS

The following diagram illustrates how the camera system interprets streaming video when embedded analytics are configured and enabled.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

Memory	2 GB RAM
Network Interface Card	100 megabits (or greater)
Monitor	Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution
Web Browser*	Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer® 8.0 (or later) is recommended for configuring analytics
Media Player†	Pelco's Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

\*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

## ANALYTICS

Required Systems for Pelco Analytics	
Pelco Interface	WS5200 Advanced System Management Software on an Endura 2.0 (or later) system
Open API	Pelco analytics allow streaming information to communicate through Pelco's API Guide for Video Analytics version 0.55.30 (or later), available at <a href="http://Pelco.com/IP">Pelco.com/IP</a>
Required System for Object Video Suites	OV ready-compliant system with OV Ready video management system

# TECHNICAL SPECIFICATIONS

## MODELS

IXE20C	Sarix 2.1 megapixel EP network color camera with built-in Pelco Analytics
IXE20DN	Sarix 2.1 megapixel EP network day/night camera with built-in Pelco Analytics
IXE20C-OS	Sarix 2.1 megapixel EP network color camera with built-in OV Security Suite
IXE20DN-OS	Sarix 2.1 megapixel EP network day/night camera with built-in OV Security Suite
IXE20C-OSP	Sarix 2.1 megapixel EP network color camera with built-in OV Security Suite Plus
IXE20DN-OSP	Sarix 2.1 megapixel EP network day/night camera with built-in OV Security Suite Plus
IXE20C-OCF	Sarix 2.1 megapixel EP network color camera with built-in OV Event Counting Suite
IXE20DN-OCF	Sarix 2.1 megapixel EP network day/night camera with built-in OV Event Counting Suite

## CERTIFICATIONS

- CE, Class B
- FCC, Class B
- UL/cUL Listed
- C-Tick

## ACCESSORIES

IX-SC	4-foot Sarix service cable; compatible with standard BNC connectors
IA-A	Audio adapter compatible with a USB 2.0 A to 5-pin mini-B cable; supplied with two USB extension cables: 1 ft (0.3 m) and 3 ft (0.9 m)

## RECOMMENDED MOUNTS

C10-UM	Universal camera mount
--------	------------------------

## RECOMMENDED ENCLOSURES

EH1512	Indoor/outdoor enclosure
EH3512	Outdoor enclosure
DF8	8-inch fixed mount dome

## RECOMMENDED LENSES

13M2.2-6	Megapixel lens, varifocal, 2.2 - 6.0 mm, f/1.3 - 2.0
13M2.8-8	Megapixel lens, varifocal, 2.8 - 8.0 mm, f/1.2 - 1.9
13M2.8-12	Megapixel lens, varifocal, 2.8 - 12.0 mm, f/1.4 - 2.7
13M15-50	Megapixel lens, varifocal, 15.0 - 50.0 mm, f/1.5 - 2.1

Pelco megapixel lenses have been designed and tested to deliver optimal image quality for the IXE20 Series camera. The use of standard definition lenses on IXE20 Series megapixel cameras will limit the resolution of the camera, creating poor image quality.

Field of View in Degrees		Aspect Ratio		
		16:9	4:3	5:4
2.2 mm	Horizontal	109	109	109
	Vertical	63	83	89
2.8 mm	Horizontal	89	89	89
	Vertical	48	66	70
6.0 mm	Horizontal	42	42	42
	Vertical	24	32	34
8.0 mm	Horizontal	32	32	32
	Vertical	18	24	25
12.0 mm	Horizontal	21	21	21
	Vertical	12	16	17
15.0 mm	Horizontal	16	16	16
	Vertical	9	12	13
50.0 mm	Horizontal	5	5	5
	Vertical	3	4	4

**Note:** For 800 x 600 (or lower) resolutions in 4:3 or 5:4 aspect ratios, the field of view is smaller than listed above. Refer to the Installation/Operation manual for details.

# IXE10 Series Sarix™ EP Network Camera

## 1.3 MEGAPIXEL EXTENDED PLATFORM HIGH DEFINITION DIGITAL CAMERAS

### Product Features

- Open IP Standards
- Up to 1.3 Megapixel Resolution (1280 x 1024)
- Up to 30 Images per Second (ips) at 1280 x 720
- Auto Back Focus
- H.264 and MJPEG Compression Capability
- Color and Day/Night Models
- Video Setup Jack
- Sensitivity Down to 0.03 Lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Up to 2 Simultaneous Video Streams
- Built-In Analytics
- Local Storage (Mini SD) for Alarm Capture

The **IXE10 Series extended platform (EP) camera with Sarix™ technology** is a 1.3 megapixel (MPx) network camera designed with industry-leading image quality and high performance processing power. Designed to install quickly, the camera includes automatic back focus control, built-in analytics, and other advanced features needed for demanding security applications.

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

### Camera

The **IXE10 Series** has two 1.3 megapixel models: color and day/night. Both models feature advanced low-light technology capabilities. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations.

The **IXE10 Series** can support two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The extended platform gives real time video (30 ips) with HD resolution using H.264 compression for optimized bandwidth and storage efficiency. The streams can be configured to a variety of frame rates, bit rates, and GOP (group of pictures) structures for additional bandwidth administration.

(LENS NOT SUPPLIED WITH CAMERA)

- Motion Detection
- Audio Accessory Available

### Built-In Analytics

**Pelco Analytics** enhance the flexibility and performance of the IXE10 Series camera. Eight Pelco behaviors are preloaded and included as standard features of the IXE10C and IXE10DN models. Pelco behaviors can be configured and enabled using a standard Web browser, and they are compatible with Endura® or a third-party system that supports Pelco's Analytics API system.

Camera models are also available with preloaded **OV Analytic Suites**. These behaviors can be configured and enabled using a standard Web browser and are compatible with an OV-ready compliant system with an OV Ready™ video management system.

### Web Interface

The **IXE10 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IXE10 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **IXE10 Series** easily connects to Pelco IP and hybrid systems such as Endura version 2.0 (or later) and Digital Sentry® version 4.2 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) for interfacing with Pelco's network cameras.

## PELCO ANALYTICS

The IXE10 Series includes eight user-configurable behaviors. The camera is capable of running up to three behaviors at the same time; although, the number of behaviors is limited to the available processing power of the camera and the type of analytic being used.

**Note:** Available processing power is determined by the settings for compression standards, resolution, image rate, bit rate, and analytic configuration.

For each behavior, you can create several custom profiles that contain different camera settings. With these profiles, you can set up different scenarios for the behavior, which will automatically detect and trigger alarms when specific activity is detected.

Pelco Analytics are configured and enabled using a standard Web browser, and Pelco behaviors are compatible with Endura® or a third-party system that supports Pelco's Analytics API system. Multiple Pelco behaviors can be scheduled to work during a certain time or condition. For example, during the day, a camera can be configured with Object Counting to count the number of people that enter a lobby door. At night, the operator can change the profile to Camera Sabotage to trigger an alarm if a camera is moved or obstructed. Available Pelco behaviors include:

- **Abandoned Object:** Detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows. An airport terminal is a typical installation for this behavior. This behavior can also detect objects left behind at an ATM, signaling possible card skimming.
- **Adaptive Motion:** Detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a user-defined zone. This behavior is primarily used in outdoor environments with light traffic to reduce the number of false alarms caused by environmental changes.
- **Camera Sabotage:** Detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.
- **Directional Motion:** Generates an alarm in a high traffic area when a person or object moves in a specified direction. Typical installations for this behavior include an airport gate or tunnel where cameras can detect objects moving in the opposite direction of the normal flow of traffic or an individual entering through an exit door.
- **Loitering Detection:** Identifies when people or vehicles remain in a defined zone longer than the user-defined time allows. This behavior is effective in real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- **Object Counting:** Counts the number of objects that enter a defined zone or cross a tripwire. This behavior might be used to count the number of people at a store entrance/exit or inside a store where the traffic is light. This behavior is based on tracking and does not count people in a crowded setting.
- **Object Removal:** Triggers an alarm if an object is removed from a defined zone. This behavior is ideal for customers who want to detect the removal of high value objects, such as a painting from a wall or a statue from a pedestal.
- **Stopped Vehicle:** Detects vehicles stopped near a sensitive area longer than the user-defined time allows. This behavior is ideal for airport curbside drop-offs, parking enforcement, suspicious parking, traffic lane breakdowns, and vehicles waiting at gates.

## OBJECTVIDEO (OV) ANALYTIC SUITES

ObjectVideo Analytics Suites are preloaded on selected IXE10 Series cameras and require an OV Ready system to configure the behaviors for alarm notification.

### OV Security Suite

The OV Security Suite is easy to use and includes Tripwire Detection, Inside Area Detection, and Camera Tamper Detection behaviors.

- Tripwire Detection identifies objects that cross a user-defined line drawn within the camera's field of view.
- Inside Area Detection identifies objects entering, appearing, or moving within a user-defined area.
- Camera Tamper Detection identifies significant contrast changes in the camera's field of view; for example, if the lens is obstructed by spray paint, a cloth, or a lens cap.

### OV Security Suite Plus

The OV Security Suite Plus includes the behaviors of the OV Security Suite plus Multi-Line Tripwire Detection, Loitering Detection, and Leave Behind Detection behaviors.

- Multi-Line Tripwire Detection identifies objects that cross two defined lines and generates an event based on defined parameters, including directionality. Defined parameters for this behavior include direction, sequential order, and time between crossing each tripwire.
- Loitering Detection identifies when people or vehicles remain within a user-defined area beyond a specified period of time. This behavior is effective for real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- Leave Behind Detection detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows.

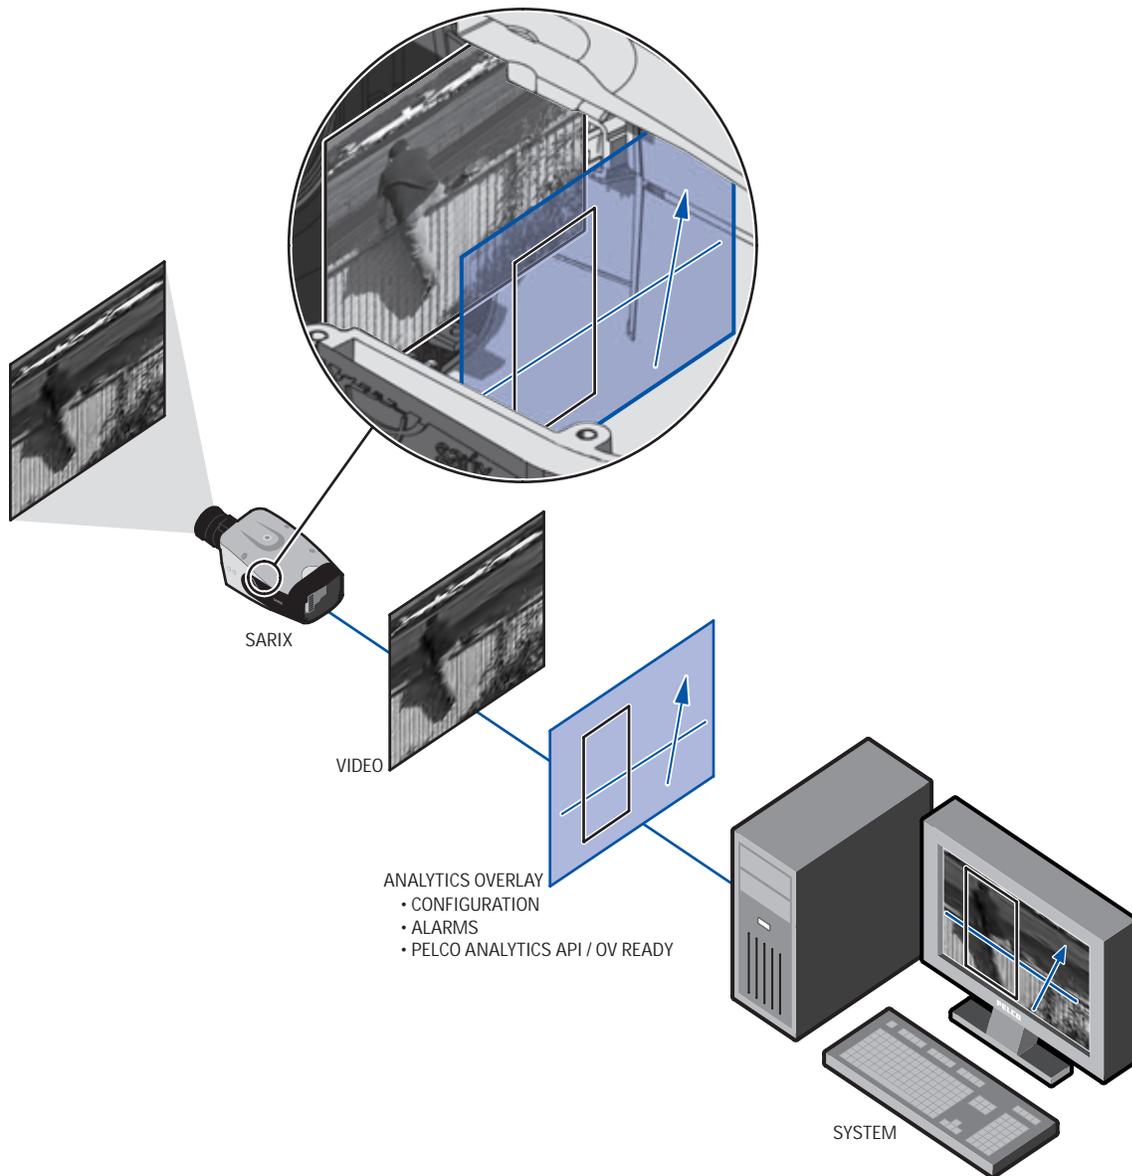

### OV Event Counting Suite

The OV Event Counting Suite uses advanced object calibration and additional features for schedules, parameters, and multiple rules. The suite includes behaviors for Tripwire Counting, Enters/Exits Counting, Loiter Counting, Occupancy Sensing, and Dwell-Time Monitoring.

- Tripwire Counting counts people or objects that cross a user-defined line.
- Enters/Exits Counting calculates the number of people that enter and exit an area without using a tripwire.
- Loiter Counting is useful in analyzing how frequently people stop in front of a product, display, or other area of interest. This feature is also useful in assessing promotion effectiveness and product interest.
- Occupancy Sensing counts people and generates a new value every time the occupancy level changes. Since each occupancy output is time-stamped, the data can be used to determine average occupancy levels or to correlate data to point-of-sale or other business scenarios.
- Dwell-Time Monitoring rules can be set up to record the length of time it takes an object to enter and exit an area. Along with queue size information, wait times can also be assessed. This behavior can be used to evaluate consumer interaction for a point-of-sale display or digital advertisement.

# TECHNICAL SPECIFICATIONS

The following diagram illustrates how the camera system interprets streaming video when embedded analytics are configured and enabled.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements

# TECHNICAL SPECIFICATIONS

## GENERAL

Imaging Device	1/3-inch (effective)
Imager Type	CMOS
Imager Readout	Progressive scan
Maximum Resolution	1280 x 1024
Signal-to-Noise Ratio	50 dB
Auto Iris Lens Type	DC drive
Electronic Shutter Range	1 ~ 1/100,000 sec
Wide Dynamic Range	60 dB
White Balance Range	2,000° to 10,000°K
Sensitivity	f/1.2; 2,850°K; SNR >24 dB
Color (33 ms)	0.50 lux
Color SENS (500 ms)	0.12 lux
Mono (33 ms)	0.25 lux
Mono SENS (500 ms)	0.03 lux
Weight (without lens)	1.14 lb (0.51 kg)
Shipping Weight	2.00 lb (0.90 kg)

## ELECTRICAL

Port	RJ-45 connector for 100Base-TX Auto MDI/MDI-X
Cabling Type	Cat5 or better for 100Base-TX
Power Input	22 to 34 VAC; 24 VAC nominal or PoE (IEEE 802.3af class 3)
Power Consumption	< 7 W
Current Consumption	
PoE	< 200 mA maximum
24 VAC	< 295 mA nominal; < 390 mA maximum
Local Storage	Mini SD
Alarm Input	10 VDC maximum, 5 mA maximum
Alarm Output	0 to 15 VDC maximum, 75 mA maximum
Service Port	External 3-connector, 2.5 mm provides NTSC/PAL video output.

## MECHANICAL

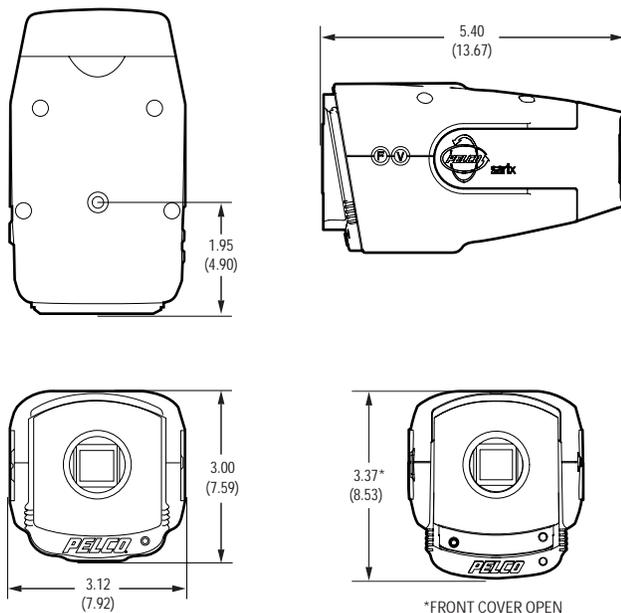

Lens Mount	CS mount, adjustable
Camera Mount	0.25-inch (0.64 cm) UNC-20 screw, top and bottom of camera housing

## ENVIRONMENTAL

# IX10 Series Sarix™ Network Camera

## 1.3 MEGAPIXEL HIGH DEFINITION DIGITAL CAMERAS

### Product Features

- Open IP Standards
- Up to 1.3 Megapixel Resolution (1280 x 1024)
- Up to 30 Images per Second (ips) at 1280 x 720
- Auto Back Focus
- H.264 and MJPEG Compression Capability
- Color and Day/Night Models
- Video Setup Jack
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously
- Local Storage (Mini SD) for Alarm Capture

The **IX10 Series with Sarix™ technology** is a 1.3 megapixel (MPx) network camera designed with industry-leading image quality and high performance processing power. Designed to install quickly, the camera comes equipped with the advanced features needed for demanding security applications.

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

### Camera

The **IX10 Series** has two 1.3 megapixel models: color and day/night. Both models feature advanced low light technology capabilities. The day/night model has a mechanical IR cut filter for increased sensitivity in low light installations.

The **IX10 Series** can support two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The streams can be configured to a variety of frame rates, bit rates, and GOP (group of pictures) structures for additional bandwidth administration.

The **IX10 Series** is simple to install, and the automatic back focus control feature makes sharp scene focus setup easy. A convenient video setup jack eliminates the need to use a laptop for viewing video when installing the camera.

(LENS NOT SUPPLIED WITH CAMERA)

- Motion Detection
- Audio Accessory Available

The **Sarix IX10 Series** features built-in Power over Ethernet (PoE) IEEE 802.3af, which supplies power to the camera over the network, eliminating the need for a separate power supply. If PoE is not available, 24 VAC can be used to power the camera.

### Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the IX10 Series. This behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

### Web Interface

The **IX10 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IX10 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Systemization

The **IX10 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.2 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) for interfacing with Pelco's network cameras

0.1	320	240	4:3	30.0 ips	0.9 Mbps	30.0 ips	0.4 Mbps

Additional Resolutions 640 x 512, 640 x 352, 480 x 368, 480 x 272, 320 x 256, and 320 x 176

Supported Protocols TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)

Users  
 Unicast Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)  
 Multicast Unlimited users H.264

Security Access Password protected

Software Interface Web browser view and setup, up to 16 cameras

Pelco System Integration Endura 2.0 (or later)  
 Digital Sentry 4.2 (or later)

Open IP Integration Pelco IP camera API

### Minimum System Requirements

Processor Intel® Pentium® 4 microprocessor, 1.6 GHz  
 Operating System Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)  
 Memory 512 MB RAM  
 Network Interface Card 100 megabits (or greater)  
 Monitor Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution  
 Web Browser\* Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer® 8.0 (or later) is recommended for configuring analytics  
 Media Player† Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

\*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

# IXS0 Series Sarix™ Network Camera

## 0.5 MEGAPIXEL STANDARD DEFINITION DIGITAL CAMERAS

### Product Features

- Open IP Standards
- Up to SVGA Resolution (800 x 600)
- Up to 30 Images per Second (ips) at All Resolutions
- Auto Back Focus
- H.264, MJPEG, and MPEG-4 Compression Capability
- Color and Day/Night Models
- Video Setup Jack
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously
- Local Storage (Mini SD) for Alarm Capture

The **IXS0 Series with Sarix™ technology** is a standard definition network camera designed with industry-leading image quality and high performance processing power. Designed to install quickly, the camera comes equipped with the advanced features needed for demanding security applications.

**Sarix** technology defines the next generation of video security imaging performance, delivering high resolution, advanced lowlight capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making network video storage more affordable.

### Camera

The **IXS0 Series** has two standard definition models: color and day/night. Both models feature advanced low light technology capabilities. The day/night model has a mechanical IR cut filter for increased sensitivity in low light installations.

The **IXS0 Series** can support two simultaneous video streams. The two streams can be compressed in MJPEG, MPEG-4, and H.264 formats across several resolution configurations. The streams can be configured to a variety of frame rates, bit rates, and GOP (group of pictures) structures for additional bandwidth administration.

The **IXS0 Series** is simple to install, and the automatic back focus control feature makes sharp scene focus setup easy. A convenient video setup jack eliminates the need to use a laptop for viewing video when installing the camera.

The **IXS0 Series** features built-in Power over Ethernet (PoE) IEEE 802.3af, which supplies power to the camera over the network,

- Motion Detection
- Audio Accessory Available

eliminating the need for a separate power supply. If PoE is not available, 24 VAC can be used to power the camera.

### Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the IXS0 Series. The behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

### Web Interface

The **IXS0 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IXS0 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Systemization

The **IXS0 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 1.5 (or later), MPEG-4; Endura version 2.0 (or later), H.264; Digital Sentry® version 4.2 (or later); DX8100 version 2.0 (or later); and DVR5100 version 1.5.4 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) for interfacing to Pelco's network cameras.

# ID30 Series Sarix™ Network Indoor Fixed Dome

## 3.1 MEGAPIXEL HIGH DEFINITION INTEGRATED CAMERA

### Product Features

- Up to 3.1 Megapixel Resolution (2048 x 1536)
- Up to 30 Images per Second (ips) at 1280 x 720
- Optional CS-Mount Lenses
- Auto Back Focus for High Precision Focusing
- Easy, Quick, One-Handed Installation
- H.264 and MJPEG Compression
- Day/Night Capability
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Video Setup Jack and Focus Button Accessible with Dome Closed
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously
- Local Storage (Micro SD) for Alarm Capture

- Open IP Standards
- Motion Detection
- Audio Accessory Available

The **ID30 Series with Sarix™ technology** is a 3.1 megapixel (MPx) network indoor fixed dome camera designed with industry-leading image quality and high performance processing power. Designed to install quickly and easily, all of the post back-box installation and setup can be done with one hand.

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

### Fixed Dome Camera

The **ID30 Series** can be ordered with or without lenses. All models include advance low-light technology and a camera in an indoor enclosure that is ready to install. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations. These cameras accept a wide range of megapixel varifocal CS-mount lenses.

The **ID30 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

### Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the ID30 Series. This behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

### Web Interface

The **ID30 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **ID30 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **ID30 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) that enables third-party systems to interface with Pelco's network cameras.

13M2.8-12	Megapixel lens, varifocal, 2.8 – 12.0 mm, f/1.4 – 2.7
13M15-50	Megapixel lens, varifocal, 15.0 – 50.0 mm, f/1.5 – 2.1

Pelco lenses have been designed and tested to deliver optimal image quality for the ID30 Series megapixel camera. The use of standard definition lenses on the ID30 Series will limit the resolution of the camera, creating poor image quality.

Field of View in Degrees		Aspect Ratio		
		16:9	4:3	5:4
2.2 mm	Horizontal	109	109	109
	Vertical	63	83	89
2.8 mm	Horizontal	89	89	89
	Vertical	48	66	70
6.0 mm	Horizontal	42	42	42
	Vertical	24	32	34
8.0 mm	Horizontal	32	32	32
	Vertical	18	24	25
12.0 mm	Horizontal	21	21	21
	Vertical	12	16	17
15.0 mm	Horizontal	16	16	16
	Vertical	9	12	13
50.0 mm	Horizontal	5	5	5
	Vertical	3	4	4

**Note:** For 800 x 600 (or lower) resolutions in 4:3 or 5:4 aspect ratios, the field of view is smaller than listed above. Refer to the Installation/Operation manual for details.

# IDE20 Series Sarix™ EP Network Indoor Fixed Dome

## 2.1 MEGAPIXEL EXTENDED PLATFORM HIGH DEFINITION INTEGRATED CAMERA

### Product Features

- Up to 2.1 Megapixel Resolution (1920 x 1080)
- Up to 30 Images per Second (ips) at 1920 x 1080
- Optional CS-Mount Lenses
- Auto Back Focus for High Precision Focusing
- Easy, Quick, One-Handed Installation
- H.264 and MJPEG Compression
- Day/Night Capability
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Video Setup Jack and Focus Button Accessible with Dome Closed
- Up to 2 Simultaneous Video Streams
- Built-in Analytics

The **IDE20 Series extended platform (EP) camera with Sarix™ technology** is a 2.1 megapixel (MPx) network indoor fixed dome camera designed with industry-leading image quality and high performance processing power. Designed to install quickly and easily, all of the post back-box installation and setup can be done with one hand.

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

### Fixed Dome Camera

The **IDE20 Series** can be ordered with or without lenses. All models include advanced low-light technology and a camera in an indoor enclosure that is ready to install. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations. These cameras accept a wide range of megapixel varifocal CS-mount lenses.

The **IDE20 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The extended platform gives real-time video (30 ips) with full HD resolution using H.264 compression for optimized bandwidth and storage efficiency. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

The **IDE20 Series** is simple to install, and the automatic back focus control feature makes sharp scene focus setup easy. A convenient video setup jack eliminates the need to use a laptop for viewing video when installing the camera.

- Local Storage (Micro SD) for Alarm Capture
- Motion Detection
- Audio Accessory Available

### Built-In Analytics

**Pelco Analytics** enhance the flexibility and performance of the IDE20 Series camera. Eight Pelco behaviors are preloaded and included as standard features of the IDE20DN models. Pelco behaviors can be configured and enabled using a standard Web browser, and they are compatible with Endura® or a third-party system that supports Pelco's Analytics API system.

Camera models are also available with preloaded **OV Analytic Suites**. These behaviors can be configured and enabled using a standard Web browser and are compatible with an OV ready-compliant system with an OV Ready™ video management system.

### Web Interface

The **IDE20 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IDE20 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **IDE20 Series** easily connects to Pelco IP and hybrid systems such as Endura version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) that enables third-party systems to interface with Pelco's network cameras.

International Standards  
Organization Registered Firm:  
ISO 9001 Quality System

C2964 / REVISED 9-3-10

## PELCO ANALYTICS

The **IDE20 Series** includes eight user-configurable behaviors. The camera is capable of running up to three behaviors at the same time; although, the number of behaviors is limited to the available processing power of the camera and the type of analytic being used.

**Note:** Available processing power is determined by the settings for compression standards, resolution, image rate, bit rate, and analytic configuration.

For each behavior, you can create several custom profiles that contain different camera settings. With these profiles, you can set up different scenarios for the behavior, which will automatically detect and trigger alarms when specific activity is detected.

Pelco Analytics are configured and enabled using a standard Web browser, and Pelco behaviors are compatible with Endura® or a third-party system that supports Pelco's Analytics API system. Multiple Pelco analytics can be scheduled to work during a certain time or condition. For example, during the day, a camera can be configured with Object Counting to count the number of people that enter a lobby door. At night, the operator can change the profile to Camera Sabotage to trigger an alarm if a camera is moved or obstructed. Available Pelco behaviors include:

- **Abandoned Object:** Detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows. An airport terminal is a typical installation for this behavior. This behavior can also detect objects left behind at an ATM, signaling possible card skimming.
- **Adaptive Motion:** Detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a user-defined zone. This behavior is primarily used in outdoor environments with light traffic to reduce the number of false alarms caused by environmental changes.
- **Camera Sabotage:** Detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.
- **Directional Motion:** Generates an alarm in a high traffic area when a person or object moves in a specified direction. Typical installations for this behavior include an airport gate or tunnel where cameras can detect objects moving in the opposite direction of the normal flow of traffic or an individual entering through an exit door.
- **Loitering Detection:** Identifies when people or vehicles remain in a defined zone longer than the user-defined time allows. This behavior is effective in real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- **Object Counting:** Counts the number of objects that enter a defined zone or cross a tripwire. This behavior might be used to count the number of people at a store entrance/exit or inside a store where the traffic is light. This behavior is based on tracking and does not count people in a crowded setting.
- **Object Removal:** Triggers an alarm if an object is removed from a defined zone. This behavior is ideal for customers who want to detect the removal of high value objects, such as a painting from a wall or a statue from a pedestal.
- **Stopped Vehicle:** Detects vehicles stopped near a sensitive area longer than the user-defined time allows. This behavior is ideal for airport curbside drop-offs, parking enforcement, suspicious parking, traffic lane breakdowns, and vehicles waiting at gates.

## OBJECTVIDEO (OV) ANALYTIC SUITES

ObjectVideo Analytics Suites are preloaded on selected IDE20 Series cameras and require an OV Ready system to configure the behaviors for alarm notification.

### OV Security Suite

The OV Security Suite is easy to use and includes Tripwire Detection, Inside Area Detection, and Camera Tamper Detection behaviors.

- Tripwire Detection identifies objects that cross a user-defined line drawn within the camera's field of view.
- Inside Area Detection identifies objects entering, appearing, or moving within a user-defined area.
- Camera Tamper Detection identifies significant contrast changes in the camera's field of view; for example, if the lens is obstructed by spray paint, a cloth, or a lens cap.

### OV Security Suite Plus

The OV Security Suite Plus includes the behaviors of the OV Security Suite, plus Multi-Line Tripwire Detection, Loitering Detection, and Leave Behind Detection behaviors.

- Multi-Line Tripwire Detection identifies objects that cross two defined lines and generates an event based on defined parameters, including directionality. Defined parameters for this behavior include direction, sequential order, and time between crossing each tripwire.
- Loitering Detection identifies when people or vehicles remain within a user-defined area beyond a specified period of time. This behavior is effective for real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- Leave Behind Detection detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows.

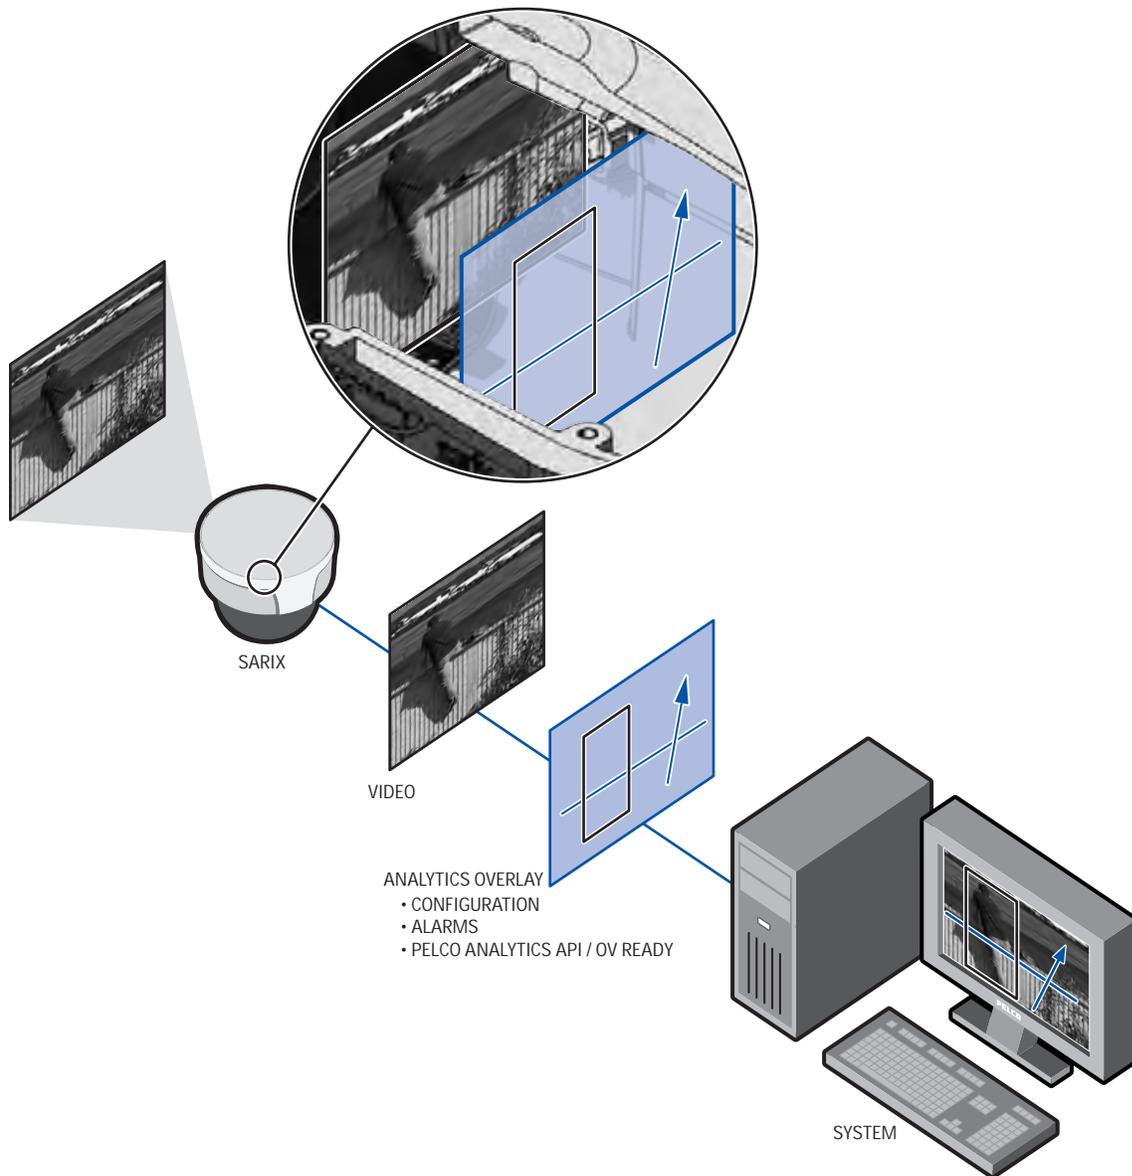

### OV Event Counting Suite

The OV Event Counting Suite uses advanced object calibration and additional features for schedules, parameters, and multiple rules. The suite includes behaviors for Tripwire Counting, Enters/Exits Counting, Loiter Counting, Occupancy Sensing, and Dwell-Time Monitoring.

- Tripwire Counting counts people or objects that cross a user-defined line.
- Enters/Exits Counting calculates the number of people that enter and exit an area without using a tripwire.
- Loiter Counting is useful in analyzing how frequently people stop in front of a product, display, or other area of interest. This feature is also useful in assessing promotion effectiveness and product interest.
- Occupancy Sensing counts people and generates a new value every time the occupancy level changes. Since each occupancy output is timestamped, the data can be used to determine average occupancy levels or to correlate data to point-of-sale or other business scenarios.
- Dwell-Time Monitoring rules can be set up to record the length of time it takes an object to enter and exit an area. Along with queue size information, wait times can also be assessed. This behavior can be used to evaluate consumer interaction for a point-of-sale display or digital advertisement.

# TECHNICAL SPECIFICATIONS

The following diagram illustrates how the camera system interprets streaming video when embedded analytics are configured and enabled.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

# TECHNICAL SPECIFICATIONS

## GENERAL

Imaging Device	1/3-inch (effective)
Imager Type	CMOS
Imager Readout	Progressive scan
Maximum Resolution	1920 x 1080
Signal-to-Noise Ratio	50 dB
Auto Iris Lens Type	DC drive
Electronic Shutter Range	1 ~ 1/100,000 sec
Wide Dynamic Range	60 dB
White Balance Range	2,000° to 10,000°K
Sensitivity	f/1.2; 2,850°K; SNR >24 dB
Color (1x/33 ms)	0.5 lux
Color SENS (15x/500 ms)	0.12 lux
Mono (1x/33 ms)	0.25 lux
Mono SENS (15x/500 ms)	0.03 lux
Dome Attenuation	
Clear	Zero light loss
Smoked	f/1.0 light loss
Construction	
Back Box	Cast aluminum
Trim Ring	Polycarbonate plastic
Bubble	Acrylic plastic
Finish	White
Weight (without lens)	
Unit	2.0 lb (0.9 kg)
Shipping	6.0 lb (2.7 kg)
Available Languages	Chinese, English, French, German, Italian, Portuguese, Russian, Spanish, and Turkish

## ELECTRICAL

Port	RJ-45 connector for 100Base-TX Auto MDI/MDI-X
Cable Type	Cat5 or better for 100Base-TX
Power Input	18 to 34 VAC; 24 VAC nominal or PoE (IEEE 802.3af class 3)
Power Consumption	< 6 W
Current Consumption	
PoE	< 200 mA maximum
24 VAC	< 295 mA nominal; < 390 mA maximum
Local Storage	Micro SD
Alarm Input	10 VDC maximum, 5 mA maximum
Alarm Output	0 to 15 VDC maximum, 75 mA maximum
Service Port	External 3-connector, 2.5 mm provides NTSC/PAL video output
Accessory Port	Connects Pelco accessories

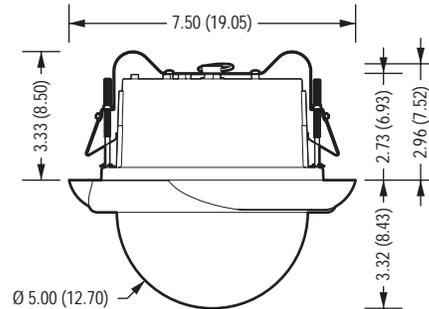

## MECHANICAL

Lens Mount	CS mount, adjustable
Pan/Tilt Adjustment	
Pan	368°
Tilt	160° (10° to 170°)
Rotate	355°

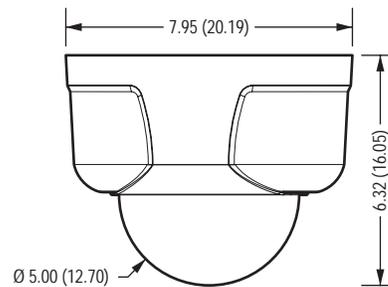

## ENVIRONMENTAL

Operational Temperature	32° to 122°F (0° to 50°C)
Operational Humidity	20% to 80%, noncondensing

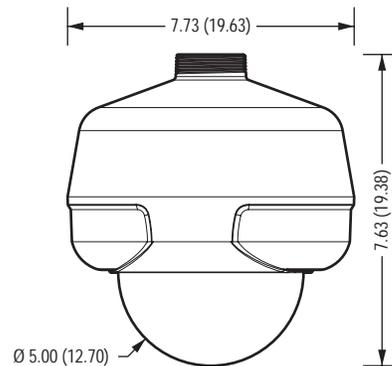

### IN-CEILING

### SURFACE MOUNT (Mounting Ring Included)

### PENDANT (Mount Available as Accessory)

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS;  
ALL OTHERS ARE INCHES

# TECHNICAL SPECIFICATIONS

## VIDEO

Video Encoding H.264 high, main, or base profile and MJPEG  
 Video Streams Up to 2 simultaneous streams; the second stream is variable based on the setup of the primary stream  
 Frame Rate Up to 30, 25, 24, 15, 12.5, 12, 10, 8, 7.5, 6, 5, 4, 3, 2, 1 (dependent upon coding, resolution, and stream configuration)

Available Resolutions	Resolution				MJPEG		H.264 High Profile	
	MPx	Width	Height	Aspect Ratio	Maximum IPS	Recommended Bit Rate	Maximum IPS	Recommended Bit Rate
	2.1	1920	1080	16:9	30.0 ips	10.0 Mbps	30.0 ips	6.0 Mbps
	1.9	1600	1200	4:3	20.0 ips	10.0 Mbps	20.0 ips	4.0 Mbps
	1.3	1280	1024	5:4	20.0 ips	10.0 Mbps	20.0 ips	3.3 Mbps
	1.2	1280	960	4:3	20.0 ips	10.0 Mbps	20.0 ips	3.0 Mbps
	0.9	1280	720	16:9	30.0 ips	10.0 Mbps	30.0 ips	2.9 Mbps

	0.3	640	480	4:3	30.0 ips	4.9 Mbps	30.0 ips	1.5 Mbps
	0.1	320	240	4:3	30.0 ips	1.2 Mbps	30.0 ips	0.5 Mbps

Additional Resolutions 640 x 512, 640 x 352, 480 x 368, 480 x 272, 320 x 256, and 320 x 176  
 Supported Protocols TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)  
 Users  
 Unicast Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)  
 Multicast Unlimited users H.264  
 Security Access Password protected  
 Software Interface Web browser view and setup, up to 16 cameras  
 Pelco System Integration Endura 2.0 (or later) or Digital Sentry 4.3 (or later)  
 Open IP Integration Pelco IP camera API  
 Minimum System Requirements  
 Processor Intel® Core® 2 Duo microprocessor, 2.6 GHz  
 Operating System Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)  
 Memory 2 GB RAM  
 Network Interface Card 100 megabits (or greater)  
 Monitor Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution  
 Web Browser\* Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer® 8.0 (or later) is recommended for configuring analytics  
 Media Player† Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

\*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

## ANALYTICS

Required Systems for Pelco Analytics  
 Pelco Interface WS5200 Advanced System Management Software on an Endura 2.0 (or later) system  
 Open API Pelco analytics allow streaming information to communicate through Pelco's API Guide for Video Analytics version 0.55.30 (or later), available at [Pelco.com/IP](http://Pelco.com/IP)  
 Required System for Object Video Suites OV ready-compliant system with OV Ready video management system

## MODELS

IDE20DN-0	Sarix indoor fixed dome network camera, extended platform with built-in Pelco Analytics, 2.1 megapixel, day/night, no lens, smoked dome
IDE20DN-1	Sarix indoor fixed dome network camera, extended platform with built-in Pelco Analytics, 2.1 megapixel, day/night, no lens, clear dome
IDE20DN8-1	Sarix indoor fixed dome network camera, extended platform with built-in Pelco Analytics, 2.1 megapixel, day/night, 2.8 ~ 8 mm varifocal megapixel lens, clear dome
IDE20DN-OCPO	Sarix indoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, smoked dome, with built-in OV Event Counting Plus Suite
IDE20DN-OSO	Sarix indoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, smoked dome, with built-in OV Security Suite
IDE20DN-OSPO	Sarix indoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, smoked dome, with built-in OV Security Plus Suite
IDE20DN-OCP1	Sarix indoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, clear dome, with built-in OV Event Counting Plus Suite
IDE20DN-OS1	Sarix indoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, clear dome, with built-in OV Security Suite
IDE20DN-OSP1	Sarix indoor fixed dome network camera, extended platform, 2.1 megapixel, day/night, no lens, clear dome, with built-in OV Security Plus Suite

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class B
- FCC, Class B
- UL/cUL Listed
- C-Tick
- Patents Pending

## ACCESSORIES

IX-SC	4-foot Sarix service cable; compatible with standard BNC connectors
IA-A	Audio adapter compatible with a USB 2.0 A to 5-pin mini-B cable; supplied with two USB extension cables: 1 ft (0.3 m) and 3 ft (0.9 m)
POE20U560G	Single port PoE injector

## RECOMMENDED MOUNTS

ID-P	Pendant mount
ID-DF5	DF5 Series adapter kit
ID-CB	Conduit box for in-ceiling installations
ID-PCB	2 x 2 ft (61 x 61 cm) ceiling panel with conduit box
SWM-WT	Wall mount for pendant
SWM-CAWT	Corner adapter for wall mount
SWM-PAWT	Pole adapter for wall mount

## RECOMMENDED LENSES

13M2.2-6	Megapixel lens, varifocal, 2.2 ~ 6.0 mm, f/1.3 ~ 2.0
13M2.8-8	Megapixel lens, varifocal, 2.8 ~ 8.0 mm, f/1.2 ~ 1.9
13M2.8-12	Megapixel lens, varifocal, 2.8 ~ 12.0 mm, f/1.4 ~ 2.7
13M15-50	Megapixel lens, varifocal, 15.0 ~ 50.0 mm, f/1.5 ~ 2.1

Pelco lenses have been designed and tested to deliver optimal image quality for the IDE20 Series megapixel camera. The use of standard definition lenses on IDE20 Series will limit the resolution of the camera, creating poor image quality.

Field of View in Degrees		Aspect Ratio		
		16:9	4:3	5:4
2.2 mm	Horizontal	109	109	109
	Vertical	63	83	89
2.8 mm	Horizontal	89	89	89
	Vertical	48	66	70
6.0 mm	Horizontal	42	42	42
	Vertical	24	32	34
8.0 mm	Horizontal	32	32	32
	Vertical	18	24	25
12.0 mm	Horizontal	21	21	21
	Vertical	12	16	17
15.0 mm	Horizontal	16	16	16
	Vertical	9	12	13
50.0 mm	Horizontal	5	5	5
	Vertical	3	4	4

**Note:** For 800 x 600 (or lower) resolutions in 4:3 or 5:4 aspect ratios, the field of view is smaller than listed above. Refer to the Installation/Operation manual for details.

# IDE10 Series Sarix™ EP Network Indoor Fixed Dome

## 1.3 MEGAPIXEL EXTENDED PLATFORM HIGH DEFINITION DIGITAL CAMERAS

### Product Features

- Up to 1.3 Megapixel Resolution (1280 x 1024)
- Up to 30 Images per Second (ips) at 1280 x 720
- Optional CS-Mount Lenses
- Auto Back Focus for High Precision Focusing
- Easy, Quick, One-Handed Installation
- H.264 and MJPEG Compression
- Day/Night Capability
- Sensitivity Down to 0.03 lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Video Setup Jack and Focus Button Accessible with Dome Closed
- Up to 2 Simultaneous Video Streams
- Built-in Analytics

The **IDE10 Series extended platform (EP) camera with Sarix™ technology** is a 1.3 megapixel (MPx) network indoor fixed dome camera designed with industry-leading image quality and high performance processing power. Designed to install quickly and easily, all of the post back-box installation and setup can be done with one hand.

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

### Fixed Dome Camera

The **IDE10 Series** can be ordered with or without lenses. All models include advance low-light technology and a camera in an indoor enclosure that is ready to install. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations. These cameras accept a wide range of megapixel varifocal CS-mount lenses.

The **IDE10 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The extended platform gives real-time video (30 ips) with full HD resolution using H.264 compression for optimized bandwidth and storage efficiency. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

The **IDE10 Series** is simple to install, and the automatic back focus control feature makes sharp scene focus setup easy. A convenient video setup jack eliminates the need to use a laptop for viewing video when installing the camera.

- Local Storage (Micro SD) for Alarm Capture
- Motion Detection
- Audio Accessory Available.

### Built-In Analytics

**Pelco Analytics** enhance the flexibility and performance of the IDE10 Series camera. Eight Pelco behaviors are preloaded and included as standard features of the IDE10DN models. Pelco behaviors can be configured and enabled using a standard Web browser, and they are compatible with Endura® or a third-party system that supports Pelco's Analytics API system.

Camera models are also available with preloaded **OV Analytic Suites**. These behaviors can be configured and enabled using a standard Web browser and are compatible with an OV ready compliant system with an OV Ready™ video management system.

### Web Interface

The **IDE10 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IDE10 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **IDE10 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) for interfacing with Pelco's network cameras.

## PELCO ANALYTICS

The IDE10 Series includes eight user-configurable behaviors. The camera is capable of running up to three behaviors at the same time; although, the number of behaviors is limited to the available processing power of the camera and the type of analytic being used.

**Note:** Available processing power is determined by the settings for compression standards, resolution, image rate, bit rate, and analytic configuration.

For each behavior, you can create several custom profiles that contain different camera settings. With these profiles, you can set up different scenarios for the behavior, which will automatically detect and trigger alarms when specific activity is detected.

Pelco Analytics are configured and enabled using a standard Web browser, and Pelco behaviors are compatible with Endura® or a third-party system that supports Pelco's Analytics API system. Multiple Pelco behaviors can be scheduled to work during a certain time or condition. For example, during the day, a camera can be configured with Object Counting to count the number of people that enter a lobby door. At night, the operator can change the profile to Camera Sabotage to trigger an alarm if a camera is moved or obstructed. Available Pelco behaviors include:

- **Abandoned Object:** Detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows. An airport terminal is a typical installation for this behavior. This behavior can also detect objects left behind at an ATM, signaling possible card skimming.
- **Adaptive Motion:** Detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a user-defined zone. This behavior is primarily used in outdoor environments with light traffic to reduce the number of false alarms caused by environmental changes.
- **Camera Sabotage:** Detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.
- **Directional Motion:** Generates an alarm in a high traffic area when a person or object moves in a specified direction. Typical installations for this behavior include an airport gate or tunnel where cameras can detect objects moving in the opposite direction of the normal flow of traffic or an individual entering through an exit door.
- **Loitering Detection:** Identifies when people or vehicles remain in a defined zone longer than the user-defined time allows. This behavior is effective in real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- **Object Counting:** Counts the number of objects that enter a defined zone or cross a tripwire. This behavior might be used to count the number of people at a store entrance/exit or inside a store where the traffic is light. This behavior is based on tracking and does not count people in a crowded setting.
- **Object Removal:** Triggers an alarm if an object is removed from a defined zone. This behavior is ideal for customers who want to detect the removal of high value objects, such as a painting from a wall or a statue from a pedestal.
- **Stopped Vehicle:** Detects vehicles stopped near a sensitive area longer than the user-defined time allows. This behavior is ideal for airport curbside drop-offs, parking enforcement, suspicious parking, traffic lane breakdowns, and vehicles waiting at gates.

## OBJECTVIDEO (OV) ANALYTIC SUITES

ObjectVideo Analytics Suites are preloaded on selected IDE10 Series cameras and require an OV Ready system to configure the behaviors for alarm notification.

### OV Security Suite

The OV Security Suite is easy to use and includes Tripwire Detection, Inside Area Detection, and Camera Tamper Detection behaviors.

- Tripwire Detection identifies objects that cross a user-defined line drawn within the camera's field of view.
- Inside Area Detection identifies objects entering, appearing, or moving within a user-defined area.
- Camera Tamper Detection identifies significant contrast changes in the camera's field of view; for example, if the lens is obstructed by spray paint, a cloth, or a lens cap.

### OV Security Suite Plus

The OV Security Suite Plus includes the behaviors of the OV Security Suite plus Multi-Line Tripwire Detection, Loitering Detection, and Leave Behind Detection behaviors.

- Multi-Line Tripwire Detection identifies objects that cross two defined lines and generates an event based on defined parameters, including directionality. Defined parameters for this behavior include direction, sequential order, and time between crossing each tripwire.
- Loitering Detection identifies when people or vehicles remain within a user-defined area beyond a specified period of time. This behavior is effective for real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- Leave Behind Detection detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows.

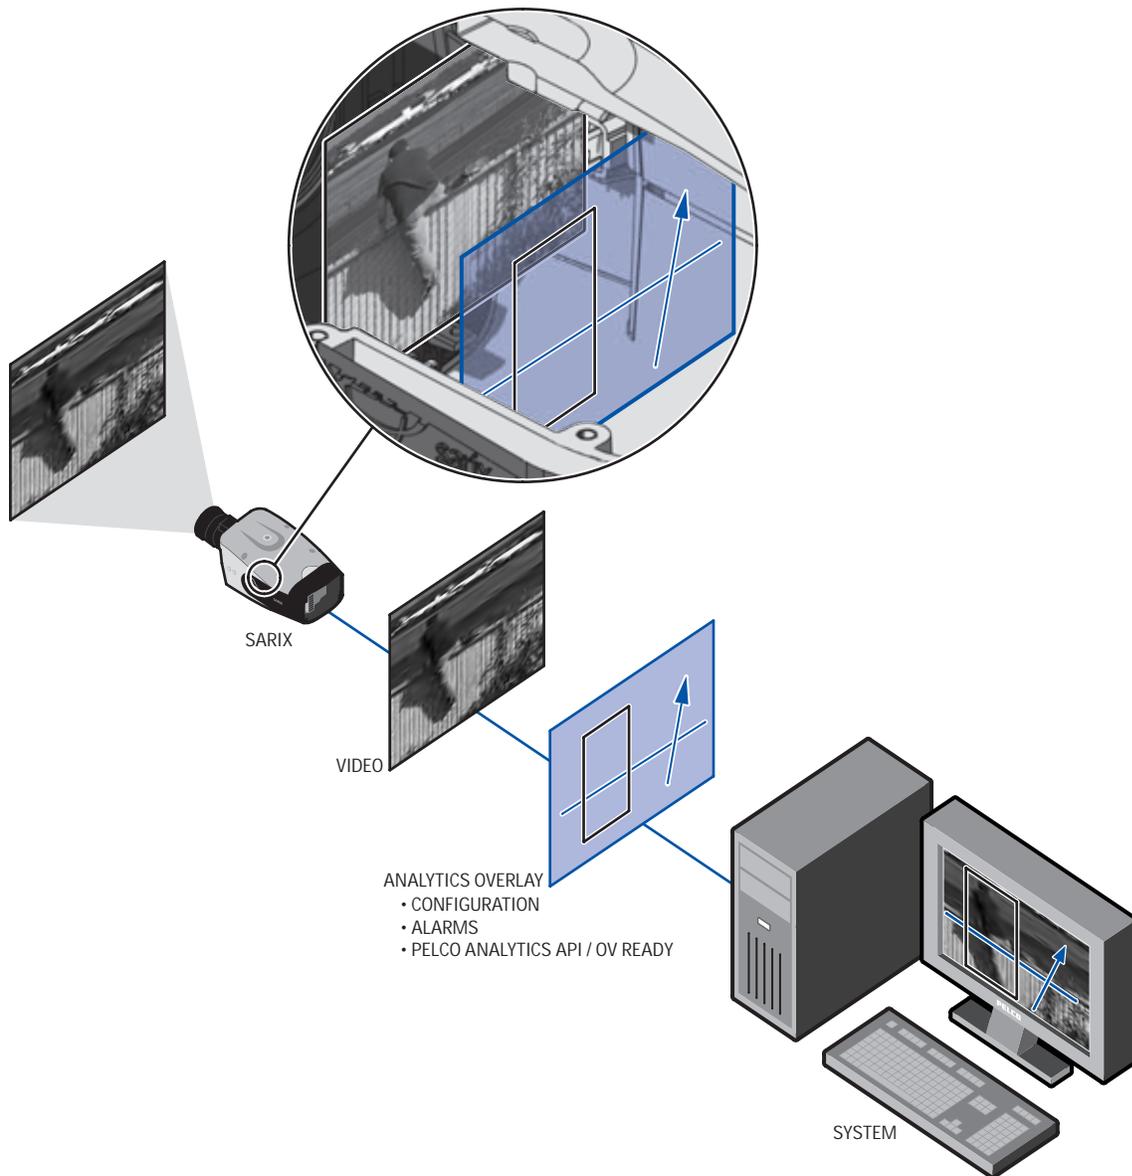

### OV Event Counting Suite

The OV Event Counting Suite uses advanced object calibration and additional features for schedules, parameters, and multiple rules. The suite includes behaviors for Tripwire Counting, Enters/Exits Counting, Loiter Counting, Occupancy Sensing, and Dwell-Time Monitoring.

- Tripwire Counting counts people or objects that cross a user-defined line.
- Enters/Exits Counting calculates the number of people that enter and exit an area without using a tripwire.
- Loiter Counting is useful in analyzing how frequently people stop in front of a product, display, or other area of interest. This feature is also useful in assessing promotion effectiveness and product interest.
- Occupancy Sensing counts people and generates a new value every time the occupancy level changes. Since each occupancy output is time-stamped, the data can be used to determine average occupancy levels or to correlate data to point-of-sale or other business scenarios.
- Dwell-Time Monitoring rules can be set up to record the length of time it takes an object to enter and exit an area. Along with queue size information, wait times can also be assessed. This behavior can be used to evaluate consumer interaction for a point-of-sale display or digital advertisement.

# TECHNICAL SPECIFICATIONS

The following diagram illustrates how the camera system interprets streaming video when embedded analytics are configured and enabled.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements

# TECHNICAL SPECIFICATIONS

## GENERAL

Imaging Device	1/3-inch (effective)
Imager Type	CMOS
Imager Readout	Progressive scan
Maximum Resolution	1280 x 1024
Signal-to-Noise Ratio	50 dB
Auto Iris Lens Type	DC drive
Electronic Shutter Range	1 ~ 1/100,000 sec
Wide Dynamic Range	60 dB
White Balance Range	2,000° to 10,000°K
Sensitivity	f/1.2; 2,850°K; SNR >24 dB
Color (1x/33 ms)	0.5 lux
Color SENS (15x/500 ms)	0.12 lux
Mono (1x/33 ms)	0.25 lux
Mono SENS (15x/500 ms)	0.03 lux
Dome Attenuation	
Clear	Zero light loss
Smoked	f/1.0 light loss
Construction	
Back Box	Cast aluminum
Trim Ring	Polycarbonate plastic
Bubble	Acrylic plastic
Finish	White
Weight (without lens)	
Unit	2.0 lb (0.9 kg)
Shipping	6.0 lb (2.7 kg)
Available Languages	Chinese, English, French, German, Italian, Portuguese, Russian, Spanish, and Turkish

## ELECTRICAL

Port	RJ-45 connector for 100Base-TX Auto MDI/MDI-X
Cable Type	Cat5 or better for 100Base-TX
Power Input	18 to 34 VAC; 24 VAC nominal or PoE (IEEE 802.3af class 3)
Power Consumption	< 6 W
Current Consumption	
PoE	< 200 mA maximum
24 VAC	< 295 mA nominal; < 390 mA maximum
Local Storage	Micro SD
Alarm Input	10 VDC maximum, 5 mA maximum
Alarm Output	0 to 15 VDC maximum, 75 mA maximum
Service Port	External 3-connector, 2.5 mm provides NTSC/PAL video output
Accessory Port	Connects Pelco accessories

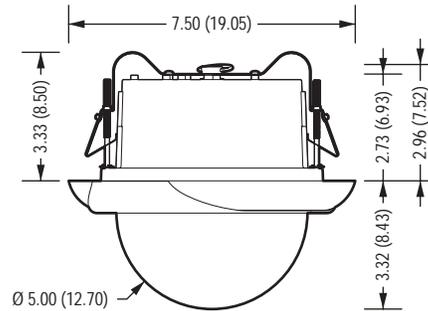

## MECHANICAL

Lens Mount	CS mount, adjustable
Pan/Tilt Adjustment	
Pan	368°
Tilt	160° (10° to 170°)
Rotate	355°

## ENVIRONMENTAL

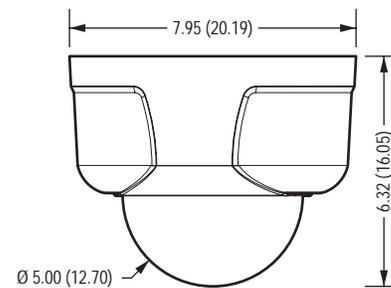

Operational Temperature	32° to 122°F (0° to 50°C)
Operational Humidity	20% to 80%, noncondensing

### IN-CEILING

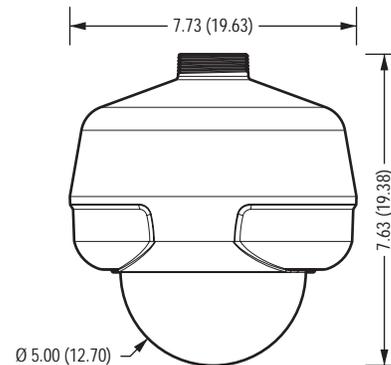

### SURFACE MOUNT

(Mounting Ring Included)

### PENDANT

(Mount Available as Accessory)

	0.1	320	240	4:3	30.0 ips	1.2 Mbps	30.0 ips	0.5 Mbps

Additional Resolutions 640 x 512, 640 x 352, 480 x 368, 480 x 272, 320 x 256, and 320 x 176

Supported Protocols TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)

Users  
 Unicast Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)  
 Multicast Unlimited users H.264

Security Access Password protected

Software Interface Web browser view and setup, up to 16 cameras

Pelco System Integration Endura 2.0 (or later) or Digital Sentry 4.3 (or later)

Open IP Integration Pelco IP camera API

### Minimum System Requirements

Processor Intel® Core® 2 Duo microprocessor, 2.6 GHz

Operating System Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)

Memory 2 GB RAM

Network Interface Card 100 megabits (or greater)

Monitor Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution

Web Browser\* Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer® 8.0 (or later) is recommended for configuring analytics

Media Player† Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

## ANALYTICS

### Required Systems for Pelco Analytics

Pelco Interface WS5200 Advanced System Management Software on an Endura 2.0 (or later) system  
 Open API Pelco analytics allow streaming information to communicate through Pelco's API Guide for Video Analytics version 0.55.30 (or later), available at [Pelco.com/IP](http://Pelco.com/IP)

Required System for Object Video Suites OV ready-compliant system with OV Ready video management system

\*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

## MODELS

IDE10DN-0	Sarix indoor fixed dome network camera, extended platform, 1.3 megapixel, day/night, no lens, smoked dome, with built-in Pelco analytics
IDE10DN-1	Sarix indoor fixed dome network camera, extended platform, 1.3 megapixel, day/night, no lens, clear dome, with built-in Pelco analytics
IDE10DN8-1	Sarix indoor fixed dome network camera, extended platform, 1.3 megapixel, day/night, 2.8 – 8 mm varifocal megapixel lens, clear dome, with built-in Pelco analytics
IDE10DN-OC P1	Sarix indoor fixed dome network camera, extended platform, 1.3 megapixel, day/night, no lens, clear dome, with built-in OV Event Counting Plus Suite
IDE10DN-OS1	Sarix indoor fixed dome network camera, extended platform, 1.3 megapixel, day/night, no lens, clear dome, with built-in OV Security Suite
IDE10DN-OSP1	Sarix indoor fixed dome network camera, extended platform, 1.3 megapixel, day/night, no lens, clear dome, with built-in OV Security Plus Suite

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class B
- FCC, Class B
- UL/cUL Listed
- C-Tick
- Meets IP66
- Patents Pending

## OPTIONAL ACCESSORIES

IX-SC	4-foot service/monitor cable, compatible with any standard monitor BNC connector
IA-A	Audio adapter compatible with a USB 2.0 A to 5-pin mini-B cable; supplied with two USB extension cables: 1 ft (0.3 m) and 3 ft (0.9 m)
POE20U560G	Single port PoE injector

## RECOMMENDED MOUNTS

ID-P	Pendant mount
ID-DF5	DF5 Series adapter kit
ID-CB	Conduit box for in-ceiling installations
ID-PCB	2 x 2 ft (61 x 61 cm) ceiling panel with conduit box
SWM-WT	Wall mount for pendant
SWM-CAWT	Corner adapter for wall mount
SWM-PAWT	Pole adapter for wall mount

## RECOMMENDED LENSES

13M2.2-6	Megapixel lens, varifocal, 2.2 – 6.0 mm, f/1.3 – 2.0
13M2.8-8	Megapixel lens, varifocal, 2.8 – 8.0 mm, f/1.2 – 1.9
13M2.8-12	Megapixel lens, varifocal, 2.8 – 12.0 mm, f/1.4 – 2.7
13M15-50	Megapixel lens, varifocal, 15.0 – 50.0 mm, f/1.5 – 2.1

Pelco megapixel lenses have been designed and tested to deliver optimal image quality for the IDE10 Series dome. The use of standard definition lenses on IDE10 Series megapixel cameras will limit the resolution of the camera, creating poor image quality.

Field of View in Degrees		High Resolution Streams (>800 x 600) Aspect Ratio		
		16:9	4:3	5:4
2.2 mm	Horizontal	109	109	109
	Vertical	63	83	89
2.8 mm	Horizontal	89	89	89
	Vertical	48	66	70
6.0 mm	Horizontal	42	42	42
	Vertical	24	32	34
8.0 mm	Horizontal	32	32	32
	Vertical	18	24	25
12.0 mm	Horizontal	21	21	21
	Vertical	12	16	17
15.0 mm	Horizontal	16	16	16
	Vertical	9	12	13
50.0 mm	Horizontal	5	5	5
	Vertical	3	4	4

**Note:** For 800 x 600 (or lower) resolutions in 4:3 or 5:4 aspect ratios, the field of view is smaller than listed above. Refer to the Installation/Operation manual for details.

# ID10 Series Sarix™ Network Indoor Fixed Dome

## 1.3 MEGAPIXEL HIGH DEFINITION INTEGRATED CAMERA

### Product Features

- Up to 1.3 Megapixel Resolution (1280 x 1024)
- Up to 30 Images per Second (ips) at 1280 x 720
- Optional CS-Mount Lenses
- Auto Back Focus for High Precision Focusing
- Easy, Quick, One-Handed Installation
- H.264 and MJPEG Compression
- Color and Day/Night Capability
- Sensitivity Down to 0.03 Lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Video Setup Jack and Focus Button Accessible with Dome Closed
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously
- Local Storage (Micro SD) for Alarm Capture

The **ID10 Series with Sarix™ technology** is a 1.3 megapixel (MPx) network indoor fixed dome camera designed with industry-leading image quality and high performance processing power. Designed to install quickly and easily, all of the post back-box installation and setup can be done with one hand.

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

### Fixed Dome Camera

The **ID10 Series** can be ordered in either color or day/night models with or without lenses installed. All models include advanced low-light technology and a camera in an indoor enclosure that is ready to install. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations. These cameras accept a wide range of megapixel varifocal CS-mount lenses.

The **ID10 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

- Open IP Standards
- Motion Detection
- Audio Accessory Available

### Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the **ID10 Series**. This behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

### Web Interface

The **ID10 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **ID10 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **ID10 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) that enables third-party systems to interface with Pelco's network cameras.

# IDS0 Series Sarix™ Network Indoor Fixed Dome

## 0.5 MEGA PIXEL STANDARD DEFINITION INTEGRATED CAMERA

### Product Features

- Up to SVGA Resolution (800 x 600)
- Up to 30 Images per Second (ips) at All Resolutions
- Optional CS-Mount Lenses
- Auto Back Focus for High Precision Focusing
- Easy, Quick, One-Handed Installation
- H.264, MPEG-4, and MJPEG Compression
- Color and Day/Night Capability
- Sensitivity Down to 0.03 Lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Video Setup Jack and Focus Button Accessible with Dome Closed
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously
- Local Storage (Micro SD) for Alarm Capture

- Open IP Standards
- Motion Detection
- Audio Accessory Available

The **IDS0 Series with Sarix™ technology** is a standard definition network indoor fixed dome camera designed with industry-leading image quality and high performance processing power. Designed to install quickly and easily, all of the post back-box installation and setup can be done with one hand.

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

### Fixed Dome Camera

The **IDS0 Series** can be ordered in either color or day/night models with or without lenses installed. All models include advanced low-light technology and a camera in an indoor enclosure that is ready to install. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations. These cameras accept a wide range of varifocal CS-mount lenses.

The **IDS0 Series** supports two simultaneous video streams. The two streams can be compressed in H.264, MPEG-4, and MJPEG formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

### Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the IDS0 Series. This behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

### Web Interface

The **IDS0 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IDS0 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

### Video Systemization

The **IDS0 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.3 (or later). Supported Protocols TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, and mDNS (Bonjour®), and 802.1x (EAP)

Users  
 Unicast Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)  
 Multicast Unlimited users H.264

Security Access Password protected

Software Interface Web browser view and setup, up to 16 cameras

Pelco System Integration Endura 2.0 (or later) or Digital Sentry 4.3 (or later)

Open IP Integration Pelco IP camera API

### Minimum System Requirements

Processor	Intel® Pentium® 4 microprocessor, 1.6 GHz
Operating System	Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)
Memory	512 MB RAM
Network Interface Card	100 megabits (or greater)
Monitor	Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution
Web Browser*	Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.5 (or later); Internet Explorer® 8.0 (or later) is recommended for configuring analytics
Media Player†	Pelco Media Player or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

\*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

## MODELS

IDS0C12-1	Sarix indoor fixed dome network camera, 0.5 megapixel, color, 2.8 - 12 mm varifocal lens, clear dome
IDS0DN12-1	Sarix indoor fixed dome network camera, 0.5 megapixel, day/night, 2.8 - 12 mm varifocal lens, clear dome
IDS0C-0	Sarix indoor fixed dome network camera, 0.5 megapixel, color, no lens, smoked dome
IDS0C-1	Sarix indoor fixed dome network camera, 0.5 megapixel, color, no lens, clear dome
IDS0DN-0	Sarix indoor fixed dome network camera, 0.5 megapixel, day/night, no lens, smoked dome
IDS0DN-1	Sarix indoor fixed dome network camera, 0.5 megapixel, day/night, no lens, clear dome

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class B
- FCC, Class B
- UL/cUL Listed
- C-Tick

# IM10 Series Sarix™ Mini Indoor Fixed Dome

## 1.3 MEGAPIXEL HIGH DEFINITION INTEGRATED NETWORK CAMERA

### Product Features

- Up to 1.3 Megapixel Resolution (1280 x 1024)
- Up to 30 Images per Second (ips) at 1280 x 720
- Compact Size with 3-inch Bubble
- Auto Focus Varifocal 2.8 ~ 10 mm Megapixel Lens
- Easy Installation
- H.264 and MJPEG Compression
- Sensitivity Down to 0.12 lux
- Line-in Audio and Built-in Microphone
- Power over Ethernet (PoE), IEEE 802.3af
- Video Setup Jack Accessible with Dome Installed
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously
- Open IP Standards

The **IM10 Series with Sarix™ technology** is a 1.3 megapixel (MPx) network indoor fixed dome camera designed with industry-leading image quality and high performance processing power. From back box wiring to focusing the lens, the **IM10 Series** is designed to install quickly and easily.

**Sarix** technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making HD video more affordable.

#### Fixed Dome Camera

The **IM10 Series** contains an integrated varifocal 2.8 ~ 10 mm megapixel lens. All models include a camera in a compact indoor enclosure that is ready to install.

The **IM10 Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

#### Built-In Analytics

The **Pelco Camera Sabotage** behavior is a standard feature of the IM10 Series. This behavior detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

#### Web Interface

The **IM10 Series** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

#### Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IM10 Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

#### Video Systemization

The **IM10 Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later) and Digital Sentry® version 4.3 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) that enables third-party systems to interface with Pelco's network cameras.

# Spectra® HD Series Network Dome System

## HIGH DEFINITION PAN/TILT/ZOOM HIGH-SPEED DOME

### Product Features

- Up to 1280 x 960 Resolution
- 4:3 or 16:9 Aspect Ratio: 960p at 20 Images per Second (ips), 720p at 30 ips
- 1.3 Megapixel (MPx), 18X Optical, Wide Dynamic Range (WDR) Camera
- Ability to Control and Monitor Video Over IP Networks
- Autotracking and Adaptive Motion Detection
- 2 Simultaneous Video Streams: Dual H.264 and Scalable MJPEG
- 360° Continuous Pan Rotation at 400° per Second
- Supported Protocols: TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, NTP, and More
- Power over Ethernet (PoE) IEEE 802.3af
- USB Expansion Slots for Alarms and Audio Accessories
- 16 Preset Tours, 255 Dome Presets, 8 Privacy Zones

Pelco takes its industry-leading Spectra® Series dome into the world of high definition. **Spectra HD** delivers crystal-clear, live streaming images over the Internet using a standard Web browser (Microsoft® Internet Explorer® or Mozilla® Firefox®). With four times the resolution of standard definition domes, **Spectra HD** is an ideal solution to view details such as faces, license plates, tattoos, playing cards (in casinos), or other specific features.

**Spectra HD** supports High-Profile H.264 compression, a vast improvement in quality over MPEG-4 and 20 times more efficient than M-JPEG. The dome system features open architecture connectivity for third-party software recording solutions allowing integration into virtually any IP-based HD system. It is also compatible with Digital Sentry® video management systems. As with all Pelco IP camera solutions, **Spectra HD** is Endura Enabled™ to record, manage, configure, and view multiple live streams. When connected to an Endura® HD network-based video security system, the dome system has access to EnduraStor™ and EnduraView™ for optimized image quality and bandwidth efficiency.

**Spectra HD** features the same ease of installation and ease of maintenance that you have come to expect from Spectra. Each dome system consists of a back box, a dome drive, and a lower dome.

**Spectra HD** includes a choice of four back box models: in-ceiling, environmental in-ceiling, pendant, and environmental pendant. All environmental models meet NEMA Type 4X, IP66 when properly installed.

**Spectra HD** dome system includes many software enhancements that increase performance and make configuration and operation easy. An internal scheduling clock allows for the scheduling of presets and patterns. Window blanking enables a user to configure up to eight, four-sided, user-defined privacy areas. Password protection prevents unauthorized users from changing the system settings. Intuitive multilingual on-screen configuration can be displayed in English, Spanish, Portuguese, Italian, French, German, Russian, Polish, and Turkish.

**Spectra HD** features include variable speed capabilities, which range from a smooth, fast pan motion of 400 degrees per second to a smooth “creep” speed of 0.1 degree per second. The system is capable of continuous 360 degrees rotation, and it has an “auto flip” feature that allows the dome to rotate 180 degrees and reposition itself for uninterrupted viewing of any subject that passes directly beneath the dome.

# TECHNICAL SPECIFICATIONS

## SOFTWARE FEATURES

- 255 Presets
- 16 Tours
- $\pm 0.1^\circ$  Preset Accuracy
- Multilingual Menus (English, Spanish, Portuguese, Italian, German, French, Russian, Polish, and Turkish)
- Password Protection
- 400°/sec Pan Preset Speed and 200°/sec Tilt Preset Speed
- Rotating Discreet Liner with Sealed Fixed Bubble
- 8 Privacy Zones, Configurable in Size
- "Auto Flip" Feature Rotates Dome 180° at Bottom of Tilt Travel
- Configurable Park with Actions
- Proportional Pan/Tilt Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom

## BACK BOX FEATURES

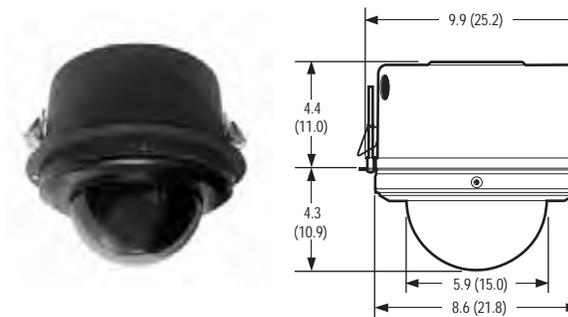

### In-Ceiling (Indoor)

- Single Back Box for Suspended or Hard Ceiling Applications
- Requires 5.25-Inch Space Above Ceiling and 3.25 Inches Below
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Suitable for Use in Environmental Air Handling Spaces

### Standard and Environmental Pendant

- Standard and Environmental Models
- Standard Pendant Available in Black or Gray Finish; Environmental Pendant Available in Gray Finish Only
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Environmental Model Includes Sun Shield, Fan, and Heater

### Environmental In-Ceiling

- Single Back Box for Hard Ceiling Applications
- Requires 4.4-Inch Space Above Ceiling and 4.3 Inches Below
- Includes Heater and Fan
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# TECHNICAL SPECIFICATIONS

## CAMERA

Sensor Type	1/3-inch CCD
Optical Zoom	18X
Maximum Resolution	1280 x 960
Lens	f/1.6 (focal length, 4.7 ~ 84.6 mm optical)
Aspect Ratios	4:3 or 16:9
Light Sensitivity	f/1.6; 2,850°K; SNR >24dB
Color (33 ms)	0.70 lux
Color (250 ms)	0.07 lux
Mono (33 ms)	0.25 lux
Mono (250 ms)	0.02 lux
Day/Night Capabilities	Yes
IR Cut Filter	Yes
IR Trace	Curves 850 nm and 950 nm
Wide Dynamic Range	60 dB
Iris Control	Auto iris with manual override
Backlight Compensation	Yes

## VIDEO

Video Encoding	H.264 high, main, or base profile and MJPEG
Video Streams	Up to 2 simultaneous streams; the second stream is variable based on the setup of the primary stream
Frame Rate	Up to 30, 25, 24, 15, 12.5, 12, 10, 8, 7.5, 6, 5, 4, 3, 2.5, 2, 1 (dependent upon coding, resolution, and stream configuration)

Available Resolutions

Resolution				MJPEG		H.264 High Profile (IP GOP structure)	
MPx	Width	Height	Aspect Ratio	Maximum IPS	Recommended bitrate (Mbps)	Maximum IPS	Recommended bitrate (Mbps)
1.30	1280	960	4:3	20	12.00	20	3.00
0.92	1280	720	16:9	30	12.00	30	2.90

0.06	320	176	16:9	30	0.90	30	0.35

Supported Protocols TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP v2c/v3, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)

Users

Unicast	Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)
Multicast	Unlimited users H.264

Security Access

Password protected

Software Interface

Web browser view and setup, up to 16 cameras

Pelco System Integration

Endura 2.0 (or later)  
Digital Sentry 4.2 (or later)

Open IP Integration

Pelco IP camera API

Minimum System Requirements

Processor	Intel® Core™ 2 Duo microprocessor, 2.6 GHz
Operating System	Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)
Memory	2 GB RAM
Network Interface Card	100 megabits (or greater)
Monitor	Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution
Web Browser*	Internet Explorer 7.0 (or later) or Firefox 3.5 (or later); Internet Explorer 8.0 (or later) is recommended for configuring analytics
Media Player†	Pelco Media Player† or QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

\*Internet Explorer is not supported by Mac OS X 10.4.

†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

†Pelco Media Player is recommended for control, smoothness, and reduced latency as compared to QuickTime.

# TECHNICAL SPECIFICATIONS

## GENERAL

Construction	
Back Box	Aluminum
Dome Drive	Aluminum, thermo plastic
Lower Dome	Acrylic
Light Attenuation	
Smoked	f/0.5 light loss
Clear	Zero light loss
Cable Entry (back box)	
In-Ceiling	0.75-inch conduit fitting
Pendant	Through 1.5-inch NPT pendant mount
Weight (approximate)	
In-Ceiling	Unit                      Shipping 5.2 lb (2.4 kg)            8 lb (3.6 kg)
Environmental In-Ceiling	6.2 lb (2.8 kg)            10 lb (4.5 kg)
Standard Pendant	6.5 lb (3.0 kg)            11 lb (5.0 kg)
Environmental Pendant	7.6 lb (3.5 kg)            12 lb (5.4 kg)
Environment	
In-Ceiling	Indoor
Environmental In-Ceiling	Outdoor
Pendant, Standard, and Environmental	Indoor/outdoor
Operating Temperature	
In-Ceiling	32° to 122°F (0° to 50°C)
Standard Pendant	(Assumes no wind chill factor) 113°F (45°C) absolute maximum; 95°F (35°C) sustained maximum
Maximum	
Minimum	25°F (-4°C) sustained minimum
Environmental In-Ceiling, Environmental Pendant	(Assumes no wind chill factor)
Maximum	140°F (60°C) absolute maximum; 122°F (50°C) sustained maximum
Minimum	-60°F (-51°C) absolute minimum; prevents icing at sustained minimum of -22°F (-30°C); de-ices 0.1 inch (2.5 mm) within 3 hours after power-up at -22°F (-30°C)
Effective Projected Area (EPA)	20.5 square inches (without mount), 47 square inches (with IWM Series mount)

## MECHANICAL

*(Dome Drive Only)*

Variable Speed	0.1° to 400°
Preset Accuracy	±0.1°
Pan Movement	360° continuous pan rotation
Vertical Tilt	+0° to -90°
Manual Pan/Tilt Speeds	
Pan	0.1° to 80°/sec manual operation, 150°/sec Turbo
Tilt	0.1° to 40°/sec manual operation
Preset Speeds	
Pan	400°/sec
Tilt	160°/sec

## ELECTRICAL

Ports	RJ-45 connector for 100Base-TX Auto MDI/MDI-X Autonegotiate/Manual setting
Cabling Type	Cat5 or better for 100Base-TX
Input Voltage	18 to 32 VAC; 24 VAC nominal 22 to 27 VDC; 24 VDC nominal
Input Power	
24 VAC	23 VA nominal (without heater); 73 VA nominal (with heater)
24 VDC	0.7 A nominal (without heater); 3 A nominal (with heater)
PoE	IEEE802.3af (without heater)
Fuse	1.25 A

# MODEL NUMBERS

## RECOMMENDED MOUNTS

### In-Ceiling Domes

SD5-P	2' x 2' drop ceiling panel, aluminum construction; replaces 2' x 2' ceiling tile
SCA1	Support rails for B5-F; for use in ceiling tile applications

### Pendant Domes

BB5-PCA-BK	Pendant conduit adapter, black
BB5-PCA-GY	Pendant conduit adapter, gray
IWM Series	Wall mount, with or without integral 24 VAC, 100 VA transformer; black or gray finish; can be adapted for corner, parapet or pole application
MRCA	Ceiling mount, black
PP4348	Parapet roof mount
PP350/PP351	Parapet wall/roof mount
SWM Series	Compact wall mount, black or gray finish; can be adapted for corner or pole applications

## RECOMMENDED POWER SUPPLIES

MCS Series	Indoor, 24 VAC power supply
WCS Series	Outdoor, 24 VAC power supply

*Refer to individual power supply specifications for more information.*

# Spectra® IV IP Series Network Dome System

## H.264, DIGITAL PAN/TILT/ZOOM HIGH-SPEED DOME

### Product Features

- Ability to Control and Monitor Video Over IP Networks
- Simultaneous IP and Analog Video and Control
- H.264, MPEG-4, and MJPEG Compression
- Supported Protocols: TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour®), and 802.1x (EAP)
- Multilevel Password Protection
- 3 Autofocus, High Resolution Integrated Camera/Optics Packages
- Horizontal Zone and Window Blanking
- Sensitivity Down to 0.00015 lux PAL (35X Models)
- On-Screen Compass and Tilt Display
- Up to 2 Simultaneous Video Streams
- Web Viewing, up to 16 Cameras Simultaneously

**Spectra® IV IP** dome systems incorporate all of the features and functions of Spectra IV (including analog), while allowing you to control and monitor video over an IP network from virtually anywhere in the world. Spectra IV IP is a high-speed dome with a built-in 100Base-TX network interface for live streaming to any network application.

**Spectra IV IP** supports two simultaneous video streams. The two streams can be compressed in MJPEG, MPEG-4, and H.264 formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration. The H.264 compression video files are up to 20 times smaller than MJPEG, making network video storage more affordable.

**Spectra IV IP** allows you to view and control analog video while viewing, recording, and controlling network IP video. There is no need to abandon your current analog infrastructure if you are making the move to network video as a recording solution. Continue to monitor and control video in the analog domain while recording video in the network domain, and let Spectra IV IP's professional compression method do the work for you without the need for external encoders.

**Spectra IV IP** dome system consists of a back box, a dome drive, and a lower dome. These three system components are interchangeable with other Spectra IV IP dome systems, making retrofitting and application adjustments simple.

**Spectra IV IP** features several back box options. All back boxes feature built-in memory, which can be used to store camera and location-specific dome settings, including labels, presets, patterns, and zones.

- Open IP Standards
- Bidirectional Full-Duplex Audio

All cameras in **Spectra IV IP** dome drives feature an EXview HAD™ imager for increased sensitivity and LowLight™ technology allowing the cameras to compensate for scenes where minimal light is present. Both the 27X and the 35X cameras feature built-in motion detection and advanced 128X wide dynamic range (WDR) that enables the system to compensate for scenes where dramatic contrasts in lighting are present. The 35X day/night camera's electronic image stabilization digitally reduces blurring of the camera image due to vibration caused by external sources, such as wind and traffic.

### Web Interface

**Spectra IV IP** uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

Network protocols such as Secure Sockets Layer (SSL) configuration for security certificates, Secure Shell (SSH) for remote logon, and Quality of Service (QoS) for priority or guarantee data flow can be managed using a Web browser.

### Systemization

**Spectra IV IP** easily connects to Pelco IP and hybrid systems such as Endura® version 1.5 (or later), MPEG-4; Endura version 2.0 (or later), H.264; Digital Sentry® version 4.2 (or later); DX8100 version 2.0 (or later); and DVR5100 version 1.5.4 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) for interfacing to Pelco's network cameras.

\*Internet Explorer is not supported by Mac OS X 10.4.

<sup>†</sup>This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

## DOMED DRIVE FEATURES

### 35X and 27X Models

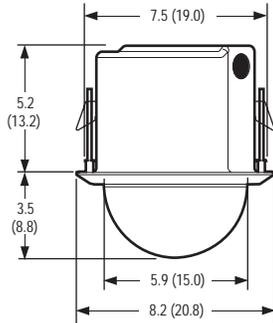

- 256 Presets
- $\pm 0.1^\circ$  Preset Accuracy
- Electronic Image Stabilization (35X model)
- Image Enhancement (35X model)
- Multilingual Menus (English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech)
- RJ-45 Data Port for Software Update and Setup
- On-Screen Compass, Tilt, and Zoom Display
- Password Protection
- 400°/sec Pan Preset Speed and 200°/sec Tilt Preset Speed
- Rotating Discreet Liner with Sealed Fixed Bubble
- Window Blanking: Up to 8, Four-Sided, User-Defined Shapes
- 8 Zones (configurable in size) Can Be Labeled with up to 20 Characters Each or Set to Output Blank Video
- 7 Alarm Inputs
- 1 Auxiliary (Form C) Relay Output and 1 Open Collector Auxiliary Output (can be alternately configured to operate upon alarm)
- Configurable Locations of Labels and On-Screen Displays
- Action on Alarm: Alarms Can Be Individually Configured for 3 Priority Levels, to Initiate a Stored Pattern, or to Go to an Associated Preset When Received
- Resume After Alarm: Allows the Dome to Return to a Previously Configured State After Alarm Acknowledgement or to its Previous Position Before Alarm
- Multiple Park and Power-Up Action
- Patterns: Up to 8, On-Screen, User-Defined Configurable Patterns; Includes Pan, Tilt, Zoom, and Preset Functions
- Proportional Pan/Tilt: Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom
- Variable Scan Speed: Scan Speed Can Be Configurable Between 1 to 40°/sec
- Pan Motion Allows 0.1° to 150°/sec Pan Speed
- Configurable Limit Stops for Auto/Random/Frame Scan Modes
- Autosensing Protocol (Coaxitron®, RS-422 Pelco P and Pelco D, Sensormatic®, Vicon®); Accepts Other Control Protocols with Optional Translator Card
- Digital Position and Zoom Control and Feedback Through Pelco D Protocol
- Built-in Menu System for Setup of Configurable Functions
- "Auto Flip" Rotates Dome 180° at Bottom of Tilt Travel
- Configurable Zoom Speeds
- Freeze Frame During Presets

### 23X Models

- 64 Presets
- $\pm 0.1^\circ$  Preset Accuracy
- Multilingual Menus (English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech)
- RJ-45 Data Port for Software Update and Setup
- On-Screen Compass, Tilt, and Zoom Display
- Password Protection
- 400°/sec Pan Preset Speed and 200°/sec Tilt Preset Speed
- Rotating Discreet Liner with Sealed Fixed Bubble
- Window Blanking: Up to 4, Four-Sided, User-Defined Shapes
- 8 Zones (configurable in size) Can Be Labeled with up to 20 Characters Each or Set to Output Blank Video
- 1 Alarm Input
- 1 Auxiliary (Form C) Relay Output
- Configurable Locations of Labels and On-Screen Displays
- Patterns: 1 On-Screen, User-Defined Configurable Pattern; Includes Pan, Tilt, Zoom, and Preset Functions
- Proportional Pan/Tilt: Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom
- Variable Scan Speed: Scan Speed Can Be Configurable Between 1 to 40°/sec
- Pan Motion Allows 0.1° to 150°/sec Pan Speed
- Autosensing Protocol (Coaxitron, RS-422 Pelco P and Pelco D, Sensormatic, Vicon); Accepts Other Control Protocols with Optional Translator Card
- Digital Position and Zoom Control and Feedback through Pelco D Protocol
- Built-in Menu System for Setup of Configurable Functions
- "Auto Flip" Rotates Dome 180° at Bottom of Tilt Travel
- Freeze Frame During Presets

# TECHNICAL SPECIFICATIONS

## BACK BOX FEATURES

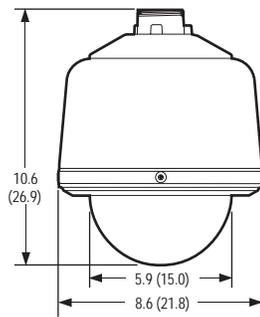

### In-Ceiling (Indoor)

- Built-in Memory Stores Camera/Dome Settings
- Single Back Box for Suspended or Hard Ceiling Applications
- Requires 5.25-Inch Space Above Ceiling and 3.25 Inches Below
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Suitable for Use in Environmental Air Handling Spaces

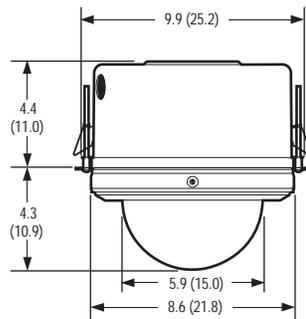

(ENVIRONMENTAL DOME WITH SUN SHROUD SHOWN)

### Standard and Environmental Pendant

- Standard and Environmental Models
- Built-in Memory Stores Camera/Dome Settings
- Standard Pendant Available in Black or Gray Finish; Environmental Pendant Gray Finish Only
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Environmental Model Includes Sun Shield, Fan, and Heater

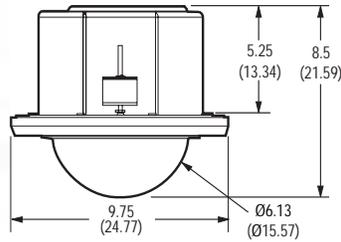

### Environmental In-Ceiling

- Built-in Memory Stores Camera/Dome Settings
- Single Back Box for Hard Ceiling Applications
- Requires 4.4-Inch Space Above Ceiling and 4.3 Inches Below
- Includes Heater and Fan
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# TECHNICAL SPECIFICATIONS

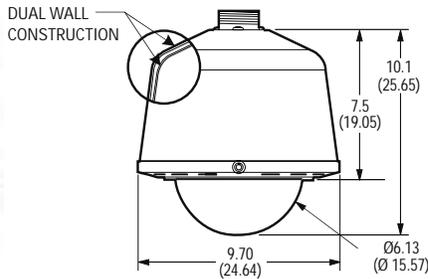

## BACK BOX FEATURES

### Heavy-Duty In-Ceiling (Indoor)

Available only with 27X and 35X models

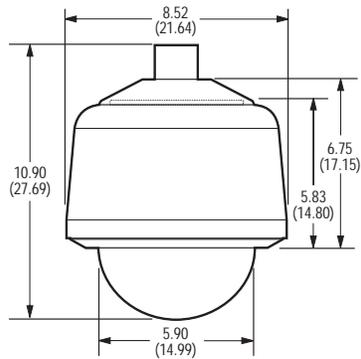

- Built-in Memory Stores Camera/Dome Settings
- Single Back Box for Hard Ceiling Applications
- Requires 5.25-Inch Space Above Ceiling and 3.25 Inches Below
- Quick Disconnect to Dome Drive
- Reinforced Mounting System
- Heavy-Duty Polycarbonate Dome Bubble
- Aluminum Trim Ring with Barrel-Type Key Locks
- Optional Protective Cage

### Heavy-Duty Pendant

Available only with 27X and 35X models

- Standard and Environmental Models
- Built-in Memory Stores Camera/Dome Settings
- Quick Disconnect to Dome Drive
- Dual Wall Construction
- Heavy-Duty Polycarbonate Dome Bubble
- Aluminum Trim Ring with Barrel-Type Key Locks
- Optional Protective Cage
- Environmental Model Includes Sun Shield, Fan, and Heater

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

### Stainless Steel Pendant

Available only with 27X and 35X models

- Standard and Environmental Models
- Built-in Memory Stores Camera/Dome Settings
- Quick Disconnect to Dome Drive
- All Stainless Steel Construction
- Includes Sun Shield, Fan, and Heater

# TECHNICAL SPECIFICATIONS

## GENERAL

Construction		
Back Box		
In-Ceiling	Aluminum	
Pendant	Aluminum	
Heavy-Duty	Aluminum	
Stainless Steel	316 stainless steel; gray, polyurethane powder coated finish	
Dome Drive	Aluminum, thermo plastic	
Lower Dome		
In-Ceiling	Acrylic	
Pendant	Acrylic	
Heavy-Duty	Polycarbonate, 0.09-inch thick	
Stainless Steel	Acrylic	
Light Attenuation		
Smoked	f/0.5 light loss	
Clear	Zero light loss	
Chrome	f/2.0 light loss	
Gold	f/2.0 light loss	
Cable Entry (back box)		
In-Ceiling	0.75-inch conduit fitting	
Pendant	Through 1.5-inch NPT pendant mount	
Weight (approximate)	<u>Unit</u>	<u>Shipping</u>
In-Ceiling	5.2 lb (2.4 kg)	8 lb (3.6 kg)
Environmental In-Ceiling	6.2 lb (2.8 kg)	10 lb (4.5 kg)
Standard Pendant	6.5 lb (3.0 kg)	11 lb (5.0 kg)
Environmental Pendant	7.6 lb (3.5 kg)	12 lb (5.4 kg)
Heavy-Duty In-Ceiling*	7.3 lb (3.3 kg)	12 lb (5.4 kg)
Heavy-Duty Pendant*	9.8 lb (4.5 kg)	16 lb (7.3 kg)
Heavy-Duty Environmental Pendant*	9.8 lb (4.5 kg)	16 lb (7.3 kg)
Stainless Steel	10.1 lb (4.6 kg)	16 lb (7.3 kg)
Environment		
In-Ceiling	Indoor	
Environmental In-Ceiling	Outdoor	
Pendant, Standard and Environmental	Indoor/outdoor	
Heavy-Duty In-Ceiling	Indoor	
Heavy-Duty Pendant, Standard & Environmental	Indoor/outdoor	
Stainless Steel	Indoor/outdoor	
Operating Temperature		
In-Ceiling	32° to 122°F (0° to 50°C)	
Standard Pendant	(Assumes no wind chill factor)	
Maximum	113°F (45°C) absolute maximum; 95°F (35°C) sustained maximum	
Minimum	25°F (-4°C) sustained minimum	
Environmental In-Ceiling and Environmental Pendant	(Assumes no wind chill factor)	
Maximum	140°F (60°C) absolute maximum; 122°F (50°C) sustained maximum	
Minimum	-60°F (-51°C) absolute minimum; prevents icing at sustained minimum of -50°F (-45°C); de-ices 0.1 inch (2.5 mm) within 3 hours after power-up	
Heavy-Duty In-Ceiling	32° to 122°F (0° to 50°C)	
Heavy-Duty Pendant	32° to 122°F (0° to 50°C) absolute maximum; 32° to 122°F (0° to 50°C) sustained maximum	
Heavy-Duty Environmental Pendant	(Assumes no wind chill factor)	
Maximum	140°F (60°C) absolute maximum; 122°F (50°C) sustained maximum	
Minimum	-60°F (-51°C) absolute minimum; minimal icing at sustained minimum of -50°F (-45°C); prevents icing at sustained minimum of -40°F (-40°C); de-ices 0.1 inch (2.5 mm) within 3 hours after power-up	

Stainless Steel	(Assumes no wind chill factor)
Maximum	140°F (60°C) absolute maximum; 122°F (50°C) sustained maximum
Minimum	-60°F (-51°C) absolute minimum; minimal icing at sustained minimum of -50°F (-45°C); prevents icing at sustained minimum of -40°F (-40°C); de-ices 0.1 inch (2.5 mm) within 3 hours after power-up
Effective Projected Area (EPA)	20.5 square inches (without mount); 47 square inches (with IWM Series mount)

## MECHANICAL

(Dome Drive Only)

Pan Movement	360° continuous pan rotation
Vertical Tilt	Unobstructed +2° to -92°
Manual Pan/Tilt Speeds	
Pan	0.1° to 80°/sec manual operation, 150°/sec Turbo
Tilt	0.1° to 40°/sec manual operation
Preset Speeds	
Pan	400°/sec
Tilt	200°/sec
	For variable-speed operation, an appropriate controller is required. (With nonvariable speed control, Spectra IV IP pan/tilt speed is 20°/sec)

## AUDIO

Streaming	Bidirectional: full or half duplex
Input/Output	Terminal block, analog for microphone and speaker; 600-ohm differential; 1 Vp-p maximum signal level
Compression	G.711 PCM 8 bit, 8 kHz mono at 64 kbit/s

## ELECTRICAL

Ports	RJ-45 connector for 100Base-TX Auto MDI/MDI-X Autonegotiate/Manual setting
Cabling Type	Cat5 or better for 100Base-TX
Input Voltage	18 to 32 VAC; 24 VAC nominal 22 to 27 VDC; 24 VDC nominal
Input Power	
24 VAC	23 VA nominal (without heater); 73 VA nominal (with heater)
24 VDC	0.7 A nominal (without heater); 3 A nominal (with heater)
Fuse	1.25 A
Auxiliary Outputs	2
Alarm Inputs	7

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class B
  - FCC, Class B
  - UL/cUL Listed
  - C-Tick
  - U.S. Patents 5,931,432; 6,793,415 B2; 6,802,656 B2; 6,821,222 B2; 7,161,615 B2
- Meets the following standards:
- NEMA Type 4X, IP66 when installed properly (BB4E-F-E, BB4E-PB, BB4E-PG, BB4E-PG-E, BB4EHD-PG, BB4EHD-PG-E, and BB4E-PSG-E)
  - NEMA Type 1, IP40 (BB4E-F and BB4EHD-F)

\*Add 2 lb (0.90 kg) to the total weight if the system includes a lower dome cage.

# RELATED PRODUCTS

## OPTIONAL ACCESSORIES

HD-KEYS	1 set of keys for heavy-duty lower dome
IPS-CABLE	Remote monitor cable and software kit consisting of the Spectra IV remote monitor interface cable and necessary software for use with a PC; refer to <a href="http://www.pelco.com">www.pelco.com</a> for a list of compatible devices
IPS-RDPE-2	Remote data port; 24 VAC, wall/pole mount video/data breakout box; allows ground-level control/configuration when used with the IPS-CABLE

## RECOMMENDED MOUNTS

### In-Ceiling Domes

SD5-P	2' x 2' drop ceiling panel, aluminum construction; replaces 2' x 2' ceiling tile
SCA1	Support rails for BB4N-F; for use in ceiling tile applications

### Pendant Domes

BB5-PCA-BK	Pendant conduit adapter, black
BB5-PCA-GY	Pendant conduit adapter, gray
IWM Series	Wall mount, with or without integral 24 VAC, 100 VA transformer; black or gray finish; can be adapted for corner, parapet or pole application
MRCA	Ceiling mount, black
PP4348	Parapet roof mount
PP350/PP351	Parapet wall/roof mount
SWM Series	Compact wall mount, black or gray finish; can be adapted for corner or pole applications
IDM4012SS	Stainless steel wall mount with feedthrough capabilities

## RECOMMENDED POWER SUPPLIES

MCS Series	Indoor, 24 VAC power supply
WCS Series	Outdoor, 24 VAC power supply

*Refer to individual power supply specifications for more information.*

\*For PAL and CCIR models add "-X" suffix to part number (for example, BB4E-PG-E-X).

<sup>†</sup>Environmental dome systems include a heater, fan, and sun shield.

# SYSTEM AND COMPONENT MODELS

## COMPONENT MODEL NUMBERS

Back Box*		Dome Drive*		Lower Dome <sup>†</sup>	
BB4E-F	In-ceiling, black, with back box memory	DD423	Day/Night (NTSC) camera (23X)	LD5F-0	Smoked, in-ceiling
BB4E-F-E	In-ceiling, black, environmental, with back box memory	DD427	Day/Night (NTSC) camera (27X)	LD5F-1	Clear, in-ceiling
BB4E-PB	Pendant mount, black, standard, with back box memory	DD4CBW35	Day/Night (NTSC) camera (35X)	LD5F-2	Chrome, in-ceiling
BB4E-PG	Pendant mount, gray, standard, with back box memory			LD5F-3	Gold, in-ceiling
BB4E-PG-E <sup>‡</sup>	Pendant mount, gray, environmental, with back box memory			LD53PB-0	Smoked, pendant, black
				LD53PB-1	Clear, pendant, black
				LD53PB-2	Chrome, pendant, black <sup>§</sup>
				LD53PB-3	Gold, pendant, black <sup>§</sup>
BB4EHD-F	Heavy-duty, in-ceiling, gray, with back box memory			LD53HDF-1	Clear, in-ceiling, heavy-duty
BB4EHD-PG	Heavy-duty, pendant, gray, with back box memory			LD53HDCF-1	Clear, in-ceiling, heavy-duty with cage
BB4EHD-PG-E <sup>‡</sup>	Heavy-duty, environmental pendant, gray, with back box memory			LD53HDPB-1	Clear, pendant, heavy-duty
				LD53HDCPB-1	Clear, pendant, heavy-duty, with cage
BB4E-PSG-E <sup>‡</sup>	Stainless steel, environmental pendant, gray 316 SS, with back box memory			LD53PSB-0	Smoked, pendant, black trim ring, 316 SS
		LD53PSB-1	Clear, pendant, black trim ring, 316 SS		

**Note:** For environmental applications you must order an environmental back box.

\*For PAL and CCIR models add "-X" suffix to part number (for example, BB4E-PG-E-X).

<sup>†</sup>Environmental dome systems include a heater, fan, and sun shield.

<sup>‡</sup>For environmental pendant back boxes, use the pendant lower domes.

<sup>§</sup>Not recommended for outdoor use due to possible light reflections.

# Spectra® IV IP Series Network Dome System

## DIGITAL PAN/TILT/ZOOM HIGH-SPEED DOME

### Product Features

- Ability to Control and Monitor Video Over IP Networks
- Simultaneous IP and Analog Video and Control
- 3 Simultaneous Video Streams: Dual MPEG-4 and MJPEG
- Supported Protocols: TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, and NTP
- Multilevel Password Protection
- 3 Autofocus, High Resolution Integrated Camera/Optics Packages
- Horizontal Zone and Window Blanking
- Sensitivity Down to 0.00018 Lux (35X Models)
- On-Screen Compass and Tilt Display
- Web Browser, Endura®, and Third-Party Network Interface
- Bidirectional Full-Duplex Audio

**Spectra® IV IP** dome systems incorporate all of the features and functions of Spectra IV (including analog), while allowing you to control and monitor video over an IP network from virtually anywhere in the world. **Spectra IV IP** is a high-speed dome with a built-in 100Base-TX network interface for live streaming to any network application. The dome system also features open architecture connectivity for third-party software recording solutions allowing integration into virtually any IP-based system. It is also compatible with Digital Sentry® video management systems. As with all Pelco IP camera solutions, **Spectra IV IP** is Endura Enabled™ to record, manage, configure, and view multiple live streams. When connected to an Endura® network-based video security system, the dome system has access to EnduraStor™ and EnduraView™ for optimized image quality and bandwidth efficiency.

**Spectra IV IP** is one of the only solutions on the market that allows you to view and control analog video while viewing, recording, and controlling network IP video. There is no need to abandon your current analog infrastructure if you are making the move to network video as a recording solution. Continue to monitor and control video in the analog domain while recording video in the network domain, and let **Spectra IV IP's** professional compression method do the work for you without the need for external encoders.

**Spectra IV IP** features the same ease of installation and ease of maintenance that you have come to expect from Spectra IV. Each dome system consists of a back box, a dome drive, and a lower dome. These three system components are interchangeable with other **Spectra IV IP** dome systems, making retrofitting and application adjustments simple.

As with all Spectra dome systems, **Spectra IV IP** features several back box options. All back boxes feature built-in memory, which can be used to store camera and location-specific dome settings, including labels, presets, patterns, and zones.

All cameras in **Spectra IV IP** dome drives feature an EXview HAD™ imager for increased sensitivity and LowLight™ technology allowing the cameras to compensate for scenes where minimal light is present. Both the 27X and the 35X cameras feature built-in motion detection and advanced 128X wide dynamic range (WDR) that enables the system to compensate for scenes where dramatic contrasts in lighting are present. The 35X day/night camera's electronic image stabilization digitally reduces blurring of the camera image due to vibration caused by external sources, such as wind and traffic.

## VIDEO

Analog	NTSC/PAL	
Digital Compression	MJPEG, MPEG-4 (available only with Microsoft® Internet Explorer®)	
Video Streams	3, simultaneous	
Video Resolutions	NTSC	PAL
4CIF	704 x 480	704 x 576
2CIF	704 x 240	704 x 288
CIF	352 x 240	352 x 288
QCIF	176 x 120	176 x 144
Bit Rate Configurable	30 ips, 2 Mbps for primary stream, 1 Mbps for secondary stream; implements EnduraView	
MPEG-4	15 ips, 3 Mbps, MJPEG	
MJPEG	Pelco Device Utility interface for viewing	
Web User Interface	HTTP, requires Java Runtime Environment (JRE™)	
Users	5 simultaneous users MJPEG and/or MPEG-4 unicast; unlimited number of users using multicast (MPEG-4 only)	
Minimum System Requirements		
Processor	Intel® Pentium® 4 microprocessor, 1.6 GHz	
Operating System	Windows® 98, Windows 2000, Windows XP (or later), or Mac® OS X 10.3.9 (or later)	
Memory	512 MB RAM	
Network Interface Card	100 megabits	
Web Browser	Internet Explorer 5.5 (or later); Mozilla® Firefox® 1.5 (or later)	
Monitor	Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution	
Firmware Upgrade	Pelco Device Utility or Endura Application	
Supported Protocols	TCP/IP, UDP/IP (unicast, multicast IGMP), UPnP, DNS, DHCP, RTP, NTP	

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

## DOMED DRIVE FEATURES

### 35X and 27X Models

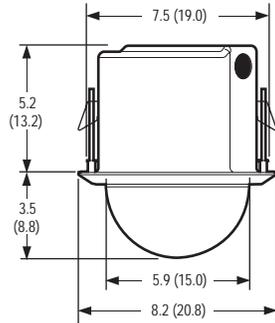

- 256 Presets
- $\pm 0.1^\circ$  Preset Accuracy
- Electronic Image Stabilization (35X model)
- Image Enhancement (35X model)
- Multilingual Menus (English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech)
- RJ-45 Data Port for Software Update and Setup
- On-Screen Compass, Tilt, and Zoom Display
- Password Protection
- $400^\circ/\text{sec}$  Pan Preset Speed and  $200^\circ/\text{sec}$  Tilt Preset Speed
- Rotating Discreet Liner with Sealed Fixed Bubble
- Window Blanking: Up to 8, Four-Sided, User-Defined Shapes
- 8 Zones (configurable in size) Can Be Labeled with up to 20 Characters Each or Set to Output Blank Video
- 7 Alarm Inputs
- 1 Auxiliary (Form C) Relay Output and 1 Open Collector Auxiliary Output (can be alternately programmed to operate upon alarm)
- Configurable Locations of Labels and On-Screen Displays
- Action on Alarm: Alarms Can Be Individually Programmed for 3 Priority Levels, to Initiate a Stored Pattern, or to Go to an Associated Preset When Received
- Resume After Alarm: Allows the Dome to Return to a Previously Programmed State After Alarm Acknowledgement or to its Previous Position Before Alarm
- Multiple Park and Power-Up Action
- Patterns: Up to 8, On-Screen, User-Defined Configurable Patterns; Includes Pan, Tilt, Zoom, and Preset Functions
- Proportional Pan/Tilt: Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom
- Variable Scan Speed: Scan Speed Can Be Configurable Between  $1\text{-}40^\circ/\text{sec}$
- Pan Motion Allows  $0.1^\circ$  to  $150^\circ/\text{sec}$  Pan Speed
- Configurable Limit Stops for Auto/Random/Frame Scan Modes
- Autosensing Protocol (Coaxitron<sup>®</sup>, RS-422 Pelco P and Pelco D, Sensormatic<sup>®</sup>, Vicon<sup>®</sup>): Accepts Other Control Protocols with Optional Translator Card
- Digital Position and Zoom Control and Feedback Through Pelco D Protocol
- Built-in Menu System for Setup of Configurable Functions
- "Auto Flip" Rotates Dome  $180^\circ$  at Bottom of Tilt Travel
- Configurable Zoom Speeds
- Freeze Frame During Presets
- Low Lux Noise Reduction

### 23X Models

- 64 Presets
- $\pm 0.1^\circ$  Preset Accuracy
- Multilingual Menus (English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech)
- RJ-45 Data Port for Software Update and Setup
- On-Screen Compass, Tilt, and Zoom Display
- Password Protection
- $400^\circ/\text{sec}$  Pan Preset Speed and  $200^\circ/\text{sec}$  Tilt Preset Speed
- Rotating Discreet Liner with Sealed Fixed Bubble
- Window Blanking: Up to 4, Four-Sided, User-Defined Shapes
- 8 Zones (configurable in size) Can Be Labeled with up to 20 Characters Each or Set to Output Blank Video
- 1 Alarm Input
- 1 Auxiliary (Form C) Relay Output
- Configurable Locations of Labels and On-Screen Displays
- Patterns: 1 On-Screen, User-Defined Configurable Pattern; Includes Pan, Tilt, Zoom, and Preset Functions
- Proportional Pan/Tilt: Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom
- Variable Scan Speed: Scan Speed Can Be Configurable Between  $1\text{-}40^\circ/\text{sec}$
- Pan Motion Allows  $0.1^\circ$  to  $150^\circ/\text{sec}$  Pan Speed
- Autosensing Protocol (Coaxitron, RS-422 Pelco P and Pelco D, Sensormatic, Vicon): Accepts Other Control Protocols with Optional Translator Card
- Digital Position and Zoom Control and Feedback through Pelco D Protocol
- Built-in Menu System for Setup of Configurable Functions
- "Auto Flip" Rotates Dome  $180^\circ$  at Bottom of Tilt Travel
- Freeze Frame During Presets

# TECHNICAL SPECIFICATIONS

## BACK BOX FEATURES

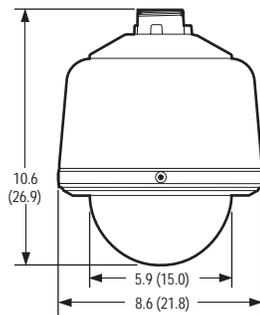

### In-Ceiling (Indoor)

- Built-in Memory Stores Camera/Dome Settings
- Single Back Box for Suspended or Hard Ceiling Applications
- Requires 5.25-Inch Space Above Ceiling and 3.25 Inches Below
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Suitable for Use in Environmental Air Handling Spaces

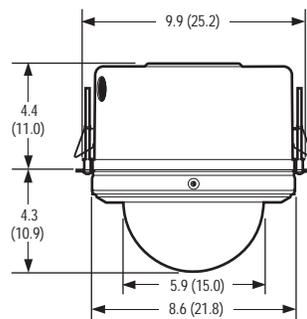

(ENVIRONMENTAL DOME WITH SUN SHROUD SHOWN)

### Standard and Environmental Pendant

- Standard and Environmental Models
- Built-in Memory Stores Camera/Dome Settings
- Standard Pendant Available in Black or Gray Finish; Environmental Pendant Gray Finish Only
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Environmental Model Includes Sun Shield, Fan, and Heater

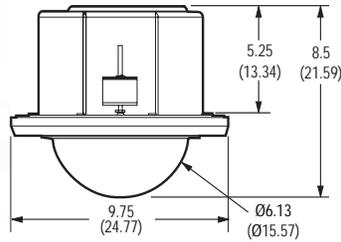

### Environmental In-Ceiling

- Built-in Memory Stores Camera/Dome Settings
- Single Back Box for Hard Ceiling Applications
- Requires 4.4-Inch Space Above Ceiling and 4.3 Inches Below
- Includes Heater and Fan
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# TECHNICAL SPECIFICATIONS

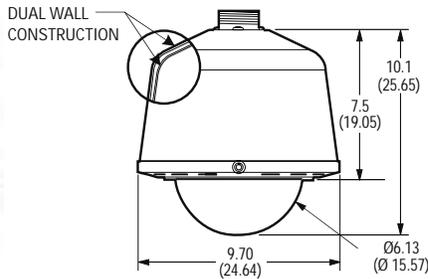

## BACK BOX FEATURES

### Heavy-Duty In-Ceiling (Indoor)

Available only with 27X and 35X models

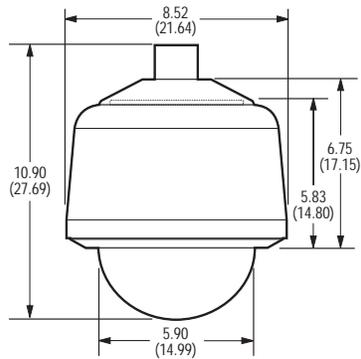

- Built-in Memory Stores Camera/Dome Settings
- Single Back Box for Hard Ceiling Applications
- Requires 5.25-Inch Space Above Ceiling and 3.25 Inches Below
- Quick Disconnect to Dome Drive
- Reinforced Mounting System
- Heavy-Duty Polycarbonate Dome Bubble
- Aluminum Trim Ring with Barrel-Type Key Locks
- Optional Protective Cage

### Heavy-Duty Pendant

Available only with 27X and 35X models

- Standard and Environmental Models
- Built-in Memory Stores Camera/Dome Settings
- Quick Disconnect to Dome Drive
- Dual Wall Construction
- Heavy-Duty Polycarbonate Dome Bubble
- Aluminum Trim Ring with Barrel-Type Key Locks
- Optional Protective Cage
- Environmental Model Includes Sun Shield, Fan, and Heater

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

### Stainless Steel Pendant

Available only with 27X and 35X models

- Standard and Environmental Models
- Built-in Memory Stores Camera/Dome Settings
- Quick Disconnect to Dome Drive
- All Stainless Steel Construction
- Includes Sun Shield, Fan, and Heater

## GENERAL

Construction		
Back Box		
In-Ceiling	Aluminum	
Pendant	Aluminum	
Heavy-Duty	Aluminum	
Stainless Steel	316 stainless steel; gray, polyurethane powder coated finish	
Dome Drive		
Lower Dome		
In-Ceiling	Acrylic	
Pendant	Acrylic	
Heavy-Duty	Polycarbonate, 0.09-inch thick	
Stainless Steel	Acrylic	
Light Attenuation		
Smoked	f/0.5 light loss	
Clear	Zero light loss	
Chrome	f/2.0 light loss	
Gold	f/2.0 light loss	
Cable Entry (back box)		
In-Ceiling	0.75-inch conduit fitting	
Pendant	Through 1.5-inch NPT pendant mount	
Weight (approximate)	Unit	Shipping
In-Ceiling	5.2 lb (2.4 kg)	8 lb (3.6 kg)
Environmental In-Ceiling	6.2 lb (2.8 kg)	10 lb (4.5 kg)
Standard Pendant	6.5 lb (3.0 kg)	11 lb (5.0 kg)
Environmental Pendant	7.6 lb (3.5 kg)	12 lb (5.4 kg)
Heavy-Duty In-Ceiling*	7.3 lb (3.3 kg)	12 lb (5.4 kg)
Heavy-Duty Pendant*	9.8 lb (4.5 kg)	16 lb (7.3 kg)
Heavy-Duty Environmental Pendant*	9.8 lb (4.5 kg)	16 lb (7.3 kg)
Stainless Steel	10.1 lb (4.6 kg)	16 lb (7.3 kg)
Environment		
In-Ceiling	Indoor	
Environmental In-Ceiling	Outdoor	
Pendant, Standard and Environmental	Indoor/outdoor	
Heavy-Duty In-Ceiling	Indoor	
Heavy-Duty Pendant, Standard & Environmental	Indoor/outdoor	
Stainless Steel	Indoor/outdoor	
Operating Temperature		
In-Ceiling	32° to 122°F (0° to 50°C)	
Standard Pendant	(Assumes no wind chill factor)	
Maximum	113°F (45°C) absolute maximum; 95°F (35°C) sustained maximum	
Minimum	25°F (-4°C) sustained minimum	
Environmental In-Ceiling and Environmental Pendant	(Assumes no wind chill factor)	
Maximum	140°F (60°C) absolute maximum; 122°F (50°C) sustained maximum	
Minimum	-60°F (-51°C) absolute minimum; prevents icing at sustained minimum of -50°F (-45°C); de-ices 0.1 inch (2.5 mm) within 3 hours after power-up	
Heavy-Duty In-Ceiling	32° to 122°F (0° to 50°C)	
Heavy-Duty Pendant	32° to 122°F (0° to 50°C) absolute maximum; 32° to 122°F (0° to 50°C) sustained maximum	
Heavy-Duty Environmental Pendant	(Assumes no wind chill factor)	
Maximum	140°F (60°C) absolute maximum; 122°F (50°C) sustained maximum	
Minimum	-60°F (-51°C) absolute minimum; minimal icing at sustained minimum of -50°F (-45°C); prevents icing at sustained minimum of -40°F (-40°C); de-ices 0.1 inch (2.5 mm) within 3 hours after power-up	

Stainless Steel	(Assumes no wind chill factor)
Maximum	140°F (60°C) absolute maximum; 122°F (50°C) sustained maximum
Minimum	-60°F (-51°C) absolute minimum; minimal icing at sustained minimum of -50°F (-45°C); prevents icing at sustained minimum of -40°F (-40°C); de-ices 0.1 inch (2.5 mm) within 3 hours after power-up
Effective Projected Area (EPA)	20.5 square inches (without mount) 47 square inches (with IWM Series mount)

## MECHANICAL

### (Dome Drive Only)

Pan Movement	360° continuous pan rotation
Vertical Tilt	Unobstructed +2° to -92°
Manual Pan/Tilt Speeds	
Pan	0.1° to 80°/sec manual operation, 150°/sec Turbo
Tilt	0.1° to 40°/sec manual operation
Preset Speeds	
Pan	400°/sec
Tilt	200°/sec
	For variable-speed operation, an appropriate controller is required. (With nonvariable speed control, Spectra IV IP pan/tilt speed is 20°/sec)

## AUDIO

Streaming	Bidirectional: full or half duplex
Input/Output	Terminal block, analog for microphone and speaker; 600-ohm differential; 1 Vp-p maximum signal level
Compression	G.711 PCM 8 bit, 8 kHz mono at 64 kbit/s

## ELECTRICAL

Ports	RJ-45 connector for 100Base-TX Auto MDI/MDI-X Autonegotiate/Manual setting
Cabling Type	Cat5 or better for 100Base-TX
Input Voltage	18 to 32 VAC; 24 VAC nominal 22 to 27 VDC; 24 VDC nominal
Input Power	
24 VAC	23 VA nominal (without heater); 73 VA nominal (with heater)
24 VDC	0.7 A nominal (without heater); 3 A nominal (with heater)
Fuse	1.25 A
Auxiliary Outputs	2
Alarm Inputs	7

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class B
- FCC, Class B
- UL/cUL Listed
- C-Tick
- U.S. Patents 5,931,432; 6,793,415 B2; 6,802,656 B2; 6,821,222 B2; 7,161,615 B2

Meets the following standards:

- NEMA Type 4X, IP66 when installed properly (BB4N-F-E, BB4N-PB, BB4N-PG, BB4N-PG-E, BB4NHD-PG, BB4NHD-PG-E, and BB4N-PSG-E)
- NEMA Type 1, IP40 (BB4N-F and BB4NHD-F)

\*Add 2 lb (0.90 kg) to the total weight if the system includes a lower dome cage.

# RELATED PRODUCTS

## OPTIONAL ACCESSORIES

HD-KEYS	1 set of keys for heavy-duty lower dome
IPS-CABLE	Remote monitor cable and software kit consisting of the Spectra IV remote monitor interface cable and necessary software for use with a PC. Refer to <a href="http://www.pelco.com">www.pelco.com</a> for a list of compatible devices.
IPS-RDPE-2	Remote data port. 24 VAC, wall/pole mount video/data breakout box. Allows ground-level control/programming when used with the IPS-CABLE.

## RECOMMENDED MOUNTS

### In-Ceiling Domes

SD5-P	2' x 2' drop ceiling panel, aluminum construction; replaces 2' x 2' ceiling tile
SCA1	Support rails for BB4N-F; for use in ceiling tile applications

### Pendant Domes

BB5-PCA-BK	Pendant conduit adapter, black
BB5-PCA-GY	Pendant conduit adapter, gray
IWM Series	Wall mount, with or without integral 24 VAC, 100 VA transformer; black or gray finish; can be adapted for corner, parapet or pole application
MRCA	Ceiling mount, black
PP4348	Parapet roof mount
PP350/PP351	Parapet wall/roof mount
SWM Series	Compact wall mount, black or gray finish; can be adapted for corner or pole applications
IDM4012SS	Stainless steel wall mount with feedthrough capabilities

## RECOMMENDED POWER SUPPLIES

MCS Series	Indoor, 24 VAC power supply
WCS Series	Outdoor, 24 VAC power supply

*Refer to individual power supply specifications for more information.*

# Spectra® Mini IP Network Dome System

## DIGITAL, INDOOR, SURFACE MOUNT/IN-CEILING

### Product Features

- Ability to Control and Monitor Video Over IP Network
- 3 Simultaneous Video Streams
  - Dual MPEG-4 (30 ips)
  - Scalable MJPEG
- Supported Protocols: TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, NTP
- Power over Ethernet (PoE) Compatible
- Single Model for Surface Mount and In-Ceiling Applications
- Autofocus, High Resolution Integrated Color Camera/Optics Package
- 80X Zoom (10X Optical, 8X Digital)
- Zone Blanking
- 64 Presets
- 0.5° Preset Accuracy
- 140°/Second Pan Speed
- 360° Continuous Pan
- Rotating Discreet Liner
- Bidirectional Full-Duplex Audio

SURFACE MOUNT APPLICATION

RECESSED CEILING APPLICATION

**Spectra® Mini IP** dome systems incorporate all of the features and functions of Spectra Mini, while allowing you to control and monitor video over an IP network from virtually anywhere in the world.

**Spectra Mini IP** is a miniature dome with a built-in 100Base-TX network interface for live streaming to a standard Web browser. The dome system features open architecture connectivity for third-party software recording solutions allowing integration into virtually any IP-based system.

The **Spectra Mini IP** is compatible with Integral Digital Sentry® video management systems. The dome system is also Endura Enabled™ to record, manage, configure, and view multiple live streams. When connected to an Endura® network-based video security system, the dome system has access to EnduraStor™ and EnduraView™ for optimized image quality and bandwidth efficiency.

**Spectra Mini IP** features the same ease of installation and ease of maintenance that you have come to expect from Spectra Mini. The easy-to-install dome system can be mounted to the surface of ceilings or recessed into hard ceilings and suspended tile ceilings. **Spectra Mini IP** is IEEE 802.3af PoE compatible, which supplies power to the dome system through the network. If PoE is not available, the unit is prewired for 24 VAC.

Variable speed capabilities of **Spectra Mini IP** range from a fast pan motion of 140 degrees per second to a smooth “creep” speed of 0.4 degrees per second. The system is capable of continuous 360 degrees rotation, and it has an autoflip feature that allows the dome to rotate 180 degrees and reposition itself for uninterrupted viewing of any subject that passes directly beneath the dome’s location.

by Schneider Electric

C3446 / REVISED 8-3-09

# TECHNICAL SPECIFICATIONS

## ADDITIONAL PRODUCT FEATURES

- 64 Presets: 53 User Definable and 11 Predefined
- Multilingual Menus (English, Spanish, Portuguese, Italian, French, and German)
- Alternate Language Files (includes Russian, Polish, Turkish, and Czech) Available as Optional Software Upload
- On-Screen Compass, Tilt, and Zoom Display
- Password Protection
- 140°/sec Pan Preset Speed and 80°/sec Tilt Preset Speed
- Rotating Discreet Liner
- 4 Zones (programmable in size) Can Be Labeled with up to 20 Characters Each or Set to Output Blank Video
- Programmable Locations of Labels and On-Screen Displays
- 1 On-Screen, User-Defined Programmable Pattern. Includes Pan, Tilt, Zoom, and Preset Functions
- 1 Programmable Window Blanking Area
- Proportional Pan and Tilt: Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom
- Variable Scan Speed: Scan Speed Can Be 3, 6, or 12°/sec
- Pan Motion Allows 0.4° to 140°/sec Pan Speed
- Programmable Limit Stops for Auto/Random/Frame Scan Modes
- Built-in Menu System for Setup of Programmable Functions
- Auto Flip Rotates Dome 180° at Bottom of Tilt Travel
- Programmable Zoom Speeds
- 1 Alarm Input
- 1 Auxiliary Relay Output

## VIDEO

Digital Compression	MJPEG, MPEG-4 (available only with Microsoft® Internet Explorer®)	
Video Streams	3, simultaneous	
Video Resolutions	<u>NTSC</u>	<u>PAL</u>
4CIF	704 x 480	704 x 576
2CIF	704 x 240	704 x 288
CIF	352 x 240	352 x 288
QCIF	176 x 120	176 x 144
Bit Rate Configurable	30 ips, 2 Mbps for primary stream, 1 Mbps for secondary stream; implements EnduraView	
MPEG-4	15 ips, 3 Mbps, MJPEG	
Web User Interface	Pelco Device Utility	
	For viewing HTTP, requires Java Runtime Environment (JRE™)	
Internet Explorer	For viewing and control, requires ActiveX®	
Firefox®	For viewing and control	
Users	5 simultaneous users MJPEG or MPEG-4 unicast; unlimited number of users using multicast (MPEG-4 only)	
Minimum System Requirements		
Processor	Intel® Pentium® 4 microprocessor, 1.6 GHz	
Operating System	Microsoft® Windows® 98, Windows 2000, Windows XP (or later), or Mac® OS X 10.4 (or later)	
Memory	512 MB RAM	
Network Interface Card	100 megabits, minimum	
Monitor	Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution	
Web Browser	Internet Explorer® 5.5 (or later) or Mozilla® Firefox® 1.5 (or later)	
Firmware Upgrade	Pelco Device Utility or Endura Application	
Supported Protocols	TCP/IP, UDP/IP (unicast, multicast IGMP), UPnP, DNS, DHCP, RTP, NTP	

## GENERAL

Construction	Alodined cast aluminum
Top Cap	ABS plastic
Dome Drive	
Trim Ring and Surface Mount Ring	ABS plastic
Bubble	Acrylic
Finish	White or black
Light Attenuation	
Smoked	f/0.5 light loss
Clear	Zero light loss
Cable Entry	RJ45-10 connector for PoE and 100Base-TX, auto MDI/MDI-X, autonegotiate; 2-position 24 VAC input terminal connector
Cable Type	Cat5 or better for 100Base-TX
Environment	Indoor
Operating Temperature	32° to 122°F (0° to 50°C)
Unit Weight	1.88 lb (0.85 kg)
Shipping Weight	4 lb (1.81 kg)

## MECHANICAL

Pan Movement	360° continuous pan rotation
Vertical Tilt	Unobstructed +2° to -92°
Manual Pan/Tilt Speeds	
Pan	0.4° to 80°/sec manual operation, 100°/sec turbo
Tilt	0.7° to 40°/sec manual operation
Preset Speeds	
Pan	140°/sec
Tilt	80°/sec

**Note:** For variable speed operation, an appropriate controller is required.

## ELECTRICAL

Input Voltage/Amps	18 to 30 VAC, 24 VAC nominal; 0.75 A, 50/60 Hz nominal
Input Power	18 VA nominal
PoE	IEEE 802.3af class 3

## AUDIO

Streaming	Bidirectional: full or half duplex
Input/Output	Terminal block, analog for microphone and speaker; 600-ohm differential; 1 Vp-p maximum signal level
Compression	G.711 PCM 8 bit, 8 kHz mono at 64 kbit/s

# TECHNICAL SPECIFICATIONS

## CAMERA

Signal Format	NTSC/PAL
Scanning System	2:1 interlace
Image Sensor	1/4-inch interline CCD
Effective Pixels	768 (H) x 494 (V)
NTSC	752 (H) x 582 (V)
PAL	
Minimum Illumination	3.0 lux
White Balance	Automatic with manual override
Shutter Speed	Automatic (electronic iris)/manual 1/60-1/30,000
Gain Control	Automatic with manual override

## LENS

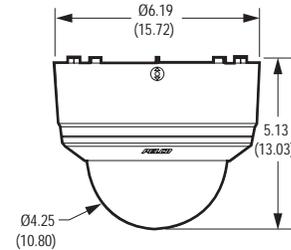

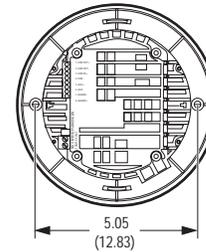

Lens	f/1.8 (f= 4.2- 42 mm optical) 10X optical zoom, 8X digital zoom
Zoom Speed (optical range)	1.5/2.5/4.3 seconds
Horizontal Angle of View	46.4° wide zoom; 5.0° telephoto zoom
Focus	Automatic with manual override
Iris Control	Automatic with manual override

SPECTRA MINI DOME SHOWN WITH  
OPTIONAL SWM4-W PENDANT-WALL MOUNT

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

### SPM4-W/SPM4-B

Mounting Method	Attach mount to 0.75-inch NPT pipe or 20 mm threaded conduit; attach Spectra Mini IP dome with hardware supplied with mount
Construction	ABS plastic
Finish	
SPM4-W	White
SPM4-B	Black
Unit Weight	0.30 lb (0.14 kg)
Shipping Weight	2 lb (0.91 kg)

### SWM4-W/SWM4-B

Mounting Method	Install adapter plate on wall or junction box using appropriate hardware; attach wall mount to adapter plate; attach Spectra Mini IP dome with hardware supplied with mount
Construction	ABS plastic, aluminum
Finish	
SWM4-W	White
SWM4-B	Black
Unit Weight	0.72 lb (0.33 kg)
Shipping Weight	2 lb (0.91 kg)

# IS20/IS21 Series Camclosure® 2 Camera System

## INDOOR MINI DOME, SURFACE AND FLUSH MOUNT

### Product Features

- Fully Integrated Indoor Enclosure with Camera and Lens
- 3 Camera Options
  - Day/Night Wide Dynamic Range (WDR)
  - Day/Night High Resolution
  - High Resolution Color
- Varifocal Lens
- Shipped Completely Assembled, Easy to Install
- 24 VAC or 12 VDC Operation, Autosensing
- Manual, 3-Axis (Pan/Tilt/Rotation) Positioning Allows Adjustment for Optimum Camera Rotation and Placement
- Service Connector for Video Output
- Available in Surface or Flush Mount Models with Smoked or Clear Domes

The **IS20/IS21 Series Camclosure® 2 Camera System** integrates a camera and lens package into a small, versatile indoor enclosure that can be mounted directly to, or recessed into, a ceiling or wall. The **IS20/IS21 Series** features a three-axis camera and lens positioning system that is capable of a wide variety of pan and tilt angles.

The **IS20/IS21 Series** offers three high resolution camera options suitable for a variety of indoor environments:

- **Day/night wide dynamic range (WDR):** Features a high resolution (650 TVL) color camera with auto iris, varifocal lens, and auto back focus. Application examples include environments with difficult lighting that require extremely high sensitivity and dynamic range.
- **True day/night:** Features a high resolution (540 TVL) color camera with auto iris and varifocal lens. Application examples include environments that require color images during the day but use monochrome images at night with or without supplemental IR lighting.
- **Color:** Features a high resolution (540 TVL) color camera with auto iris, simple day/night functions, and varifocal lens. For use in all general-purpose environments.

All cameras in the **IS20/IS21 Series** offer adaptive black stretch (ABS) to provide optimal image quality in dark areas by increasing the visibility in those areas without sacrificing the image quality in brighter areas. In addition, in some cameras the **IS20/IS21 Series**

features technology, ensuring the best picture quality even in challenging environments. The day/night WDR camera is equipped with auto back focus (ABF) and intelligent motion detection. The ABF feature automatically adjusts the cameras CCD position when installing or changing from color to black-white mode, saving time during setup and optimizing focus. Using advanced motion analytics provides the ability to accurately detect motion within a targeted area. The analytics include three behaviors: motion detection, object abandonment/removal, and scene change detection.

The **IS20/IS21 Series** is shipped completely assembled, making installation fast and easy. To surface-mount the unit, remove it from the box, attach it to the mounting surface, and connect video and power. For recessed installations, use the supplied mounting bracket to install the unit inside a ceiling or wall.

The **IS20/IS21 Series** also features a complete line of optional mounting accessories. Optional pendant and wall mounts are available for all models, which allow the cameras to be adapted for a variety of installations. In addition, the flush mount kits allow surface mount cameras to be installed in a ceiling if the installation type should change after the original deployment.

## RUGGED OUTDOOR MINI DOME, SURFACE AND FLUSH MOUNT

### Product Features

- Heavy Duty Outdoor Enclosure with Camera and Lens
- 3 Camera Options
  - Day/Night Wide Dynamic Range (WDR)
  - Day/Night High Resolution
  - High Resolution Color
- Varifocal Lens
- Shipped Completely Assembled, Easy to Install
- 24 VAC or 12 VDC Operation, Autosensing
- Manual, 3-Axis (Pan/Tilt/Rotation) Positioning Allows Adjustment for Optimum Camera Rotation and Placement
- Service Connector for Video Output
- Available in Surface or Flush Mount Models with Smoked or Clear Domes
- Built-in Heater for Outdoor Environments

The **IS50/IS51 Series Camclosure® 2 Camera System** integrates a camera and lens package into a small, versatile rugged enclosure that can be mounted directly to, or recessed into, a ceiling or wall. The **IS50/IS51 Series** features a three-axis camera and lens positioning system that is capable of a wide variety of pan and tilt angles.

The **IS50/IS51 Series** offers three high resolution camera options suitable for a variety of outdoor environments:

- **Day/night wide dynamic range (WDR):** Features a high resolution (650 TVL) color camera with auto iris, varifocal lens, and auto back focus. Application examples include environments with difficult lighting that require extremely high sensitivity and dynamic range.
- **True day/night:** Features a high resolution (540 TVL) color camera with auto iris and varifocal lens. Application examples include environments that require color images during the day but use monochrome images at night with or without supplemental IR lighting.
- **Color:** Features a high resolution (540 TVL) color camera with auto iris, simple day/night functions, and varifocal lens. For use in all general-purpose environments.

All cameras in the **IS50/IS51 Series** offer adaptive black stretch (ABS) to provide optimal image quality in dark areas by increasing the visibility in those areas without sacrificing the image quality in brighter areas. In addition, in some cameras the **IS50/IS51 Series** features WDR technology, ensuring the best picture quality even in

challenging environments. The day/night WDR camera is equipped with auto back focus (ABF) and intelligent motion detection. The ABF feature automatically adjusts the cameras CCD position when installing or changing from color to black-white mode, saving time during setup and optimizing focus. The intelligent built-in video motion detector provides more efficient and reliable surveillance, while eliminating the loss of notification in vital scenes. Using advanced motion analytics provides the ability to accurately detect motion within a targeted area. The analytics include three behaviors: motion detection, object abandonment/removal, and scene change detection.

The **IS50/IS51 Series** is shipped completely assembled, making installation fast and easy. To surface-mount the unit, remove it from the box, attach it to the mounting surface, and connect video and power. For recessed installations, use the supplied mounting bracket to install the unit inside a ceiling or wall.

The **IS50/IS51 Series** also features a complete line of optional mounting accessories. The IS50-P pendant mount allows the IS50/IS51 surface mount cameras to be adapted for pendant installations. The IS50-P can also be combined with the SWM-SR compact wall mount for wall mount installations. In addition, the IS50-FK flush mount kit allows a surface mount unit to be installed in a ceiling if the installation type should change after the original deployment.

## IS90 SERIES SURFACE MOUNT/IN-CEILING, WDR, DAY/NIGHT, HIGH RESOLUTION

### Product Features

- Fully-Integrated Indoor Enclosure with Camera and Lens
- Single Model for Surface Mount and Recessed Ceiling Applications with 4S Adapter Plate
- 4 Camera Options:
  - Day/Night Wide Dynamic Range (WDR): Pixel-Based Imager for Accurate Color Representation, Progressive Scan
  - Day/Night High Resolution: 540 TVL
  - Wide Dynamic Range (WDR): Pixel-Based Imager for Accurate Color Representation, Progressive Scan
  - High Resolution Color: 540 TVL
- Varifocal Lens Options: 3 mm to 9.5 mm, 9 mm to 22 mm
- Fixed Lens Options: 3 mm, 3.6 mm, 6 mm, 8 mm, 12 mm
- Includes Both Composite and Unshielded Twisted Pair (UTP) Outputs
- All Models Include 1 Smoked Bubble, 1 Clear Bubble, and 1 Liner
- Shipped Completely Assembled, Easy to Install
- 12 VDC or 24 VAC Operation, Autosensing
- Manual, 3-Axis (Pan/Tilt/Rotation) Positioning Allows Adjustment for Optimum Camera Rotation and Placement
- Housing Available in White or Black
- Service Connector for Video Output

IS90 SERIES DOME SHOWN WITH OPTIONAL PENDANT WALL MOUNT (IS90-PW)

IS90 SERIES DOME SHOWN WITH SURFACE MOUNT RING

NOTE: REMOVE THE SURFACE MOUNT RING FOR RECESSED INSTALLATIONS.

### Camera Modules

The **IS90 Series Camclosure® Integrated Camera System** offers a large selection of camera and lens options. Available camera modules include the following:

- **Day/night wide dynamic range (WDR) and wide dynamic range:** Pelco's WDR uses a pixel-based imager that adjusts for lighting by pixel. Traditional CCD cameras adjust the entire image for lighting conditions that appear in a small portion of the image or that are not extreme. Different lighting problems occur at night. Car headlights and parking lot lights are good examples of problematic video images. Use Pelco's Day/Night WDR where you need the camera to adjust from extreme lighting to low light conditions.
- **Day/night high resolution (540 TVL) color camera** with auto iris, varifocal lens; Application examples include environments that require monochrome images at night and color images during the day.
- **High (540 TVL) resolution color camera** with auto iris, varifocal lens or fixed iris lens; application examples include all general-purpose environments.

### Enclosure Modules

The **IS90 Series Camclosure Integrated Camera System** integrates a camera and lens package into a small, versatile indoor enclosure that can be mounted directly to, or recessed into, a ceiling or wall. The **IS90 Series** features a three-axis camera and lens positioning system that is capable of 360 degrees of tilt, and 360 degrees of rotation.

The **IS90 Series** is shipped completely assembled, making installation fast and easy. To surface-mount the unit, remove it from the box, attach it to the mounting surface, and connect video and power. For recessed installations, simply remove the surface mount ring (no tools required) and then install the unit inside a ceiling or wall. A 4S adapter plate is supplied with the unit for electrical box installations.

# Camclosure® IS Series Rugged Mini Dome

## IS110 SERIES SURFACE MOUNT, WDR, DAY/NIGHT, HIGH RESOLUTION

### Product Features

- Fully-Integrated Enclosure with Camera and Lens
- Rugged, High-Impact, Vandal-Resistant, Puncture-Proof Domes; Tamper-Resistant Hardware
- 4 Camera Options:
  - Day/Night Wide Dynamic Range (WDR): Pixel-Based Imager for Accurate Color Representation, Progressive Scan
  - Day/Night High Resolution: 540 TVL
  - Wide Dynamic Range (WDR): Pixel-Based Imager for Accurate Color Representation, Progressive Scan
  - High Resolution Color: 540 TVL
- Varifocal Lens Options: 3.0 - 9.5 mm, 9.0 - 22.0 mm
- Includes Both Composite and Unshielded Twisted Pair (UTP) Outputs
- 12 VDC or 24 VAC Operation, Autosensing
- Available with Smoked or Clear Bubble
- Service Connector for Video Output

IS110 SERIES DOME

IS110 SERIES DOME WITH ICS110-PG PENDANT ADAPTER AND SWM-GY MOUNT

### Camera Modules

The **IS110 Series Camclosure® Integrated Camera System** offers a large selection of camera and lens options. Available camera modules include:

- **Day/night wide dynamic range (WDR) and wide dynamic range:** Pelco's WDR uses a pixel-based imager that adjusts for lighting by pixel. Traditional CCD cameras adjust the entire image for lighting conditions that appear in a small portion of the image or lighting conditions that are not extreme. Different lighting problems occur at night; car headlights and parking lot lights are good examples of problematic video images. Use Pelco's Day/Night WDR where you need the camera to adjust from extreme lighting to low light conditions.
- **Day/night high resolution (540 TVL) color camera with auto iris, varifocal lens:** Application examples include environments that require monochrome images at night and color images during the day.
- **High resolution (540 TVL) color camera with auto iris, varifocal lens:** Application examples include all general-purpose environments.

### Enclosure Module

The **IS110 Series Camclosure Integrated Camera System** combines an environmental cover, back box, camera, lens, and lower dome into a small, high-security system that is quick and easy to install. The system is perfect for a variety of indoor and outdoor applications and its versatile design allows for multiple mounting options.

The **IS110 Series** can be installed directly into a ceiling or wall, or to a 1.5-inch (3.81 mm) NPT fitting with the optional pendant mount adapter (ICS110-PG). The unit can also mount directly to a 4S electrical box using the optional adapter plate (ICS110-AP) or a standard plaster ring.

The system's back box has three conduit openings: two in the base, and a threaded 0.75-inch (1.91 cm) opening in the side. The environmental cover can be used to hide and protect the side conduit opening if it is not used.

C3426 / REVISED 10-19-10

# TECHNICAL SPECIFICATIONS

## GENERAL

Construction	Aluminum with steel camera mounting bracket and polycarbonate dome
Impact	IS110 is a rugged product that exceeds an IK10++ rating of Standard EN62262 and can withstand up to 100J in a vertical impact
Finish	Light gray polyester powder coat
Light Attenuation	f/1.5 light loss
Smoked	Zero light loss
Clear	
Unit Weight	2.20 lb (1.00 kg)
Shipping Weight	4.0 lb (1.81 kg)

## ELECTRICAL

Input Voltage*	12 VDC or 24 VAC ( $\pm 10\%$ ), autosensing
Synchronization	Internal or AC line lock
Power Consumption	
Camera	< 3 W (DW/CW models) < 4 W (DN/CH models)
Heaters	10 W when active; thermostatically controlled

## MECHANICAL

Cable Entry	One 0.75-inch (1.91 cm) NPT threaded opening on side; two 0.75-inch (1.91 cm) openings on base
Pan/Tilt Adjustment	Manual
Pan	360°
Tilt	80° (20° to 100° range)
Rotation	360°

## VIDEO

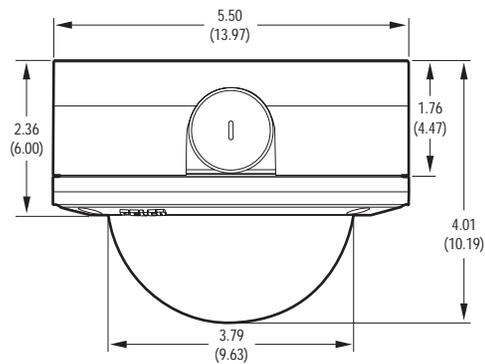

Signal System	NTSC or PAL
Video Output	
Composite	1 Vp-p, 75 ohms
UTP	1 Vp-p, 100 ohms
Video Connectors	1 composite BNC and 1 UTP
Service Connector	3-conductor, 2.5 mm connector for video output to optional IS-SC cable

## ENVIRONMENTAL

Environment	Low temperature, indoor/outdoor
Operating Temperature	-50° to 122°F (-46° to 50°C); de-ices to 25°F (-4°C)
Thermostat Operation	Heater is thermostatically controlled to activate at 50°F (10°C) and turn off at 80°F (27°C)

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class B
- FCC, Class B
- UL/cUL Listed
- C-Tick
- Meets NEMA Type 4X and IP66 standards
- IEC 60068-2-27 Shock Certified
- IEC 60068-2-30 Humidity Certified
- IEC 60068-2-6 Vibration Certified
- ISTA Shipping Standard
- U.S. Patents D476,025; 6,715,939 B2; 6,805,498 B2

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS;  
ALL OTHERS ARE INCHES.

\*24 VAC power is recommended when installing any Camclosure Integrated Camera System under fluorescent lighting conditions.

# CCC1390H Series Day/Night, WDR, CCD Compact Camera

## 1/3-INCH, HIGH RESOLUTION, 530 TVL B-W/480 TVL COLOR (NTSC/PAL)

### Product Features

- Compact Body Style
- Wide Dynamic Range (60 dB Maximum)
- Day/Night with Automatic or Manual Control
- Electronic PTZ
- 1/3-Inch Format Sony® SS-2WD CCD Imager
- Digital Signal Processing
- 530 TV Lines (B-W); 480 TV Lines (Color)
- On-Screen Menu Configuration
- Four Preset Application Profiles; One User-Definable Profile
- Auto White Balance, Automatic Gain Control, Electronic Shutter Control, and Backlight Compensation
- Flickerless Mode
- Autosensing DC-Drive Auto Iris
- Autosensing 24 VAC/12 VDC with Line Lock or Internal Synchronization
- Compatible with Pelco P and Pelco D Protocol

(LENS NOT SUPPLIED WITH CAMERA)

CCC1390H-6/6X

The **CCC1390 Series** camera is a compact, wide dynamic range (WDR), day/night camera. Its WDR technology provides up to 60 dB of dynamic range and produces superior images over a wide range of lighting conditions, including extreme backlight conditions. The camera also uses a removable infrared (IR) cut filter to switch between color and black-white (B-W) modes as environmental lighting conditions change. It also provides a dual resolution of 530 TVL (B-W) and 480 TVL (color).

On-screen programmable menus can be accessed locally using the rear panel button or remotely using any Pelco controller with Pelco P or Pelco D protocol. Use these menus to select a specific profile or to customize and save camera settings for the specific application.

The **CCC1390 Series** camera has a standard CS-mount and can be used with fixed, manual, or DC-drive auto iris lenses. The auto iris is controlled through a standard four-pin square connector that is included with all Pelco auto iris lenses.

The **CCC1390 Series** camera is quick and easy to install and its compact size makes it ideal for Pelco's DomePak® and ImagePak® fixed camera dome/enclosure packages.

# C10DN Series Day/Night, CCD Color Camera

## 1/3-INCH, ULTRA HIGH RESOLUTION, 540 TVL (NTSC/PAL)

### Product Features

- Compact Body Style
- Day/Night with Automatic or Manual Control
- 1/3-Inch Format CCD Imager
- Digital Signal Processing
- 540 TV Lines
- On-Screen Menu Configuration with Side Joystick
- 4 Preset Application Profiles; 1 User-Definable Profile
- Automatic White Balance, Automatic Gain Control, Electronic Shutter Control, and Backlight Compensation
- Flickerless Mode
- Autosensing DC Drive Auto Iris
- CS Lens Mount
- Autosensing 24 VAC/12 VDC with Line Lock or Internal Synchronization
- Long Distance Cable Compensation
- Internal Top/Bottom Mount
- Eclipser Function

The **C10DN Series** camera is Pelco's smallest, day/night camera. Its day/night technology provides outstanding performance over a wide range of lighting conditions. The camera uses a removable infrared (IR) cut filter to switch between color and black-white (B-W) modes as environmental lighting conditions change, and the need for infrared sensitivity is realized.

The **C10DN Series** is an ultra high resolution digital camera with 540 TVL of resolution and 0.3 lux minimum illumination in day mode and 0.07 lux in night mode. Camera features include autosensing power (24 VAC with internal line lock or 12 VDC with internal synchronization), automatic gain control (AGC), electronic shutter control (ESC), and flickerless mode. The **C10DN Series** also includes automatic white balance (AWB) for difficult lighting situations, and backlight compensation (BLC) that adjusts the picture to prevent objects from appearing dark due to a strong backlight. These fine-tuning features are easily set using the on-screen menus.

**C10DN-6/C10DN-6X**  
(LENS NOT SUPPLIED WITH CAMERA)

**C10DN-7X**  
(LENS NOT SUPPLIED WITH CAMERA)

The **C10DN Series** camera has a standard CS mount and can be used with fixed, manual, or DC drive auto iris lenses. The auto iris is controlled through a standard 4-pin square connector that is included with all Pelco auto iris lenses. A back panel control allows you to control the **C10DN Series** with an external IR light during B-W mode operation.

The convenient on-screen menu allows you to select area masking, titling, pixel correction, and preset lighting profiles, features which are not typically found in a compact camera. Also, the **C10DN Series** allows on-screen setup of color/B-W modes.

The **C10DN Series** is quick and easy to install. The C10DN-6 and C10DN-6X are ideal for use with DF5, DF8A, EH100, EH3508, and EH2508 enclosures. The camera is also featured in Pelco's DomePak® and ImagePak® fixed camera dome/enclosure packages. The optional C10-UM wall/ceiling/rail mount kit offers easy installation in many nonenclosure applications, for all models (C10DN-6, C10DN-6X, and C10DN-7X).

# TECHNICAL SPECIFICATIONS

## MODELS

C10DN-6	1/3-inch high resolution day/night, CCD camera; 24 VAC or 12 VDC; NTSC format
C10DN-6X	1/3-inch high resolution day/night, CCD camera; 24 VAC or 12 VDC; PAL format
C10DN-7X	1/3-inch high resolution day/night, CCD camera; 230 VAC, PAL format

## GENERAL

Day/Night Operation	
Day	Infrared (IR) cut filter
Night	BK-7 glass, same optical displacement as day mode
Imaging Device	1/3-inch interline transfer CCD
Picture Elements	
NTSC	768 (H) x 494 (V), approx. 380k
PAL	752 (H) x 582 (V), approx. 440k
Sensing Area	3/16 x 1/8-inch (4.7 x 3.5 mm)
Scanning System	
NTSC	525 lines, 2:1 interlace
PAL	625 lines, 2:1 interlace
Synchronization System	AC line lock/internal
Horizontal Resolution	540 TV lines
Auto Iris Lens Type	DC/video drive (autosensing)
Sensitivity	
Color	0.4 lux, f/1.2, 50 IRE, AGC on, 89% scene reflectance
B-W	0.08 lux, f/1.2, 50 IRE, AGC on, 89% scene reflectance
Minimum Illumination	
Color	0.3 lux, f/1.2, 40 IRE, AGC on, 75% scene reflectance
B-W	0.07 lux, f/1.2, 40 IRE, AGC on, 75% scene reflectance
Signal-to-Noise Ratio	>50 dB
Vertical Phase Adjustable	±90°
Automatic Gain Control	Selectable
Electronic Shutter Control	Selectable
Electronic Shutter Range	
NTSC	1/60 sec to 1/100000 sec
PAL	1/50 sec to 1/100000 sec
Backlight Compensation	Selectable
Eclipser Function	Selectable
Auto White Balance	Selectable
Internal Synchronization	Selectable
Gamma	Selectable
Flickerless Mode	Selectable
Signal Processing	Digital signal processing (DSP)
Video Output	1 Vp-p, 75 ohms
Auto White Balance Range	2,500° to 9,500°K

## ELECTRICAL

Power Requirements	
C10DN-6	24 VAC ±15%/12 VDC ±15%, 60 Hz
C10DN-6X	24 VAC ±15%/12 VDC ±15%, 50 Hz
C10DN-7X	230 VAC ±15%, 50 Hz
Power Consumption	3 W
Power Connector	2-pin terminal block with screw lock
Video Connector	BNC
Auto Iris Connector	4-pin connector (miniature square)
Controls	5-position button

## MECHANICAL

Lens Mount	CS mount
Camera Mount	1/4-inch UNC-20 screw, top or bottom of camera housing

## ENVIRONMENTAL

Operating Temperature	14° to 122°F (-10° to 50°C)
Storage Temperature	-40° to 140°F (-40° to 60°C)
Operating Humidity	20% to 80%, noncondensing
Storage Humidity	20% to 90%, noncondensing

## PHYSICAL

# C10CH Series Digital CCD Color Camera

## 1/3-INCH, ULTRA HIGH RESOLUTION, 540 TVL (NTSC/PAL), COMPACT

### Product Features

- Compact Body Style
- 1/3-Inch Format CCD Imager
- Digital Signal Processing
- 540 TV Lines
- 0.4 Lux Sensitivity
- CS Lens Mount
- Autosensing DC/Video Drive Auto Iris
- On-Screen Menu Configuration with Side Joystick
- Automatic/Manual White Balance Settings for Difficult Lighting Situations
- Selectable Automatic Gain Control, Electronic Shutter Control, and Backlight Compensation
- Flickerless Mode
- Eclipser Function
- Autosensing Power (24 VAC/12 VDC with Line Lock or Internal Synchronization)
- Internal Top/Bottom Mount
- Long Distance Cable Compensation

The **C10CH Series** is Pelco's smallest full-featured digital color CCD camera. It is designed to provide superior picture quality over a wide range of conditions. The camera's compact size, combined with its numerous features, makes it the ideal camera for most applications.

The **C10CH Series** is an ultra high resolution digital camera with 540 TVL of resolution and 0.3 lux minimum illumination. Camera features include autosensing power (24 VAC with internal line lock or 12 VDC with internal synchronization), automatic gain control (AGC), electronic shutter control (ESC), and flickerless mode. The **C10CH Series** also includes automatic white balance (AWB) for difficult lighting situations, an analog eclipser function that allows the auto iris lens to create clear images in a dark area with a strongly backlit background, and backlight compensation (BLC) that adjusts the picture to prevent objects from appearing dark due to a strong backlight. These features are easily set using the on-screen menus.

C10CH-6/C10CH-6X  
(LENS NOT SUPPLIED WITH CAMERA)

C10CH-7X  
(LENS NOT SUPPLIED WITH CAMERA)

The **C10CH Series** has a standard CS lens mount and can be used with fixed, manual, or auto iris (DC or video drive) lenses. The iris is controlled through a standard 4-pin square connector that is included on all Pelco auto iris lenses.

The convenient on-screen menu allows you to select area masking, tilting, pixel correction, and preset lighting profiles, features which are not typically found in a compact camera.

The **C10CH Series** is quick and easy to install. The C10CH-6 and C10CH-6X are ideal for use with DF5, DF8A, EH100, EH3508, and EH2508 enclosures. The camera is also featured in Pelco's DomePak® and ImagePak® fixed camera dome/enclosure packages. The optional C10-UM wall/ceiling/rail mount kit offers easy installation in many nonenclosure applications, for all models (C10CH-6, C10CH-6X, C10CH-7X).

# Spectra® IV SL Series Dome Systems

## HIGH-PERFORMANCE INTEGRATED DOME SYSTEM

### Product Features

- Autofocus, High Resolution Integrated LowLight™ Color Camera/Optics Package
- Day/Night, 540 TVL
- 23X Optical Zoom
- Window Blanking
- Camera Title Overlay, 20 User-Definable Characters
- On-Screen Compass and Tilt Display
- Password Protection
- Freeze Frame During Presets
- Built-in Surge and Limited Lightning Protection
- Integrated Passive Unshielded Twisted Pair (UTP) Circuit
- Internal Scheduling Clock
- Ability to Add IP Network Capability by Purchasing Optional TXB-IP Module

### Modularity

Spectra® IV SL Series was designed with ease of installation and ease of maintenance in mind. Each dome system consists of three components: a back box, a dome drive, and a lower dome. These three system components are interchangeable with other Spectra IV dome systems, making retrofitting and application adjustments simple. Also, dome drives and lower domes can be removed and replaced reducing maintenance time.

### Back Box

Spectra IV SL back box options include the following models: environmental in-ceiling (ideal for outdoor soffits), indoor in-ceiling, indoor surface mount, standard and environmental. A **passive UTP circuit** is located on the door assembly for convenient video transmission through twisted pair wire. For added flexibility, Pelco fiber modules can also be attached to the door assembly for transmission over single-mode or multimode fiber.

### Dome Drive

The Spectra IV SL dome drive's **integrated optics package** incorporates many advanced features that allow the system to produce high quality video in the most difficult environments. The camera features 23X optical zoom and 12X digital zoom. Spectra IV SL dome drives feature an EXview HAD™ imager for increased sensitivity and **LowLight™** technology to compensate for scenes where minimal light is present. The camera also offers **freeze frame between presets** and **window blanking**.

IN-CEILING MODEL  
SD423-F0

ENVIRONMENTAL PENDANT  
SD423-PG-E0  
(SHOWN WITH SWM-GY WALL MOUNT)

### Lower Dome

Special consideration was taken when designing the Spectra IV SL lower dome bubble to ensure that an optimal optical relationship between the lens and bubble was achieved, providing crystal clear video at long focal lengths.

### Dome Systems

Spectra IV SL dome systems feature many software enhancements that increase performance and make configuration and operation easy. An **internal scheduling clock** allows for the scheduling of presets and patterns. **Window blanking** enables a user to configure a four-sided, user-defined privacy area. **Password protection** prevents unauthorized users from changing the system settings. Configurable **on-screen compass and tilt display** provides positioning information when needed. Intuitive multi-lingual on-screen menus can be displayed in English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech.

Spectra IV SL's variable speed capabilities range from a smooth, fast pan motion of 400 degrees per second to a smooth "creep" speed of 0.1 degree per second. The system is capable of continuous 360 degrees rotation and has an **"auto flip"** feature that allows the dome to rotate 180 degrees and reposition itself for uninterrupted viewing of any subject that passes directly beneath the dome.

In addition, with the optional Pelco TXB-IP module, you can add IP network capability at any time to a Spectra IV dome system without losing analog viewing and control. By snapping the TXP-IP module into the back box, you can stream network video to a Web browser, Endura®, Digital Sentry®, or third-party software recording solution allowing integration into virtually any IP-based system.

NTSC/EIA	0.65 lux at 1/60 sec (color) 0.15 lux at 1/60 sec (B-W)
PAL/CCIR	0.55 lux at 1/50 sec (color) 0.12 lux at 1/50 sec (B-W)
Sync System	Internal/AC line lock, phase adjustable using remote control, V-Sync
White Balance	Automatic with manual override
Shutter Speed	Automatic (electronic iris)/manual
NTSC	1/2 ~1/30,000
PAL	1/1.5 ~1/30,000
Iris Control	Automatic iris control with manual override
Gain Control	Automatic/OFF
Video Output1	Vp-p, 75 ohms
Video Signal-to-Noise	>50 dB

## DOME DRIVE FEATURES

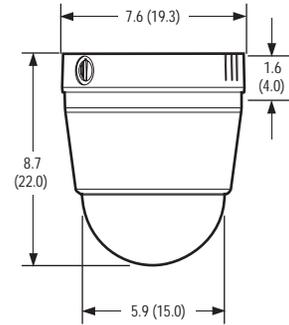

- 64 Presets
- $\pm 0.1^\circ$  Preset Accuracy
- Multilingual Menus (English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech)
- RJ-45 Data Port for Software Update and Setup
- On-Screen Compass, Tilt, and Zoom Display
- Password Protection
- 400°/sec Pan Preset Speed and 200°/sec Tilt Preset Speed
- Rotating Discreet Liner with Sealed Fixed Bubble
- 8 Zones (configurable in size) Can Be Labeled with up to 20 Characters Each or Set to Output Blank Video
- Configurable Locations of Labels and On-Screen Displays
- Patterns: 1 On-Screen, User-Defined Configurable Pattern; Includes Pan, Tilt, Zoom, and Preset Functions
- Proportional Pan/Tilt: Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom
- Variable Scan Speed: Scan Speed Can Be Configurable Between 1 to 40°/sec
- Pan Motion Allows 0.1 to 150°/sec Pan Speed
- Configurable Limit Stops for Auto/Random/Frame Scan Modes
- Auto-sensing Protocol (Coaxitron®, RS-422 Pelco P and Pelco D, Sensormatic®, Vicon®); Accepts Other Control Protocols with Optional Translator Card
- Digital Position and Zoom Control and Feedback Using D Protocol
- Built-in Menu System for Setup of Configurable Functions
- "Auto Flip" Rotates Dome 180° at Bottom of Tilt Travel
- Window Blanking: Up to 4 Four-Sided, User-Defined Shapes
- 1 Alarm Input
- 1 Auxiliary (Form C) Relay Output
- Freeze Frame Between Presets

# TECHNICAL SPECIFICATIONS

## BACK BOX FEATURES

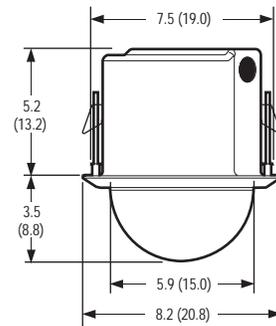

### Surface Mount (Indoor)

- Available in Black or White Finish
- Installs Quickly and Easily to Any Type of Ceiling
- Quick Disconnect to Dome Drive
- Injection-Molded Plastic

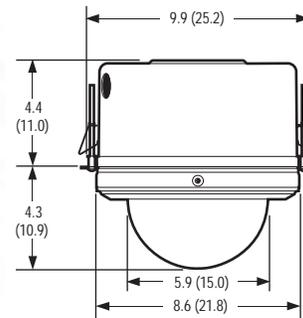

### In-Ceiling (Indoor)

- Single Back Box for Suspended or Hard Ceiling Applications
- Requires 5.25-Inch Space Above Ceiling and 3.25 Inches Below
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Suitable for Use in Environmental Air Handling Spaces

### Environmental In-Ceiling

- Single Back Box for Hard Ceiling Applications
- Requires 4.4-Inch Space Above Ceiling and 4.3 Inches Below
- Includes Heater and Fan
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction

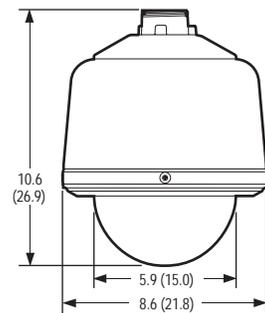

### Standard and Environmental Pendant

- Standard and Environmental Models
- Standard Pendant Available in Black or Gray Finish; Environmental Pendant Gray Finish Only
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Environmental Model Includes Sun Shield, Fan, and Heater

(ENVIRONMENTAL DOME WITH SUN SHROUD SHOWN)

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# TECHNICAL SPECIFICATIONS

## MECHANICAL *(Dome Drive Only)*

Pan Movement	360° continuous pan rotation

# RELATED PRODUCTS

## OPTIONAL ACCESSORIES

DD5-FM	Fixed camera mount adapter. Interchangeable with all Spectra IV dome drives.
IPS-CABLE	Remote monitor cable and software kit consisting of the Spectra IV remote monitor interface cable and necessary software for use with a PC. Refer to <a href="http://www.pelco.com">www.pelco.com</a> for a list of compatible devices.
IPS-RDPE-2*	Remote data port. 24 VAC, wall/pole mount video/data breakout box. Allows ground-level control/configuration and software upgrades when used with the IPS-CABLE.
TXB Series*	Translator boards for AD™ Manchester, Hervis, Bosch® (Philips, Burle), TASS, and NTCIP protocols.
TXB-IP Series*	Communication module that allows you to control and monitor Spectra IV dome systems over an IP network (in-ceiling and pendant models only).
FS85011A*	Fiber transmitter sends one unidirectional composite video channel and one bidirectional data channel over one multimode or single-mode fiber optical cable.

\*If TXB or FS85011A boards are installed, it is not possible to upgrade system operating software through the remote data port (IPS-RDPE-2).

## RECOMMENDED MOUNTS

### Surface Mount Domes

PASMB	Pendant adapter for surface mount dome, black
SD53SM-P	2' x 2' drop ceiling panel for BB4-SMW Series back boxes. Replaces 2' x 2' ceiling tile. Aluminum construction.

### In-Ceiling Domes

SD5-P	2' x 2' drop ceiling panel, aluminum construction. Replaces 2' x 2' ceiling tile.
SCA1	Support rails for BB4-F; for use in ceiling tile applications.

### Pendant Domes

BB5-PCA-BK†	Pendant conduit adapter, black
BB5-PCA-GY†	Pendant conduit adapter, gray
IWM Series	Wall mount, with or without integral 24 VAC, 100 VA transformer. Black or gray finish. Can be adapted for corner, parapet or pole applications.
MRCA	Ceiling mount, black
PP4348	Parapet roof mount
PP350/PP351	Parapet wall/roof mount
SWM Series	Compact wall mount, black or gray finish. Can be adapted for corner or pole applications.

† Not suitable for use with heavy-duty, pressurized, or stainless steel Spectra domes.

## RECOMMENDED POWER SUPPLIES

MCS Series	Indoor, 24 VAC power supply
WCS Series	Outdoor, 24 VAC power supply

Refer to individual power supply specifications for more information.

		LD53SMW-3 Gold, surface, white
		LD5F-0 Smoked, in-ceiling
		LD5F-1 Clear, in-ceiling
		LD5F-2 Chrome, in-ceiling
		LD5F-3 Gold, in-ceiling
		LD53PB-0 Smoked, pendant, black
		LD53PB-1 Clear, pendant, black
		LD53PB-2 Chrome, pendant, black <sup>§</sup>
		LD53PB-3 Gold, pendant, black <sup>§</sup>

**Notes:**  
 To order a fixed mount dome system refer to the component models above and select one each of the following options: back box (BB4-F), dome drive (DD5-FM), plus choice of lower dome (LD5F-0, LD5F-1, LD5F-2, or LD5F-3).  
 For environmental applications, you must order an environmental back box (BB4-F-E) or (BB4-PG-E).  
 DD5-FM is ideal for use with Pelco's C10DN-6, C10DN-6X, C10CH-6, C10CH-6X, CCC1390H-6, and CCC1390H-6X cameras with selected Pelco lenses.

\*For PAL and CCIR models add "-X" suffix to part number. (Example: SD423-SMW-0-X)

†Environmental dome systems include a heater, fan, and the environmental pendant also includes a sun shield.

‡Use the pendant lower domes with the environmental in-ceiling and environmental pendant back boxes.

§Not recommended for outdoor use due to possible light reflections.

# Spectra® IV SE Series Dome Systems

## PREMIER INTEGRATED DOME SYSTEM

### Product Features

- 2 Autofocus, High Resolution Integrated Camera/Optics Packages; Multiple Back Box Models
- Day/Night, 540 TVL, 128X Wide Dynamic Range (WDR), Motion Detection, Image Enhancement, and Electronic Image Stabilization (SD435 Series)
- Day/Night, 540 TVL, 128X Wide Dynamic Range (WDR), and Motion Detection (SD427 Series)
- Window Blanking
- Camera Title Overlay, 20 User-Definable Characters
- Horizontal and Zone Blanking
- On-Screen Compass and Tilt Display
- Password Protection
- Low Lux Noise Reduction
- Built-in Surge and Limited Lightning Protection

### Modularity

Spectra® IV SE was designed with ease of installation and ease of maintenance in mind. Each dome system consists of three components: a back box, a dome drive, and a lower dome. These three system components are interchangeable with other Spectra IV SE dome systems, making retrofitting and application adjustments simple. Also, dome drives and lower domes can be removed and replaced reducing maintenance time.

### Back Box

Spectra IV SE back box options include the following models: environmental in-ceiling (ideal for outdoor soffits), indoor in-ceiling, indoor surface mount, and standard and environmental pendant. The Spectra IV SE Series can also be ordered with heavy-duty, pressurized, and stainless steel back box options (refer to the appropriate product specification sheets for more information). Each back box model features built-in **back box memory** to store camera and location-specific dome settings, including labels, presets, patterns, and zones. A **passive UTP circuit** is located on the door assembly for convenient video transmission through twisted pair wire. For added flexibility, Pelco fiber modules can also be attached to the door assembly for transmission over single-mode or multimode fiber.

### Dome Drive

The Spectra IV SE dome drive's unique **integrated optics package** incorporates many advanced features that allow the system to produce high quality video in the most difficult environments. All cameras in Spectra IV SE dome drives feature **LowLight™** technology allowing the cameras to compensate for scenes where minimal light is present. Both the 27X and the 35X cameras feature built-in motion detection and advanced **128X WDR** that enables the system to compensate for scenes where dramatic contrasts in lighting are present. The 35X day/night camera **electronic image stabilization** digitally reduces blurring of the camera image due to vibration caused by external sources, such as wind and traffic.

SURFACE MOUNT MODEL  
SD435-SMW-0

PENDANT MODEL  
SD427-PG-0

- Sure Focus
- Integrated Passive Unshielded Twisted Pair (UTP) Circuit
- Internal Scheduling Clock
- Ability to Add IP Network Capability by Purchasing Optional TXB-IP Module

### Lower Dome

Special consideration was taken when designing the Spectra IV SE lower dome bubble to ensure that an optimal optical relationship between the lens and bubble was achieved, providing crystal clear video at long focal lengths.

### Dome Systems

Spectra IV SE dome systems feature many software enhancements that increase performance and make configuration and operation easy. An **internal scheduling clock** allows for the scheduling of presets and patterns. **Window blanking** enables a user to configure up to eight, four-sided, user-defined privacy areas. **Password protection** prevents unauthorized users from changing the system settings. Configurable **on-screen compass and tilt display** provides positioning information when needed. Intuitive multilingual on-screen menus can be displayed in English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech.

Spectra IV SE's variable speed capabilities range from a smooth, fast pan motion of 400 degrees per second to a smooth "creep" speed of 0.1 degree per second. The system is capable of continuous 360 degrees rotation and has an **"auto flip"** feature that allows the dome to rotate 180 degrees and reposition itself for uninterrupted viewing of any subject that passes directly beneath the dome.

In addition, with the optional Pelco TXB-IP module, you can add IP network capability at any time to a Spectra IV dome system without losing analog viewing and control. By snapping the TXB-IP module into the back box, you can stream network video to a Web browser, Endura®, Digital Sentry®, or third-party software recording solution allowing integration into virtually any IP-based system.

## DOMES DRIVE FEATURES

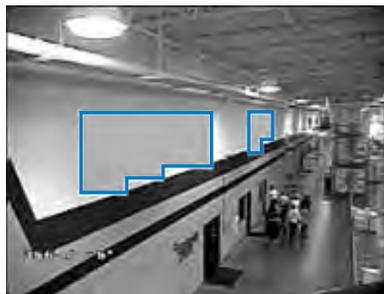

- 256 Presets
- $\pm 0.1^\circ$  Preset Accuracy
- Electronic Image Stabilization (35X model)
- Image Enhancement (35X model)
- Multilingual Menus (English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech)
- RJ-45 Data Port for Software Update and Setup
- On-Screen Compass, Tilt, and Zoom Display
- $400^\circ/\text{sec}$  Pan Preset Speed and  $200^\circ/\text{sec}$  Tilt Preset Speed
- Rotating Discreet Liner with Sealed Fixed Bubble
- Window Blanking: Up to 8, Four-Sided, User-Defined Shapes
- 8 Zones (configurable in size) Can Be Labeled with up to 20 Characters Each or Set to Output Blank Video
- 7 Alarm Inputs
- 1 Auxiliary (Form C) Relay Output and 1 Open Collector Auxiliary Output (can be alternately configured to operate upon alarm)
- Configurable Locations of Labels and On-Screen Displays
- Action on Alarm: Alarms Can Be Individually Configured for 3 Priority Levels, to Initiate a Stored Pattern, or to Go to an Associated Preset When Received
- Resume After Alarm: Allows the Dome to Return to a Previously Configured State After Alarm Acknowledgement or to its Previous Position Before Alarm
- Multiple Park and Power-Up Action
- Patterns: Up to 8, On-Screen, User-Defined Configurable Patterns; Includes Pan, Tilt, Zoom, and Preset Functions
- Proportional Pan/Tilt: Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom
- Variable Scan Speed: Scan Speed Can Be Configurable Between 1 to  $40^\circ/\text{sec}$
- Pan Motion Allows 0.1 to  $150^\circ/\text{sec}$  Pan Speed
- Configurable Limit Stops for Auto/Random/Frame Scan Modes
- Autosensing Protocol (Coaxitron<sup>®</sup>, RS-422 Pelco P and Pelco D, Sensormatic<sup>®</sup>, Vicon<sup>®</sup>); Accepts Other Control Protocols with Optional Translator Card
- Digital Position and Zoom Control and Feedback through Pelco D Protocol
- Built-in Menu System for Setup of Configurable Functions
- "Auto Flip" Rotates Dome  $180^\circ$  at Bottom of Tilt Travel
- Configurable Zoom Speeds
- Low Lux Noise Reduction (reduces noise in low light)

### WINDOW BLANKING

Window blanking allows a user to configure up to eight, four-sided, user-defined areas that cannot be viewed by the operator of the dome system. A blanked area will move with pan and tilt functions and automatically adjust in size as the lens zooms telephoto and wide.

AFTER

### WIDE DYNAMIC RANGE

The WDR setting balances the brightest and darkest sections of a scene to produce a picture that provides more detail.

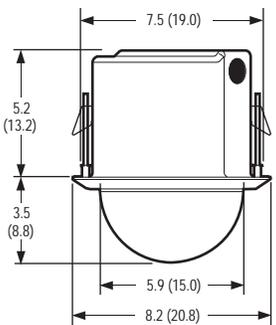

# TECHNICAL SPECIFICATIONS

## BACK BOX FEATURES

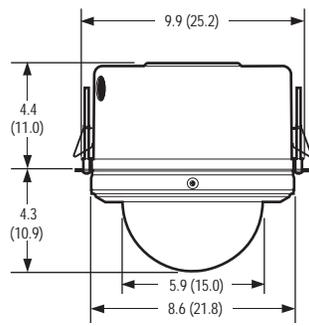

### Surface Mount (Indoor)

- Built-in Memory Stores Camera/Dome Settings
- Available in Black or White Finish
- Quick Disconnect to Dome Drive
- Injection-Molded Plastic
- Integrated Passive UTP

### In-Ceiling (Indoor)

- Built-in Memory Stores Camera/Dome Settings
- Single Back Box for Suspended or Hard Ceiling Applications
- Requires 5.25-Inch Space Above Ceiling and 3.25 Inches Below
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Suitable for Use in Environmental Air Handling Spaces
- Integrated Passive UTP

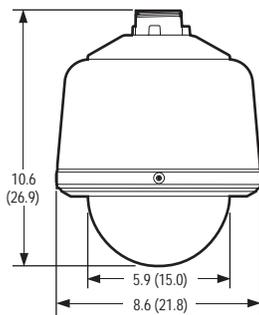

### Environmental In-Ceiling

- Built-in Memory Stores Camera/Dome Settings
- Single Back Box for Hard Ceiling Applications
- Requires 4.4-Inch Space Above Ceiling and 4.3 Inches Below
- Includes Heater and Fan
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Integrated Passive UTP

(ENVIRONMENTAL DOME WITH SUN SHROUD SHOWN)

### Standard and Environmental Pendant

- Standard and Environmental Models
- Built-in Memory Stores Camera/Dome Settings
- Standard Pendant Available in Black or Gray Finish; Environmental Pendant Gray Finish Only
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Environmental Model Includes Sun Shield, Fan, and Heater
- Integrated Passive UTP

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

**Note:** The Spectra IV SE Series can be ordered with heavy-duty, pressurized, and stainless steel back box options. Refer to the appropriate product specification sheets for more information.

## RELATED PRODUCTS

### OPTIONAL ACCESSORIES

DD5-FM	Fixed camera mount adapter. Interchangeable with all Spectra IV dome drives.
IPS-CABLE	Remote monitor cable and software kit consisting of the Spectra IV remote monitor interface cable and necessary software for use with a PC. Refer to <a href="http://www.pelco.com">www.pelco.com</a> for a list of compatible devices.
IPS-RDPE-2*	Remote data port. 24 VAC, wall/pole mount video/data breakout box. Allows ground-level control/configuration and software upgrades when used with the IPS-CABLE.
TXB Series*	Translator boards for AD™ Manchester, Hervis, Bosch® (Philips, Burle), TASS, and NTCIP protocols.
TXB-IP Series*	Communication module that allows you to control and monitor Spectra IV dome systems over an IP network (in-ceiling and pendant models only).
FS85011A*	Fiber transmitter sends 1 unidirectional composite video channel and 1 bidirectional data channel over 1 multimode or single-mode fiber optical cable.

\*If TXB or FS85011A boards are installed, remote upload of system software will not be possible.

## RECOMMENDED MOUNTS

### Surface Mount Domes

PASMB	Pendant adapter for surface mount dome, black
SD53SM-P	2' x 2' drop ceiling panel for BB4-SMW and BB4T-SMW series back boxes; replaces 2' x 2' ceiling tile; aluminum construction

### In-Ceiling Domes

SD5-P	2' x 2' drop ceiling panel, aluminum construction; replaces 2' x 2' ceiling tile
SCA1	Support rails for BB4-F; for use in ceiling tile applications

### Pendant Domes

BB5-PCA-BK*	Pendant conduit adapter, black
BB5-PCA-GY*	Pendant conduit adapter, gray
IWM Series	Wall mount, with or without integral 24 VAC, 100 VA transformer; black or gray finish; can be adapted for corner, parapet, or pole applications
MRCA	Ceiling mount, black
PP4348	Parapet roof mount
PP350/PP351	Parapet wall/roof mount
SWM Series	Compact wall mount, black or gray finish; can be adapted for corner or pole applications

\*Not suitable for use with heavy-duty, pressurized, or stainless steel Spectra domes.

## RECOMMENDED POWER SUPPLIES

MCS Series	Indoor, 24 VAC power supply
WCS Series	Outdoor, 24 VAC power supply

*Refer to individual power supply specifications for more information.*

# Pressurized Spectra® IV SE Series

## BACK BOX AND LOWER DOME

### Product Features

- Pressurized to 8 psig (55 kPa)
- Solid-State Sensors for Internal Temperature, Pressure, and Dew Point
- On-Demand Environmental Status Display for Internal Temperature, Pressure, and Dew Point
- On-Screen Alert Modes
- On-Screen Programmable Menus for Pan/Tilt, Camera, and Sensor Alert Settings
- Built-in Back Box Memory
- Integrated Passive UTP Circuit
- 2 Auxiliary Outputs and 7 Alarm Inputs
- Environmental Pendant Style Back Box
- Stainless Steel Construction
- Meets NEMA Type 6P and IP67 Standards
- Compatible with 27X and 35X Spectra® IV SE Dome Drives
- Built-in Power Line Surge and Limited Lightning Protection
- Fiber Optic Feedthrough Models Available

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE IN INCHES.

Pelco's **Pressurized Spectra® IV SE Series** dome system provides ultimate protection of the camera optics and electronics from moisture, corrosive gases, and airborne contaminants. Domes are easily pressurized with dry nitrogen to 8 psig (55 kPa) before or after installation to stabilize the environment inside the system.

Sensors strategically placed in the dome system send an "Alert" message when changes in internal pressure, temperature, or dew point are beyond factory-set acceptable limits. The sensors also allow for instant on-screen display of internal temperature, pressure, and dew point.

The components of the **Pressurized Spectra IV SE Series** include an environmental pendant style back box and a lower dome designed for optimum optical clarity. All stainless steel construction provides added protection in harsh environments.

The back box features a sun shroud, heater, and fan to maintain a consistent operating environment. The back box also features built-in back box memory, an integrated passive UTP circuit, two auxiliary outputs, seven alarm inputs, and is compatible with all Spectra IV SE Series dome drives.

The lower dome features an innovative O-ring seal and a stainless steel V-band to create a reliable pressure seal. The V-band has a unique latching system with one captivated fastener making lower dome installation easy. Accessible on the lower dome trim ring are a Schrader valve for system purging and a pressure relief valve.

The **Pressurized Spectra IV SE Series** is supplied with a prewired cable with mating connector. The cable includes all wires for system functionality, including power, alarms, auxiliaries, coaxial video, UTP video, and serial control.

Also available are pressurized back box models with fiber optic feedthrough that allow Pelco's FS85011A and third-party fiber optic transmitters to be installed inside the back box. These models include either a 9/125 μm single-mode or 62.5/125 μm multimode fiber optic cable with an ST-type connector.

- FCC, Class B
- UL/cUL Listed
- C-Tick
- S Mark for Argentina
- Meets NEMA Type 6P and IP67 standards

## GENERAL

Construction	
Back Box and Lower Dome	Type 316L stainless steel
Bubble	Polycarbonate, 0.090-inch thick
Light Attenuation	1 F-stop (smoked); zero light loss (clear)
V-Band	Type 316L stainless steel
Pressure Relief	Brass
Schrader Valve	Brass
Connector	Nickel-plated steel
Mounting	1.5-inch NPT, threaded
Pressurization	
Valve	Schrader
Pressure	8 psig (55 kPa) (not factory pressurized)
Pressure Relief	10 psig (69 kPa)
Operating Temperature	(Assumes no wind chill factor; for detailed test conditions, contact Pelco)
Maximum	140°F (60°C) absolute maximum; 122°F (50°C) sustained maximum
Minimum	-60°F (-51.11°C) absolute minimum; minimal icing at sustained minimum of -50°F (-45°C); prevents icing at sustained minimum of -40°F (-40°C); de-ices 0.1 inch (2.5 mm) within 3 hours after power-up

## OPTIONAL ACCESSORIES

IPS-CABLE	Remote monitor cable and software kit
IPS-RDPE-2 <sup>†</sup>	Remote data port
EH8000RKIT	Dry nitrogen recharging kit (cannot be refilled)
TXB Series <sup>†</sup>	Translator boards for AD Manchester, Hervis, Bosch® (Philips, Burle), TASS, and NTCIP protocols
FS85011A <sup>†</sup>	Fiber transmitter sends one unidirectional composite video channel and one bidirectional data channel over one optical fiber. Available in multimode and single-mode versions
Mounts	IDM4012SS (stainless steel, wall), IWM Series (wall), MRCA (ceiling), PP4348 (parapet roof), and PP350/PP351 (parapet wall/roof)

<sup>†</sup>If TXB or FS85011A boards are installed, it is not possible to upgrade system operating software through the remote data port (IPS-RDPE-2).

# Heavy-Duty Spectra® IV SE Series

## BACK BOX AND LOWER DOME

### Product Features

- Tough, Heavy-Duty Construction
- Improved Bubble Design
  - 0.090-Inch Injection Molded Polycarbonate
  - Increased Optical Clarity
  - 3.5X Stronger Than Previous Heavy-Duty Bubbles
  - Available in Clear and Smoked Bubble
- Trim Rings Are Constructed of Thick Aluminum
- Protective Cage for Lower Dome (Optional)
- Built-in Back Box Memory
- 2 Auxiliary Outputs
- 7 Alarm Inputs
- Integrated Passive UTP Circuit
- Compatible with 27X and 35X Spectra® IV SE Dome Drives
- In-Ceiling and Pendant Models Available
- Indoor/Outdoor Applications
- Pendant Models Meet NEMA Type 4X and IP66 Standards
- Ability to Add IP Network Capability by Purchasing Optional TXB-IP Module

Pelco's **Heavy-Duty Spectra® IV SE Series** is ideal for installations where structural integrity and resistance to vandalism are a priority. Dual wall construction, added thickness, and a geometric design enhance the overall durability of the enclosure.

Three **Heavy-Duty Spectra IV SE Series** back box models are available. The in-ceiling model (BB4HD-F) has a reinforced mounting system for added security. The indoor pendant (BB4HD-PG) and environmental pendant (BB4HD-PG-E) models are strengthened by a thick shroud and dual wall construction, and meet NEMA Type 4X and IP66 standards. The environmental pendant includes a heater and fan.

The **Heavy-Duty Spectra IV SE Series** has all the features of the Spectra IV SE dome system (built-in back box memory, two auxiliary outputs, seven alarm inputs, integrated passive UTP circuit) and is also compatible with all Spectra IV SE dome drives.

The lower dome of the **Heavy-Duty Spectra IV SE Series** meets Pelco's stringent standards for optical clarity and strength. The lower dome features a clear or smoked 0.090-inch polycarbonate bubble that is 3.5 times stronger than previous heavy-duty bubbles. The trim ring is all aluminum construction with two barrel-type key locks to increase the tamper resistance of the unit.

IN-CEILING MODEL  
BB4HD-F AND LD53HDF-1

ENVIRONMENTAL PENDANT  
BB4HD-PG-E AND LD53HDF-1  
(SHOWN WITH IWM-GY WALL MOUNT)

For installations that face the highest threat of vandalism, models are available with a protective cage (optional). The cage is designed to increase the protection of the unit's bubble with minimal obstruction of the viewed scene. The camera automatically focuses through the cage's bars at medium to high zoom settings, eliminating interference (as shown below). The cage is removable for cleaning purposes. Cage hardware is only accessible when the lower dome is removed.

# Stainless Steel Spectra® IV SE Series

## BACK BOX AND LOWER DOME

### Product Features

- All Stainless Steel Construction
- Built-in Back Box Memory
- Integrated Passive UTP Circuit
- 7 Alarm Inputs; 2 Programmable Auxiliary Outputs
- Built-in Surge and Limited Lightning Protection
- Compatible with 27X and 35X Spectra® IV SE Dome Drives
- Bubble Constructed of Optically Clear Acrylic
- Environmental Pendant Model Only
- Indoor/Outdoor Applications
- Meets NEMA Type 4X and IP66 Standards
- Ability to Add IP Network Capability by Purchasing Optional TXB-IP Module

ENVIRONMENTAL PENDANT  
BB4-PSG-E AND LD53PSB-1  
(SHOWN WITH IDM4012SS WALL MOUNT)

Pelco's **Stainless Steel Spectra® IV SE Series** is designed for harsh environmental installations and meets NEMA Type 4X and IP66 standards.

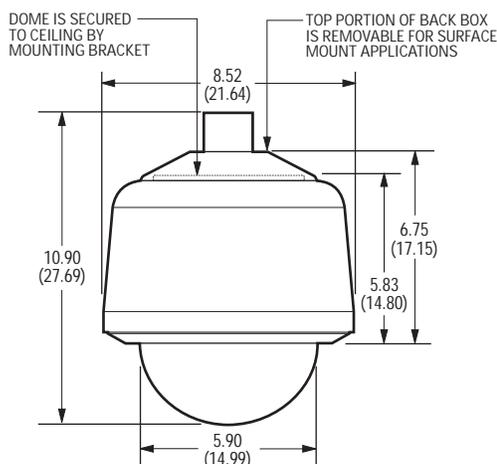

The components (back box and lower dome) provide added protection against corrosive conditions. The pendant-style back box (**BB4-PSG-E**) is constructed of Type 316 Stainless Steel (SS) and includes a sun shield (also constructed of Type 316 SS), heater, and fan. The lower dome features a trim ring constructed of Type 316 SS and an optically clear bubble that is available in smoked (**LD53PSB-0**) or clear (**LD53PSB-1**) acrylic.

The **Stainless Steel Spectra IV SE Series** has all the features of the Spectra IV SE dome system (built-in back box memory, two auxiliary outputs, seven alarm inputs) and is also compatible with all Spectra IV SE dome drives.

Camera and lens options for the **Stainless Steel Spectra IV SE Series** include:

- Day/night camera, 128X wide dynamic range, motion detection, electronic image stabilization, image enhancement, LowLight™ technology, and 35X optical zoom with 12X digital zoom
- Day/night camera, 128X wide dynamic range, motion detection, LowLight technology, and 27X optical zoom with 12X digital zoom

For an alternative mounting option use the **IDM4012SS** wall mount. The **IDM4012SS** mount is designed specifically for the **Stainless Steel Spectra IV SE Series** and features all stainless steel construction and conduit access in the bottom and back of the mount.

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# Spectra® IV SE Horizon Series Dome Systems

## CRYSTAL CLEAR, INTEGRATED LOOK-UP DOME SYSTEM

### Product Features

- Unparalleled Crystal Clear Video at Any Angle
- Vertical Tilt of up to 18° Above Horizontal
- Autofocus, High Resolution Integrated Camera/Optics Package
- Day/Night, 540 TVL, 128X Wide Dynamic Range (WDR), Motion Detection, and Electronic Image Stabilization
- Window Blanking
- Camera Title Overlay, 20 User-Definable Characters
- Horizontal and Zone Blanking
- On-Screen Compass and Tilt Display
- Password Protection
- Freeze Frame During Presets
- Built-in Surge and Limited Lightning Protection
- Integrated Passive Unshielded Twisted Pair (UTP) Circuit
- Low Lux Noise Reduction

An important, but often overlooked, component of a high-speed dome system is the relationship between the dome bubble and the camera lens. Special consideration was taken when designing the Spectra® IV SE Horizon lower dome bubble to ensure that an optimal optical relationship between the lens and bubble was achieved, providing crystal clear video at long focal lengths and extended vertical angles.

The Spectra IV SE Horizon dome drive's unique **integrated optics package** incorporates many advanced features that allow the system to produce high quality video in the most difficult environments. The camera in the Spectra IV SE Horizon dome drive features vertical tilt of 18° above the horizon, providing optical clarity and the ability to look up. **LowLight™** technology allows the camera to compensate for scenes where minimal light is present. The camera features advanced **128X wide dynamic range** that enables the system to compensate for scenes where dramatic contrasts in lighting are present. **Electronic image stabilization** digitally reduces blurring of the camera image due to vibration caused by external sources such as wind and traffic.

Spectra IV SE Horizon back box options include environmental in-ceiling, standard pendant, and environmental pendant models. Each back box model features built-in **back box memory** to store camera and location-specific dome settings, including labels, presets, patterns, and zones. A **passive UTP circuit** is located on the door assembly for convenient video transmission through twisted pair wire. For added flexibility, Pelco fiber modules can also be attached to the door assembly for transmission over single-mode or multimode fiber.

ENVIRONMENTAL  
IN-CEILING MODEL  
SD4H35-F-E0

PENDANT MODEL  
SD4H35-PG-0

- Ability to Add IP Network Capability by Purchasing Optional TXB-IP Module

Spectra IV SE Horizon dome systems feature many software enhancements that increase performance and make configuration and operation easy. An **internal scheduling clock** allows for the scheduling of presets and patterns. **Window blanking** enables a user to configure up to eight, four-sided, user-defined privacy areas. **Password protection** prevents unauthorized users from changing the system settings. Configurable **on-screen compass and tilt display** provides positioning information when needed. Intuitive multilingual on-screen menus can be displayed in English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech.

Spectra IV SE Horizon's variable speed capabilities range from a smooth, fast pan motion of 400 degrees per second to a smooth "creep" speed of 0.1 degree per second. The system is capable of continuous 360 degrees rotation and has an **"auto flip"** feature that allows the dome to rotate 180 degrees and reposition itself for uninterrupted viewing of any subject that passes directly beneath the dome.

In addition, with the optional Pelco TXB-IP module, you can add IP network capability at any time to a Spectra IV dome system without losing analog viewing and control. By snapping the TXP-IP module into the back box, you can stream network video to a Web browser, Endura®, Digital Sentry®, or third-party software recording solution allowing integration into virtually any IP-based system.

by Schneider Electric

C3434 / REVISED 10-31-10

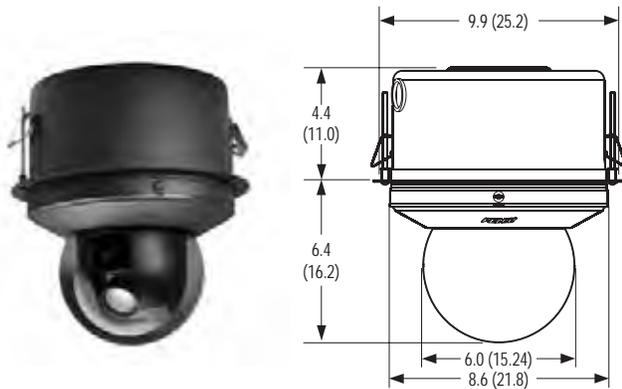

# TECHNICAL SPECIFICATIONS

## DOMES DRIVE FEATURES

- Vertical Tilt of 18° Above Horizontal
- 256 Presets
- ±0.1° Preset Accuracy
- Electronic Image Stabilization
- Extended Vertical Angles
- Multilanguage Menus (English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech)
- RJ-45 Data Port for Software Update and Setup
- On-Screen Compass, Tilt, and Zoom Display
- 400°/sec Pan Preset Speed and 200°/sec Tilt Preset Speed
- Rotating Discreet Liner with Sealed Fixed Bubble
- Window Blanking: Up to 8, Four-Sided, User-Defined Shapes
- 8 Zones (configurable in size) Can Be Labeled with up to 20 Characters Each or Set to Output Blank Video
- 7 Alarm Inputs
- 1 Auxiliary (Form C) Relay Output and 1 Open Collector Auxiliary Output (can be alternately configured to operate upon alarm)
- Configurable Locations of Labels and On-Screen Displays

- Action on Alarm: Alarms Can Be Individually Configured for 3 Priority Levels, to Initiate a Stored Pattern, or to Go to an Associated Preset When Received
- Resume After Alarm: Allows the Dome to Return to a Previously Configured State After Alarm Acknowledgement or to its Previous Position Before Alarm
- Multiple Park and Power-Up Action
- Patterns: Up to 8, On-Screen, User-Defined Configurable Patterns: Includes Pan, Tilt, Zoom, and Preset Functions
- Proportional Pan/Tilt: Continually Decreases Pan/Tilt Speeds in Proportion to Depth of Zoom
- Variable Scan Speed: Scan Speed Can Be Configurable Between 1–40°/sec
- Pan Motion Allows 0.1–150°/sec Pan Speed
- Configurable Limit Stops for Auto/Random/Frame Scan Modes
- Auto-sensing Protocol (Coaxitron®, RS-422 Pelco P and Pelco D); Accepts Competitive Control Protocol with Optional Translator Card
- Digital Position, Zoom Control, and Feedback Through Pelco D Protocol
- Built-in Menu System for Setup of Configurable Functions
- “Auto Flip” Rotates Dome 180° at Bottom of Tilt Travel
- Configurable Zoom Speeds

## BACK BOX FEATURES

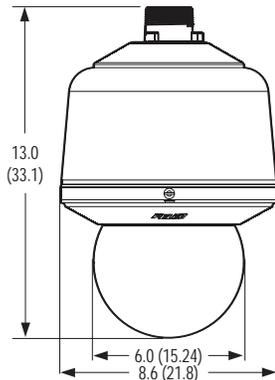

### Environmental In-Ceiling

- Built-in Memory Stores Camera/Dome Settings
- Single Back Box for Hard Ceiling Applications
- Requires 4.4-Inch Space Above Ceiling and 6.4 Inches Below
- Includes Heater and Fan
- Minimum Ceiling Thickness 0.5-Inch; Maximum 1.75 Inches
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Integrated Passive UTP

(STANDARD PENDANT MODEL)

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

### Standard and Environmental Pendant

- Standard and Environmental Models
- Built-in Memory Stores Camera/Dome Settings
- Quick Disconnect to Dome Drive
- Aluminum Construction
- Environmental Model Includes Sun Shield, Fan, and Heater
- Integrated Passive UTP

## OPTIONAL ACCESSORIES

IPS-CABLE	Remote monitor cable and software kit consisting of the Spectra IV remote monitor interface cable and necessary software for use with a PC. Refer to <a href="http://www.pelco.com">www.pelco.com</a> for a list of compatible devices.
IPS-RDPE-2 <sup>†</sup>	Remote data port. 24 VAC, wall/pole mount video/data breakout box. Allows ground-level control/configuration and software upgrades when used with the IPS-CABLE.
TXB Series <sup>†</sup>	Translator boards for AD™ Manchester, Hervis, Bosch® (Philips, Burle), Sensormatic®, Vicon™, TASS, and NTCIP protocols.
TXB-IP Series	Communication module that allows you to control and monitor Spectra IV dome systems over an IP network (in-ceiling and pendant models only).
FS85011A <sup>†</sup>	Fiber transmitter sends one unidirectional composite video channel and 1 bidirectional data channel over 1 multimode or single-mode fiber optical cable.

<sup>†</sup>If TXB or FS85011A boards are installed, remote upload of system software will not be possible.

## RECOMMENDED MOUNTS

### In-Ceiling Domes

SD5-P	2' x 2' drop ceiling panel, aluminum construction. Replaces 2' x 2' ceiling tile.
SCA1	Support rails for BB4-F; for use in ceiling tile applications.

### Pendant Domes

BB5-PCA-BK	Pendant conduit adapter, black
IWM Series	Wall mount, with or without integral 24 VAC, 100 VA transformer. Can be adapted for corner, parapet, or pole applications.
MRCA	Ceiling mount, black
PP4348	Parapet roof mount
PP350/PP351	Parapet wall/roof mount
SWM Series	Compact wall mount. Can be adapted for corner or pole applications.

## RECOMMENDED POWER SUPPLIES

MCS Series	Indoor, 24 VAC power supply
WCS Series	Outdoor, 24 VAC power supply

Refer to individual power supply specifications for more information.

# Spectra® Mini Dome System

## INDOOR, MINIATURE, SURFACE MOUNT/IN-CEILING

### Product Features

- Familiar Spectra® Camera Menu Structure
- Single Model for Surface Mount and In-Ceiling Applications
- Autofocus, High Resolution Integrated Color Camera/Optics Package
- 80X Zoom (10X Optical, 8X Digital)
- Zone Blanking
- 64 Presets
- 0.5° Preset Accuracy
- 140°/second Pan Speed
- Rotating Discreet Liner
- 1 Pattern
- 1 Dynamic Window Blanking Area
- Proportional Pan and Tilt
- Programmable Zoom Speeds
- Multilingual Support
- Integral, Autosensing, Multiprotocol Receiver
- Auto Flip Dome Rotation
- Integrated UTP Circuit
- Quick Connect Cable for Power, Video (Coaxial or UTP), and Data
- Available with Smoked or Clear Dome

SURFACE MOUNT APPLICATION

RECESSED CEILING APPLICATION

The **Spectra® Mini** incorporates many well-known features from Pelco's full-size Spectra dome system into a cost effective, small form factor. The easy-to-install dome system can be mounted to the surface of ceilings or recessed into hard ceilings and suspended tile ceilings. A high resolution camera transmits video over coaxial cable or unshielded twisted pair (UTP) wires. When paired with active UTP receivers, **Spectra Mini** is capable of transmitting high quality video across distances of up to 4,000 ft (1,219 m). Pan/tilt operation can be performed with Pelco's controllers that transmit Pelco D, Pelco P, or Coaxitron® protocols. For non-Pelco controllers, a translator board can be installed. On-screen programming allows easy setup of the miniature dome's many features.

Variable speed capabilities of the **Spectra Mini** range from a fast pan motion of 140 degrees per second to a smooth "creep" speed of 0.4 degrees per second. The system is capable of continuous 360 degrees rotation and has an auto flip feature. This feature allows the dome to rotate 180 degrees and reposition itself for uninterrupted viewing of any subject that passes directly beneath the dome's location.

by Schneider Electric

C3401 / REVISED 10-31-10

# TECHNICAL SPECIFICATIONS

## Product Features

- 64 Presets: 53 User Definable and 11 Predefined
- $\pm 0.5^\circ$  Preset Accuracy
- Multilingual Menus (English, Spanish, Portuguese, Italian, French, and German)
- Alternate Language Files (includes Russian, Polish, Turkish, and Czechoslovakian) Available as Optional Software Upload
- Data Port for Software Update and Setup
- On-Screen Compass, Tilt, and Zoom Display
- Password Protection
- $140^\circ/\text{sec}$  Pan Preset Speed and  $80^\circ/\text{sec}$  Tilt Preset Speed
- Rotating Discreet Liner
- 4 Zones (programmable in size) Can Be Labeled with up to 20 Characters Each or Set to Output Blank Video
- Programmable Locations of Labels and On-Screen Displays
- 1 on-screen, user-defined programmable pattern. Includes pan, tilt, zoom, and preset functions
- 1 Programmable Window Blanking Area
- Proportional Pan and Tilt: Continually decreases pan and tilt speeds in proportion to depth of zoom
- Variable Scan Speed: Scan speed can be 3, 6, or  $12^\circ/\text{sec}$
- Pan Motion Allows  $0.4\text{--}140^\circ/\text{sec}$  Pan Speed
- Programmable Limit Stops for Auto/Random/Frame Scan Modes
- Autosensing Protocol (Coaxitron, RS-422 Pelco P and Pelco D); Accepts Competitive Control Protocols with Optional TXB Translator Boards
- Digital Position, Zoom Control, and Feedback Through Pelco D Protocol
- Built-in Menu System for Setup of Programmable Functions
- Auto Flip Rotates Dome  $180^\circ$  at Bottom of Tilt Travel
- Programmable Zoom Speeds

## GENERAL

Construction	
Top Cap	Anodized cast aluminum
Dome Drive	ABS plastic
Trim Ring and Surface Mount Ring	ABS plastic
Bubble	Acrylic
Finish	White or black
Light Attenuation	
Smoked	f/0.5 light loss
Clear	Zero light loss
Cable Entry	RJ45-10 pigtail connector for video (UTP), power, and data (supplied) BNC connector for video (coaxial)
Environment	Indoor
Operating Temperature	$32^\circ$ to $122^\circ\text{F}$ ( $0^\circ$ to $50^\circ\text{C}$ )
Unit Weight	1.75 lb (0.79 kg)
Shipping Weight	4 lb (1.81 kg)

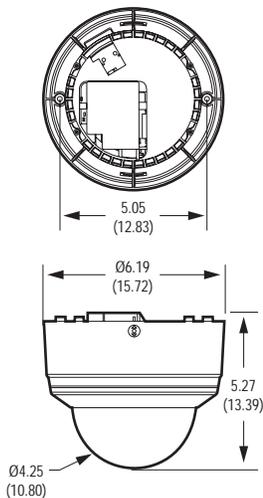

## MECHANICAL

Pan Movement	$360^\circ$ continuous pan rotation
Vertical Tilt	Unobstructed $+2^\circ$ to $-92^\circ$
Manual Pan/Tilt Speeds	
Pan	$0.4^\circ$ to $80^\circ/\text{sec}$ manual operation, $100^\circ/\text{sec}$ turbo
Tilt	$0.7^\circ$ to $40^\circ/\text{sec}$ manual operation
Preset Speeds	
Pan	$140^\circ/\text{sec}$
Tilt	$80^\circ/\text{sec}$
	For variable speed operation an appropriate controller is required.

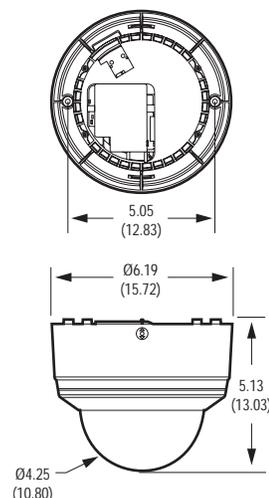

## ELECTRICAL

Input Voltage	18 to 30 VAC; 24 VAC nominal
Input Power	21 VA nominal
Fuse	1.6 A

WITH TXB TRANSLATOR BOARD

WITHOUT TXB TRANSLATOR BOARD

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# ES30C/ES31C Series Positioning System

## ESPRIT® SYSTEM WITH IOP CAMERA AND OPTIONAL WIPER

### Product Features

- Receiver, Pan/Tilt, and Enclosure with an Integrated Optics Package (IOP)
- Configurable Camera Settings
- Configurable Camera Title
- On-Screen Compass, Tilt, and Zoom Display
- Auto Iris with Manual Override
- Auto Focus with Manual Override
- AC Line Lock
- Variable Speed Pan: 0.1° to 100°/Sec with Proportional Pan
- 360° Continuous Pan Rotation
- Zone Blanking Allows up to 8 Zones (Configurable in Size) to be Set to Output Blank Video
- Tilt Range of +33° to -83° from Horizontal
- Preset Positioning, Patterns, Multiple Scan Modes
- Designed for Minimal Maintenance, No Gears to Adjust
- Wide Dynamic Range (35X only)

ESPRIT IOP SYSTEM WITH WIPER  
(SHOWN WITH WALL MOUNT AND POLE ADAPTER)

Pelco's **ES30C/ES31C** Esprit® Positioning System features a receiver, pan/tilt, enclosure, and Integrated Optics Package (IOP) in a single, easy-to-install system. The IOP contains an autofocus camera and lens module with configurable features.

For a wide range of applications, the **ES30C** and **ES31C Series** features a choice of three different IOP cameras:

- Day/night camera (540 TVL) with an infrared cut filter, 35X zoom lens (35X optical, 12X digital), electronic image stabilization, and wide dynamic range
- Day/night camera (520 TVL) with an infrared cut filter and 24X zoom lens (24X optical, 10X digital)
- High resolution color camera (470 TVL) with LowLight™ color technology and 22X zoom lens (22X optical, 10X digital)

A powder-coated, aluminum construction makes the **ES30C** and **ES31C** ideal for either indoor or outdoor applications. The system has an absolute operating temperature range of -50° to 140°F (-45° to 60°C). Within two hours after power-up, the entire unit can de-ice and be operational from a temperature of -13°F (-25°C).

The **ES31C Series** includes a window wiper. The wiper is completely integrated into the enclosure and does not interfere with the viewing range of the system. The wiper can be configured to delay between wipes and to automatically shut off after a specified period. The wiper design also allows for easy replacement of the wiper blade. A built-in heater, window defroster/defogger, sun shroud, and insulation blanket are standard features on the **ES30C** and **ES31C** units. All units also include an open collector auxiliary output that functions for two seconds before deactivating.

The **ES30C** and **ES31C Series** variable pan and tilt speeds range from 0.1 to 40 degrees per second in manual pan mode and 0.1 to 20 degrees per second in manual tilt. Pan preset and turbo speeds are 100 degrees per second in wind speeds of 50 mph and 50 degrees per second in the 90 mph wind-speed profile. Tilt preset speed is 30 degrees per second. The **ES30C** and **ES31C** are capable of 360 degrees of continuous pan rotation. The tilt range allows for horizontal viewing of +33 to -83 degrees. There are 64 configurable preset positions with a preset accuracy of one-quarter degree.

The systems are available with an input voltage of 24 VAC or with a selectable power source of 120/230 VAC. The **ES30C** and **ES31C** also have a power-up recovery mode that allows the user to specify what operation the system will resume whenever the power is cycled.

C307 / REVISED 11-2-10

# TECHNICAL SPECIFICATIONS

## ADDITIONAL PRODUCT FEATURES

- Deterrent Surveillance
- Integral Multiprotocol (Coaxitron®, RS-422 Pelco D and Pelco P Protocols) Receiver/Driver
- Digital Position and Zoom Control and Feedback Using Pelco D Protocol
- Integral Camera Enclosure
- Operational in 90 mph Winds, Can Withstand Wind Velocity up to 130 mph
- Pan Preset Speed of 100°/Sec in 50 mph Winds and 50°/Sec in 90 mph Winds
- Variable Scan Speeds (1 to 40°/Sec)
- Translator Boards for Selected Competitive Protocols
- Easy to Install: Quick and simple electrical connections
- 24 VAC or 120/230 VAC Selectable
- Full Continuous-Duty Warranty
- 850 nm and 950 nm Active IR Illumination Focus Algorithms (24X and 35X models only)

## SOFTWARE/HARDWARE

- 64 Configurable Presets with Labels
- Auto, Frame, and Random Scan
- Configurable Power-up Mode
- Configurable Park
- Configurable Manual Limit Stops (Pan)
- Configurable Scan Limit Stops (Pan)
- Patterns
- Proportional Pan/Tilt
- 8 Zones (configurable in size) Can Be Labeled with up to 20 Characters Each
- Up to 8 Zones (configurable in size) Can Be Set to Output Blank Video
- 10-Inch Integrated Enclosure with Pre-Assembled, IOP Camera
- Sun Shroud, Heater/Window Defroster, and Insulation All Standard
- 1 Auxiliary Output
- Integrated Window Wiper with Configurable Delay and Shut-Off (ES31C Models)

## ELECTRICAL

Input Voltage	24, 120, or 230 VAC, 50/60 Hz: switch selectable for 120/230 VAC inputs	
Input Voltage Range	±10%	
Power Consumption	Maximum 70 VA per system	
Heater and Defroster	Thermostatically controlled	
Electrical Connections	2 power source connections made at mount location with wire splices and 1 ground wire splice; 1 BNC receptacle and 4 wire splices at mount location for RS-422 Pelco D and Pelco P protocols; 2 wire splices for open collector auxiliary output	
Aux 2	Open collector output with 2-second activation; connected relay must require no more than 32 VDC and 40 mA to energize relay coil; wire length between Esprit and relay must be less than 100 ft (30 m)	
Video Coaxial Cable		
Max. Wiring Distances	<u>Cable Type*</u>	<u>Maximum Distance</u>
	RG59/U	750 ft (229 m)
	RG6/U	1,000 ft (305 m)
	RG11/U	1,500 ft (457 m)

\*Minimum cable requirements: 75-ohms impedance; all-copper center conductor; all copper braided shield with 95% braid coverage

## MECHANICAL

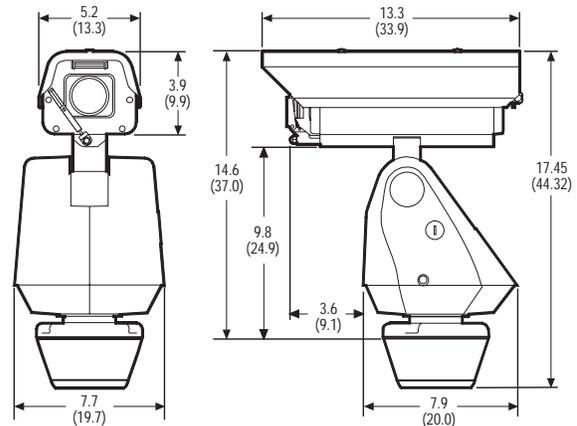

Pan Movement	360° Continuous pan rotation
Vertical Tilt	Unobstructed +33° to -83°
Variable Pan/Tilt Speed	
Pan	0.1° to 40°/sec variable-speed operation, 100°/sec Turbo
Tilt	0.1° to 20°/sec variable-speed operation
Preset Speeds	
Pan	100°/sec
Tilt	30°/sec
Camera Mounting	Integrated camera sled assembly
Latches	One link-lock, No. 3 stainless-steel latch; can be secured with padlock (not supplied)

## GENERAL

Construction	Die-cast, extruded and sheet aluminum; stainless steel hardware	
Finish	Gray polyester powder coat	
Viewing Window	0.23" (5.84 mm) thick, optically clear impact/scratch-resistant coated Lexan®	
Operating Temperature	-50° to 122°F (-45° to 50°C) for sustained system operation or 140°F (60°C) absolute maximum. Within two hours after power-up, the entire unit can de-ice and be operational from a temperature of -13°F (-25°C).	
Operating Environment	Will remain operational in 90 mph wind conditions; withstands 130 mph	
Weight	<u>With Pedestal Adapter</u>	<u>With Wall Mount</u>
Unit		
Standard with IOP	20 lb (9.0 kg)	22 lb (9.9 kg)
With Wiper and IOP	21 lb (9.5 kg)	23 lb (10.4 kg)
Shipping		
Standard with IOP	25 lb (11.3 kg)	28 lb (12.6 kg)
With Wiper and IOP	26 lb (11.7 kg)	29 lb (13.1 kg)

## CERTIFICATIONS/RATINGS/PATENTS

- CE, Class B
- FCC, Class B
- UL/cUL Listed
- C-Tick

\*Pedestal mount models include Esprit EPP pedestal adapter plate. Use with PM2000/PM2010 mount (not supplied) for pedestal application.

† Wall mount models include Esprit EWM wall mount. Optional mounting adapters for corner, pole, and parapet applications are available.

## REPLACEMENT INTEGRATED OPTICS PACKAGE (IOP CAMERA) MODULES

The following IOP modules are replacement components only; they are not interchangeable.

ESIOPC22	Esprit high resolution color camera and lens module, 22X NTSC format
ESIOPC22-X	Same as ESIOPC22 except PAL format
ESIOPCBW24	Esprit high resolution day/night camera and lens module, 24X, NTSC format
ESIOPCBW24-X	Same as ESIOPCBW24 except PAL format
ESIOPBW35	Esprit high resolution day/night camera and lens module, 35X, NTSC format
ESIOPBW35-X	Same as ESIOPBW35 except PAL format

## OPTIONAL ACCESSORIES

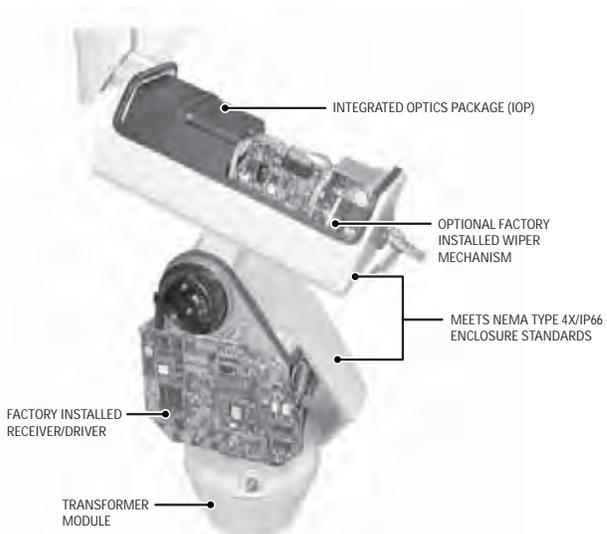

ES-REPLBLADE-2	Package of 2 window wiper replacement blades
ES-REPLBLADE-10	Package of 10 window wiper replacement blades
IPS-RDPE-2	Remote data port. 24 VAC, wall/pole mount video/data breakout box. Allows ground-level control/configuration when used with the IPS-CABLE. (No code upload.)
IPS-CABLE	Kit consisting of the remote monitor interface cable and necessary software for use with a PC.
TXB Series	Translator boards for AD™ Manchester, Hervis, Bosch® (Philips, Burle), Sensomatic®, TASS, Vicon™, and NTCIP protocols.

## OPTIONAL MOUNTS AND ADAPTERS

ECM100	Corner mount adapter for use with EWM wall mount
EPM	Pole mount adapter for use with EWM wall mount
EA4348	EWM-to-Legacy adapter; use with PP4348 parapet mount
PM2000/PM2010	Pedestal mount with cable feedthrough. For use with Esprit systems with EPP pedestal adapter plate.

## RECOMMENDED POWER SUPPLIES

MCS Series	Multiple 24 VAC camera power supply, indoor
WCS Series	Single/multiple 24 VAC camera power supply, outdoor

# ES30PC/ES31PC Series Positioning System

## ESPRIT® WITH PRESSURIZED IOC AND OPTIONAL WIPER

### Product Features

- Receiver, Pan/Tilt, and Enclosure with Pressurized Integrated Optics Cartridge (IOC), NTSC/PAL
- All Components Factory Assembled and System Tested
- Pressurized Integrated Optics Cartridge Factory Charged to 10 psig
- Solid-State Sensors For Temperature, Pressure, and Dew Point
- On-Demand Environmental Status Display For Temperature, Pressure, and Dew Point
- On-Screen Multiple Fault Alert Modes
- On-Screen Compass, Tilt, and Zoom Display
- On-Screen Configurable Zone Blanking
- On-Screen Configurable Menus For Pan/Tilt, Camera, and Sensor Alert Settings
- All Standard Features of the Esprit® Positioning System
- Wide Dynamic Range (35X only)

Pelco's **ES30PC/ES31PC** Esprit® Positioning System is optimally designed to protect camera optics and electronics from moisture and airborne contaminants. The system features a receiver, pan/tilt, enclosure, and a pressurized Integrated Optics Cartridge (IOC).

The **ES30PC/ES31PC** system's IOC packages an auto focus camera, lens, heater, and sensors in a small, self-contained, sealed unit. Dry nitrogen pressurized to 10 psig protects the environment inside the cartridge eliminating internal condensation and corrosion. Sensors strategically placed in the cartridge send an "Alert" message if changes in pressure, temperature, and humidity are beyond factory set acceptable limits. The sensors also allow for instant on-screen display of temperature, pressure, and dew point.

The IOC is factory assembled and installed in the **ES30PC/ES31PC** systems. All labor intensive procedures of setting up the camera, lens and charging the unit with dry nitrogen are eliminated. The miniature size of the cartridge decreases the future need for maintenance and increases the overall reliability of the pressurized unit.

The **ES30PC** and **ES31PC Series** feature three models of pressurized IOCs:

- Day/night camera (540 TVL) with an infrared cut filter, 35X zoom lens (35X optical, 12X digital), electronic image stabilization, and wide dynamic range
- Day/night camera (520 TVL) with an infrared cut filter and 24X zoom lens (24X optical, 10X digital)
- High resolution color camera (470 TVL) with LowLight™ color technology and 22X zoom lens (22X optical, 10X digital)

A powder-coated, aluminum construction makes the **ES30PC** and **ES31PC** ideal for either indoor or outdoor applications. The system has an absolute operating temperature range of  $-50^{\circ}$  to  $140^{\circ}$ F ( $-45^{\circ}$  to  $50^{\circ}$ C). Within two hours after power-up, the entire unit can de-ice and be operational from a temperature of  $-13^{\circ}$ F ( $-25^{\circ}$ C).

The **ES31PC Series** has a window wiper completely integrated into the enclosure and designed not to interfere with the viewing range of the system. The wiper can be configured to delay between wipes and to shut off automatically after a specified period. The wiper design also allows for easy replacement of the wiper blade.

The **ES30PC** and **ES31PC Series** variable pan and tilt speeds range from 0.1 to 40 degrees per second in manual pan mode and 0.1 to 20 degrees per second in manual tilt. Pan preset and turbo speeds are 100 degrees per second in wind speeds up to 50 mph and 50 degrees per second in the 90 mph wind-speed profile. Tilt preset speed is 30 degrees per second. The **ES30PC** and **ES31PC** are capable of 360 degrees of continuous pan rotation. The tilt range allows for horizontal viewing of  $+33$  to  $-83$  degrees. There are 64 configurable preset positions with a preset accuracy of one-quarter degree.

The systems are available with an input voltage of 24 VAC or with a selectable power source of 120/230 VAC. The **ES30PC** and **ES31PC** also have a power-up recovery mode that allows the user to specify what operation the system will resume whenever the power is cycled.

## ADDITIONAL PRODUCT FEATURES

- Deterrent Surveillance
- Integral Multiprotocol (Coaxitron®, RS-422 Pelco D and Pelco P Protocols) Receiver/Driver
- Digital Position and Zoom Control and Feedback Using Pelco D Protocol
- Integral Camera Enclosure
- Variable Speed 0.1 to 100°/Sec
- 360° Continuous Pan Rotation
- +33° to -83° Tilt Range
- Operational in 90 mph Winds, Can Withstand Wind Velocity up to 130 mph
- Pan Preset Speed of 100°/Sec in 50 mph Winds and 50°/Sec in 90 mph Winds
- Variable Scan Speeds (1 to 40°/Sec)
- Translator Boards for Selected Competitive Protocols
- Easy to Install; Quick and Simple Electrical Connections
- 24 VAC or 120/230 VAC Selectable
- Designed for Minimal Maintenance, No Gears to Adjust
- Full Continuous-Duty Warranty
- 850 nm and 950 nm Active IR Illumination Focus Algorithms (24X and 35X models only)

## SOFTWARE/HARDWARE

- 64 Configurable Presets with Labels
- Auto, Frame, and Random Scan
- Configurable Power-up Mode
- Configurable Park
- Configurable Manual Limit Stops (Pan)
- Configurable Scan Limit Stops (Pan)
- Patterns
- Proportional Pan/Tilt
- 8 Zones (configurable in size) Can Be Labeled with up to 20 Characters Each and Set to Output Blank Video
- 10-Inch Integrated Enclosure with Pre-Assembled, Pressurized IOC
- Sun Shroud, Heater/Window Defroster, and Insulation All Standard
- 1 Auxiliary Output
- Integrated Window Wiper with Configurable Delay and Shut-Off (ES31PC Models)

## PRESSURIZED INTEGRATED OPTICS CARTRIDGE (IOC)

- Pressurized to 10 psig, Nominal (Sea Level, 70°F)
- Internal Sensors for Temperature, Dew Point and Pressure
- On-Screen Alert for High and Low Temperature, High and Low Pressure, and High Humidity
- 4 Alert On-Screen Display Modes
- 4 Acknowledge Modes
- Pressurized Relief Valve
- Meets IP67 Standards

## ELECTRICAL

Input Voltage	24, 120, or 230 VAC, 50/60 Hz; switch selectable for 120/230 VAC inputs
Input Voltage Range	±10%
Power Consumption	Maximum 70 VA per system
Heater/Defroster	Digital temperature control
Electrical Connections	2 power source connections made at mount location with wire splices and 1 ground wire splice; 1 BNC receptacle and 4 wire splices at mount location for RS-422 Pelco D and Pelco P protocols; 2 wire splices for open collector auxiliary output
Aux 2	Open collector output with 2-second activation; connected relay must require no more than 32 VDC and 40 mA to energize relay coil; wire length between Esprit and relay must be less than 100 ft (30 m)

Video Coaxial Cable		
Max. Wiring Distances	<u>Cable Type*</u>	<u>Maximum Distance</u>
	RG59/U	750 ft (229 m)
	RG6/U	1,000 ft (305 m)
	RG11/U	1,500 ft (457 m)

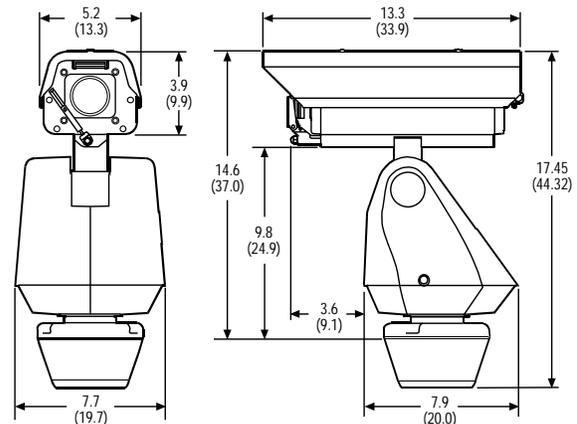

\*Minimum cable requirements:  
75-ohms impedance; all-copper center conductor; all copper braided shield with 95% braid coverage

## MECHANICAL

Pan Movement	360° Continuous pan rotation
Vertical Tilt	Unobstructed +33° to -83°
Variable Pan/Tilt Speed	
Pan	0.1° to 40°/sec variable-speed operation, 100°/sec Turbo
Tilt	0.1° to 20°/sec variable-speed operation
Preset Speeds	
Pan	100°/sec
Tilt	30°/sec
Camera Mounting	Replaceable pressurized cartridge
Latches	1 link-lock, No. 3 stainless-steel latch; can be secured with padlock (not supplied)

## GENERAL

Construction	Die-cast, extruded and sheet aluminum; stainless steel hardware	
Finish	Gray polyester powder coat	
Viewing Window	0.23" (5.84 mm) thick, optically clear tempered glass	
Operating Temperature	-50° to 122°F (-45° to 50°C) for sustained system operation or 140°F (60°C) absolute maximum. Within two hours after power-up, the entire unit can de-ice and be operational from a temperature of -13°F (-25°C).	
Operating Environment	Will remain operational in 90 mph wind conditions; withstands 130 mph	
Weight	<u>With Pedestal Adapter</u>	<u>With Wall Mount</u>
Unit		
Standard with IOC	21 lb (9.5 kg)	23 lb (10.4 kg)
With Wiper and IOC	22 lb (10 kg)	24 lb (11 kg)

## REPLACEMENT PRESSURIZED INTEGRATED OPTICS CARTRIDGE (IOC)

The following IOC models are replacement components only; they are not interchangeable.

IOC-C22-X	Same as IOC-C22 except PAL format
IOC-CBW24	Esprit high resolution day/night camera and lens module, 24X, NTSC format
IOC-CBW24-X	Same as IOC-CBW24 except PAL format
IOC-CBW35	Esprit high resolution day/night camera and lens module, 35X, NTSC format
IOC-CBW35-X	Same as IOC-CBW35 except PAL format

## OPTIONAL ACCESSORIES

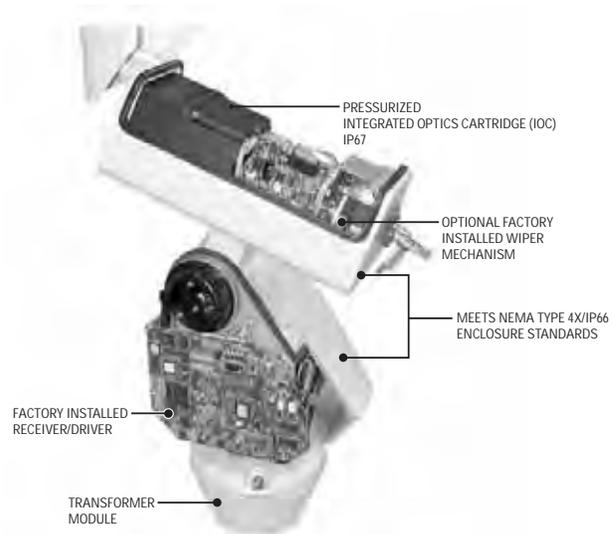

ES-REPLBLADE-2	Package of 2 window wiper replacement blades
ES-REPLBLADE-10	Package of 10 window wiper replacement blades
IPS-RDPE-2	Remote data port. 24 VAC, wall/pole mount video/data breakout box. Allows ground-level control/configuration when used with the IPS-CABLE. (No code upload.)
IPS-CABLE	Kit consisting of the remote monitor interface cable and necessary software for use with a PC.
TXB Series	Translator boards for AD™ Manchester, Hervis, Bosch® (Philips, Burle), Sensormatic®, TASS, Vicon™, and NTCIP protocols.

## OPTIONAL MOUNTS/ADAPTERS

ECM100	Corner mount adapter for use with EWM wall mount
EPM	Pole mount adapter for use with EWM wall mount
EA4348	EWM-to-Legacy adapter; use with PP4348 parapet mount
PM2000/PM2010	Pedestal mount with cable feedthrough. For use with Esprit systems with EPP pedestal adapter plate.

## RECOMMENDED POWER SUPPLIES

# ES3012 Series Integrated Positioning System

ESPRIT® PREMIUM PERFORMANCE P/T, COAXITRON® COMPATIBLE

## Product Features

- Integrated Receiver, Pan/Tilt, and Housing with No Exposed Cabling
- Optional ImagePak® Integrated Optics Package
- Quick and Simple Electrical Connections
- Variable Speed Advanced Motor Control Technology
- 360° Continuous Pan Rotation
- Zone Blanking Allows up to 8 Zones (Programmable in Size) to Be Set to Output Blank Video
- Operational in 90 mph Wind Conditions; Can Withstand Wind Velocity Up to 130 mph
- Pan Preset Speed of 100° Per Second in 50 mph Winds and 50° Per Second in 90 mph Winds
- Tilt Range of +33° to -83° from Horizontal
- Preset Positioning
- Designed for Minimal Maintenance, No Gears to Adjust
- Lightweight Aluminum Construction
- Meets NEMA Type 4X and IP66 Standards

Pelco's **Esprit® ES3012 Series** integrated positioning system ingeniously integrates a pan/tilt, enclosure, and receiver into one compact system that is easy to install. On-screen, user-friendly menus also make the system easy to program and operate.

The **ES3012 Series** is available as a standard or ImagePak® system. The **Esprit ImagePak** system combines the innovative design of the standard system with a factory-installed camera and lens package of your choice. Choose from a variety of high resolution, day/night and color cameras. The standard system does not include the camera and lens components. It is designed to accept any 24 VAC camera and lens combination up to 12.10" L x 3.45" W x 3.17" H (30.73 x 8.76 x 8.05 cm).

Every **ES3012** system (standard or ImagePak) has a built-in heater, window defroster/defogger, sun shroud, and insulation blanket. The system is available with an input voltage of 24 VAC or with a selectable power source of 120/230 VAC.

ES3012-2W SYSTEM  
WITH WALL MOUNT

A powder-coated, aluminum construction makes the **ES3012 Series** ideal for either indoor or outdoor applications. The system has an absolute operating temperature range of -40° to 140°F (-40° to 60°C). Within two hours after power-up, the entire unit can de-ice and be operational from a temperature of -13°F (-25°C).

The **Esprit ES3012 Series** variable pan and tilt speeds range from 0.5 degrees to 40 degrees per second in manual pan mode and 0.5 degrees to 20 degrees per second in manual tilt. Pan preset and turbo speeds are 100 degrees per second in wind speeds of 50 mph and 50 degrees per second in the 90 mph wind-speed profile. Tilt preset speed is 30 degrees per second. The **ES3012 Series** is capable of 360 degrees of continuous pan rotation. The tilt range allows for horizontal viewing of +33 to -83 degrees. There are 64 programmable preset positions with a preset accuracy of one-quarter degree.

The **ES3012 Series** features on-screen programmable menus for pan and scan speed, limit stops, zone blanking, and patterns. The unit also has a power-up recovery mode that allows the user to specify what condition the system will resume whenever the power is cycled.

# MODEL NUMBERS

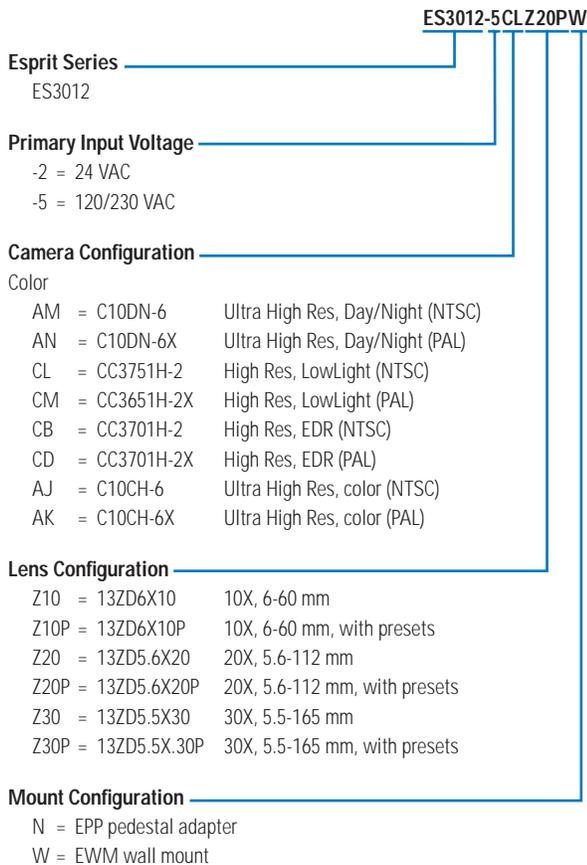

## MODELS

### Basic

ES3012-2	Standard Esprit integrated positioning system (pan/tilt, enclosure and receiver), 24 VAC, no mount
ES3012-5	Same as ES3012-2 except 120/230 VAC
ES3012-2N	Standard Esprit integrated positioning system, 24 VAC, with EPP pedestal adapter plate
ES3012-5N	Same as ES3012-2N except 120/230 VAC
ES3012-2W	Standard Esprit integrated positioning system, 24 VAC, with EWM wall mount
ES3012-5W	Same as ES3012-2W except 120/230 VAC

### ImagePak Esprit Systems

Create a complete, ready-to-install system (including optics package) from the optional components below or refer to the Esprit ImagePak Selection Guide for model numbers.

## OPTIONAL MOUNTS AND ADAPTERS

ECM100	Corner mount adapter for use with EWM wall mount
EPM	Pole mount adapter for use with EWM wall mount
EA4348	EWM-to-Legacy adapter; use with PP4348 parapet mount
PM2000/PM2010	Pedestal mount with cable feedthrough; for use with Esprit systems with EPP pedestal adapter plate
PP4348	Parapet mount; requires EWM wall mount and EA4348 adapter when used with Esprit system

## OPTIONAL ACCESSORIES

IPS-RDPE-2	Remote data port. 24 VAC, wall/pole mount video/data breakout box. Allows ground-level control/programming when used with the IPS-CABLE. (No code upload.)
IPS-CABLE	Remote monitor cable and software kit.
TXB Series	Translator boards for model specific AD™ Manchester, Hervis, Bosch® (Philips, Burle), Sensormatic®, Vicon™, TASS, and NTCIP protocols.

## RECOMMENDED POWER SUPPLIES

MCS Series	Multiple 24 VAC camera power supply, indoor
WCS Series	Single/multiple 24 VAC camera power supply, outdoor

## RECOMMENDED CONTROLS

All Pelco multiplexer and matrix switchers (CM6700, CM6800, CM9700 Series, MPT9000, and MX4000 Series) and PelcoNet™ Series.

## RECOMMENDED KEYBOARD CONTROLS

(For use in Direct Mode operation only)

KBD200A	Desktop keyboard, multispeed PTZ control
KBD300A	Desktop keyboard, variable speed PTZ control

**Note:** KBD keyboards require a remote keyboard wiring kit (KBDKIT) for direct mode operation; allows two-wire control of up to 16 daisy-chained receivers (or Esprit systems). Keyboards output Pelco P protocol at 4800 baud.

**GSA** Contract #GS-07F-9323S

# ExSite® Series Explosionproof Positioning System

## PAN/TILT SYSTEM WITH IOP CAMERA AND OPTIONAL WIPER

### Product Features

- Electropolished 316L Stainless Steel Construction
- Upright or Inverted Operation
- Receiver, Pan/Tilt, and Enclosure with an Integrated Optics Package (IOP)
- 2 Autofocus, High Resolution Integrated Optic Packages
  - 23X Day/Night, 80X Wide Dynamic Range, Motion Detection, and 540 TVL Horizontal Resolution
  - Color 22X EXview HAD™
- Multilingual On-Screen Menus
- Password Protection
- Configurable Camera Settings
- On-Screen Compass, Tilt, and Zoom Display
- Variable Speed Pan: 0.1° to 40°/second with Proportional Pan
- 360° Continuous Pan Rotation
- Tilt Range of +90° to -90° from Horizontal
- Preset Positioning, Patterns, Multiple Scan Modes
- Designed for Minimal Maintenance
- Built-in System Memory
- Software Update and Setup Through Remote Data Port (IPS-RDPE-2)
- Password Protection to Prevent Unauthorized Changes to the System

SHOWN WITH WXM100 WALL MOUNT  
(NOT SUPPLIED)

- On-Board Connector for
  - Pelco VC-UTP Video Converter
  - Pelco TXB Series Translator Boards for Use with Hervis and Other Protocols
  - Pelco FS85011A and Third-Party Fiber Optic Transmitters

The **ExSite® Series** are innovative integrated positioning systems that meet stringent explosionproof requirements. The **ExSite Series** not only combine a receiver, pan/tilt, and enclosure in a single, easy-to-install system, but also includes an Integrated Optics Package (IOP). The Integrated Optics Package contains an autofocus camera and lens module with configurable features.

For a wide range of applications, the **ExSite Series** feature a choice of two different IOP cameras: a high resolution camera with LowLight™ color technology and 22X zoom lens (22X optical, 12X digital), and a high resolution day/night camera with a removable infrared cut filter and 23X zoom lens (23X optical, 12X digital).

The electropolished 316L stainless steel construction makes the **ExSite Series** ideal for all kinds of environmental conditions including marine applications. The system has an absolute operating temperature range of -76° to 140°F (-60° to 60°C). Within two hours after power-up, the entire unit can de-ice and be operational from a temperature of -13°F (-25°C).

The **ExSite Series** include an optional window wiper. The wiper is completely integrated into the enclosure and does not interfere with the viewing range of the system. The wiper can be configured to delay

between wipes and to automatically shut off after a specified period. A built-in heater, window defroster/defogger, sun shroud, and blower are standard features on the **ExSite Series**. All units also include three auxiliary output relays that can be configured for a variety of uses.

The **ExSite Series** variable pan and tilt speeds range from 0.1 to 40 degrees per second in manual pan, tilt, and preset mode. The **ExSite Series** is capable of 360 degrees of continuous pan rotation. The tilt range allows for horizontal viewing of -90 to +90 degrees. There are 80 preset positions with a preset accuracy of ±0.1 degree.

The systems are available with an input voltage of 24 VAC or with a power source of 100 to 240 VAC. The **ExSite Series** also have a power-up recovery mode that allows the user to specify what operation the system will resume whenever the power is cycled.

**ExSite Series** feature built-in system memory in the power module to store camera and location-specific pan/tilt settings, including labels, presets, patterns, and zones. These settings are automatically down-loaded if a new pan and tilt body is installed.

by Schneider Electric

C1300 / REVISED 10-29-10

# TECHNICAL SPECIFICATIONS

## PRODUCT FEATURES

- Integral Multiprotocol Receiver/Driver
- 360° Continuous Pan Rotation, Tilt Range  $\pm 90^\circ$
- Quick and Easy Installation
- Designed for Minimal Maintenance, No Gears to Adjust
- 2-Year Continuous-Duty Warranty
- Upright or Inverted Installation

## SOFTWARE/HARDWARE

- Configurable Power-up Mode
- Configurable Park
- Sun Shroud, Heater/Window Defroster, and Blower All Standard
- 80 Presets with Custom Camera Settings and Labels
- $\pm 0.1^\circ$  Preset Accuracy
- Multilingual Menus (English, Spanish, Portuguese, Italian, French, German, Russian, Polish, Turkish, and Czech)
- On-Screen Compass, Tilt, and Zoom Display
- Password Protection
- 8 Zones (configurable in size) Can Be Labeled with Up to 20 Characters Each or Set to Output Blank Video
- Configurable Locations of Labels and On-Screen Displays
- 7 Alarm Inputs
- 3 Relay Outputs
- Action on Alarm: Alarms can be individually configured for 3 priority levels, to initiate a stored pattern, or to go to an associated preset when received
- Resume After Alarm: Allows the pan/tilt to return to a previously configured state after alarm acknowledgement or to its previous position before alarm
- Patterns: Up to 4, on-screen, user-defined configurable patterns; includes pan, tilt, zoom, and preset functions
- Proportional Pan/Tilt: Continually decreases pan and tilt speeds in proportion to depth of zoom
- Variable Scan Speed: Scan speed can be configurable between  $1^\circ$  and  $40^\circ/\text{sec}$
- Configurable Limit Stops for Auto/Random/Frame Scan Modes
- Autosensing Protocol (Coaxitron®, RS-422 Pelco P and Pelco D); Accepts Competitive Control Protocol with Optional Translator Card
- Built-in Menu System for Setup of Configurable Functions

## ALL CAMERAS

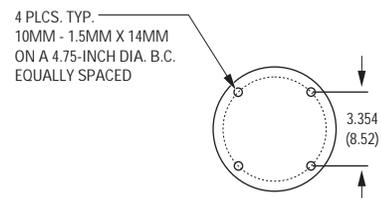

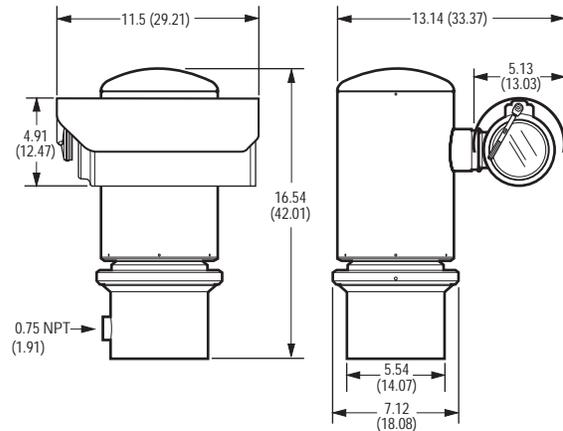

- Autofocus with Manual Override
- Auto Iris with Manual Override
- Configurable Settings
- AC Line Lock
- NTSC/PAL

## ELECTRICAL

Input Voltage	24 VAC or 100 to 240 VAC, 50/60 Hz
Input Voltage Range	$\pm 10\%$
Power Consumption	Maximum 60 W (120 VA) per system
Heater and Defroster	Microprocessor controlled
Electrical Connections	6-foot pigtail wire harness with connections for power, video, data control, alarm inputs, and auxiliary outputs
Auxiliary Outputs	3 N/O or N/C relays, 32 VDC, 0.5 A. Relay 3 is allocated specifically for an external washer (not supplied by Pelco).
Alarm Inputs	7

## MECHANICAL

Cable Entry	One 0.75-inch (1.91 cm) NPT threaded opening; one explosionproof sealable fitting supplied
Pan Movement	360° Continuous pan rotation
Vertical Tilt	Unobstructed $+90^\circ$ to $-90^\circ$
Variable Pan/Tilt Speed	
Pan	$0.1^\circ$ to $40^\circ/\text{sec}$ variable-speed operation
Tilt	$0.1^\circ$ to $40^\circ/\text{sec}$ variable-speed operation
Preset Speeds	
Pan	$40^\circ/\text{sec}$
Tilt	$40^\circ/\text{sec}$

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

## OPTIONAL ACCESSORIES

TXB Series\* Translator boards for AD Manchester, Hernis, Bosch® (Philips®, Burle), Sensomatic®, TASS, Vicon™, and NTICIP™ protocols.

IPS-CABLE Remote monitor cable and software kit.

IPS-RDPE-2\* Remote data port. 24 VAC, wall/pole mount video/data breakout box. Allows ground-level control/configuration when used with the IPS-CABLE.

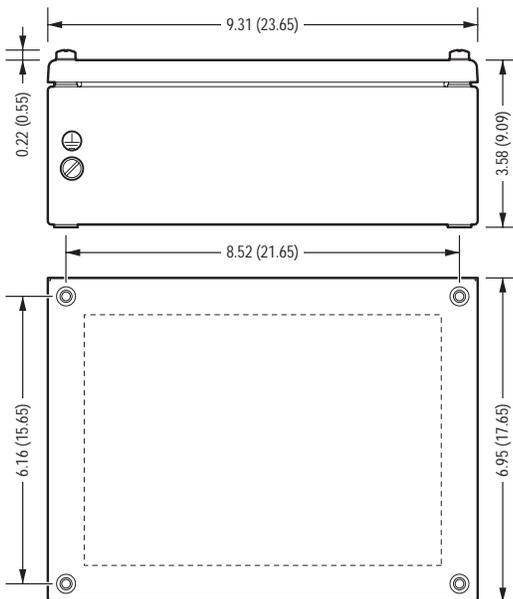

VC-UTP Converts video for use with unshielded twisted pair (UTP); cannot be used simultaneously with TXB translator boards.

FS85011A Series\* Factory-installed fiber transmitter sends one unidirectional composite video channel and one bidirectional data channel over on multimode or single-mode fiber optic cable.

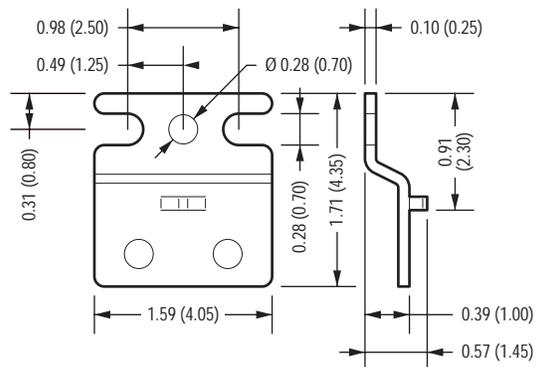

EXAC Factory-installed increased safety (Ex e) potted cable interface and junction box with screw-down terminal for quick connection and easy installation.

\*If TXB or FS85011A boards are installed, remote upload of system software will not be possible.

# EHXM Series Explosionproof Camera System

## CAMERA SYSTEM WITH IOP CAMERA AND OPTIONAL WIPER

### Product Features

- Electropolished 316L Stainless Steel Construction
- Upright or Inverted Installation
- Manual 200° Pan and 180° Tilt Adjustments
- Receiver and Enclosure with Integrated Optics Package (IOP)
- For Use in a Variety of Harsh and/or Hazardous Environments, including Marine Environments
- 2 Auto Focus, High Resolution Integrated Camera/Optics Packages
  - 23X Day/Night, 80X Wide Dynamic Range, Motion Detection, and 540 TVL Horizontal Resolution
  - Color 22X EXview HAD™
  - Multilingual On-Screen Menus
  - Password Protection
  - Autofocus with Manual Override
  - Configurable Camera Settings
  - Auto Iris with Manual Override
- Integral Multiprotocol Receiver/Driver
- Meets NEMA Type 4X and IP66 Standards
- Designed for Minimal Maintenance
- Password Protection

- On-Board Connector for
  - Pelco VC-UTP Video Connector
  - Pelco TXB Series Translator Boards for Use with Hervis and Other Protocols
  - Pelco FS85011A and Third-Party Fiber Optic Transmitters

The **EHXM Series** explosionproof camera enclosures are designed to meet the rigorous requirements of explosionproof and dust-ignitionproof electrical equipment for installation and use in hazardous locations. The system can be installed in a standard or inverted position and features manually adjustable 200 degrees of pan and 180 degrees of tilt positioning.

All units feature an integrated camera and lens package with LowLight™ technology. The day/night model features a 23X lens, built-in motion detection and 80X wide dynamic range imager. The color camera has a 22X lens and EXview HAD™ imager for increased sensitivity.

The electropolished 316L stainless steel construction makes the **EHXM Series** ideal for either indoor or outdoor applications. The system has an absolute operating temperature range of -76° to 140°F (-60° to 60°C). Within two hours after power-up, the entire unit can de-ice and be operational from a temperature of -13°F (-25°C).

The systems are available with an input voltage of 24 VAC or with a power source of 100 to 240 VAC.

The **EHXM Series** includes an optional window wiper. The wiper is completely integrated into the enclosure and does not interfere with the viewing range of the system. The wiper can be configured to delay between wipes and to automatically shut off after a specified period. The wiper design also allows for easy replacement of the wiper blade. A built-in heater, window defroster/defogger, sun shroud, and blower are standard features on the **EHXM Series** units. All units also include three auxiliary output relays that can be configured for a variety of uses including third-party washer systems.

Also available are video conversion modules for applications using unshielded twisted pair (UTP) and fiber. Refer to OPTIONAL ACCESSORIES for information.

- Integral Multiprotocol Receiver/Driver
- Quick and Easy Installation

## SOFTWARE/HARDWARE

- Multilingual Menus (English, Spanish, Portuguese, Italian, French, and German)
- Alternate Language Files (includes Russian, Polish, Turkish) Available as Optional Software Upload
- Password Protection
- Configurable Locations of Labels and On-Screen Displays
- Autosensing Protocol (Coaxitron®, RS-422 Pelco P and Pelco D); Accepts Competitive Control Protocol with Optional Translator Card
- Built-in Menu System for Setup of Configurable Functions

## ALL CAMERAS

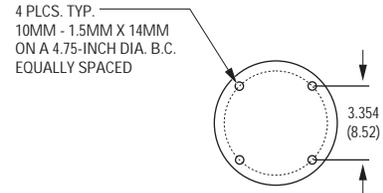

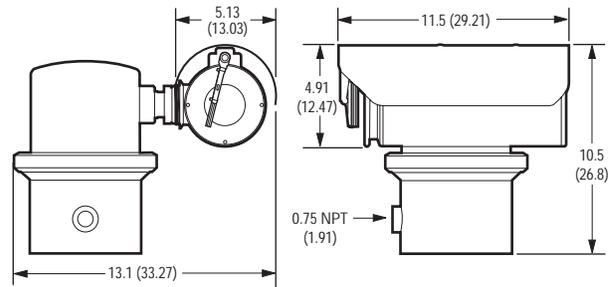

- Autofocus with Manual Override
- Auto Iris with Manual Override
- Configurable Settings
- AC Line Lock
- NTSC/PAL

## ELECTRICAL

Input Voltage	24 VAC or 100 to 240 VAC, 50/60 Hz
Input Voltage Range	±10%
Power Consumption	Maximum 60 W (120 VA)
Heater and Defroster	Microprocessor controlled
Electrical Connections	6-foot pigtail wire harness with connections for power, video, alarm inputs, and auxiliary outputs.

## MECHANICAL

Cable Entry	One 0.75-inch (1.91 cm) NPT threaded opening; explosionproof sealable fitting (supplied)
-------------	--

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# TECHNICAL SPECIFICATIONS

## GENERAL

Construction	316L stainless steel
Finish	Electropolish
Viewing Window	0.50-inch (12.7 mm) thick, soda-lime tempered glass
Operating Temperature	-76° to 140°F (-60° to 60°C)
Unit Weight	34.7 lb (11.33 kg)
Shipping Weight	40 lb (18.14 kg) approximate
Effective Projected Area (EPA)	31.1 square inches

# MOUNTING ACCESSORIES

## MODELS

WXM100	Wall mount designed to mount the EHXM Series system directly to a load-bearing vertical surface
PXM100	Pedestal mount designed to mount an EHXM Series system directly to a horizontal surface in either an upright or inverted position
CMXM100	Corner adapter for use with the WXM100 to mount an EHXM Series system to the corner of a structure
PAXM100	Pole adapter for use with the WXM100 to mount a system to a vertical pole or with a PXM100 to mount a system to a horizontal pole; recommended pole diameter is 4 to 9 inches (10.16 to 22.86 cm)

## GENERAL

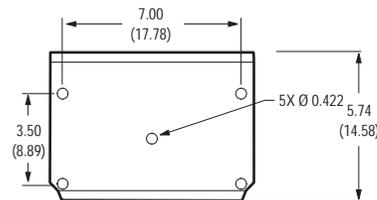

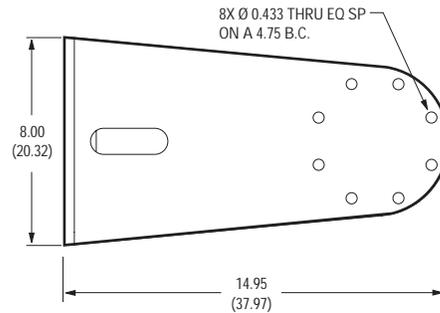

Construction	
Mounts	Electropolished 304 stainless steel
PAXM100 Mounting Straps	316 stainless steel
Maximum Load	
WXM100	73 lb (33 kg)
CMXM100	85 lb (38.50 kg)
PAXM100	88 lb (40 kg)
PXM100	79 lb (35.83 kg)
Unit Weight	
WXM100	12.4 lb (5.62 kg)
CMXM100	7.6 lb (3.45 kg)
PAXM100	9.2 lb (4.17 kg)
PXM100	1.3 lb (0.60 kg)
Shipping Weight (approximate)	
WXM100	17 lb (7.71 kg)
CMXM100	13 lb (5.89 kg)
PAXM100	14 lb (6.35 kg)
PXM100	4 lb (1.81 kg)

## MECHANICAL

Mounting Method	Recommended Mounting Surface	Recommended Hardware
WXM100, CMXM100*, and PXM100	Solid concrete with the recommended strength of 3,600 psi or 25 Mpa	Five 3/8-16 x 1-9/16-inch long stainless steel drop-in anchors and five 3/8-16 x 1.0-inch thread length, stainless steel hex head bolts with stainless steel lock washers (not supplied)
	Steel I beam with a minimum of 1/8-inch wall	Five 3/8-16 x 1.0-inch thread length, stainless steel hex head bolts with stainless steel lock washers and 3/8-16 stainless steel nuts (not supplied)
PAXM100*	Steel pole with a diameter of 4 to 9 inches (10.16 to 22.86 cm)	Four 5/8-inch wide x 40-inch (101.6 cm) long stainless steel straps to attach the adapter to a pole (supplied)

\*Five 3/8-16 x 1.0-inch thread length, stainless steel hex head bolts with lock washers are supplied with the CMXM100 and PAXM100 to be used with the WXM100 wall mount or PXM100 pedestal mount.

## OPTIONAL ACCESSORIES

TXB Series\* Translator boards for AD Manchester, Hernis, Bosch® (Philips®, Burle), Sensomatic®, TASS, Vicon™, and NTICIP™ protocols.

IPS-CABLE Remote monitor cable and software kit

IPS-RDPE-2\* Remote data port. 24 VAC, wall/pole mount video/data breakout box. Allows ground-level control/configuration when used with the IPS-CABLE (no code upload).

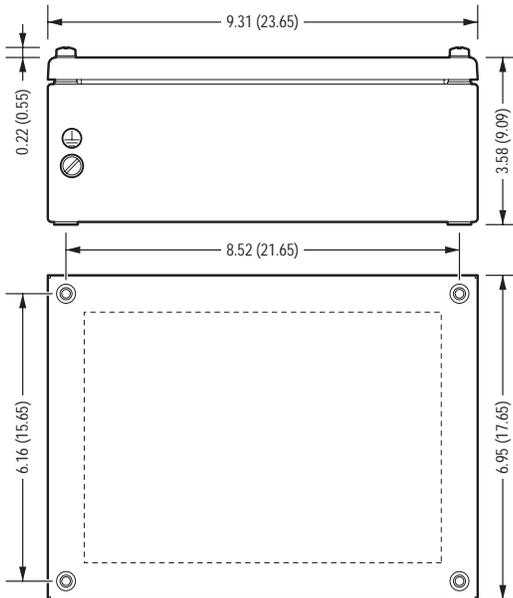

VC-UTP Converts video for use with unshielded twisted pair (UTP); cannot be used simultaneously with TXB translator boards.

FS85011A Series\* Factory-installed fiber transmitter sends one unidirectional composite video channel and one bidirectional data channel over one multimode or single-mode fiber optic cable.

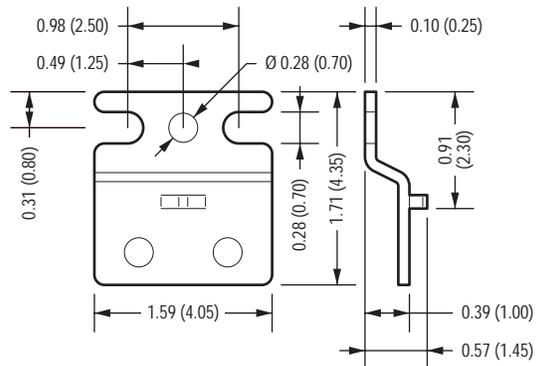

EXAC Factory-installed increased safety (Ex e) potted cable interface and junction box with screw-down terminal for quick connection and easy installation.

\*If TXB or FS85011A boards are installed, remote upload of system software will not be possible.

# ES30TI Series Positioning System

## ESPRIT® SYSTEM WITH THERMAL IMAGING OPTICS

### Product Features

- Receiver, Pan/Tilt, and Enclosure with an Integrated Thermal Imaging Camera
- Sensitivity Below 40 mK at f/1.0
- Long Wave, Uncooled, Vanadium Oxide Microbolometer
- 320 x 240 Resolution; 38 µm Pixel Size
- User Definable/Configurable Camera Settings
- On-Screen Compass, Tilt, and Zoom Display
- 2X Digital Zoom
- Integral Multiprotocol (Coaxitron®, RS-422 Pelco D and Pelco P) Receiver/Driver
- Variable Speed Pan Ranges from 0.1° to 100°/Second with Proportional Pan
- 360° Continuous Pan Rotation
- Zone Blanking Allows up to 8 Zones (Configurable in Size) to Be Set to Output Blank Video
- Operational in 90 mph Wind Conditions; Can Withstand Wind Velocity up to 130 mph
- Pan Preset Speed of 100° Per Second in 50 mph Winds and 50° Per Second in 90 mph Winds
- Tilt Range of +33° to –83° from Horizontal

The **ES30TI Series** combines the power of an advanced thermal imaging device with the precision of an Esprit® pan/tilt to create a completely integrated, single addressable thermal imaging positioning system. At the core of the **ES30TI** is an uncooled, vanadium oxide microbolometer, long wave infrared (LWIR) camera. It delivers 320 x 240 thermal video with a pixel size of 38 µm and supports 2X digital zoom.

The **ES30TI Series** provides outstanding sensitivity below 40 mK. It is capable of multiple display formats, including white hot, black hot, and color signatures. The **ES30TI** is available with three different lens configurations (14.25 mm, 35 mm, and 50 mm focal lengths) for effective deployment in a wide range of applications.

A powder-coated, aluminum construction makes the **ES30TI Series** ideal for either indoor or outdoor applications. The system has an absolute operating temperature range of –50° to 140°F (–45° to 60°C). Within two hours after power-up, the entire unit can de-ice and be operational from a temperature of –13°F (–25°C).

**ES30TI ESPRIT THERMAL IMAGING SYSTEM  
(SHOWN WITH EPP PEDESTAL ADAPTER)**

- Preset Positioning, Patterns, Multiple Scan Modes
- Designed for Minimal Maintenance, No Gears to Adjust

A built-in heater, window defroster/defogger, sun shroud, and insulation blanket are standard features on the **ES30TI Series**. All units also include an open collector auxiliary output that functions for two seconds before deactivating.

The **ES30TI Series** variable pan and tilt speeds range from 0.1 to 40 degrees per second in manual pan mode and 0.1 to 20 degrees per second in manual tilt. Pan preset and turbo speeds are 100 degrees per second in wind speeds of 50 mph and 50 degrees per second in the 90-mph wind-speed profile. Tilt preset speed is 30 degrees per second. The **ES30TI** is capable of 360 degrees of continuous pan rotation. The tilt range allows for horizontal viewing of +33 to –83 degrees. There are 64 configurable preset positions with a preset accuracy of one-quarter degree.

**ES30TI Series** systems are available with an input voltage of 24 VAC or with a selectable power source of 120/230 VAC. The **ES30TI** also has a power-up recovery mode that lets users specify the operation to perform whenever the power is cycled.

# TECHNICAL SPECIFICATIONS

## ADDITIONAL FEATURES

- Deterrent Surveillance
- Digital Position and Feedback Using Pelco D Protocol
- Integral Infrared (IR) Camera Enclosure
- Meets NEMA Type 4X and IP66 Standards, Pan/Tilt and Enclosure
- Variable Scan Speeds (0.1 to 40°/Second)
- Translator Boards for Selected Competitive Protocols
- Easy to Install; Quick and Simple Electrical Connections
- 24 VAC or 120/230 VAC Selectable
- Full Continuous-Duty Warranty

## SOFTWARE/HARDWARE

- 64 Configurable Presets with Labels
- Auto, Frame, and Random Scan
- Configurable Power-Up Mode
- Configurable Park
- Configurable Manual Limit Stops (Pan)
- Configurable Scan Limit Stops (Pan)
- Patterns
- Proportional Pan/Tilt
- 8 Zones (Configurable in Size) Can Be Labeled with up to 20 Characters Each
- Up to 8 Zones (Configurable in Size) Can Be Set to Output Blank Video
- 10-Inch Integrated Enclosure with Pre-Assembled, Thermal Camera
- Sun Shroud, Heater/Window Defroster, and Insulation All Standard
- 1 Auxiliary Output

## ALL CAMERAS

- Configurable Settings
- AC Line Lock
- NTSC/PAL

## ELECTRICAL

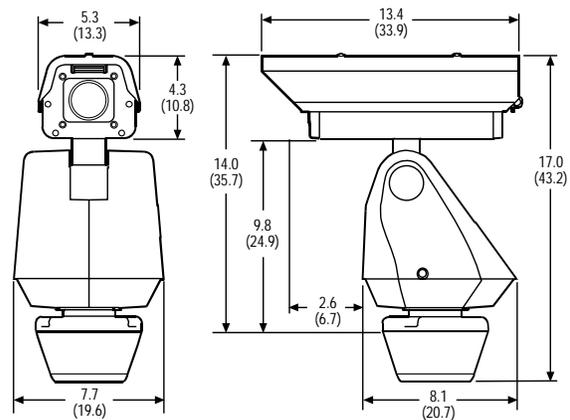

Input Voltage	24, 120, or 230 VAC, 50/60 Hz; switch selectable for 120/230 VAC inputs
Input Voltage Range	±10%
Power Consumption	Maximum 70 VA per system
Heater and Defroster	Thermostatically controlled
Electrical Connections	2 power source connections made at mount location with wire splices and one ground wire splice; 1 BNC receptacle and 4 wire splices at mount location for RS-422 Pelco D and Pelco P protocols; 2 wire splices for open collector auxiliary output
Aux 2	Open collector output with 2-second activation; connected relay must require no more than 32 VDC and 40 mA to energize relay coil; wire length between Esprit and relay must be less than 100 feet (30 m)

Video Coaxial Cable	Cable Type*	Maximum Distance
Maximum Wiring Distances	RG59/U	750 ft (229 m)
	RG6/U	1,000 ft (305 m)
	RG11/U	1,500 ft (457 m)

\*Minimum cable requirements:  
75-ohms impedance; all-copper center conductor; all copper braided shield with 95 percent braid coverage

## MECHANICAL

Pan Movement	360° continuous pan rotation
Vertical Tilt	Unobstructed +33° to -83°
Variable Pan/Tilt Speed	
Pan	0.1° to 40°/sec variable-speed operation, 100°/sec turbo
Tilt	0.1° to 20°/sec variable-speed operation
Preset Speeds	
Pan	100°/sec
Tilt	30°/sec
Camera Mounting	Integrated camera sled assembly
Latches	1 link-lock, No. 3 stainless-steel latch; can be secured with padlock (not supplied)

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS;  
ALL OTHERS ARE INCHES.

# TECHNICAL SPECIFICATIONS

## THERMAL CAMERA/OPTICS

Detector	Uncooled microbolometer, vanadium oxide (VOx)
Array Format	320 x 240
Pixel Size	38 µm
Spectral Response	7.5 to 13.5 µm, long wave infrared (LWIR)
Video Output	NTSC/PAL
Normalization Source	Internal shutter (offset only), 0.7 sec video freeze during shutter wink
Time to Image	Less than 2 seconds, no thermoelectric cooler (TEC)
Image Control	2X digital zoom
Serial Command	RS-232 compatible
Scene Temp Range (Lens Dependent)	To 150°C standard; optional auto-gain mode extends range to 560°C
Lens Options	14.25 mm, f/1.3 lens 35 mm, f/1.4 lens 50 mm, f/2.0 lens

## PIXELS ON TARGET (POT)

The following performance values are based on a man-sized target from a unit mounted at 25 feet (8 m) under normal atmospheric conditions:

Model	Lens	Horizontal Field of View	Identification (12 POT)	Detection (2 POT)
ES3014TI	14.25 mm	50°	305 ft (93 m)	807 ft (246 m)
ES3035TI	35 mm	20°	767 ft (234 m)	1,902 ft (580 m)
ES3050TI	50 mm	14°	1,115 ft (340 m)	2,736 ft (834 m)

## GENERAL

Construction	Die-cast, extruded and sheet aluminum; stainless steel hardware	
Finish	Gray polyester powder coat	
Viewing Window	3 mm thick hard carbon coated germanium	
Operating Temperature	-50° to 122°F (-45° to 50°C) for sustained system operation or 140°F (60°C) absolute maximum; within two hours after power-up, the entire unit can de-ice and be operational from a temperature of -13°F (-25°C)	
Operating Environment	Will remain operational in 90 mph wind conditions; withstands 130 mph	
Weight	With Pedestal Adapter	With Wall Mount
	Unit	20 lb (9.0 kg)
Shipping	25 lb (11.3 kg)	28 lb (12.6 kg)
Effective Projected Area (EPA)	104 square inches (with pole adapter)	
	132 square inches (with wall mount)

# TI2500 Series Fixed-Mount Thermal Imager

## ENCLOSURE WITH INTEGRATED THERMAL IMAGING OPTICS

### Product Features

- Long Wave Infrared (LWIR), Uncooled, Vanadium Oxide Microbolometer
- 320 x 240 Resolution, 38 Microns Pixel Size
- Sensitivity Below 85 mK at f/1.4
- User Definable/Configurable Camera Settings
- Interface Board for 24 VAC/24 VDC Input Power
- NTSC/PAL Analog Video Output
- 2X Digital Zoom
- 2 Lens Options (35 mm and 50 mm)
- Designed for Maximum Rain Protection
- Compact, Lightweight Aluminum Construction

TI2535

- Meets NEMA Type 4 and IP66 Standards
- Complete with Sun Shroud and Heater

The **TI2500 Series** offers a completely integrated advanced thermal imaging device in a Pelco outdoor enclosure. At the core of the **TI2500** is an uncooled, vanadium oxide 38 microns microbolometer, LWIR camera. It delivers 320 x 240 thermal video and supports 2X digital zoom.

The **TI2500 Series** provides outstanding sensitivity below 85 mK at f/1.4. It is capable of multiple display formats, including white hot, black hot, and color signatures. The **TI2500 Series** is available with two different lens configurations (35 mm and 50 mm focal lengths) for effective deployment in a wide range of applications.

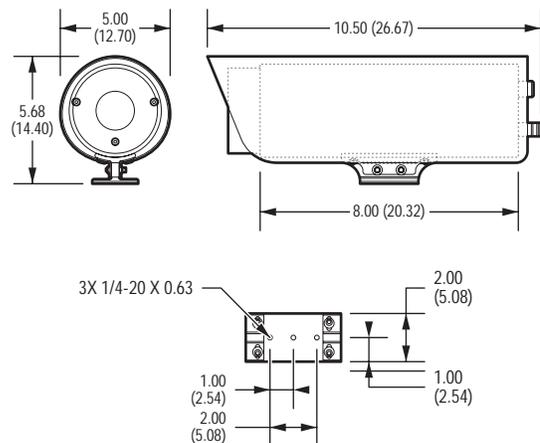

The powder-coated, aluminum constructed enclosure makes the **TI2500 Series** ideal for either indoor or outdoor applications. With an absolute operating temperature range of -25° to 131°F (-32° to 55°C), this indoor/outdoor system can be used in many environments.

A sun shroud and built-in thermostatically controlled heater are standard features on the **TI2500 Series**.

The **TI2500 Series** produces video imagery within 5 seconds of turning on the unit, within the operating temperature range.

The **TI2500 Series** has an input voltage of 24 VAC or 24 VDC.

**TI2500 Series** cameras are factory focused and locked at infinity; however, they can be manually adjusted by a qualified technician.

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

Hyper Focal Distance	
TI2535	85 ft (26 m)
TI2550	114 ft (35 m)

## RECOMMENDED MOUNTS

<b>Ceiling/Pedestal</b>	
EM1009U, EM1015U	Medium duty ceiling/pedestal mount
<b>Wall</b>	
EM1450	Light duty wall mount
<b>Pipe/Pole</b>	
EM1109	Medium duty pedestal mount for horizontal or vertical pipe/pole applications
EM2000	Medium duty mount for vertical applications
EM2200	Medium duty mount for horizontal applications

## RECOMMENDED POWER SUPPLIES

WCS1-4	Outdoor camera power supply, 100/120/240 VAC input; one 24/26/28 VAC output; total current capacity of 4 A (100 VA)
WCS4-20	Outdoor multiple camera power supply, 120/240 VAC input; four fused 24/28 VAC outputs; total current capacity of 20 A (480 VA)

# 13VA Series Varifocal Lens

## 1/3-INCH FORMAT, MANUAL IRIS

### Product Features

- CS Mount
- For use with 1/3-Inch Format Cameras
- Manual Iris, Manual Focus, and Manual Zoom
- High Resolution Power in a Compact Body

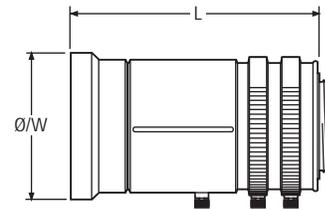

13VA5-40

Pelco's **13VA Series** 1/3-inch varifocal lenses offer versatile and flexible packages in one lens. Each adjustable manual iris lens in this series covers a specific range of focal lengths. Adjust these lenses to get the exact field of view instead of "almost-the-right-view."

Appropriate for indoor and outdoor lighting situations, the **13VA Series** lenses will fit all 1/3-inch CS-mount cameras and are ideal for those equipped with an electronic iris feature. Some lenses have aspheric elements, which provide optimized, crisper images at all focal lengths.

Lenses in this series are available in 2.1X, 2.7X, 4.3X, 8X, and 10X zoom with varying focal lengths.

Pelco's **13VA Series** varifocal lenses are optimized for maximum light transmission. Maximum f-numbers range from f/1.0-f/1.6 for excellent low light characteristics.

MODELS	Ø/W	L
13VA1-3	1.56 (3.96)	2.05 (5.21)
13VA2.8-12	1.58 (4.01)	2.33 (5.92)
13VA3-8	1.30 (3.30)	1.78 (4.52)
13VA5-40	1.65 (4.19)	2.86 (7.26)
13VA5-50	1.56 (3.96)	2.33 (5.92)

# 13VD Series Varifocal Lens

## 1/3-INCH FORMAT, AUTO IRIS (DIRECT DRIVE)

### Product Features

- CS Mount
- Spot Filter
- For Use with 1/3-Inch Format Cameras
- Auto Iris, Manual Focus, and Zoom
- High Resolution Power in Compact Body

13VD5-40

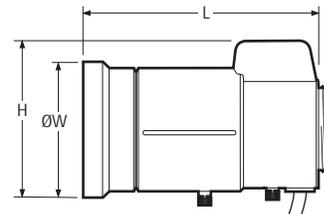

Pelco's **13VD Series** 1/3-inch varifocal lenses offer versatile and flexible packages in one basic lens. Each auto iris lens in this series covers a specific range of focal lengths. Adjust these lenses to get the exact field of view instead of "almost the right view."

Appropriate for indoor and outdoor lighting situations, the **13VD Series** lenses will fit all 1/3-inch CS-mount cameras requiring DC-drive auto iris lenses. In addition, all auto iris lenses include a spot filter. Lenses in the **13VD Series** come with a standard square 4-pin plug installed for ease of installation and convenience.

Lenses in this series are available in 2.1X, 2.4X, 2.7X, 4.3X, 8X, 10X, and 15X zoom with varying focal lengths.

Pelco's VD series lenses are intraspot-type lenses, which optimize the dynamic range of the iris. Maximum apertures of no less than f/1.8 to a minimum aperture of f/360 are typical of all these lenses. This allows for excellent performance characteristics across a wide range of lighting conditions.

Select the model lens that best suits your needs from the Technical Specifications section of this product specification sheet.

# 13VDIR Series Day/Night Lens

## 1/3-INCH FORMAT, AUTO IRIS (DIRECT DRIVE), IR CORRECTED

### Product Features

- Designed for All Day/Night and Monochrome Cameras
- Increased Sharpness in Monochrome Mode
- Focuses IR and Visible Light
- Eliminates the Problem of IR Focus Shift
- Auto Iris, Manual Focus, and Zoom

13VDIR3-8.5

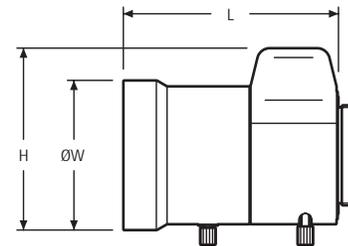

The purpose of Pelco's **13VDIR Series** is to compensate for the focus shift that results from the different wavelengths of visible and IR light. IR corrected lenses focus light energy on the same plane. The result is better focus, sharper contrast, and better overall image quality.

IR corrected lenses are particularly of benefit to Pelco's day/night cameras, which "see" both visible and IR light. IR corrected lenses allow a camera's imager to take in visible and IR illumination in "night" conditions (when the IR cut filter is not deployed), while eliminating the problem of IR focus shift.

Appropriate for indoor and outdoor lighting situations, the **13VDIR Series** lenses will fit all 1/3-inch CS mount cameras requiring DC drive auto iris lenses. Lenses in the **13VDIR Series** come with a standard square 4-pin plug installed for ease of installation and convenience.

Lenses in this series are available in 2.8X (13VDIR3-8.5), 3.9X (13VDIR2.8-11), and 6.7X (13VDIR7.5-50) zoom with varying focal lengths.

Maximum and minimum apertures for these lenses are f1.4 - f2.6 (13VDIR2.8-11), f1.0 - f1.6 (13VDIR3-8.5), and f1.3 - f1.8 (13VDIR7.5-50). This allows for excellent performance characteristics across a wide range of lighting conditions. These lenses have aspheric elements, which provide crisper, optimized images at all focal lengths.

# 13M Series Megapixel Varifocal Lens

## 1/3-INCH FORMAT, 3 MEGAPIXEL, AUTO IRIS (DIRECT DRIVE)

### Product Features

- Up to 3 Megapixels (MPx)
- CS Mount
- For use with 1/3-Inch Cameras
- Auto Iris, Manual Focus, and Zoom
- High Resolution Power in a Compact Body
- Aspherical Elements

13M15-50

Pelco's **13M Series** megapixel varifocal lenses are a new class of lenses specially designed to provide optimal results when used in cameras with megapixel sensors. These lenses enable megapixel cameras to realize the high resolutions that standard lenses cannot deliver, with a resolving power of up to 100 lines per millimeter. These lenses provide excellent image quality at both the center and at the corner of the image.

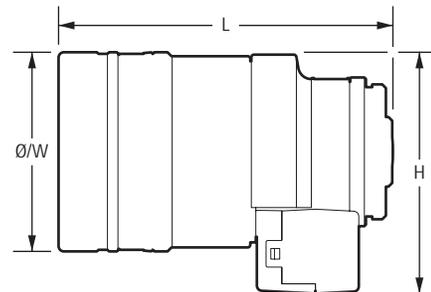

The **13M Series** offers versatility and flexibility in a compact package. Each auto iris lens covers a specific range of focal lengths, so you can adjust the lens to achieve the exact field of view instead of "almost the right view."

Appropriate for indoor and outdoor lighting situations, the **13M Series** lenses will fit all 1/3-inch CS-mount cameras requiring DC drive auto iris lenses. The lenses also include a spot filter. A factory-installed square 4-pin plug is standard for ease of installation.

Lenses in this series are available in 2.7X, 2.8X, 3.3X, and 4.3X zoom with varying focal lengths.

Designed especially for low-light capability, Pelco's **13M Series** lenses are extremely fast. These lenses provide excellent performance across a wide range of lighting conditions. The **13M Series** also provides excellent day/night performance in Pelco Sarix™ cameras that are capable of this function, which includes operation with IR lighting and visible lighting.

The **13M Series** lenses have a slip mechanism that allows it to be easily adjusted and oriented inside enclosures, domes, and so forth. In addition, the metal mount makes for a robust and secure attachment to cameras.

# 13ZD Series Motorized Zoom Lens

## 1/3-INCH FORMAT, AUTO IRIS (DIRECT DRIVE)

### Product Features

- CS Mount
- Spot Filter
- For Use with 1/3-Inch Format Cameras
- Auto Iris (Direct Drive, No Amplifier), Motorized Focus and Zoom (with or without Presets)
- High Resolution Power in Compact Body

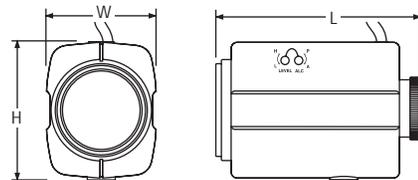

13ZD5.6X20

Pelco's **13ZD Series** of 1/3-inch motorized zoom lenses cover a wide range of applications from wide angle to telephoto. Each auto iris lens in this series covers a specific range of focal lengths and is available with or without preset positioning.

Appropriate for indoor and outdoor lighting situations, the **13ZD Series** lenses will fit all 1/3-inch CS-mount cameras requiring DC-drive auto iris lenses. In addition, all auto iris lenses include a spot filter. A factory-installed, square 4-pin auto iris connector is standard.

Lenses in this series are available in 8X, 10X, 15X, 20X, and 30X zoom with varying focal lengths.

Various maximum apertures of f1.4 to f1.8 and a minimum aperture of f/360 allow excellent performance characteristics across a wide range of lighting conditions.

# CM9765 Series Matrix

## MICROPROCESSOR-BASED SWITCHER/CONTROLLER; 2,048 INPUTS; 512 OUTPUTS

### Product Features

- Microprocessor-Based, Full Cross-Point Video Matrix
- High-Density Architecture Supports up to 256 Cameras and 16 Monitors in Each Bay
- Control up to 2,048 Cameras and 512 Monitors in a Single Node or Expand Camera Capacity with a Multi-Node System (up to 24 Nodes)
- Full System Reports From CM9700-MGR Provide System Wiring and Configuration Details
- Sixteen RS-422 COM Ports (Expandable to 120) and Two RS-232 Full-Duplex Ports Available on the CPU
- System Diagnostic LEDs Displayed on Front Panel
- Flash Technology Eases System Maintenance and Upgrades
- Logical Camera Selection and Priority Level Operation
- Multiplexer and DVR Control Using the Keyboard
- Built-in Video Loss Detection
- Windows®-Based System Management Software (Windows 2000, Windows XP) Includes Multilingual Menus and On-Screen Help
- Factory Tested Prepackaged Systems
- ASCII Data Input to Interface Access Control and Other External Computer-Based Systems
- Powerful Macro Programming

### Optional Accessories

- “Hot Switch” and Backup CPU Ensure Uninterrupted Operation
- Redundant Power Supplies for Switching Bays
- Coaxitron® Translator Allows PTZ Communication Over Standard Coaxial Cable
- Responds to 5,000 Alarms
- Network Interface Unit Allows Multiple Systems to Share Video and Control
- DVR Management

*All CM9765 Series systems require installation by a Pelco Certified Dealer/ Installer. This specification sheet may be used for purpose of information only and does not constitute approval or certification of receiving party. Proof of certification must be provided prior to shipment of CM9765 Systems contained herein.*

The **9765 System** is a full-featured video matrix switching control system that allows users to view and control up to 2,048 cameras and 512 monitors on a single node. Up to 96 individual user-defined ID numbers can be assigned to allow or deny access to system functions.

The base configuration for the **9765 System** is made up of a central processing unit (CC1), matrix switching bay(s) (MXBs) with video input/output modules, and keyboard controllers (KBDs). Optional components can be added to enhance system capabilities.

Preconfigured, prepackaged systems make installation fast and simple. The **9765 System** features a user-friendly Windows®-based management system, which allows for easy system programming and maintenance.

Macros allow activation of events based on schedule or alarm. Macros may call system-wide sequences (tours); activate preset positions on properly equipped cameras; and activate external relays to control auxiliary functions such as locking doors (additional equipment may be required).

The **9765 System** also includes built-in video loss detection and system diagnostic features, indicated by LEDs on the front panel of the matrix bay. Flash technology incorporated into the system design allows for easier system maintenance and upgrades.

Optional DVR management allows DVRs to be controlled directly from the system keyboards. Suitable DVRs can be monitored for operational conditions ensuring continuous recording.

C1593 / REVISED 11-30-09

# SYSTEM COMPONENTS/TECHNICAL SPECIFICATIONS

## CENTRAL PROCESSING UNIT (CC1)

The central processing unit communicates with external devices and accepts commands from external computers, keyboards, graphical user interfaces (GUIs), access control systems, casino data systems, programmable logic controllers (PLCs), and lighting and intercom systems. An internal VGA card is included for displaying system diagnostics and for programming. RS-422 COM ports are provided for communication with external devices such as matrix switching bays, pan/tilt or dome receivers, and keyboards.

### ELECTRICAL

Input Voltage	120 VAC, 60 Hz or 230 VAC, 50 Hz, autoranging
Power Consumption	57 W

Diagnostic Monitor Output	1 VGA
I/O Ports	16 RS-422 ports (expandable to 32); total system capability is 120 ports*
	2 RS-232 ports
	1 parallel printer port
	1 VGA output port
	2 PC-AT compatible keyboard ports

### GENERAL

Operating Temperature	32° to 120° F (0° to 49° C)
Dimensions	19.50" D x 19.00" W x 7.00" H (49.53 x 48.26 x 17.78 cm)
Mounting	Fits 19-inch EIA-standard rack (4 RUs)
Unit Weight	29.7 lb (13.5 kg)
Shipping Weight	43 lb (19.5 kg)

### CERTIFICATIONS

- CE, Class A
- FCC, Class A
- UL/cUL Listed

## MATRIX SWITCHING BAY

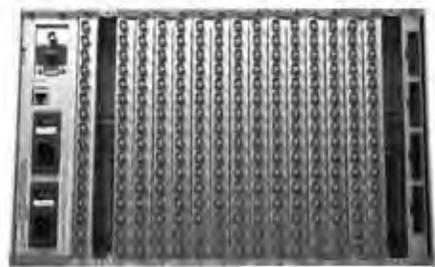

Each bay includes a power supply and mounting baffle and will support modules for up to 256 camera inputs and 16 monitor outputs. Multiple bays can be used to expand a single CPU system to a maximum of 2,048 camera inputs and 512 monitor outputs. An optional backup power supply module (MPS) can be installed in each bay to provide redundancy.

### ELECTRICAL

Input Voltage	100 to 240 VAC, 50/60 Hz, autoranging
Power Consumption	60 W maximum (fully populated)
Communication	Full duplex RS-422 using an RJ-45 connector

### VIDEO

Bandwidth	15 MHz
Signal-to-Noise Ratio	-70.5 dB
Adjacent Channel Crosstalk	-60.9 dB at 3.58 MHz
Differential Gain	0.51%
Differential Phase	0.38°
Line Tilt	0.40%
Field Tilt	0.59%
Switching Time	16 ms
Inputs	Card slots support up to 256 inputs per bay
Outputs	1 output card slot for supporting 16 outputs per bay
Video Input Level	0.5 to 2 Vp-p, RS-170 composite video
Impedance	75 ohms terminating (looping versions available)

V-Sync	The Pelco V-Sync signal (sent up the coaxial cable) provides a synchronization pulse, which allows roll-free switching between cameras within the same matrix bay
Vertical Drive	Input connector available on rear panel
Overall Frequency Response	Flat to 8 MHz
Luminance Nonlinearity	20%

### GENERAL

Operating Temperature	32° to 122° F (0° to 50° C), noncondensing
Dimensions	
Matrix Bay	21.70" D x 19.00" W x 10.50" H (55.10 x 48.26 x 26.67 cm)
Mounting Baffle <sup>†</sup>	24.00" D x 19.00" W x 1.75" H (60.96 x 48.26 x 4.45 cm)
Mounting	Fits 19-inch EIA-standard rack (matrix bay: 6 RUs; mounting baffle: 1RU)
Unit Weight	33 lb (14.99 kg) 52 lb (23.59 kg), fully populated
Shipping Weight	44 lb (19.96 kg) 62 lb (28.12 kg), fully populated

### CERTIFICATIONS

\*The CM9700-CC1 is equipped with 16 RS-422 COM ports; total capacity can be expanded to 32 ports by adding 2 CM9700-SER serial communication cards (8 ports each). Total system capability can be expanded to 120 RS-422 COM ports by adding 3 CM9700-SER-32 port expansion units (32 ports each) to the CC1.

<sup>†</sup>Included with each MXB unit. Total height of MXB with baffle installed is 12.25 inches (31 cm).

# SYSTEM COMPONENTS AND ACCESSORIES

## MODELS

### CONTROLLER

CM9700-CC1	CPU controller; operates on 120 VAC, 60 Hz or 230 VAC, 50 Hz. (4 RUs).
CM9700-SER	Serial communication card (RS-422 SERCOM) provides eight communications ports to interface peripheral equipment (4 maximum per CPU).
CM9700-SER-32	Port expansion unit; 32 serial communication (SERCOM) ports per unit. Up to three units can be added to a CC1 (contact Pelco's System Applications Department before adding to an existing CM9700-CC1). Includes interconnecting cables and adapters for DB9 and RJ45 connectors. Data interface can be RS-232 or RS-422. (4 RUs).

### MATRIX BAY

CM9765-MXB	Video matrix bay equipped with CM9700-MPS power supply; 100 to 240 VAC, 50/60 Hz, autoranging (6 RUs).
CM9700-MPS	Matrix bay power supply (spare); 120 VAC, 60 Hz or 230 VAC, 50 Hz.
CM9765-DFC	Down frame card and cable assembly; connects multiple matrix bays for expansion purposes.
CM9765-VCC	Video camera card capable of accepting up to 32 camera inputs. Also requires a rear panel card (CM9765-DFC, CM9765-RPC).
CM9765-RPC	Rear panel video card; provides 32 BNC connectors used to connect camera inputs to matrix bay.
CM9765-VMC	Video monitor card providing 16 monitor outputs; requires CM9765-RPM.
CM9765-RPM	Rear panel monitor card; provides 16 BNCs to connect monitor outputs to matrix bay; also interfaces video output signals from video output card.
CM9765-RPS	Rear panel side frame/down frame card; use when side framing and down framing.
CM9700-VPP	Video patch panel; provides 32 BNC inputs for bringing video inputs into the system or 32 BNC connections for looping video out of the system; includes 16-channel coaxial ribbon cable, 3 feet (0.91 m). (3 VPP units = 2 RUs; actual height of each VPP is 1.07 inches [2.7 cm])
CM9700-CBL-06FT	16-channel coaxial ribbon cable, 6 ft (1.82 m)
CM9700-CBL-10FT	16-channel coaxial ribbon cable, 10 ft (3.04 m)

CM9700-VPP FRONT PANEL

CM9700-VPP video patch panels can be mounted horizontally into a standard EIA rack. A cable management bracket is attached to each end of the video patch panel.

## OPTIONAL COMPONENTS

The following components are compatible with the 9765 System:

### KEYBOARDS

#### CM9760 Keyboard Controller

The CM9760 keyboard controller allows the user to control the system. The keyboard includes a variable speed, vector-solving joystick with zoom control knob for pan/tilt/zoom (PTZ) and dome control. From the keyboard, the user can control GPI-activated devices, receivers, camera/monitor switching, and multiplexer screen functions, and create single/dual patterns, zones, zone labels, presets and preset recalls. The user can also arm and disarm alarms as well as implement stand-alone, direct mode operation. Twenty-four programmable soft keys can be individually labeled allowing logical camera selection based on the camera's field of view rather than camera numbers.

CM9760-KBD	Full-function desktop variable speed keyboard, white finish; 100 to 240 VAC, 50/60 Hz.
CM9760-KBD-B	Full-function desktop variable speed keyboard, black finish; 100 to 240 VAC, 50/60 Hz.
CM9760-KBR	Full-function 19-inch EIA rack mount keyboard (4 RUs); available in black finish only; 100 to 240 VAC, 50/60 Hz.

A suffix of -US, -UK, -AU, or -EU, designating a region-specific power cord, is added to the above model numbers when ordering. For example, a CM9760-KBD-US is a desktop keyboard (white finish) with a power cord for use in the United States.

#### KBD200A Keyboard Controller

The KBD200A provides control of camera/monitor switching; reset, pattern, and sequence operation; local and receiver auxiliary operation; and multiplexer screen functions. The KBD200A also provides push-button control of PTZ functions. (A KBDKIT is required for power.)

KBD200A	Desktop keyboard with full switching capabilities, plus push-button control of PTZ functions. 12 VAC or $\pm 12$ VDC. (Requires KBDKIT for power.)
---------	--

#### KBD300A Keyboard Controller

The KBD300A provides control of camera/monitor switching; preset, pattern, and sequence operation; local and receiver auxiliary operation; and multiplexer screen functions. The KBD300A also provides joystick control of PTZ functions. (A KBDKIT is required for power.)

KBD300A	Desktop keyboard with full switching capabilities, plus joystick control of PTZ functions. 12 VAC or $\pm 12$ VDC. (Requires KBDKIT for power.)
---------	---

### NETWORK INTERFACE UNIT

The CM9700-NW1 network interface unit allows multiple systems to share video and control.

CM9700-NW1	Network interface unit; network CPU and software necessary for joining two or more independent systems together. (4 RUs).
------------	---

# SYSTEM COMPONENTS AND ACCESSORIES

## MISCELLANEOUS

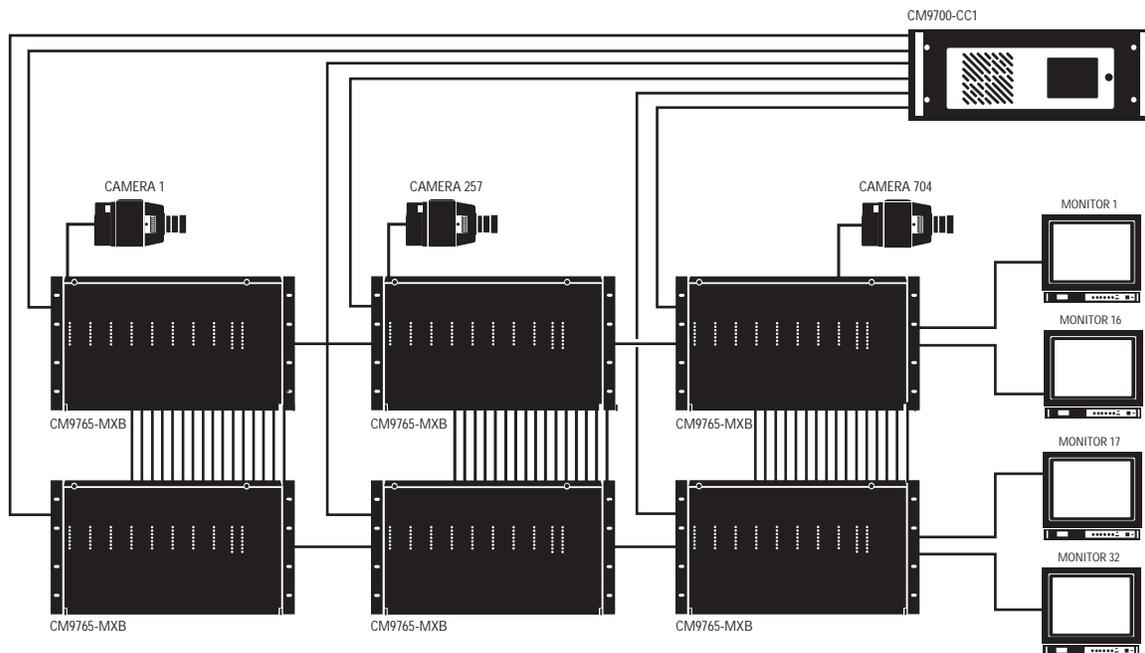

CM9760-ALM	Alarm interface unit; connects directly to each system; each unit can monitor up to 64 alarms and up to four units can be connected in a series from one SERCOM port. (1 RU).
CM9760-CDU-T	Code distribution unit; 16-channel RS-422 transmit only (two data wires and ground) distributor. Primarily used for wiring up to 16 pan/tilt/zoom receivers in a "star" configuration. (1 RU).
CM9760-CXTA	Coaxitron translator; generates Coaxitron signals for Pelco Coaxitron receivers; each translator supports up to 16 receivers. (1 RU).
CM9760-DMR	Data merger and port expander unit; this unit allows multiple CM9700-CC1 units to control multiple pan/tilt/zoom cameras and allows multiple keyboards to communicate through one CC1 port. (1 RU).
CM9760-DMR-X	Same as CM9760-DMR except 230 VAC, 50 Hz.
CM9760-HS	Hot switch interface unit; changeover unit that monitors the status of a primary CC1 in a 9770 system: three components, 1 RU each.
CM9760-MDA	Master distribution amplifier; inserts master time and date from the CM9700-CC1 and a programmable title up to 24 characters on 1 to 16 video signals. (3 RUs).
CM9760-MDA-X	Same as CM9760-MDA except 230 VAC, 50 Hz.
CM9700MDD-EVS	Matrix digital decoder (NET5301R optimized for use with matrix) that converts digital video streams from Endura® products into analog video to be viewed and controlled on a Pelco CM9700 Series matrix switcher.

CM9760-REL	Relay interface unit; connects directly to each system and provides dry contact switching for direct or automatic control of peripheral equipment; each unit provides up to 64 SPST contact outputs. (1 RU).
CM6800E-48X8	Satellite video matrix switcher. Allows the user to distribute switching capability around a facility, reducing the number of coaxial cable runs to the matrix and allowing monitoring at the satellite switch location. Supports up to 48 inputs or up to 96 inputs in a 96 x 16 configuration. (3 RUs).
Genex® Multiplexers	Genex Series MX4009 (9-channel) and MX4016 (16-channel) multiplexers. (1 RU).

## COMPATIBLE RECEIVERS

Spectra® Series	Spectra dome multiple protocol receiver.
ERD97P21-U	Pelco P protocol receiver.
LRD41C21-1/-2/-3	Legacy® fixed speed receiver with presets.
LRD41C22-1/-2/-3	Same as LRD41C21 Series except variable speed receiver.
Esprit®	Integrated pan/tilt positioning receiver.
Coaxitron	Coaxitron translator allows Coaxitron control of PTZ cameras.
ExSite®	Integrated explosionproof positioning system.

RU = The number of rack units (RU) required to mount a component in a 19-inch EIA-standard rack mount. One RU is equivalent to 1.75 inches (4.45 cm) of vertical space

# CM9770 Series Matrix

## MICROPROCESSOR-BASED SWITCHER/CONTROLLER; 2,048 INPUTS; 512 OUTPUTS

### Product Features

- Microprocessor-Based, Full Cross-Point Video Matrix
- High-Density Architecture Supports up to 256 Cameras and 32 Monitors in Each Bay
- Control up to 2,048 Cameras and 512 Monitors in a Single Node or Expand Camera Capacity with a Multi-Node System (up to 24 Nodes)
- Full System Reports From CM9700-MGR Provide System Wiring and Configuration Details
- Sixteen RS-422 COM Ports (Expandable to 120) and Two RS-232 Full-Duplex Ports Available on the CPU
- System Diagnostic LEDs Displayed on Front Panel
- Flash Technology Eases System Maintenance and Upgrades
- Logical Camera Selection and Priority Level Operation
- Multiplexer and DVR Control Via Keyboard
- Built-in Video Loss Detection
- Windows®-Based System Management Software (Windows 2000, XP) Includes Multilanguage Menus and On-Screen Help
- Factory Tested Prepackaged Systems
- ASCII Data Input to Interface Access Control and Other External Computer-Based Systems
- Powerful Macro Programming

### Optional Accessories

- “Hot Switch” and Backup CPU Ensure Uninterrupted Operation
- Redundant Power Supplies for Switching Bays
- Coaxitron® Translator Allows PTZ Communication Over Standard Coaxial Cable
- Responds to 5,000 Alarms
- Network Interface Unit Allows Multiple Systems to Share Video and Control
- DVR Management

*All CM9770 Series systems require installation by a Pelco Certified Dealer/Installer. This specification sheet may be used for purpose of information only and does not constitute approval or certification of receiving party. Proof of certification must be provided prior to shipment of CM9770 Systems contained herein.*

The **9770 System** is a full-featured video matrix switching control system that allows users to view and control up to 2,048 cameras and 512 monitors on a single node. Expanded monitor capacity in the matrix bay allows implementation of larger systems with a smaller footprint (less hardware) than other matrix systems.

The base configuration for the **9770 System** is made up of a central processing unit (CC1), matrix switching bay(s) (MXBs) with video input/output modules, and keyboard controllers (KBDs). Optional components can be added to enhance system capabilities.

Preconfigured, prepackaged systems make installation fast and simple. The **9770 System** features a user-friendly Windows-based management system, which allows for easy system programming and maintenance.

Macros allow activation of events based on schedule or alarm. Macros may call system-wide sequences (tours); activate preset positions on properly equipped cameras; and activate external relays to control auxiliary functions such as locking doors (additional equipment may be required).

The **9770 System** also includes built-in video loss detection and system diagnostic features, indicated by LEDs on the front panel of the matrix bay. Flash technology incorporated into the system design allows for easier system maintenance and upgrades.

Optional DVR management allows DVRs to be controlled directly from the system keyboards. Suitable DVRs can be monitored for operational conditions ensuring continuous recording.

# CM9780 Series Matrix

## MICROPROCESSOR-BASED SWITCHER/CONTROLLER; 4,096 INPUTS; 512 OUTPUTS

### Product Features

- Microprocessor-Based, Full Cross-Point Video Matrix
- High Density Architecture Supports up to 512 Cameras and 32 Monitors in Each Bay
- Control up to 4,096 Cameras and 512 Monitors in a Single Node or Expand Camera Capacity with a Multi-Node System (up to 24 Nodes)
- Full System Reports From CM9700-MGR Provide System Wiring and Configuration Details
- Sixteen RS-422 COM Ports (Expandable to 120) and Two RS-232 Full-Duplex Ports Available on the CPU
- System Diagnostic LEDs Displayed on Front Panel
- Flash Technology Eases System Maintenance and Upgrades
- Logical Camera Selection and Priority Level Operation
- Multiplexer and DVR Control Through Keyboard
- Built-in Video Loss Detection
- Windows®-Based System Management Software (Windows 2000, Windows XP) Includes Multilingual Menus and On-Screen Help
- Factory Tested Prepackaged Systems
- ASCII Data Input to Interface Access Control and Other External Computer-Based Systems
- Powerful Macro Programming

### Optional Accessories

- “Hot Switch” and Backup CPU Ensure Uninterrupted Operation
- Redundant Power Supplies for Switching Bays
- Coaxitron® Translator Allows PTZ Communication Over Standard Coaxial Cable
- Responds to 5,000 Alarms
- Network Interface Unit Allows Multiple Systems to Share Video and Control
- DVR Management

The **9780 System** is a full-featured video matrix switching control system that allows users to view and control up to 4,096 cameras and 512 monitors on a single node. Expanded monitor capacity in the matrix bay allows implementation of larger systems with a smaller footprint (less hardware) than other matrix systems.

The base configuration for the **9780 System** is made up of a central processing unit (CC1), matrix switching bay(s) (MXBs) with video input/output modules, and keyboard controllers (KBDs). Optional components can be added to enhance system capabilities.

Preconfigured, prepackaged systems make installation fast and simple. The **9780 System** features a user-friendly Windows-based management system, which allows for easy system programming and maintenance.

Macros allow activation of events based on schedule or alarm. Macros may call system wide sequences (tours); activate preset positions on properly equipped cameras; and activate external relays to control auxiliary functions such as locking doors (additional equipment may be required).

The **9780 System** also includes built-in video loss detection and system diagnostic features, indicated by LEDs on the front panel of the matrix bay. Flash technology incorporated into the system design allows for easier system maintenance and upgrades.

Optional DVR management allows DVRs to be controlled directly from the system keyboards. Suitable DVRs can be monitored for operational conditions ensuring continuous recording.

*All CM9780 Series systems require installation by a Pelco Certified Dealer/ Installer. This specification sheet may be used for purpose of information only and does not constitute approval or certification of receiving party. Proof of certification must be provided prior to shipment of CM9780 Systems contained herein.*

# SYSTEM COMPONENTS/TECHNICAL SPECIFICATIONS

## CENTRAL PROCESSING UNIT (CC1)

The central processing unit communicates with external devices and accepts commands from external computers, keyboards, graphical user interfaces (GUIs), access control systems, casino data systems, programmable logic controllers (PLCs), and lighting and intercom systems. An internal VGA card is included for displaying system diagnostics and for programming. RS-422 COM ports are provided for communication with external devices such as matrix switching bays, pan/tilt or dome receivers, and keyboards.

### ELECTRICAL

Input Voltage	120 VAC, 60 Hz or 230 VAC, 50 Hz, autoranging
Power Consumption	57 W

## MATRIX SWITCHING BAY

Each bay includes a power supply and mounting baffle and will support modules for up to 512 camera inputs and 32 monitor outputs. Cameras are connected to CM9700-VPP patch panels, which are then connected to the matrix bay with video ribbon cables. Monitors connect directly to rear panel BNC cards installed on the matrix bay. Multiple bays can be used to expand a single CPU system to a maximum of 4,096 camera inputs and 512 monitor outputs. An optional backup power supply module (MPS) can be installed in each bay to provide redundancy.

### ELECTRICAL

Input Voltage	100-240 VAC, 50/60 Hz, autoranging
Power Consumption	60 W maximum (fully populated)
Communication	Full duplex RS-422 using an RJ-45 connector

### VIDEO

Bandwidth	15 MHz
Signal-to-Noise	-70.5 dB
Adjacent Channel Crosstalk	-60.9 dB at 3.58 MHz
Differential Gain	0.51%
Differential Phase	0.38°
Line Tilt	0.40%
Field Tilt	0.59%
Switching Time	16 mS
Inputs	Card slots support up to 512 inputs per bay
Outputs	2 output card slots for supporting 32 outputs per bay
Video Input Level	0.5 to 2 Vp-p, RS-170 composite video
Impedance	75 ohms, terminating (looping versions available)
V-Sync	The Pelco V-Sync signal (sent up the coaxial cable) provides a synchronization pulse which allows roll-free switching between cameras within the same matrix bay

\*The CM9700-CC1 is equipped with 16 RS-422 COM ports; total capacity can be expanded to 32 ports by adding two CM9700-SER serial communication cards (8 ports each).

Total system capability can be expanded to 120 RS-422 COM ports by adding three CM9700-SER-32 port expansion units (32 ports each) to the CC1.

†Included with each MXB unit. Total height of MXB with baffle installed is 12.25 inches (31 cm).

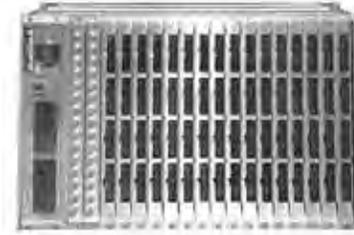

Diagnostic Monitor Output	1 VGA
I/O Ports	16 RS-422 ports (expandable to 32); total system capability is 120 ports* 2 RS-232 ports 1 parallel printer port 1 VGA output port 2 PC-AT compatible keyboard ports

### GENERAL

Operating Temperature	32° to 120°F (0° to 49°C)
Dimensions	19.50" D x 19.00" W x 7.00" H (49.53 x 48.26 x 17.78 cm)
Mounting	Fits 19-inch EIA-standard rack (4 RUs)
Unit Weight	29.7 lb (13.5 kg)
Shipping Weight	43 lb (19.5 kg)

### CERTIFICATIONS

- CE, Class A
- FCC, Class A
- UL/cUL Listed
- C-Tick

Vertical Drive	Input connector available on rear panel
Overall Frequency Response	Flat to 8 MHz
Luminance Nonlinearity	20%

### GENERAL

Operating Temperature	32° to 122°F (0° to 50°C), noncondensing
Dimensions	
Matrix Bay	21.70" D x 19.00" W x 10.50" H (55.10 x 48.26 x 26.67 cm)
Mounting Baffle†	24.00" D x 19.00" W x 1.75" H (60.96 x 48.26 x 4.45 cm)
CM9700-VPP	6.00" D x 19.00" W x 1.07" H (15.24 x 48.26 x 2.72 cm)
CM9700-VPP-RK	14.12" D x 19.00" W x 13.96" H (35.86 x 48.26 x 35.46 cm)
Mounting	Fits 19-inch EIA-standard rack (matrix bay: 6 RUs; mounting baffle: 1 RU)
Unit Weight	33 lb (14.99 kg) 57 lb (25.85 kg), fully populated
Shipping Weight	44 lb (19.96 kg) 67 lb (30.39 kg), fully populated

# SYSTEM COMPONENTS AND ACCESSORIES

## MODELS

### CONTROLLER

CM9700-CC1	CPU controller. Operates on 120 VAC, 60 Hz or 230 VAC, 50 Hz. (4 RUs).
CM9700-SER	Serial communication card (RS-422 SERCOM) provides 8 communication ports to interface peripheral equipment (4 maximum per CPU).
CM9700-SER-32	Port expansion unit: 32 serial communication (SERCOM) ports per unit. Up to 3 units can be added to a CC1. (Check with Pelco Systems Applications Department before adding to an existing CM9700-CC1.) Includes inter-connecting cables and adapters for DB9 and RJ45 connectors. Data interface can be RS-232 or RS-422. (4 RUs).

### MATRIX BAY

CM9780-MXB	Video matrix bay equipped with CM9700-MPS power supply. 100-240 VAC, 50/60 Hz, autoranging (6 RUs).
CM9700-MPS	Matrix bay power supply (spare). 120 VAC, 60 Hz or 230 VAC, 50 Hz.
CM9780-DFC	Rear panel card used to connect video ribbon cables from the CM9700-VPP video patch panels; also used for sideframing, downframing, and looping.
CM9780-VCC	Video camera card capable of accepting up to 32 camera inputs. Requires a rear panel card (CM9780-DFC) and associated VPP panels.
CM9780-RPC	Rear panel video card; provides 32 BNC connectors used for sideframing from additional input bays.
CM9780-VMC	Video monitor card providing 16 monitor outputs; requires CM9780-RPM.
CM9780-RPM	Rear panel monitor card; provides 16 BNCs to connect monitor outputs to matrix bay; also interfaces video output signals from video output card.
CM9700-VPP	Video patch panel; provides 32 BNC inputs for bringing video inputs into the system or 32 BNC connections for looping video out of the system; includes 16-channel coaxial ribbon cable, 3 feet (0.91 m). (3 VPP units = 2 RUs; actual height of each VPP is 1.07 inches [2.7 cm]).
CM9700-VPP-RK	Optional rack mount designed to hold up to 16 CM9700-VPP patch panels. (8 RUs).
CM9700-CBL-06FT	16-channel coaxial ribbon cable, 6 feet (1.82 m).
CM9700-CBL-10FT	16-channel coaxial ribbon cable, 10 feet (3.04 m).

CM9700-VPP video patch panels can be mounted horizontally into a standard EIA rack. Although you can mount multiple video patch panels into a rack, a CM9700-VPP-RK can be used to save rack space if using more than nine video patch panels. A cable management bracket is attached to each end of the video patch panel.

The CM9700-VPP-RK can hold a maximum of 16 CM9700-VPP video patch panels. The CM9700-VPP-RK is mounted into a standard EIA rack and then the panels are mounted vertically into the CM9700-VPP-RK. Each video patch panel is secured to the CM9700-VPP-RK by way of two thumbscrews. You can attach two cable management brackets to each end of the CM9700-VPP-RK.

CM9700-VPP FRONT PANEL

## OPTIONAL COMPONENTS

The following components are compatible with the 9780 System:

### KEYBOARDS

#### CM9760 Keyboard Controller

The CM9760 keyboard controller allows the user to control the system. The keyboard includes a variable speed, vector-solving joystick with zoom control knob for pan/tilt/zoom (PTZ) and dome control. From the keyboard, the user can control GPI-activated devices, receivers, camera/monitor switching, and multiplexer screen functions, and create single/dual patterns, zones, zone labels, presets and preset recalls. The user can also arm and disarm alarms as well as implement stand-alone, direct mode operation. As many as 24 programmable soft keys can be individually labeled allowing logical camera selection based on the camera's field of view rather than camera numbers.

CM9760-KBD	Full-function desktop variable speed keyboard, white finish; 100-240 VAC, 50/60 Hz.
CM9760-KBD-B	Full-function desktop variable speed keyboard, black finish; 100-240 VAC, 50/60 Hz.
CM9760-KBR	Full-function 19-inch EIA rack mount keyboard (4 RUs); available in black finish only; 100-240 VAC, 50/60 Hz.

A suffix of -US, -UK, -AU, or -EU, designating a region-specific power cord, is added to the above model numbers when ordering. For example, a CM9760-KBD-US is a desktop keyboard (white finish) with a power cord for use in the United States.

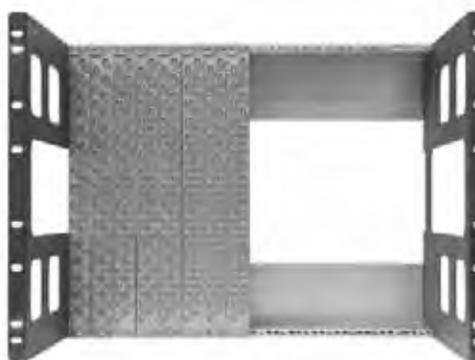

#### KBD200A and KBD300A Keyboard Controllers

The KBD200A and KBD300A keyboards both provide control of camera/monitor switching; preset, pattern, and sequence operation; local and receiver auxiliary operation; and multiplexer screen functions.

KBD200A	Desktop keyboard with full switching capabilities, plus push-button control of PTZ functions. 12 VAC or $\pm 12$ VDC. (Requires KBDKIT for power.)
KBD300A	Desktop keyboard with full switching capabilities, plus joystick control of PTZ functions. 12 VAC or $\pm 12$ VDC. (Requires KBDKIT for power.)

### NETWORK INTERFACE UNIT

CM9700-NW1	Network interface unit; network CPU and software necessary for joining two or more independent systems together. (4 RUs).
------------	---

CM9700-VPP-RK RACK MOUNT  
(SHOWN WITH VPP PATCH PANELS INSTALLED)

# SYSTEM COMPONENTS AND ACCESSORIES

## MISCELLANEOUS

- CM9760-ALM** Alarm interface unit; connects directly to each system; each unit can monitor up to 64 alarms and up to 4 units can be connected in a series from one SERCOM port. (1 RU).
- CM9760-CDU-T** Code distribution unit; 16-channel RS-422 transmit only (two data wires and ground) distributor. Primarily used for wiring up to 16 pan/tilt/zoom receivers in a "star" configuration. (1 RU).
- CM9760-CXTA** Coaxitron translator; generates Coaxitron signals for Pelco Coaxitron receivers; each translator supports up to 16 receivers. (1 RU).
- CM9760-DMR** Data merger and port expander unit; this unit allows multiple CM9700-CC1 units to control multiple pan/tilt/zoom cameras and allows multiple keyboards to communicate through one CC1 port. (1 RU).
- CM9760-DMR-X** Same as CM9760-DMR except 230 VAC, 50 Hz.
- CM9760-HS** Hot switch interface unit; changeover unit that monitors the status of a primary CC1 in a 9780 system: three components, 1 RU each.
- CM9760-MDA** Master distribution amplifier; inserts master time and date from the CM9700-CC1 and a programmable title of up to 24 characters on 1-16 video signals. (3 RUs).
- CM9760-MDA-X** Same as CM9760-MDA except 230 VAC, 50 Hz.
- CM9700MDD-EVS** Matrix digital decoder (NET5301R optimized for use with matrix) that converts digital video streams from Endura products into analog video to be viewed and controlled on a Pelco CM9700 Series matrix switcher.
- CM9760-REL** Relay interface unit; connects directly to each

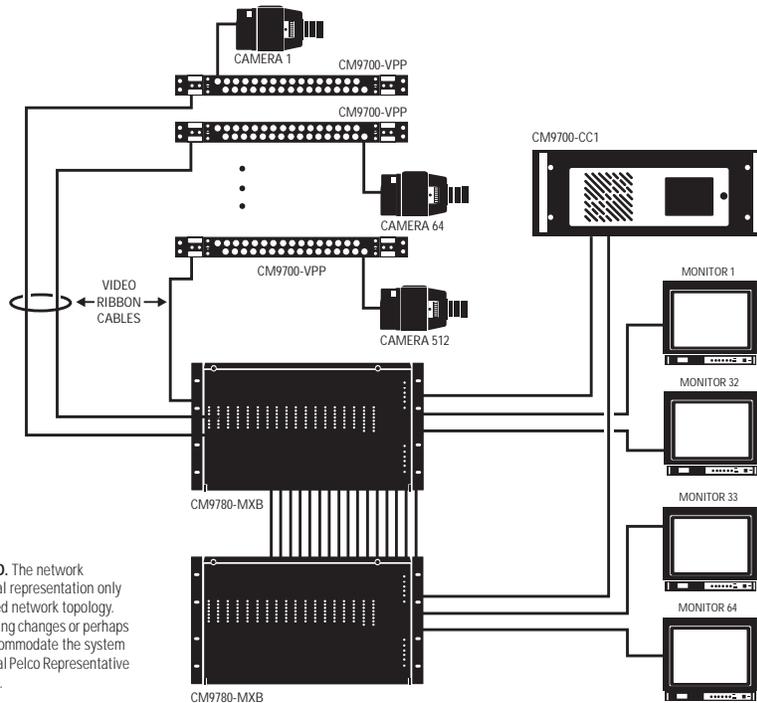

CM6800E-48X8

Genex® Multiplexers

## COMPATIBLE RECEIVERS

- Spectra® Series** Spectra dome multiple protocol receiver.
- ERD97P21-U** Pelco P protocol receiver.
- LRD41C21-1/-2/-3** Legacy®, fixed speed receiver with presets. Same as LRD41C21 series except variable speed receiver.
- LRD41C22-1/-2/-3** Legacy®, fixed speed receiver with presets. Same as LRD41C21 series except variable speed receiver.
- Esprit®** Integrated pan/tilt positioning receiver.
- Coaxitron** Coaxitron translator allows Coaxitron control of PTZ cameras.
- ExSite®** Integrated explosionproof positioning system.

RU = Rack Unit. One RU is equivalent to 1.75 inches (4.45 cm) of vertical space. Identifies number of rack units required to mount component in a 19-inch EIA-standard rack mount.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

# CM9760-KBD and CM9760-KBR Series Keyboards

## FULL FUNCTION, VARIABLE-SPEED, PTZ CONTROL

### Product Features

- Variable-Speed, Vector-Solving Joystick for PTZ and Dome Control
- Joystick Zoom Control Knob
- 24 Programmable Soft Keys, 6 Control Keys, and 3 Lens Control Keys
- LCD Display Provides 4 Lines of Keyboard Information and Options
- Preset Position and Pattern Control
- Auxiliary Operation
- Download Function Key Configurations to and from Other CM9760-KBD Keyboards, through the CM9700 System, or through the CM9700-MGR Software
- Desktop Models Available with a White Finish (CM9760-KBD) or a Black Finish (CM9760-KBD-B)
- Also Available as a Rack-Mount Model (CM9760-KBR)

CM9760-KBD-B

CM9760-KBR

The **CM9760** Series keyboards provide system users with the maximum degree of flexibility in controlling camera call-up and pan/tilt or dome operation. A desktop model (**KBD**) is available in either a white finish or a black finish, and a rack-mount model (black finish only) is also available (**KBR**).

The keyboard includes a variable speed, vector-solving joystick with zoom control knob for pan/tilt/zoom (PTZ) and dome control. All additional lens control functions are positioned next to the joystick for one-handed operation. LCD display keys give system operators fingertip control of powerful programming and operational features. These keys access multiple menus of logically displayed icons for simplistic operation.

Twenty-four programmable soft keys may be individually labeled with installation-specific titles. This allows logical camera selection based on the cameras field of view rather than camera numbers. The keyboard utilizes an adjustable backlit LCD screen to provide the greatest amount of flexibility in a variety of lighting conditions. In addition, all programmable soft keys illuminate when auxiliaries are activated.

From the keyboard, the user can control auxiliary relay activated devices, receivers, camera/monitor switching, multiplexer screen functions, and NVR/DVR playback. The user can create single/dual patterns, zones, zone labels, presets and preset recalls. The user can also arm and disarm alarms as well as implement stand-alone, direct mode operation. The keyboard also includes an adjustable audible beeper that can be used to alert operators of all alarm conditions.

# TECHNICAL SPECIFICATIONS

## MODELS

CM9760-KBD	Full-function desktop variable speed keyboard, white finish. 100-240 VAC, 50/60 Hz.
CM9760-KBD-B	Full-function desktop variable speed keyboard, black finish. 100-240 VAC, 50/60 Hz.
CM9760-KBR	Full-function 19-inch EIA rack mount keyboard (4 RUs); available in black finish only. 100-240 VAC, 50/60 Hz.

A suffix of -US, -UK, -AU, or -EU, designating a region-specific power cord, is added to the above model numbers when ordering. For example, a CM9760-KBD-US is a desktop keyboard (white finish) with a power cord for use in the United States.

## FUNCTIONAL

Joystick	Vector-solving, variable-speed with zoom
Display	Four-line backlit LCD for programming and control
Display Keys	Eight multi-function keys to access programming icons and menus
Definable Keys	Twenty-four programmable "soft" keys
Numeric Keys	Numeric keys (0-9) plus (Cam) and (Mon)
Specialty Keys	
(T) "Turbo"	Activates high speed mode of camera positioning systems
(Fwd/Bwd)	Initiates forward or backward camera sequencing of next/last camera
(Run/Mac)	Initiates sequencing/calls pre-programmed macros
(Rcl/Alt)	Recalls previously selected cameras/calls next camera in group
(Prst/Lock)	Calls preset position scene/locks currently displayed camera to monitor
Lens Control	Three keys for controlling zoom (In/Out), iris (Open/Close), and focus (Near/Far)

## ELECTRICAL

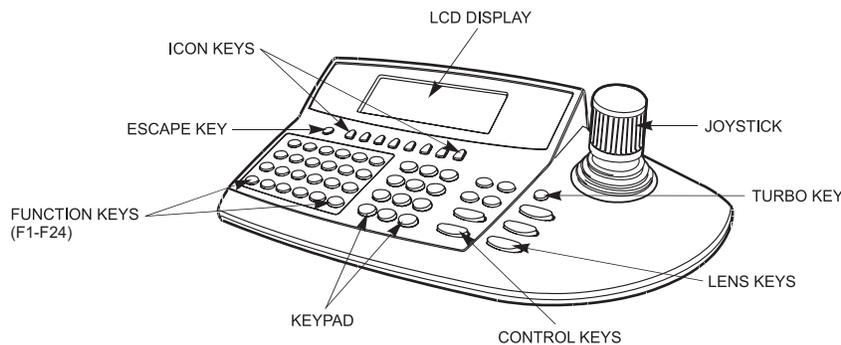

Input Voltage	100-240 VAC, 50/60 Hz
Power Consumption	10 W
Communication	RS-422, full duplex
Operating Distance	
For Direct Control Operation	Up to 3,900 ft (1.2 km) on 24-gauge wire (0.5 mm)
Keyboard Connectors	Five total, as follows: Two 8-pin RJ-45 connectors (female); both RS-422 serial ports One 4-pin RJ-45 connector (female); RS-232 serial port Two 6-pin RJ-45 connectors (female); one relay port; one PC bus port for future expansion
Internal Relay Rating	1 A

## GENERAL

Ambient Operating Temperature	32° to 120°F (0° to 49°C)
Dimensions	
CM9760-KBD	7.80" D x 15.53" W x 3.30" H (19.81 cm x 39.45 x 8.38)
CM9760-KBR	1.75" D x 19.00" W x 7.00" H (4.45 cm x 48.26 x 17.78) Fits 19-inch EIA-standard rack (4 RUs)
Unit Weight	
CM9760-KBD	4.6 lb (2.09 kg)
CM9760-KBR	6.4 lb (2.90 kg)
Shipping Weight	
CM9760-KBD	9 lb (4.08 kg)
CM9760-KBR	11 lb (5.00 kg)

# CM9760-ALM Alarm Interface Unit

## ALARM GATHERING UNIT FOR UP TO 64 ALARM INPUTS

### Product Features

- Each Unit Can Handle up to 64 Alarms
- Up to Four Units Can Be Daisy-Chained from One CM9700 Series CC1 SERCOM Port for a Total of 256 Alarms
- Alarm Inputs Can Be Configured in Groups of 16 for Supervised or Unsupervised Mode
- Alarm Inputs in Groups of 16 Can Be Wired Either Normally Open or Normally Closed
- Each Unit Has One Common Alarm Relay Output
- Each Unit is Powered by an Autoranging Power Supply

The **CM9760-ALM** uses an RS-232/422 communication interface with the CM9700 Series system controllers. The unit can be remotely placed with respect to the controller, from where it can communicate back to the central system when an alarm occurs. The alarm unit is capable of handling up to 64 alarm inputs.

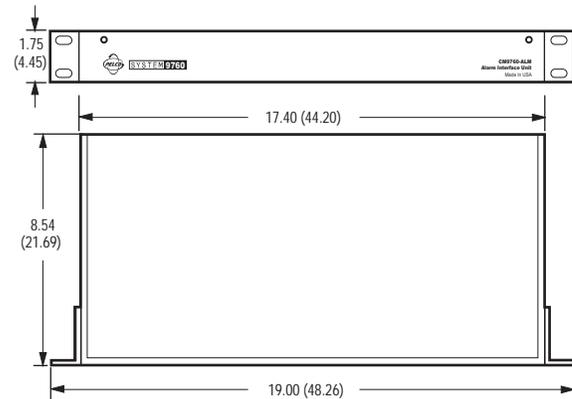

The front of the **CM9760-ALM** has two 10-position DIP switches, which allow the configuration of each unit. Also, a red LED flashes whenever there is a valid alarm condition.

The relay output connector accepts a screw terminal adapter. When a valid alarm condition is sensed, the alarm unit will activate the relay. It will deactivate only when the alarms are no longer present.

The alarm unit mounts in a standard 19-inch (48.3 cm) rack and occupies only 1 RU (1.75 inches or 4.45 cm) of rack space. For remote operation, the wiring from the alarm unit to the system controller should not exceed 4,000 feet (1,219 m).

Daisy-chaining is required when more than 64 alarms are needed. Daisy-chain configurations can be used whether alarm units are situated locally, remotely, or as a combination of the two.

The 64th input on an alarm unit can be used as an alarm output to report a data communication failure.

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS;  
ALL OTHERS ARE INCHES.

# CM9760-CDU-T Code Distribution Unit

## 16-CHANNEL TRANSMIT-ONLY DISTRIBUTOR

### Product Features

- Two 8-Position, RJ-45 Parallel Connectors Provide an Input from a Controller and an Output for an Additional Daisy-Chained CDU Unit
- Sixteen 3-Position Screw Terminal Connectors Used to Output 16 RS-422 Transmit-Only Code Lines
- Allows for "Star" Type Wiring of PTZ Data Lines
- Standard 100-240 VAC, 50/60 Hz Line Input (Autoranging)
- Provides 16 Driver Outputs

CM9760-CDU-T (FRONT)

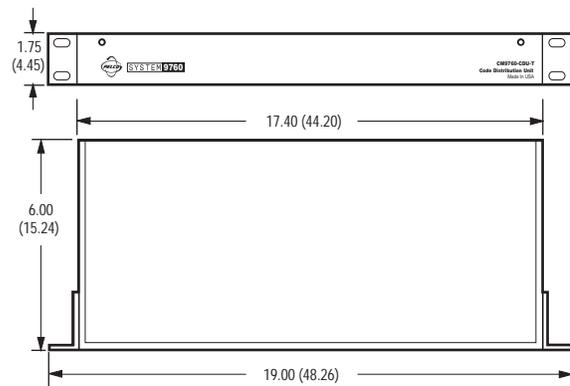

CM9760-CDU-T (BACK)

The **CM9760-CDU-T** code distribution unit is a 16-channel RS-422 transmit-only (two data wires and ground) data distribution unit. It can be used with any system that uses RS-422 serial communications. The CDU is used to install pan/tilt and dome receivers in a "star," or "home run," configuration.

The unit is rack/wall mountable and is only 6 inches (15.2 cm) deep. In addition to the 16 lines available for output with one unit, eight CDUs may be daisy-chained. This allows 128 receivers (that support 128 address settings) to be connected on a single SERCOM port.

The remote devices can be located as far as 4,000 feet (1,219 m) away from the controller, depending on the physical parameters of the connection.

The unit is ideal for use on larger switching systems where it becomes desirable to "home run" the RS-422 data lines for controlling pan/tilt or dome receivers.

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# CM9760-CXTA Coaxitron® Translator

## INTERFACE UNIT FOR COAXITRON-CAPABLE RECEIVERS

### Product Features

- Allows Coaxitron® Control from Any RS-422 P or D Protocol Device
- 16 Looping Video Inputs Allow Easy Connection Between Switch and Cameras
- Send PTZ Control Commands Through a Camera's Video Cable
- Fits a Standard 19-Inch Rack Mount

CM9760-CXTA (FRONT)

CM9760-CXTA (REAR)

The **CM9760-CXTA** interfaces Pelco's matrix switchers that use Pelco P protocol with Pelco's receivers that use Coaxitron® protocol for command and control functions.

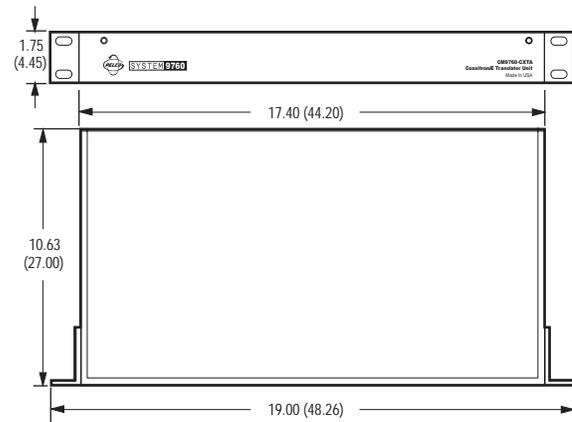

The **CM9760-CXTA** will also interface Pelco's digital video recorders (DVRs) that use Pelco D protocol with Pelco's receivers that use Coaxitron protocol for command and control functions.

CX9000, Legacy®, Spectra®, and Esprit® receivers can be used with the **CM9760-CXTA**.

The 32 BNCs are looped inside the unit. Each BNC on the top row is paired with a BNC on the bottom row. This allows either the top or bottom BNC to be selected as an input or output to communicate to or from the receiver.

The rear of the **CM9760-CXTA** has input and output connectors that allow two translator units to be cascaded. This makes 32 Coaxitron ports available that can be controlled from one RS-422 communication port on a System 9700 Series CC1.

The eight-position DIP switch allows the protocol for the BNC inputs to be set to either 15 bits or 32 bits. The DIP switch is also used to configure Pelco P or Pelco D protocol and data rates.

## MODEL

CM9760-CXTA Coaxitron translator

## ELECTRICAL

Input Voltage 100 to 240 VAC, 50/60 Hz, auto-ranging  
 Power Consumption 15 VA  
 Coaxitron Ports  
     Video Format NTSC or PAL  
     Video Level  $\pm 6$  dB minimum  
     Coaxitron Level 0.7 V peak  
 Data Ports  
     Input RS-422, 8-way, 4-wire, RJ-45 connector  
         DIP-switch selectable baud rate, even parity  
     Output RS-422, 8-way, 4-wire, RJ-45 connector  
         DIP-switch selectable baud rate, even parity  
 Indicators Power LED (green)  
 Fusing 1/4A, 250 VAC

## MECHANICAL

Connectors  
     Video BNC type (32 total)  
     Power 3-wire, 18 AWG  
     RS-422 RJ-45 (8-way), connectors (2 total)

## GENERAL

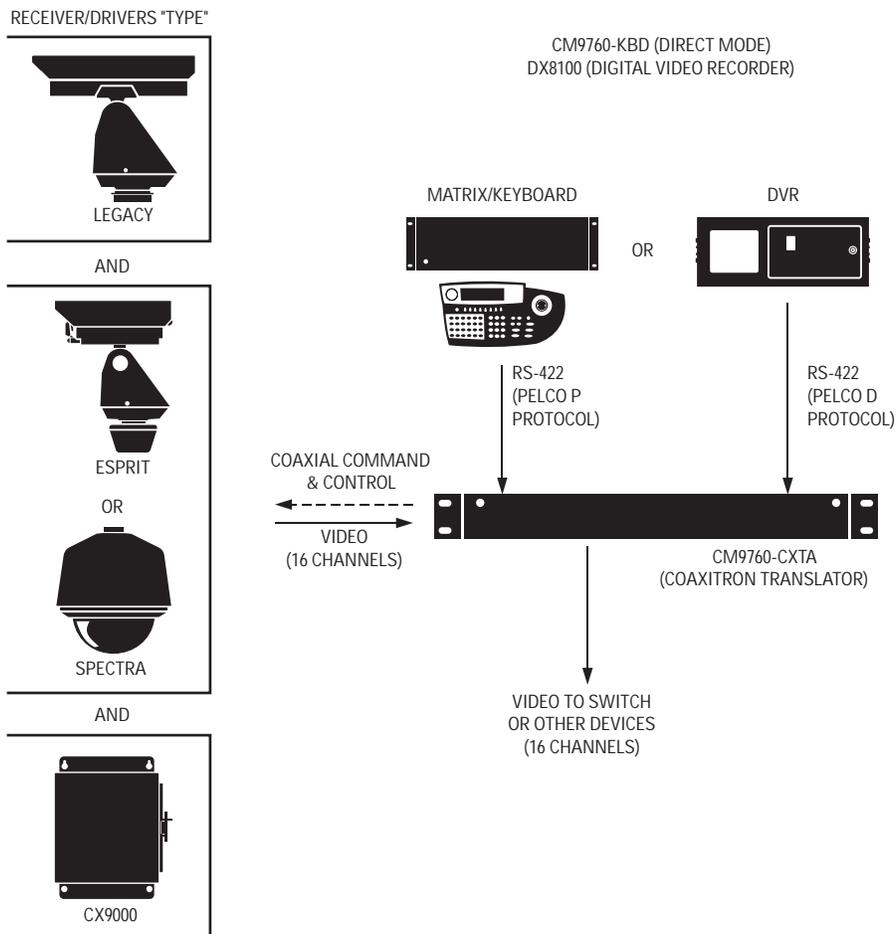

Dimensions  
     Base Only 1.75" H x 17.40" W x 10.63" D  
         (4.45 x 44.20 x 27.00 cm)  
     With Rack Ears 1.75" H x 19.00" W x 10.63" D (1 RU)  
         (4.45 x 48.26 x 27.00 cm)  
 Mounting Fits 19-inch EIA-standard rack  
 Operating Temperature 32° to 158°F (0° to 70°C)  
 Unit Weight 5.7 lb (2.59 kg)  
 Shipping Weight 13 lb (5.91 kg)

# CM9760-DMR Data Manager

## SERCOM PORT EXPANSION/DATA MERGER UNIT

### Product Features

- Choose One of Three Different Operating Modes: Keyboard Expander, Camera Control Expander, or Data Merger
- Connect Up to Four CM9760-KBD Keyboards to One Data Port
- Address Up to 64 PTZ Cameras From One Data Port
- Allow Up to Four Matrix Switchers, DVRs, or Direct Keyboards to Share Control of Up to 32 PTZ Cameras
- Both RJ-45 Connectors and Screw Terminals Are Provided for Each Data Port
- Diagnostic LEDs Identify the Amount of Data Activity for Each Port

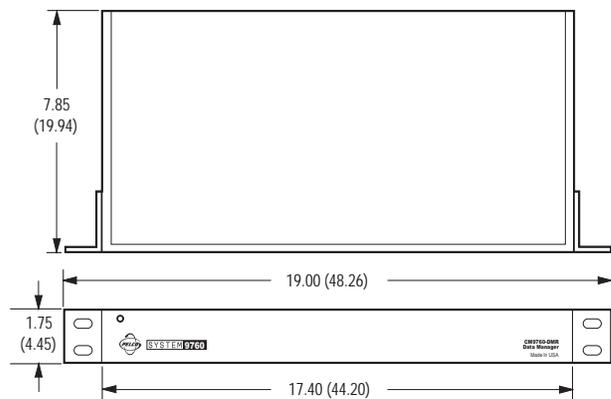

The **CM9760-DMR** is a data manager package that provides a four-to-one expansion of the number of data (SERCOM) ports available on a CM9765, CM9770, or CM9780 central processing unit (CPU). It may be used with System 9700 Series matrix switchers in three basic applications: To expand the number of cameras controlled through a port (Camera Control Expander), to expand the number of keyboards connected to a port (Keyboard Expander), and to interface up to four networked CPUs to control a common group of cameras (Data Merger).

When configured for use as a Keyboard Expander, the **CM9760-DMR** allows up to four CM9760-KBD keyboards to be connected to one SERCOM port on the CM9780, CM9770, or CM9765 CPU.

When configured for use as a Camera Control Expander, the **CM9760-DMR** allows addressing of up to 64 PTZ cameras from one SERCOM port on the CM9780, CM9770, or CM9765 CPU.

When configured for use as a Data Merger, the **CM9760-DMR** allows up to four matrix switchers or other devices to share control of up to 32 cameras using Pelco D or Pelco P protocol.

In the Data Merger configuration the **CM9760-DMR** can also interface control from as many as four non-matrix controllers to up to 32 cameras. Devices include direct mode KBD300A keyboards and other Pelco control products using Pelco P protocol. Priority can be assigned to each device with this configuration.

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# CM9760-HS Hot Switch Interface Unit

## HOT STANDBY SWITCH FOR CM9700 SERIES MATRIX

### Product Features

- Continuous Monitoring of Active and Standby CPUs
- Automatic or Manual Switching to Standby CPU in the Event of a Failure
- Diagnostic LEDs Show CPU Status
- Audible Alert in Case of CPU Failure
- Manual Control of Diagnostic Monitor and Keyboard Allows Servicing/Programming of Either CPU Without Interrupting System Operation
- Automatically Routes Data Lines for Keyboards, Bays, and Accessories to Standby CPU
- Backward Compatible With Older Matrix Systems
- Fits a 19-Inch EIA-Standard Rack

The **CM9760-HS** hot switch interface unit is a computer changeover switch that monitors the status of an active CC1 in a 9700 Series system. If the active CC1 fails to operate, the hot switch receives an alarm and transfers control to a standby CC1. All devices controlled by the active CC1 are then controlled by the standby CC1. Also, all common computer input/output devices (keyboard, monitor, printer and two serial ports) are switched from the active CC1 to the standby CC1; this can be done when there is a failure or by command of the system user.

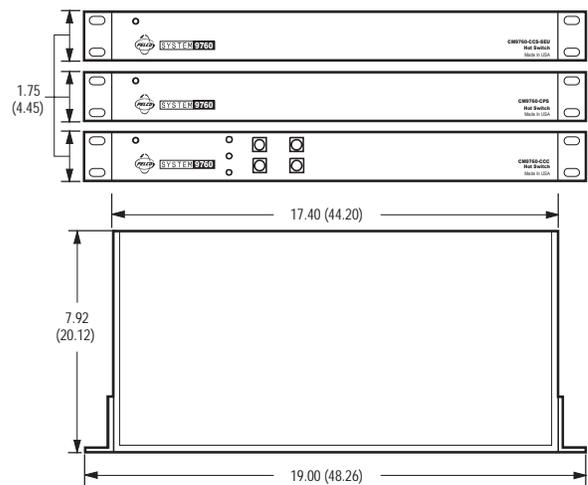

The hot switch is made up of three subunits: the CCC (computer changeover control), the CPS (computer peripheral switch), and the SEU (serial expansion unit).

The CCC is the main component of the hot switch. The data connections between the interfaced CC1s and the hot switch are located on the rear of this unit.

The CPS switches computer peripherals so that two CC1s may use only one monitor, printer, keyboard, and standard serial port.

The SEU switches the data communications ports. Each SEU can switch 16 standard RS-422/RS-485 ports.

The **CM9760-HS** allows for easy expansion to 128 ports.

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.

# TECHNICAL SPECIFICATIONS

## MODELS

CM9760-HS	Hot switch interface unit, consisting of one CM9760-CCC, one CM9760-CPS, and one CM9760-SEU
CM9760-SEU	Serial expansion unit; supports switching of an additional 16 data ports.

## ELECTRICAL

CM9760-CCC	
Input Voltage	120 to 240 VAC, 50/60 Hz (autoranging, European-standard plug supplied)
Power	30 VA
Fusing	2 A, fast acting
Power Indicator	LED, green
CM9760-CPS	
Power Indicator	LED, green
CM9760-SEU	
Power Indicator	LED, green

## PORTS

CM9760-CCC	
Input (data)	Two RS-422, RJ-45 connectors (female) DIP switch selectable baud rate and communication type
Common Bus	Two RS-232, DB9 connectors (female) DIP switch selectable baud rate and communication type
Logging Printer	One DB25 (female)
CM9760-CPS	
Common Bus	Two (one IN, one OUT), DB37 connectors (female)
Input (Side A)	One mini-DIN, 5-pin connector One DB9, COM 2 connector (male) One DB15, VGA connector (female) One DB25 printer connector (female)
Input (Side B)	Same configuration as Side A, input
Output	Same configuration as Side A, input
CM9760-SEU	
Common Bus	Two (one IN, one OUT), DB37 connectors (female)
Input (Side A)	Sixteen, RJ-45 (female) connectors
Input (Side B)	Same as Side A configuration
Output	Same as Side A configuration

## MECHANICAL

Connectors	
CM9760-CCC	
Power	3-wire, 18 AWG
RJ-45	Two (female)
DB9	Two (female)
DB25	Two (one male, capped, not used; and one female)
DB37	Two (female)
CM9760-CPS	
Mini-DIN, 5-pins	Three (female)
DB9	Three (male)
DB15	Three (female)
DB25	Six (three male and three female)
DB37	Two (female)
CM9760-SEU	
RJ-45	48 (female)
DB37	Two (female)

## GENERAL

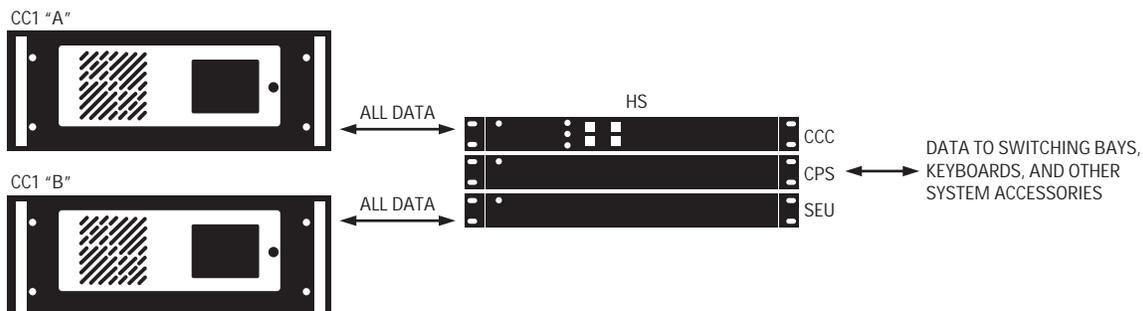

Operating Temperature	32° to 122°F (0° to 50°C)
Construction	Aluminum

# CM9760-REL Relay Interface Unit

## CONTROLS UP TO 64 RELAY CONTACT OUTPUTS PER UNIT

### Product Features

- Each Unit Provides up to 64 Single-Pole, Single-Throw (SPST) Contact Outputs for Operating Different Peripheral Equipment
- Relay Output Contacts Can Be Configured for Normally Open (Factory Default) or Normally Closed Operation
- Memory Feature Allows Relay Groups to Retain or Hold Their Contact Position in the Event of a Power Failure or Front Panel Reset
- Multiple Units Can Be Daisy-Chained to Extend the Number of Relay Contact Outputs Controlled from a Single Port on the CC1 (More Than 5,000 Relay Outputs Can Be Configured)
- The Relay Unit Can Be Remotely Placed up to 4,000 Feet (1,219 meters) from the Controller (RS-422 Operation)

The **CM9760-REL** relay interface unit is an optional accessory for System 9700 Series matrix switchers. The unit provides dry contact switching for direct or automatic control of peripheral equipment. The unit connects to any RS-422 COM port on the rear of the CM9700-CC1.

The basic function of the relay unit is to allow the user to control various peripheral equipment through relay contacts. Each relay unit processes and executes commands only with addresses that match that of the RELs (frame address). When a relay unit receives a command with an inappropriate address, it passes it on to the next unit (if applicable) through its output port.

The front of the relay interface unit has three 10-position DIP switches that configure the communication parameters for the unit as well as setting the parameters for relay contact output operation. The front also has a red data LED that flashes when the first valid command is received.

The relay unit mounts in a standard 19-inch (48.26 cm) rack and occupies only 1 RU (1.75 inches or 4.45 cm) of rack space. For remote operation, the wiring from the relay unit to the system controller should not exceed 4,000 feet (1,219 m).

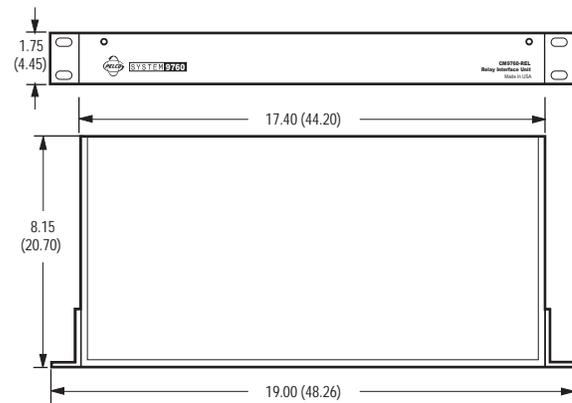

Daisy-chaining is required when more than 64 relays are needed. Each unit must be configured to have a unique frame address. Daisy-chain configurations can be used whether relay units are situated locally, remotely, or as a combination of the two.

# PMCL300 Series TFT LCD Monitor

17-INCH, 19-INCH, OR 19-INCH WIDE, WITH MULTIMODE FUNCTIONALITY

## Product Features

- Space-Saving, Flat Panel Design
- Picture-Frame-Style Desktop Stand
- Looping Composite and S-Video Inputs
- RGB and DVI Input
- Supports up to 1280 x 1024 SXGA Resolution (PMCL317A, PMCL319A), 1440 X 900 Resolution (PMCL319W)
- Maximum Brightness of 300 cd/m<sup>2</sup>
- Maximum Contrast Ratio of 1000:1
- Maximum Response Time of 5 ms
- 100 to 240 VAC, 50/60 Hz Autoranging Internal Power Supply
- Low Power Consumption (<50 W)
- Internal Speakers
- Optional Rack, Wall, and Ceiling Mounts
- 3-Year Warranty

The **PMCL300 Series** TFT LCD monitors, designed specifically for the security industry, provide high-resolution display of computer signals and composite video. These monitors have a color LCD panel with a thin film transistor (TFT) active matrix. The monitors automatically adapt to the appropriate input resolution and detect and display the correct video format (NTSC or PAL).

The **PMCL300 Series** provides looping composite (BNC) and S-Video inputs. Additionally, these models provide RGB and DVI inputs to support the use of digital video recorders (DVRs) and PC applications. This multimode functionality, combined with a quick panel response time to minimize ghosting in motion video, ergonomic design, autoranging internal power supply, and low power consumption, makes the **PMCL300 Series** ideal for applications requiring an RGB and DVI display with composite video capabilities.

The **PMCL300 Series** features a folding picture-frame-style desktop stand, optional rack mount kits, and VESA®-compliant mounting holes to easily adapt to different wall and ceiling mounts.

The **PMCL300 Series** uses four long-life CCFT (cold cathode fluorescent tube) backlights to maintain the brightness level over time, eliminating the brightness degradation common in aging CRT monitors.

Adjustments of standard monitor display parameters are made through user-friendly, on-screen menus and front panel controls.

Additionally, these models provide RGB and DVI inputs to support the use of digital video recorders (DVRs) and PC applications. This multimode functionality, combined with a quick panel response time to minimize ghosting in motion video, ergonomic design, autoranging internal power supply, and low power consumption, makes the **PMCL400 Series** ideal for applications requiring an RGB and DVI display with composite video capabilities.

The **PMCL400 Series** features a folding picture-frame-style desktop stand, optional rack mount kits, and VESA®-compliant mounting holes to easily adapt to the available wall and ceiling mounts.

The **PMCL400 Series** uses four long-life CCFT (cold cathode fluorescent tube) backlights to maintain the brightness level over time, eliminating the brightness degradation common in aging CRT monitors.

Adjustments of standard monitor display parameters are made through user-friendly, on-screen menus and front panel controls.

# Desktop Full High-Definition Series LCD Monitors

## 24- AND 32-INCH MONITORS

### Product Features

- Full High Definition 1920 x 1080 Resolution
- 3D Digital Comb Filter with Deinterlacing for High Quality Video
- High Contrast Ratio
- Lightweight Design
- Built for 24/7 Applications
- VGA, DVI, S-Video, BNC, and HDMI
- Deinterlace Motion
- Picture-in-Picture (PIP)
- On-Screen Display (OSD) Languages: English, Spanish, French, Italian, German, Russian, Portuguese, and Chinese (simplified)
- Anti-Glare Panel Surface
- Energy Star Level 5 Compliant

Pelco's 24- and 32-inch displays combine the latest technologies into a perfect complement to your investment in megapixel imaging and performance. **Desktop full high-definition (FHD) monitors** deliver 1920 x 1080 resolution and are specifically engineered to exceed the demands of surveillance operators.

High-definition displays adapt to the changing nature of security in control room design and efficiency. Pelco **FHD monitors** are an integral component of the modern control room, allowing you to customize and deliver the most efficient video configuration for your installation.

Individual monitors, as well as entire walls, can be configured to meet your security needs. Also, multiple video streams can be arranged on a single monitor to significantly reduce your installation's power requirements. Pelco's energy-conscious **FHD** displays use low-power components to meet regulatory compliance.

**FHD monitors** deliver optimal performance and the truest color reproduction available while retaining compatibility with Pelco and third-party megapixel cameras. The result is superior clarity and image recognition. When used with other, lower resolution camera systems, Pelco **FHD** displays can seamlessly scale down to 720p. This feature guarantees crisp, detailed images from all cameras.

**FHD monitors** have been designed to meet the global demands of complex security installations. Stringent testing of **FHD monitor** components ensures that around-the-clock, day-in and day-out operation does not degrade the image quality, but consistently maintains the superior performance that surveillance operators require.

# DX4500/DX4600 Series Digital Video Recorder

## 8/16 CAMERA INPUTS, 250 GB TO 8 TB STORAGE, FLEXIBLE SEARCH CAPABILITIES

### Product Features

- 8- or 16- Channel Digital Video Recorder
- Up to 480 Images per Second (IPS) Recording Rate
- Up to 704 x 480 (NTSC), 704 x 576 (PAL) Recording Resolution
- Support for KBD300A Keyboard Camera Control
- Pelco C Coaxitron®, Pelco D, and Pelco P PTZ Protocols
- Normal, Alarm, Motion, Instant Recording, and Multi-Event Recording
- Scheduled Backup
- HDD Storage Manager
- Increased Frame Rate and Resolution for Event Recording
- Channel Resolution, Quality, and Frame Rate Settings Configurable per Individual Camera
- Picture-On-Picture for Multiscreen Live and Playback Video
- Remote and Web Client
- Local and Remote PTZ Control
- Third-Party PTZ Protocols
- Up to 4 Audio Inputs and 1 Audio Output

- Export and Import System Configurations
- Pre- and Post-Alarm Recording
- Up to 16 Alarm Inputs and Up to 4 Relay Outputs
- Main Monitor for VGA or Analog Display, Analog Spot Monitor
- Multilingual On-Screen Display
- USB, CD-RW, or DVD±RW Media for Video Export
- Event Notifications by E-mail, Emergency Agent, or Sounder
- Time/Date, Bookmark, Event, and Pixel Search

A fully featured and fully affordable entry-level digital video recorder (DVR), the **DX4500/DX4600** Series is the next generation in DVRs. Equipped with an embedded operating system, it offers camera capacity, features, and functionality exceeding other DVRs. The **DX4500/DX4600** is designed for the entry-level market that requires 8 or 16 camera inputs; greater internal hard drive storage capacity; fast frame rate recording; and efficient playback, search, and export capability. The **DX4500/DX4600** not only replaces the traditional VCR and multiplexer combination, it provides a solution that scales from standalone to networked.

Designed to work with today's broadband networks, the **DX4500/DX4600** allows you to view and control the DVR across local or wide area networks. The **DX4500/DX4600** remote client allows live viewing and video playback for a maximum of sixteen **DX4000** series servers simultaneously. This display can consist of multiple **DX4500/DX4600** servers and one **DX4004** server.

With DS ControlPoint software, the **DX456/4600** can connect to a Digital Sentry® system and other DX Series HVRs/DVRs. DS ControlPoint operators can simultaneously view and playback

analog video and control cameras from any **DX4500, DX4600, DX8000, or DX8100**. Operators can also view and playback analog and IP video and control cameras from any Digital Sentry system.

Recording at resolutions of up to 704 x 480 (4CIF), the **DX4500/DX4600** captures crystal clear pictures, creating effective footage for later use and retrieval. Each DVR input channel can be configured individually to meet a specific security application requirement for video retention. User-configurable disk partitioning is used to allocate specific hard disk space for storing continuous video data and event-initiated video data. The retention time can be different for retaining continuous recorded video and event-initiated recorded video. Video critical to investigation and archiving is easily exported to a USB memory device or to an optional DVD±RW device.

Exported video is easily reviewed at the **DX4500/DX4600**, the remote client, or using the export player. The export video preview feature allows you to verify the content and quality of video exported to a disc or a USB drive. At the client, users can easily and quickly capture a video scene, save it in JPEG format, and then store it on the hard drive. User-configurable disk partitioning is used to allocate specific hard

by Schneider Electric

C2673 / REVISED 7-29-10

# TECHNICAL SPECIFICATIONS

disk space for storing continuous video data and event-initiated video data. The retention time can be different for retaining continuous recorded video and event-initiated recorded video.

Operation of the unit is made easy through the front panel, remote control device, or mouse. For surveillance applications requiring PTZ capability, the **DX4500/DX4600** addresses and controls pan/tilt/zoom (PTZ) equipment such as Spectra® domes and mini domes or third-party cameras. The optional KBD300A keyboard operates Pelco and third-party PTZ cameras that support Pelco C (Coaxitron), Pelco D, or Pelco P protocols.

Multi-event recording on the DX4600 supports single-event recording or a combination of alarm, motion, or instant event recording at a resolution, quality, and image rate specific to each camera. With the ability to trigger recording and in response to events (such as alarm inputs, motion detection, and video loss), the **DX4600** becomes an automated monitoring engine as well.

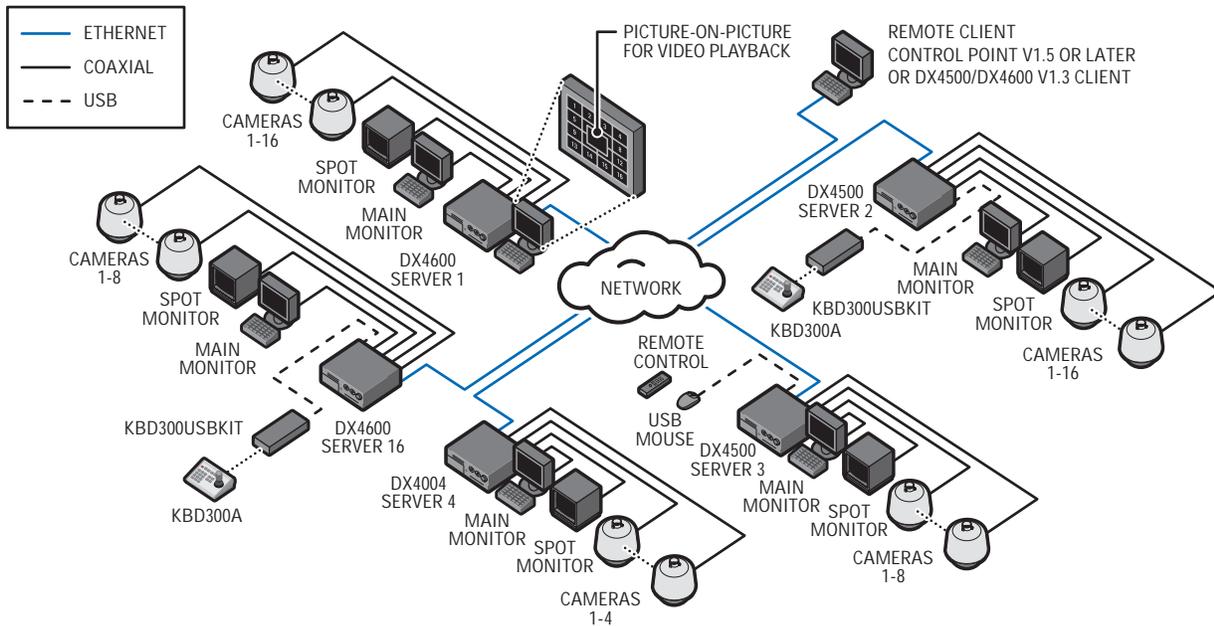

The **DX4500/DX4600** provides a robust set of features for small- to multiple-site applications. From the incorporation of watermarking technology to prevent alterations to captured video, to the ability to capture log entries, to the inclusion of Pelco's world renowned customer service promise, the **DX4500/DX4600** embodies the ideal entry-level DVR to protect people and assets.

## APPLICATIONS

The remote client-to-server connectivity allows operation from a remote location, connecting multiple servers simultaneously. The remote client can be used to operate and administer both **DX4500/DX4600** and **DX4000** servers installed at multiple locations. For example, small sites can use the **DX4000** to record and display video from 1 to 4 cameras; medium sized sites can use the **DX4500/DX4600** to record and display video from 8 or 16 cameras. Additionally, the remote client is an application for the Microsoft® Windows Vista® operating system and supports all editions.

The remote client can export a video data file in AVI or native format from a **DX4500/DX4600** server, or in AVI format from a **DX4000** server. It can also store the file at a specified destination on the remote computer's hard drive or other allocated storage media. Use the Windows Media® Player or similar viewer to view video exported in AVI format. Use the **DX4500/DX4600** Export Viewer to playback video exported in native format or to view authenticated watermarked video. Use the **DX4000** Backup Player to view authenticated watermarked video.

The remote client can play back video from the live view or search modes of the **DX4500/DX4600**; the **DX4000** can play back video from the remote client's date/time search mode. For the **DX4000**, the playback mode, playback controls, and playback speed and volume controls are available in the remote client's date/time search mode. With only a few clicks of a button, the remote client can quickly print a **DX4500/DX4600** live view playback/search mode image or a **DX4000** date/time search mode playback video image.

### IMPORTANT NOTE. PLEASE READ.

The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

## REMOTE PC CLIENT APPLICATION

### Minimum PC Requirement

Operating System	Windows®2000 (SP4), Windows XP (SP2), or later and DirectX® 8.1 or later
Processor	Intel® Pentium® 4
Memory	512 MB
Video Card	VGA card with minimum 64 MB video RAM
Hard Drive	40 GB hard drive with minimum of 15 GB of available space

### Recommended PC Requirements

Operating System	Windows XP (SP3), Windows Vista, or Windows 7
Processor	1 GHz or higher, 32-bit (x86) or 64-bit (x64)
Memory	1 GB (32-bit) or 2 GB (64-bit) RAM
Video Card	DirectX 9 graphics card with Windows Display Driver Model (WDDM) 1.0 or higher driver and 128 MB of graphics memory
Hard Drive	40 GB hard drive with minimum 20 GB of available space
Remote Administration	Full remote control through TCP/IP network

**Notice:** Judgment as to the suitability of the products for users' purposes is solely the users' responsibility. Users should refer to the Operation manuals for cautionary statements regarding user selected options and how they might affect video quality. Users shall determine the suitability of the products for their own intended application, picture rate and picture quality. In the event users intend to use the video for evidentiary purposes in a judicial proceeding or otherwise, users should consult with their attorney regarding any particular requirements for such use.

## PRODUCT MODELS AND FEATURES

Feature	DX4508	DX4516	DX4608	DX4616
IPS	120	240	240	480
Multi-Event Recording	No	No	Yes	Yes
Pixel Search	No	No	Yes	Yes
Maximum Hard Drive Storage (GB)	4000	4000	8000	8000
Audio Inputs	2	2	4	4
Alarms Inputs	8	16	8	16
Relay Outputs	2	2	2	4
Standard Optical Disk Drive	None	None	CD-RW	CD-RW
Optional Optical Disk Drive	CD-RW or DVD±RW	CD-RW or DVD±RW	DVD±RW	DVD±RW

## MODEL NUMBERS

Use the following table to specify and customize your DX4500/DX4600. For example, the model number for an 8-channel DX4500 with 250 GB of internal storage and an optional DVD±RW optical drive is DX4508DVD-250. The model number for a 16-channel DX4600 with 250 GB of internal storage and an optional DVD±RW optical drive is DX4616DVD-250.

## CREATING MODEL NUMBERS

Models	Channels	Disk Drive	Storage In GB
5 (DX4500)	08	CD-RW* DVD±RW†	250
6 (DX4600)	16	DVD±RW†	500
			750
			1000
			1500
			2000
			4000
			6000† 8000†

\* Optional for the DX4500 and standard for the DX4600.  
 † Optional for the DX4500/DX4600. The DVD±RW drive supports double-layer recording.  
 ‡ Drive configurations for only the DX4600.

## SUPPLIED ACCESSORIES

Power cords (USA and European), USB mouse, remote control, remote client application disc, alarm and relay terminal blocks, and rack mounting kit.

## COMPATIBLE PRODUCTS

Esprit Positioning Systems  
Spectra Domes

# DX8100 Series Hybrid Video Recorder

## 8 TO 32 ANALOG/IP CAMERA INPUTS, UP TO 8 TB INTERNAL STORAGE

### Product Features

- 8 to 32 Analog/IP Cameras
- DIACAP-Compliant
- Supports Pelco and AXIS® Standard Definition IP Cameras
- No Added IP Camera Licensing Fees
- USB 2.0 JBOD External Storage Supports up to 8 TB
- Remote Client Connection up to 200 Servers
- Internal Storage Capacity up to 8 TB
- 8, 16, 24, or 32 Looping Analog Video Channels
- Up to CIF/480 Images per Second (ips) Recording Rate
- DVD+RW Drive Standard
- Dynamic Adjustment of Video Settings
- 2 Standard Audio Channels with Live Audio Over the Network
- 8/16/24/32 Alarm Inputs and 8/16/24 Relay Outputs
- Online Help

- Thumbnail, Pixel (Smart Search), and ATM/POS Search Modes
- Instant Playback
- 5 Simultaneous Connections per Server
- Scheduled Backup
- Export and Import System Configurations
- Multilevel Password and User Configuration
- Multilingual Support

The **DX8100 Series hybrid video recorder (HVR)** has long-served the professional security market with a wide variety of search tools, the ability to view up to 72 cameras at the server, ATM/POS recording, and more. The new hybrid recording capability in **DX8100** version 2.0 offers an even more flexible and robust security recording platform.

The **DX8100D** is a security-enabled product for highly regulated markets. This model meets Defense Information Assurance Certification and Accreditation Process (DIACAP) standards. Government installations that have existing **DX8100** systems can convert them to DIACAP-compliant systems without losing existing video.

### Efficient and Easy Analog to IP Camera Recording

The new **DX8100** resource meter monitors system resources in real time and is a useful gauge for the addition of IP cameras to the system. New configuration tools allow you to easily configure IP cameras. With no licensing fees for Pelco and AXIS® standard definition network cameras, the shift to IP recording is an affordable transition.

### Flexible Storage

The **DX8100** provides a variety of options for internal storage and data redundancy needs. New 8 TB models provide increased storage retention. New USB 2.0 JBOD (just a bunch of disks) external storage of up to 8 TB meets cost-sensitive demands. Combined, the new

storage options increase the HVR's recording capacity to 16 TB. Customers requiring file redundancy can select from a range of RAID 5 options up to 24 TB of external storage.

### Increased Flexibility and Interconnectivity

With DS ControlPoint software, the **DX8100** can connect to a Digital Sentry® system and other DX Series HVRs/DVRs. DS ControlPoint operators can simultaneously view and playback analog video and control cameras from any DX4500, DX4600, DX8000, or **DX8100**. Operators can also view and playback analog and IP video, while controlling cameras from any Digital Sentry system.

### Adaptable Viewing

The **DX8100's** unique server dual display capability allows simultaneous viewing of up to 72 cameras. Up to four extended composite monitors can function as public view monitors. The **DX8100** favorites feature lets users quickly recall any combination of camera and views for easy camera navigation. These extensive selections make the **DX8100** adaptable for complete surveillance viewing.

by Schneider Electric

C2629 / REVISED 10-26-10

## System Health Check Monitoring

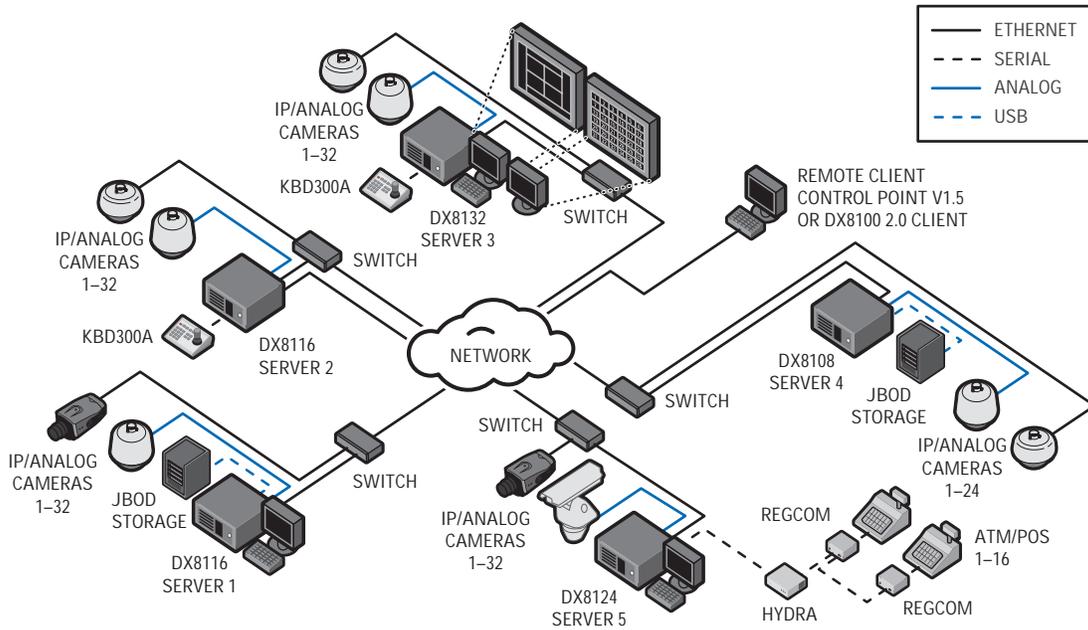

**DX8100** provides a quick view of critical unit operating status. When an operating limit is exceeded, an alert appears on the server and connected remote clients. System health check monitoring helps ensure maximum system uptime and **DX8100** availability.

## Application and System Integration

**DX8100** flexibility and expendability is accomplished through published and well-documented APIs. For information about the Pelco developer program, visit our Web site at [www.pelco.com](http://www.pelco.com).

## Extensive Networking Options

**DX8100** networks can grow as security requirements expand. A unit can operate as part of a network of as many as five **DX8100s** and **DX8000s**. This gives the HVR operator the ability to view and control up to 180 cameras. The remote client can administer **DX8100** servers, and it can simultaneously control and operate up to 36 cameras connected to any of 200 **DX8100** and **DX8000** HVR/DVRs. The remote client application, EmergencyAgent, and **DX8100** Viewer are included at no extra cost. These applications can be installed on an unlimited number of client workstations.

### IMPORTANT NOTE. PLEASE READ.

The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

# TECHNICAL SPECIFICATIONS

## ANALOG AND IP CAMERA CONFIGURATIONS

Model	Maximum Analog Cameras	Maximum Analog and IP Cameras
DX8108	8	24
DX8116	16	32
DX8124	24	32
DX8132	32	32

The total number of IP cameras depends on analog and IP camera settings and DX8100 system resources. You can record the maximum number of analog and IP cameras when all cameras are set to record at CIF/1 ips.

## AVAILABLE IP CAMERA BANDWIDTH

Analog Camera Image Rate	Available Mbps IP Stream* for Each DX8100 Series	
	DX8108	DX8116
1 ips (Low)	13	11
15 ips (Medium)	11	7
30 ips (High)	11	4
	DX8124	DX8132
1 ips (Low)	11	15
7 ips (Medium)	10	14
15 ips (High)	6	13

\*Testing has determined that recording at CIF, 2CIF, and 4CIF resolutions produces only small differences in the available bandwidth.

## PELCO IP CAMERA RESOURCE USAGE

The available recording resources of the DX8100 is determined by the resolution and bit rate of the attached cameras. For example, a DX8108 with eight analog cameras recording at CIF/30 ips supports up to eleven IP110 cameras recording at CIF/15 ips.

Stream	Resolution	Bit Rate
Primary	4CIF/30 ips	2 Mbps
Secondary	CIF/15 ips	1 Mbps

**Note:** Pelco cameras with Sarix™ technology and AXIS IP camera resolutions and bit rates are variable. Refer to the appropriate product specification sheet for information about resource usage.

## MAXIMUM ANALOG CAMERA RECORDING

Model	Format	NTSC IPS		PAL IPS	
		Total	Per Camera	Total	Per Camera
DX8108	CIF	240	30	200	25
	2CIF	120	15	100	12
	4CIF	60	7	50	6
DX8116	CIF	480	30	400	25
	2CIF	240	15	200	12
	4CIF	120	7	100	6
DX8124	CIF	360	15	300	12
	2CIF	180	6	150	6
	4CIF	90	3	75	3
DX8132	CIF	480	15	400	12
	2CIF	240	6	200	6
	4CIF	120	3	100	3

Resolution and frame rate values can be assigned evenly among all cameras, or they can be configured independently for individual cameras. Frame rate values can also be customized according to recording mode (normal, motion, alarm, and ATM/POS).

- CE and FCC, Class A (all DX8124-M, DX8124-MA, DX8132-M, and DX8132-MA models)
- CE and FCC, Class B (all except DX8124-M, DX8124-MA, DX8132-M, and DX8132-MA models)
- UL/cUL Listed
- C-Tick

## THIRD-PARTY PRODUCT SUPPORT

The DX8100 Series HVR is compatible with the third-party domes listed in the following table. Please note that this list is subject to change. For more information about dome compatibility or third-party devices, contact Pelco Product Support.

Manufacturer	Model
GE™ (Kalatel)	CyberDome™ Day/Night
LG®	LPT-SD163HM
Panasonic®	WV-CW864
Samsung™	SCC-641
American Dynamics™ (Sensormatic®)	SpeedDome® Ultra VII
Philips® CSI	AutoDome® Day/Night
Baxall™	BPD1-RAS916

The DX8100 has been tested with the USB 2.0 JBOD ICY DOCK® model MB561US-4S-1. Pelco tested this unit with a maximum capacity of four Seagate 2 TB Barracuda 7200.11 (model ST31500341AS) drives.

### Notes:

- The DX8100 version 2.0 interface is designed to work with AXIS standard definition cameras. The interface was written using VAPIX® Application Programming Interface (API) version 2.0 (Firmware 4.xx). Pelco Product Support is limited to the interface. The DX8100 has been tested to work with the AXIS Model 211 and 232D network cameras.
- Consult the appropriate product Web site for specific model information.

**Notice:** Judgment as to the suitability of the products for users' purposes is solely the users' responsibility. Users should refer to the Operation manuals for cautionary statements regarding user selected options and how they might affect video quality. Users shall determine the suitability of the products for their own intended application, picture rate and picture quality. In the event users intend to use the video for evidentiary purposes in a judicial proceeding or otherwise, users should consult with their attorney regarding any particular requirements for such use.

## MODEL NUMBERS

Use the following table to create a model number to specify your DX8100. For example, the model number for a 32-channel system with 1000 GB storage and audio option is DX8132-1000A. The model number for a DIACAP 32-channel system with 1000 GB storage, MUX, and audio options is DX8132-1000DMA.

**Note:** When a MUX or audio option is ordered, the MUX or audio option will have the same number of channels as the unit.

DX81XX – XXXXXXXX		
Channels		
Storage (GB)		
Options		
Channels	Storage in GB	Options
8	250	M = MUX
16	500	A = Audio
24	750	MA = MUX and Audio
32	1000	D = DIACAP
	1500	DM= DIACAP and MUX
	2000	DA = DIACAP and Audio
	4000	DMA = DIACAP, MUX, and Audio
	6000	
	8000	

To order a custom system, specify the base unit first, and then specify the custom option. For example, for a 32-channel system with 1000 GB storage and 8 audio inputs, order the DX8132-1000 and the DX8108-AUD separately. For more information about ordering customized configurations, contact your Pelco sales representative.

## SUPPLIED ACCESSORIES

Power Cords	1 USA and 1 European
USB Keyboard and Mouse	1 each for configuration and operation
Recovery Disc	1, for re-imagining the unit
Resource Disc	1, contains server and client software and documentation
Audio Input Breakout Cables	(optional)
Terminal Blocks	
Alarm (green)	1 (8 inputs) or 2 (16 inputs)
Relay (blue)	1 (8 inputs) or 2 (16 inputs)
Rack Mount Kit	1 standard kit (brackets, rails, and hardware)

**Note:** A monitor is not supplied with DX8100 Series HVR.

## OPTIONAL ACCESSORIES

DX8100-EXP	DX8100 16-channel expansion unit kit; racks, 1 RU per unit (rack ears and screws are provided)
DX8108-AUD	DX8100 8-channel audio input card
DX8116-AUD	DX8100 16-channel audio input card
DX8100-512RAM	DX8100 memory upgrade from 512 MB to 1 GB*
DX8108-MUX	DX8100 8-channel graphics acceleration and additional composite output card
DX8116-MUX	DX8100 16-channel graphics acceleration and additional composite output card
DX8100-ISCI	DX8100 internal Ultra 160 SCSI card†

DX81HDD500KIT	DX8100 SATA 500 GB upgrade
DX81HDD750KIT	DX8100 SATA 750 GB upgrade
DX81HD1000KIT	DX8100 SATA 1000 GB upgrade
DX81HD1500KIT	DX8100 SATA 1500 GB upgrade
DX81HD2000KIT	DX8100 SATA 2000 GB upgrade
Regcom	AVE® RS-485 network system unit‡
Hydra	AVE RS-485 network system control unit‡
VSI-PRO	AVE Video serial interface for ATM/POS§
KBD300A	KBD300A Universal keyboard (requires KBDKIT/KBDKIT-X)
KBDKIT/KBDKIT-X	Remote keyboard wiring kit
DX8100DSP-XP	Dual Display Card and version 2.0 software upgrade for Windows XP Embedded
DX81SWV20XPE	Software only upgrade for DX8100 Windows XP Embedded
DX8100XPEUP	Windows XP Embedded license upgrade
DX81SWV20XPED	Software for converting DX8100 version 1.0 (or later) to DIACAP version 2.0D**

\*Provides pre- and post- alarm recording up to 15 minutes. Pre- and post-alarm recording is up to 60 seconds without upgrade.

†Not for use with DX8124 or DX8132 models.

‡One Regcom unit is required for each ATM/POS device; one Hydra unit is required for each DX8100 serial connection used. One to four serial ports may be used. Support is limited to 16 total ATM/POS devices. Hydra, Regcom, and the required cabling are available from AVE.

§The VSI-PRO and required cabling is available from AVE.

\*\*For information about the DIACAP supported features, refer to the most current version of the DX8100 v2.0D DIACAP Addendum (C4653M).

# EE500 Series EnduraXpress™

## INTEGRATED RECORDING AND MANAGEMENT PLATFORM, 32 OR 64 IP, 3 TO 24 TB

### Product Features

- Recording Throughput up to 250 Mbps Meets Demanding Performance Requirements for Write-Intensive Applications
- Hardware Designed to Eliminate Single Points of Failure, Including Redundant Fans, Power Supplies, and RAID 6 Storage for Optimum Reliability
- Built-in EnduraStor™ Storage Management Increases Storage Efficiency by Grooming Recorded Streams Based on Age and Priority
- Ability to Serve 32 Simultaneous Playback Streams
- Performance Levels Maintained in Normal and RAID Error Conditions
- Built-in Diagnostic Monitoring Provides Preventative Maintenance and SNMP Monitoring
- Ships with Endura® WS5200 Software Licenses
- Software Runs on a Standard PC with Microsoft® Windows® XP Professional and 32-Bit Versions of Windows Vista® Business, Ultimate, or Enterprise Operating Systems
- Support for Standard Resolution and Megapixel Resolution Cameras
- Support for MPEG-4, H.264 Baseline, Main, and High-Profile Codecs
- Zone of Interest™ Allows Independent View and Management of Specified Areas Within a Camera's Field of View in Live or Playback Views
- Digital Zoom in Live or Playback Views
- Convenient Tear-Off Options to Customize Display

- EnduraView™ Technology Mitigates CPU Processing Requirements and Network Bandwidth Consumption for Multiscreen Configurations
- Integrated Configuration and Administration Interface Provides Full-Management Capability for All Components
- On-Screen Pan/Tilt/Zoom (PTZ) Controls Including Click to Center and PTZ to Selected Area
- Advanced Search Capabilities Including Motion, Alarm, Event, and Camera
- Integrated Event and Alarm Monitoring and Management Interface

The **EE500 Series EnduraXpress™** combines the performance, reliability, and robustness of an enterprise-class, mission-critical storage management system. It offers ease of installation and management that is critical for delivering a cost-effective solution to small-scale installations.

### Hardware Built for Performance and Reliability

The demands of surveillance applications place unique strains on storage subsystems. Storage systems require the bandwidth and capacity to keep up with incoming streams. They must also simultaneously manage all other common disk and RAID functions. Additionally, physical security applications are typically mission critical. Any downtime, degraded performance for routine maintenance, or loss of recorded footage is extremely disruptive to the organization's physical security mission.

The **EE500** is engineered to meet these unique performance and reliability demands. Custom hardware components have been specifically designed to deliver sustained high throughput for recording and playback. The **EE500** can handle a maximum of 250 Mbps of sustained write throughput across 32 or 64 streams and an additional 32 simultaneous playback streams. This performance is maintained whether the system is operating under normal conditions, dealing with disk drive errors, or rebuilding the RAID array.

by Schneider Electric

C4649 / REVISED 8-12-10

The **EE500** improves the total cost of ownership and energy efficiency by consolidating disparate components into a single chassis. The integration of the recording server, recording software, and storage array into a highly optimized chassis can easily support standard resolution and megapixel camera recording workloads. The purpose-built, highly optimized design reduces annual operating costs by eliminating the cost of additional servers and the associated heating, ventilation, and cooling requirements they introduce.

Reliability is enhanced through the use of redundancy at all common failure points. A CompactFlash card hosts the operating system for higher reliability over traditional hard disk drives. To mitigate any downtime resulting from CompactFlash errors, the database is striped across the storage array. The RAID 6 storage configuration provides double parity protection of recorded data. The hard drive bay is cooled through the use of high capacity, redundant fans to ensure that the drives are kept at an optimum operating temperature. Finally, fully redundant power supplies guard against any power supply failure.

As with any other system, maintenance is an important and vital part of sustained operation. The **EE500** incorporates various innovations to make maintenance more efficient and to allow the system to continue operating at peak performance levels. Easy access to hard disk drives and the CompactFlash card is available from the front panel. A unique rail system allows access to a failed fan should it need to be replaced. Temperature sensors throughout the chassis detect possible airflow obstruction or clogged intake filters. The use of enterprise-class SAS® technology provides advanced enclosure management and monitoring. Notifications of potential or actual issues are transmitted to the specified user interfaces for action through Simple Network Management Protocol (SNMP) messages and traps.

If additional storage capacity is required, the capacity can be expanded using third-party storage arrays with an optional fibre channel interface.

## Software Built for Flexibility, Reliability, and Cost Optimization

The **EE500** incorporates a wizard-driven installation procedure that guides the integrator through a step-by-step installation, which automates most processes. The integrated Dynamic Host Configuration Protocol (DHCP) server provides DHCP addresses to IP cameras or client workstations. The integrated network time protocol manager can be directed at a network time server, or it can act as the time source for all cameras and client workstations on the network. The deterministic performance of the hardware and software combination allows integrators to easily estimate, size, and configure the system to meet their storage and performance requirements.

Cameras from the **EE500** are viewed through a PC running the supplied Endura® workstation client software. The software provides access to all operation and configuration features in a unified, intuitive graphical user interface. The interface utilizes drag and drop operations, keyboard shortcuts, built-in ToolTips, and online Help to enable the most direct, intuitive interactions with cameras and components distributed across the network. In addition, operators can add Endura viewing devices such as the VCD5202 for virtual-matrix style control and network decoders to build out a monitor wall for surveillance operations. Finally, the optional mapping interface allows for a comprehensive view of the entire facility with integrated alarm monitoring and visual verification capabilities.

The **EE500** software easily accommodates standard resolution, high definition (HD), and megapixel camera sources; decodes MPEG-4 and H.264 (baseline, main, and high profile); includes support for Zone of Interest™; direct PTZ control and digital zoom; alarm management; includes the option of utilizing camera sources with intelligent video content analysis at the edge; efficient search and export mechanisms; and a complete administration and configuration console.

The **EE500** includes built-in support for Pelco IP Cameras. Third-party cameras can be added using an optional UDI5000-CAM universal device interface. Additional user interfaces, including network decoders and virtual console displays, can be added to expand viewing capabilities into a full virtual matrix.

# TECHNICAL SPECIFICATIONS

## SYSTEM

Operating System	Linux®
RAID Level	RAID 6
Effective Capacity	Up to 18.1 TB
Drive Interface	SAS/SATA

### Recommended PC Requirements

Web Browser	Internet Explorer® 6.x (or later) with Adobe® Flash® Player 10 (or later)
-------------	---

## NETWORK

Interface	2, 1 Gbps Ethernet RJ-45 ports (1000Base-T)
Auxiliary Interfaces	
USB 2.0	3 ports (2 rear, 1 front)

## FRONT PANEL INDICATORS

Power	Blue Pelco badge
Software Status	Green, amber, red (based on diagnostics)
Ethernet Port 1	Green, red
Ethernet Port 2	Reserved
Hardware Status	Green, red
Hard Drive Status	Green, red

## POWER

Power Input	100 to 240 VAC, 50/60 Hz, autoranging
Power Supply	Internal, dual-redundant, hot swappable
Power Consumption	Operating Average
100 VAC	262 W, 2.65 A, 895 BTU/H
115 VAC	263 W, 2.31 A, 895 BTU/H
220 VAC	254 W, 1.25 A, 868 BTU/H

## ENVIRONMENTAL

Operating Temperature	50° to 95°F (10° to 35°C) at unit air intake
Storage Temperature	-40° to 149°F (-40° to 65°C)
Operating Humidity	20% to 80%, noncondensing
Maximum Humidity Gradient	10% per hour
Operating Altitude	-50 to 10,000 ft (-16 m to 3,048 m)
Operating Vibration	0.25 G at 3 Hz to 200 Hz at a sweep rate of 0.5 octave/minute

**Note:** The temperature at the unit air intake can be significantly higher than room temperature. Temperature is affected by rack configuration, floor layout, air conditioning strategy, and other issues. To prevent hard disk drive failure and unit damage, make sure the temperature at the air intake of the unit is continuously within the operating temperature range.

## PHYSICAL

Construction	Steel cabinet
Finish	
Bezel	Gray metallic with black end caps
Chassis	Black matte finish
Dimensions (without rails)	24.3" D x 17.0" W x 5.2" H (61.8 x 43.2 x 13.2 cm)
Unit Weight	
Empty (without drives)	46.4 lb (21 kg)
Loaded (with drives)	66.8 lb (30 kg)
Shipping Weight	77.0 lb (35 kg)
Mounting Options	Rack, 3 RU per unit (rack rails and hardware are supplied)

## MODELS

The following table describes the EE500 model numbers. For example, the model number for an EE564, 24 TB, no expansion unit with United Kingdom power cords is EE564-24-UK.

**Note:** Units shipped to China do not include power cords.

Model	Storage	Country Code
EE532 or EE564 (no expansion) EE532F or EE564F (fibre channel expansion)	3 TB	US = North America
	6 TB	EU = Europe
	9 TB	UK = United Kingdom
	12 TB	CN = China
	24 TB	AU = Australia AR = Argentina

## SUPPLIED ACCESSORIES

Power Cord	2 power cords (based on country designation) <b>Note:</b> Units shipped to China do not include power cords
Rack Mount Kit	Brackets, rails, and hardware

## OPTIONAL ACCESSORIES

NSM5200-PS	Replacement power supply module
NSM5200-FAN	Replacement system fan (upper-middle)
NSM5200-FANB	Replacement rear-chassis (rear panel) fan
NSM5200-FC	Fibre channel expansion card
HD5200-250	Replacement 250 GB drive and carrier
HD5200-500	Replacement 500 GB drive and carrier
HD5200-750	Replacement 750 GB drive and carrier
HD5200-1000	Replacement 1 TB drive and carrier
HD5200-2000	Replacement 2 TB hard drive and carrier

## CERTIFICATIONS/RATINGS

- CE, Class A; meets EN50130-4 standard requirements
- FCC, Class A
- UL/cUL Listed
- C-Tick
- S-Mark for Argentina
- CCC

## STANDARDS/ORGANIZATIONS

- Pelco is a member of the MPEG-4 Industry Forum.
- Pelco is a member of the Universal Plug and Play (UPnP) Forum.
- Pelco is a member of the Universal Serial Bus (USB) Implementers Forum.
- Pelco is a contributor to the International Standards for Organization/Electrotechnical Commission (ISO/IEC) Joint Technical Committee 1 (JTC1), "Information Technology," Subcommittee 29, Working Group 11.
- Compliant with ISO/IEC 14496 standard (also known as MPEG-4).
- Compliant with International Telecommunication Union (ITU) Recommendation G.711, "Pulse Code Modulations (PCM) of Voice Frequencies."

# NSM5200 Series Network Storage Manager

250 MBPS RECORDING THROUGHPUT, UP TO 24 TB OF RAW CAPACITY, RAID 6

## Product Features

- Recording Throughput up to 250 Mbps Meets Demanding Performance Requirements for Write-Intensive Applications
- Hardware Designed to Eliminate Single Points of Failure, Including Redundant Fans, Power Supplies, and RAID 6 Storage for Optimum Reliability
- Pooled Storage Management Provides Automatic Distributed Load Balancing and Active-Active Failover Across a Storage Pool to Ensure Continued Recording if Catastrophic Failure Occurs
- Built-in EnduraStor™ Storage Management Increases Storage Efficiency by Grooming Recorded Streams Based on Age and Priority
- Ability to Serve 32 Simultaneous Playback Streams Per Storage Pool
- Performance Levels Maintained in Normal and RAID Error Conditions
- Built-in Diagnostic Monitoring Provides Preventative Maintenance and SNMP Monitoring

- Reduced Cost of Ownership and Increased Energy Efficiency Through Consolidation of Multiple Hardware Components into a Fully Integrated Chassis

The **NSM5200 Series** delivers industry leading performance and innovation for mission-critical storage needs. The combination of high performance, scalable hardware design and advanced software capabilities enables the **NSM5200** to meet the unique storage needs of physical security and surveillance applications.

### Hardware Built for Performance, Reliability, and Scalability

The demands of surveillance applications place unique strains on storage subsystems. Storage systems require the bandwidth and capacity to keep up with incoming streams. They must also simultaneously manage all other common disk and RAID functions. In addition, physical security applications are almost always mission critical. Any downtime, degraded performance for routine maintenance, or loss of recorded footage is extremely disruptive to the organization's physical security mission.

The **NSM5200** has been engineered to meet these unique performance and reliability demands. Custom hardware components, to eliminate common performance choke points to a patented scheme for writing content to a disk drive, have been specifically designed to deliver sustained high throughput for recording and playback. The **NSM5200** is capable of a maximum of 250 Mbps of throughput for incoming streams while delivering 32 simultaneous playback streams per storage pool. This performance is maintained whether the system is operating under normal conditions, dealing with disk drive errors, or rebuilding the RAID array.

The **NSM5200** improves the total cost of ownership and energy efficiency by consolidating disparate components into a single chassis. The 250 Mbps throughput provides double the improvement over Pelco's first generation integrated recorder, allowing users to service far more data streams in one storage unit than previously possible. In addition, with the integration of the management server functionality into the storage chassis, cost and energy efficiency is optimized by eliminating the cost of additional servers and the associated heating, ventilation, and cooling costs. Finally, the use of lower power components and adaptive cooling inside the chassis manage power dissipation based on load requirements.

Reliability is enhanced through the use of redundancy at all common failure points. A CompactFlash card is used to host the operating system for higher reliability than traditional hard disk drives. To mitigate any downtime resulting from CompactFlash errors, the database is striped across the storage array. The RAID 6 storage configuration provides double parity protection of recorded data. The hard drive bay is cooled through the use of high capacity, redundant fans to ensure that the drives are kept at an optimum operating temperature. Finally, fully redundant power supplies guard against any power supply failure.

*This Endura distributed, network-based product is available only to certified dealers/integrators. Please contact your local sales representative for details on certification applications and requirements. Additional information on Endura products and certifications may be found at <http://www.pelco.com/endura>.*

by Schneider Electric

C4626 / REVISED 10-25-10

As with any other system, maintenance is an important and vital part of sustained operation. The **NSM5200** incorporates various innovations to make maintenance more efficient and to allow the system to continue operating at peak performance levels. Easy access to hard disk drives and the CompactFlash card is available from the front panel. A unique rail system allows access to a failed fan should it need to be replaced. Temperature sensors throughout the chassis detect possible air-flow obstruction or clogged intake filters. The use of enterprise-class SAS<sup>®</sup> technology provides advanced enclosure management and monitoring. Notifications of potential or actual issues are transmitted to the specified user interfaces for action.

Storage capacity is scaled using third-party storage arrays with an optional fibre channel interface.

## Software Built for Flexibility, Reliability, Cost Optimization

In addition to unique strains placed on hardware components, surveillance applications also demand innovations in software. Recording software must accommodate automatic failover should a catastrophic failure occur. Recording software must deal with file fragmentation caused by overwrite, locking of video clips, and managing metadata associated with alarms and events. Finally, recording software must deal with the escalating cost of storage by finding innovative ways to manage recorded content. This ensures that the user extracts the most value from the cost of the storage subsystem.

The **NSM5200** supports pooling of multiple recorders to provide for automatic load balancing and failover. Up to twenty NSM5200 nodes can be placed into the same storage pool. One of the **NSM5200s** in the pool acts as the master and manages the assignment of incoming streams, health monitoring, and redistribution of the recording load. Should a unit fail, the given streams are automatically redistributed to the remaining units in the storage pool. When the failed unit is brought back on-line, the recording load is distributed again such that the load on any given recorder is balanced. This capability also allows users to dynamically add additional storage to a pool as their retention needs change.

The **NSM5200** incorporates an improved version of Pelco's patented EnduraStor<sup>™</sup> storage optimization technology. EnduraStor was developed to manage the cost of storing high resolution, high-frame rate video by leveraging the fact that the value of recorded video is typically higher immediately following an incident. Organizations are capable of specifying a desired delay period during which all recorded video will be kept at 30 images per second (25 for PAL). As the age of video available on hard disk drives exceeds the delay period, it is automatically groomed to a lower frame rate, thus freeing up storage capacity for new data. The **NSM5200** incorporates advancements in the EnduraStor algorithm, which gives administrators the option of classifying the priority level of alarm or event video to retain the full frame rate.

The **NSM5200** is built upon the proven stability and robustness of its Linux<sup>®</sup>-based operating system. It utilizes an XFS file system and automated defragmentation routines to keep the database from becoming fragmented. XFS has been proven to be a more superior file format for the rigors of surveillance recording applications than an NTFS file system, which is standard with Windows<sup>®</sup>-based recorders.

The **NSM5200** incorporates a number of diagnostic monitoring functions that serve vital roles in notifying operators of potential problems and failures. Integrated diagnostics utilize on-board LED indicators to display warnings and failures on the **NSM5200** and then it reports these failures to operators. The **NSM5200** monitors and provides warning messages for items such as retention time issues, accumulation of software errors, network errors that result in packet loss, and changes to network link speeds. It also monitors and reports hardware diagnostics such as temperatures approaching established thresholds, hard disk drive failures, fan failures, power supply failures, or when a stream or a **NSM5200** is off line. Finally, the **NSM5200** can communicate to an APC Smart-UPS<sup>®</sup> series uninterruptible power supply to provide battery status information and initiate a graceful shutdown if the available charge falls below its designated threshold.

# TECHNICAL SPECIFICATIONS

## MODELS

The following table describes the NSM5200 model numbers. For example, the model number for a 6 TB, no expansion unit with a United Kingdom power cord is NSM5200-06-UK.

**Note:** Units shipped to China do not include power cords.

Model	Storage	Country Code
NSM5200 (no expansion) NSM5200F (fibre channel expansion)	3 TB	US = North America EU = Europe UK = United Kingdom CN = China AU = Australia AR = Argentina
	6 TB	
	9 TB

# DS NVR Network Video Recorder

## DIGITAL SENTRY® NVR, UP TO 32 CAMERAS AND 4 TB

### Product Features

- Manages and Records Video from IP Cameras and Encoders Over an IP Network
- Support for Standard IP Video Devices
- Supports Pelco IP Cameras with Sarix™ HD Technology
- Supports the Recording of JPEG, MPEG-4, and H.264 Streams from IP Cameras
- Expandable by Networking an Unlimited Number of Servers and DS NVRs
- 4-, 16-, and 32-Channel Configurations per Server
- Compatible with DS ControlPoint for Simultaneous Monitoring of All DS and DX Products in a Single Client Interface
- Network Health and Event Monitoring Support Through Simple Network Management Protocol (SNMP)
- Compatible with the DS Archive Utility
- Recording Rate Configurable per Individual Camera
- Support for DS DataPoint Integration

(MONITOR NOT INCLUDED)

Digital Sentry® software provides IT-focused, scalable solutions that allow users to manage all data and hardware devices from a single client user interface. Digital Sentry network video recorder (**DS NVR**) is a purpose-built software and hardware solution that manages and records video from IP cameras and encoders across an Ethernet network connection. DS NVR comes in 4-, 16-, or 32-channel configurations with the appropriate number of IP connection licenses preconfigured. **DS NVR** is a fully scalable solution. **DS NVR** is HD-enabled, capable of recording exceptional high-quality images captured by Pelco IP cameras with Sarix™ HD technology.

Open architecture is the cornerstone of the Digital Sentry design. Users can choose specific IP cameras or encoders that fit their application. **DS NVR** supports the majority of third-party IP cameras available today and will continue to add support for new cameras as they are released to the market.

**DS NVR** supports the IT-focused Digital Sentry software suite that includes network health and event monitoring, video analytics, and archive utility. It seamlessly integrates with all other Digital Sentry video management systems and can be monitored by the same DS ControlPoint client application.

**DS NVR** offers up to 4 TB of internal storage, which provides enough storage to meet the requirements of most applications. Storage expansion options are also available for additional retention requirements, providing flexibility and scalability to the overall solution. Each **DS NVR** contains a SCSI card as standard equipment, providing simple connection to external storage solutions such as the DX8100HDDI, which adds another 24 TB of JBOD or RAID 5 storage.

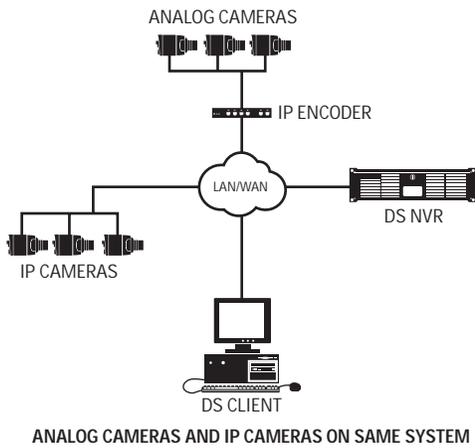

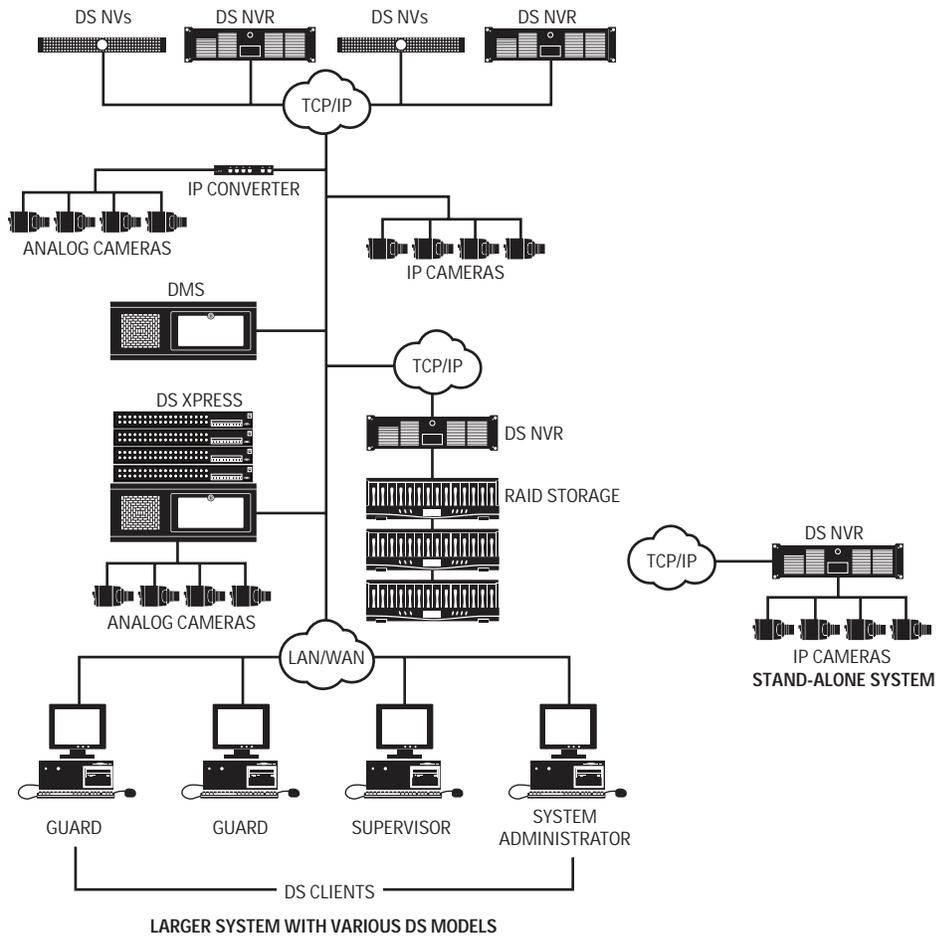

**DS NVR** contains dual Gigabit network interface cards (NIC) so that users can segment network traffic: one NIC supports heavy IP camera traffic, while the other NIC connects to client workstations for monitoring live and recorded video. **DS NVR** is designed to accommodate most security and IT requirements.

by Schneider Electric

C3668 / REVISED 11-2-10

**IMPORTANT NOTE. PLEASE READ.**

The network implementations are shown as general representations only and are not intended to show detailed network topologies. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the systems as illustrated. Please contact your local Pelco representative to discuss your specific requirements.

- UL Listed

## MODELS

DSNVR04500	4 video inputs, 500 GB internal storage
DSNVR16500	16 video inputs, 500 GB internal storage
DSNVR162000	16 video inputs, 2000 GB internal storage
DSNVR164000	16 video inputs, 4000 GB internal storage
DSNVR32500	32 video inputs, 500 GB internal storage
DSNVR322000	32 video inputs, 2000 GB internal storage
DSNVR324000	32 video inputs, 4000 GB internal storage
DSNVR16-8080	16 video inputs, 80 GB x 80 GB RAID 1*

\*No internal storage included. External RAID storage required.

**Note:** For a DS NVR system configured as a video acquisition unit (VAU) for use with a Data Management Server (DMS), add "-V" to the model number (not available with DSNVR16-8080).

## SUPPLIED ACCESSORIES

USB Keyboard  
 USB Mouse  
 Power Cord  
 Keys  
 Resource Disc  
 Recovery Disc  
 Rack Hardware

## OPTIONAL ACCESSORIES

KBD300A	KBD300A desktop keyboard with full switching and programming capabilities and joystick control of PTZ functions; requires a KDB300USBKIT or a KBD300USBKIT-X
KBD300USBKIT	Remote keyboard wiring kit (120 VAC) for KBD300A
KBD300USBKIT-X	Remote keyboard wiring kit (230 VAC) for KBD300A

## DS NVR UPGRADES

3390-00290	DVD-RW option (factory installation)
3390-00295	DVD-RW option (field upgrade)

## OPTIONAL SOFTWARE AND HARDWARE

AUSRV-SW-1L	Archive utility server software license for first DVMS unit (required)
AUS 2-10L	Archive utility server software license for second to tenth DVMS units
AUS-1L	Archive utility server software license for eleventh or greater DVMS units

## OPTIONAL EXTERNAL STORAGE

Part Number	Number of 2 TB Drives	Storage in GB	
		Internal	Video
DX8100HDDI-6TB	3	6000	4000
DX8100HDDI-12TB	6	12,000	10,000
DX8100HDDI-18TB	9	18,000	16,000
DX8100HDDI-24TB	12	24,000	22,000

## IP CAMERA LICENSE

DS-SW-CAM

IP camera license for an IP camera or each analog camera connected to an IP encoder

**NOTICE:** Judgment as to the suitability of the products for users' purposes is solely the users' responsibility. Users should refer to the Operation manuals for cautionary statements regarding user selected options and how they might affect video quality. Users shall determine the suitability of the products for their own intended application, picture rate and picture quality. In the event users intend to use the video for evidentiary purposes in a judicial proceeding or otherwise, users should consult with their attorney regarding any particular requirements for such use.

# DS NVs

## DIGITAL SENTRY® NETWORK VIDEO SOFTWARE SOLUTION

### Product Features

- Software-Only Video Management Solution
- Supports up to 64 Video Channels per Server
- Open Architecture Allows Installation on Industry-Standard Servers Running Microsoft® Windows®
- Manages Video from IP Cameras, Encoders, DX Series DVRs, DS Series HVRs, and Other DS NVs Servers Across the Network
- Supports Pelco IP Cameras with Sarix™ HD Technology
- Capable of Recording Audio from Pelco IP Cameras, Including Cameras with Sarix HD Technology
- Supports the Recording of MJPEG, MPEG-4, and H.264 Streams from Pelco and Numerous Third-Party Cameras
- Recording Rate Configurable per Individual Camera
- Supports Lightweight Directory Access Protocol (LDAP) Authentication
- Remote Administration, Monitoring, and Management of Video and Data
- Archive Utility Support
- Logical Camera Grouping
- Quick Review of up to 90 Minutes of Video and Data
- Detailed Reporting of System Settings and Configuration Changes
- Support for DS DataPoint Integration
- Wizard-driven "Quick Setup"

(MONITOR NOT INCLUDED)

**DS NVs** is a software-only management solution that supports up to 64 video channels per server. **DS NVs** is also HD-enabled, capable of recording and displaying exceptional high-quality images captured by Pelco IP cameras with Sarix™ HD technology and various third-party megapixel cameras. This tight integration between product and technology makes **DS NVs** a robust HD-enabled, end-to-end solution.

**DS NVs** provides users the flexibility of installing Digital Sentry software on the server of their choice. Customers with standard PC or server platforms can reduce their cost of ownership by leveraging their existing platforms for volume pricing and technical support agreements. Because Digital Sentry is based on an open architecture, **DS NVs** allows customers the freedom to choose the PC/server platform and IP cameras that best fit their application.

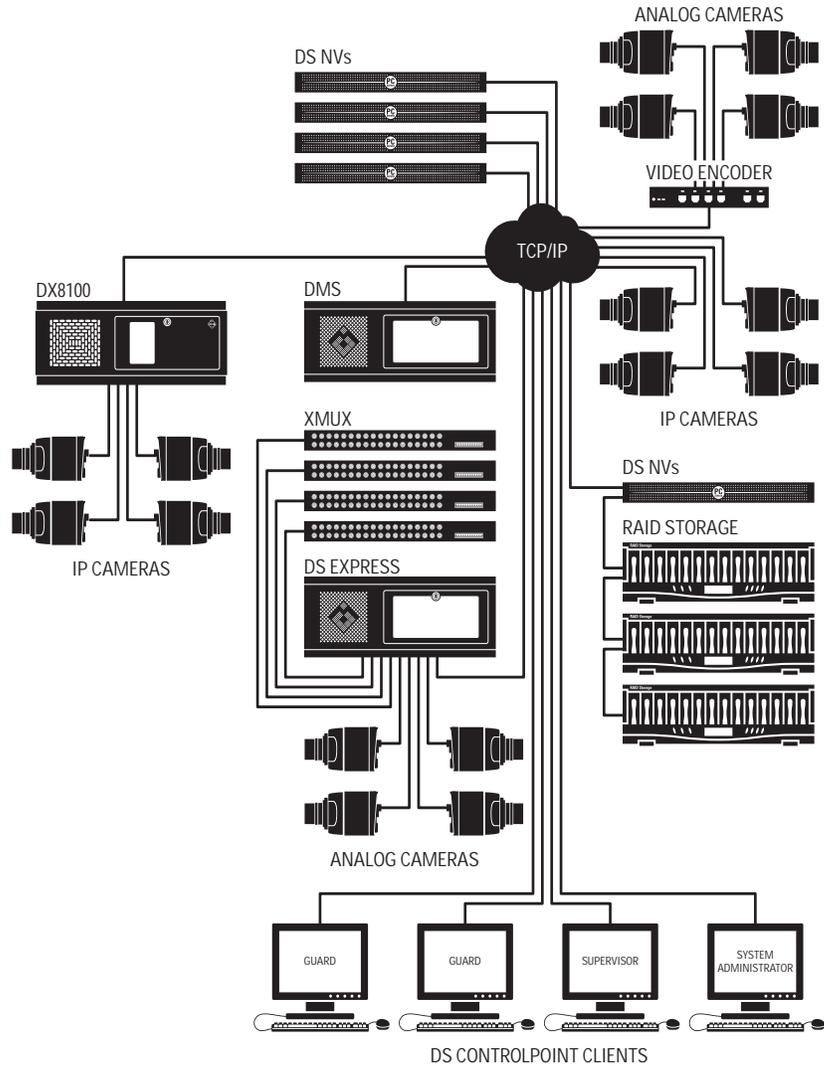

**DS NVs** allows customers to leverage their investments in analog infrastructures while migrating to IP technologies. From a central location, the same user interface is used for viewing IP cameras and encoders simultaneously. This is especially important for users with existing analog systems who want to transition to completely digital systems.

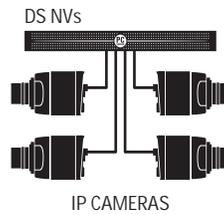

by Schneider Electric

C3663 / REVISED 10-25-10

DS NVS AS PART OF A LARGER DIGITAL SENTRY NETWORK

DS NVS AS A STAND-ALONE IP VIDEO MANAGEMENT SYSTEM

**IMPORTANT NOTE. PLEASE READ.** The network implementations in this document are shown as general representations only and are not intended to show detailed network topologies. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the systems as illustrated. Please contact your local Pelco representative to discuss your specific requirements.

## SYSTEM

User Interface DS ControlPoint

## VIDEO

Video Standards	NTSC/PAL	
Video Decoding	iVEX, MPEG-4, MJPEG, wavelet, H.264	
Video Resolutions	NTSC	PAL
CIF	352 x 240	352 x 288
2CIF	704 x 240	704 x 288
4CIF	704 x 480	704 x 576
HD	Up to 5 megapixels (NTSC and PAL)	
IP Camera Capacity	Up to 64 per server	

## RECOMMENDED SERVER REQUIREMENTS

Supported Operating Systems	Windows 7 Professional 32 bit, Windows Vista® SP2, Windows XP® SP3, Windows Server® 2003 or Windows Server 2008
Processor	
4 to 32 MPEG-4/MJPEG Cameras	Intel® Core™2 Duo (or later)
32 to 64 MPEG-4/MJPEG Cameras	Intel Core2 Quad, Intel Core i5, or Intel Core i7 (or later)
Greater than 16 H.264 Cameras	Intel Core i7 processor Extreme Edition (or equivalent)
System Memory	
2 GB or Greater	Microsoft Windows XP
4 GB or Greater	Windows Vista®, Windows 7, Windows Server® 2003, or Windows Server 2008
Graphics Card	Dedicated PCI/E graphics controller card with 512 MB (or greater) dedicated video memory
Optical Drive	DVD
Dedicated Server	Required

## CERTIFIED PLATFORMS

Intrinsa Videoappliance™  
Pivot 3 CloudBank™  
Pivot 3 MiniBank™  
Pivot3 HardBank™  
Pivot3 DataBank™

# TECHNICAL SPECIFICATIONS

## MODEL

DS-NVS-NC Base software, video recording software solution

## IP CAMERA LICENSE

DS SW-CAM IP camera license for IP cameras or analog cameras connected to IP encoders

**Note:** The first four Pelco camera licenses (equal to the initial default configuration) are included at no additional cost. Camera licenses are required to upgrade to any camera count (up to 64 cameras) above the initial default configuration or for the first non-Pelco camera.

## OPTIONAL SOFTWARE AND HARDWARE

AUSVR-SW-1L	Archive Utility server software license for first DVMS unit (required)
AUS 2-10L	Archive Utility server software license for second to tenth DVMS units
AUS-1L	Archive Utility server software license for eleventh or greater DVMS units
3590-01067	ActiveAlert 2-camera video analytics for Digital Sentry version 4.0 or later
3590-01068	ActiveAlert 4-camera video analytics for Digital Sentry version 4.0 or later

**NOTICE:** Judgment as to the suitability of the products for users' purposes is solely the users' responsibility. Users should refer to the Operation manuals for cautionary statements regarding user selected options and how they might affect video quality. Users shall determine the suitability of the products for their own intended application, picture rate and picture quality. In the event users intend to use the video for evidentiary purposes in a judicial proceeding or otherwise, users should consult with their attorney regarding any particular requirements for such use.

# NET5301T-I Intelligent Video Encoder

## DUAL-STREAM, NTSC/PAL

### Product Features

- Powerful Video Analytics Processing at the Edge
- Encode and Transmit 2 Simultaneous MPEG-4 Video Streams
- Up to 30 NTSC (25 PAL) High Quality (4CIF) Images per Second per Stream
- Video, Audio, and Data over IP Network
- Simultaneously View Video on a Computer User Interface, Console User Interface, and Video Decoder While Recording to an Endura® Video Recorder
- Adaptive Deinterlacing Technology
- 3 Programmable Alarm Inputs (Supervised or Unsupervised), 1 Relay Output
- 2 Security Modes
- Video Loss Indicator

The **NET5301T-I** intelligent video encoder is a dual-purpose video encoding unit and video analytics processor. As a video encoder, it converts live analog video into dual MPEG-4 video streams. It can process up to 30 NTSC (25 PAL) images per second (ips) per stream at 4CIF resolution. In addition, the **NET5301T-I** uses motion adaptive deinterlacing technology to reduce jitter in 4CIF images.

The **NET5301T-I** adds a sophisticated video analytics engine to the video encoder function. Once installed and configured, object and activity detection behaviors can interpret activity in the field of view and trigger an alarm when unwanted activity is detected. This ability to process video analytics at the edge conserves network bandwidth; the unit only transmits video streams that have triggered an analytics alarm.

The unit also improves operator effectiveness when monitoring both large and small installations. These sophisticated analysis techniques monitor each frame of video and only alert the operator to cameras and scenes that warrant attention.

Like all Endura® encoders, the **NET5301T-I** incorporates EnduraView™ video optimization technology to select the best image quality and frame rate for the target Endura product (decoder, workstation, console), all without affecting the system recording rate. For example, the unit selects a high rate and quality setting for recording and automatically selects a lower rate for viewing in a multiple view format.

- PTZ Support Through Pelco P/Pelco D (RS-422) and Coaxitron® (up-the-coax) Protocols
- Optional Wall and Rack Kits; Rack Kit Will Accommodate up to 12 Units

The **NET5301T-I** can be configured for three alarm inputs and one relay output. When an alarm event is triggered, the unit can send a message to an operator, trigger a relay, and implement video recording.

The **NET5301T-I** also supports activity detection. You can configure up to three activity zones, each with its own independent sensitivity and threshold settings. When the **NET5301T-I** detects activity in any of these areas, it can trigger an alarm event.

The unit supports one audio input over the network. The system operator (security personnel) can see and hear activity in the target area.

The **NET5301T-I** can run in both unsecured and secured modes. The secure mode uses a proprietary key system to prevent unauthorized devices from communicating with a **NET5301T-I** over the Endura network.

All Endura products support Pelco P/Pelco D and Coaxitron® protocols. As a result, the **NET5301T-I** supports control of remote peripherals such as pan/tilt/zoom (PTZ) cameras.

by Schneider Electric

C603 / REVISED 10-29-10

## VIDEO ANALYTIC BEHAVIORS

The NET5301T-I intelligent video encoder supports the following video analytic behaviors:

### Vibration Removal

This behavior is designed for installations that experience video vibration. When you remove video vibration, your image quality and video storage capacity improve. Typical installations include the following options:

- **Pole mount:** A camera mounted to a pole is subject to wind currents.
- **Rooftop:** A camera mounted on a rooftop can be affected by equipment, including heating, ventilation, and air conditioning units.
- **Power zoom lens:** A camera with a high-power zoom lens is subject to amplified vibration.

### Adaptive Motion

This behavior detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a defined zone. The objects are monitored until they exit the scene. The movement of the objects is highlighted by a colored box and an optional trail.

### Abandoned Object

This behavior detects objects placed in a defined zone and triggers an alarm if the object remains in the specified zone too long.

An air terminal is a typical installation. Cameras observe passengers walking through the terminal. If someone leaves a bag for a specified amount of time, an alarm is triggered. The behavior can distinguish between an abandoned object and baggage sitting next to a traveler. You can also program the behavior to distinguish an abandoned object from floor clutter (wrappers and cigarette butts) that accumulates over a period of time.

### Camera Sabotage

This behavior detects contrast changes in the field of view. If the lens is covered with spray paint, a cloth, or a lens cap cover, the behavior triggers an alarm. It also triggers an alarm if there is any unauthorized movement of the camera.

### Object Counting

This behavior counts the number of objects that enter a defined zone or that cross a defined tripwire. Typical installations include the following:

- **Counting people:** Counts the number of people at a store entrance or exit, or counts the people inside a store in an area with light foot traffic. The behavior is based on tracking and will not count people in a crowded setting.
- **Counting vehicles:** Counts the number of vehicles on highways, local streets and roads, or in parking lots and garages; otherwise, larger vehicles may be counted more than once.

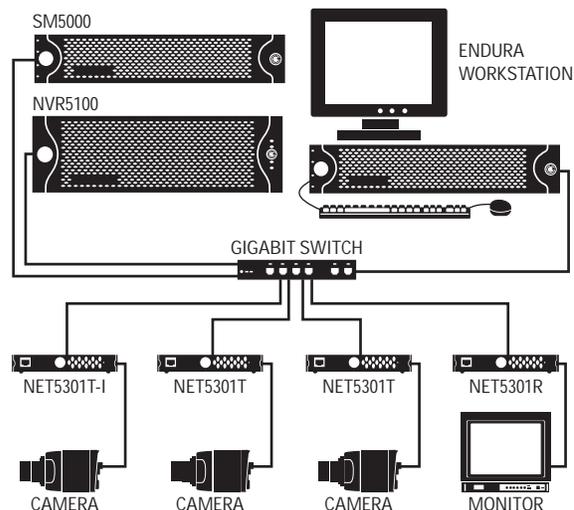

### Object Removal

This behavior triggers an alarm if an object is removed from a defined zone. It is ideal for detecting the removal of high value objects, such as a painting from a wall or a statue from a pedestal.

### Directional Motion

This behavior generates an alarm when a person or object moves in a certain direction. Typical installations include the following examples:

- **Airport:** Cameras observe passengers boarding an air bridge in a terminal. If a person moves in the opposite direction of the other passengers, an alarm triggers.
- **Traffic flow:** Cameras observe traffic flow in a tunnel. If a car drives into the tunnel through the wrong entrance, an alarm alerts the operator to activate the traffic signals to stop all traffic in the tunnel.
- **Exit doors:** The camera is pointed at an exit door. If someone tries to pass through the door in the wrong direction, an alarm triggers.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

# TECHNICAL SPECIFICATIONS

## SYSTEM

Operating System	Linux®
User Interface	Remote operation from Endura workstation or VCD5202

## VIDEO/AUDIO

Video Standards	NTSC/PAL/EIA/CCIR composite
Video Coding	MPEG-4
Video Streams	2, simultaneous
Video Resolutions	NTSC PAL
4CIF	704 x 480 704 x 576
2CIF	704 x 240 704 x 288
CIF	352 x 240 352 x 288
QCIF	176 x 120 176 x 144
Video Inputs/Connector Type	1, BNC, looping, 75 ohms, 1 Vp-p
Audio Encoding	G.711 speech codec
Audio Bit Rate	64 kbps
Audio Levels	
Line In	1 Vp-p (0 dBV) nominal, 1.228 Vp-p (+4 dBu) maximum, 10 kohms
Microphone	5 mVp-p, approximately 40 kohms
Audio Connectors	2, 3.5 mm monaural
Connector Tip	Signal high (input)
Connector Sleeve	Common
Audio Input	Microphone or line in

## PTZ CONTROL

PTZ Interface	RS-422, video in
PTZ Protocols	Pelco P/Pelco D (RS-422), Coaxitron

## ALARMS/RELAYS

Alarm Inputs	3, programmable, 3.3 VDC, 1 kohms, triggered; uses 6 of 16 pins on terminal block connector
Relay Output	1, form-C relay, 30 VDC, 1 A; uses 3 of 16 pins on terminal block connector

## VIDEO ACTIVITY DETECTION

Zones	3 plus background zone
Zone Types	Any shape, user-definable in 16 x 16 pixel blocks
Sensitivity/Threshold	Adjustable per zone
Video Analytics	Refer to <i>Video Analytic Behaviors</i> on the second page of this specification.

## AUXILIARY INTERFACES

Serial	Pelco P/Pelco D protocols (RS-422); uses 4 of 16 pins on terminal block connector
Terminal Block Connector	16-pin: Pelco P/Pelco D protocols (RS-422), 3 alarm inputs, 1 relay output

## FRONT PANEL INDICATORS/FUNCTIONS

Network	RJ-45, 10/100Base-T
Power	Blue
Status	Green, amber, red
Network Link/Speed	Amber, red
Network Activity	Green
Video	Green, red

## POWER

Power Consumption	14.5 W, 50 BTU/H
Power Input	12 VDC ±10% 24 VAC ±10%
Power Connectors	
4-Pin	For RK5200PS-5U or NET5301PS
2-Pin	For user-supplied power supply

## ENVIRONMENTAL

Operating Temperature	41° to 95°F (5° to 35°C) at unit air intake
Storage Temperature	-40° to 149°F (-40° to 65°C)
Operating Humidity	20% to 80%, noncondensing
Maximum Humidity Gradient	10% per hour
Operating Altitude	-50 ft to 10,000 ft (-16 m to 3,048 m)
Operating Vibration	0.25 G at 3 Hz to 200 Hz at a sweep rate of 0.5 octave/minute

**Note:** The temperature at the unit air intake can be significantly higher than room temperature. Temperature is affected by rack configuration, floor layout, air conditioning strategy, and other issues. To prevent performance failure and unit damage, make sure the temperature at the unit is continuously within the operating temperature range.

## PHYSICAL

Construction	Sheet metal
Finish	Gray metallic with black end caps, black matte finish
Dimension	8.75" D x 6.5" W x 1.2" H (22.2 x 16.5 x 3.0 cm)
Mounting	Desktop (feet), wall, or rack with options
Unit Weight	2.0 lb (0.9 kg)
Shipping Weight	5.0 lb (2.3 kg)

## MODEL

NET5301T-I Network video encoder that supports sophisticated object and activity detection behaviors, which simultaneously encodes video, audio, and control data for transmission over an IP network

## SUPPLIED ACCESSORIES

Mating Connectors 1, 16-pin  
1, 2-pin

## OPTIONAL BEHAVIORS

Use this table to create a model number for the desired intelligent encoder behavior and license quantity. For example, NET-LIC-AO-10 is the model number for 10 licenses for the abandoned object behavior. For more information, contact your Pelco sales representative.

NET-LIC-a-b		
Behavior _____		}
License Quantity _____		
Behavior (a)		Quantity (b)
Vibration Removal	VR	1
Adaptive Motion	AM	5
Abandoned Object	AO	10
Camera Sabotage	CS	25
Object Removal	OR	50
Object Counting	OC	100
Directional Motion	DM	

## OPTIONAL MOUNTING ACCESSORIES

RK5200PS-5U Rack mount with power supply (12 units)  
WM5200-4U Wall mount without power supply (1 unit)  
WM5200-4UEXP Wall mount expansion (1 unit)

## RECOMMENDED POWER SUPPLIES

NET5301PS Power supply for one encoder (4-pin connector)  
TF2000 Power supply for one encoder (2-pin connector)  
MCS Series (B model) Multiple unit power supply, indoor (2-pin connector)

## CERTIFICATIONS

- CE, Class A
- FCC, Class A
- UL/cUL Listed
- C-Tick

## STANDARDS/ORGANIZATIONS

- Pelco is a member of the MPEG-4 Industry Forum
- Pelco is a member of the Universal Plug and Play (UPnP) Forum
- Pelco is a member of the Universal Serial Bus (USB) Implementers Forum
- Pelco is a contributor to the International Standards for Organization/Electrotechnical Commission (ISO/IEC) Joint Technical Committee 1 (JTC1), "Information Technology," Subcommittee 29, Working Group 11
- Compliance, ISO/IEC 14496 standard (also known as MPEG-4)
- Compliant with International Telecommunication Union (ITU) Recommendation G.711, "Pulse Code Modulation (PCM) of Voice Frequencies"

# NET5400T Series Video Encoders

## H.264 BASED NETWORK VIDEO ENCODERS WITH VIDEO CONTENT ANALYSIS

### Product Features

- Open Standards-Based Architecture
- H.264 Baseline, Main, or High Profile Compression
- Dual-Stream at up to 4CIF, 30/25 Images per Second (ips) per Stream
- Integrated Video Content Analysis on Designated Models
- Integrated Multi-Zone Video Motion Detection
- Integrated Audio, Alarm, and Relay Inputs and Outputs
- Integrated Coaxitron® and Pelco D PTZ Protocols
- Power over Ethernet (PoE) Models (Compliant with IEEE 802.3af or IEEE 802.3at)
- Support for 2 Unicast Streams per Channel
- Support for Multicast Transmission
- 1-, 2-, and 4-Channel Models

The **NET5400T Series** is a high performance, single- to multi-channel video encoder that integrates analog cameras and positioning systems into an IP video surveillance system. The **NET5400T** encoders deliver crystal clear images while drastically reducing the network bandwidth and storage requirements for IP video surveillance applications.

### Uncompromised Performance and Image Quality

The **NET5400T Series** encoders are capable of compressing a single video input into two streams, each up to 4CIF (704 x 480 for NTSC and 704 x 576 for PAL) and 30/25 ips. With individually configurable streams, each channel of the **NET5400T** encoder can be configured to meet differing bandwidth, resolution, and frame rate requirements.

The high profile H.264 compression option delivers outstanding picture quality at a drastically lower bandwidth. While H.264 compression provides significant bit-rate savings over JPEG and MPEG-4 compression schemes, high profile H.264 enables sophisticated tools that further reduce bit-rate while also improving picture quality under certain scene conditions. The **NET5400T** encoders provide baseline, main, and high profile H.264 compression to optimize the cost of deploying IP video surveillance while improving image quality.

### Powerful Intelligence at the Edge

The **NET5400T-I** encoders are enabled for video intelligence at the edge. With a dedicated analytics processing unit per channel, each input can be independently configured to run multiple algorithms to analyze frames of video in real time. Once configured, object and activity detection algorithms can interpret activity in the field of view and trigger an alarm when unwanted activity is detected, thus making the surveillance operator significantly more effective and efficient. The ability to run analytic behaviors at the edge reduces network

bandwidth requirements in transmitting video to a central server. In addition, edge-based analytics also allow for more graceful scalability as centralized servers can introduce bottlenecks. Pelco is constantly updating the available analytics libraries; contact a Pelco representative for the latest available algorithms.

### Integration for Installation Flexibility

The **NET5400T Series** is available in a choice of 1-, 2-, or 4-channel form factors. The 1- and 2-channel models support PoE, minimizing the amount of wiring needed. The 1- and 2-channel models also support looping video output, allowing simple connections to other analog components at the edge.

The dual network ports allow for daisy-chaining the units to reduce the number of expensive network switch ports that would normally need to be consumed by each encoder.

The optional wall mounts and rack mount provide convenient installation of the 1- to 4-channel models. The RK5200 rack mount also provides built-in cooling and an integrated, redundant power supply to safeguard all encoder operations.

Integrated audio inputs for each video input can capture audio from various sources and associate it with the video. One alarm for each video input and one relay output for the encoder allows for I/O communication with external components.

**PELCO**

by Schneider Electric

International Standards  
Organization Registered Firm:  
ISO 9001 Quality System

C4646 / REVISED 11-2-10

## Built-in Analytics

The **Pelco® Analytic Suite** and **ObjectVideo® (OV) Analytic Suites** enhance the flexibility and performance of the NET5400T Series video encoder. Models are preloaded and configured for the **Pelco Analytics Suite**. No additional licensing or license activation is required. Some models are also available preloaded with **OV Analytic Suites**.

NET5400T-I Series models provide full access to the entire Pelco Analytics library for each channel. Up to three behaviors can be run simultaneously per input. The **Pelco Analytic Suite** is easy to configure for alarm notification when used with Endura®. **OV Analytic Suites** offers rule configurations and alarm notifications that are compatible with **OV Ready™** systems.

## Web Interface

The **NET5400T Series** uses a standard Web browser for powerful remote setup and administration. In addition, up to 16 cameras can be viewed on the same network.

## Pelco Analytic Suite

The Pelco Analytic Suite is configured with an Endura system, which enables the behaviors to automatically detect and trigger alarms when specific activity is detected. Multiple Pelco analytics can be scheduled to work during a certain time or condition. For example, during the day, a camera can be configured with Object Counting to count the number of people that enter a lobby door. At the same time, Camera Sabotage and Directional Motion can also be running to detect any attempt at tampering with the camera or someone moving in the wrong direction. Further, profiles can be created and scheduled such that the behaviors on any given camera are changed throughout the day or as a result of an alarm or event trigger. The Pelco Analytics Suite includes the following behaviors:

- **Abandoned Object:** Detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows. An airport terminal is a typical installation for this behavior. Abandoned Object can also detect objects left behind at an ATM, signaling possible card skimming.
- **Adaptive Motion:** Detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a defined zone. Adaptive Motion is primarily used in outdoor environments with light traffic to reduce the number of false alarms caused by environmental changes.
- **Camera Sabotage:** Detects contrast changes in the camera's field of view. If the lens is obstructed with spray paint, a cloth, or covered with a lens cap, the behavior triggers an alarm. It also triggers an alarm if there is any unauthorized movement of the camera.
- **Directional Motion:** Generates an alarm in a high traffic area when a person or object moves in the wrong direction, alerting operators to a safety or security threat. Typical installations for this behavior include an airport gate or tunnel where cameras can detect objects moving in the opposite direction of the normal flow of traffic.
- **Loitering Detection:** Identifies when people or vehicles remain in a defined zone longer than the user-defined time allows. This behavior is effective in real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.

- **Object Counting:** Counts the number of objects that cross a tripwire or enter a defined zone. This behavior can improve business intelligence and operations by counting the number of people at a store entrance or exit. It can also monitor foot traffic inside a store to gauge areas of interest.
- **Object Removal:** Triggers an alarm if an object is removed from a defined zone. This behavior is ideal for detecting the removal of high value objects, such as a painting from a wall or a statue from a pedestal.
- **Stopped Vehicle:** Detects vehicles stopped near a sensitive area longer than the user-defined time allows. This behavior is ideal for airport curbside drop-offs, parking enforcement, suspicious parking, traffic lane breakdowns, and vehicles waiting at gates.

## ObjectVideo (OV) Analytic Suites

ObjectVideo Analytics Suites are preloaded on selected **NET5400T Series** video encoders and require an OV Ready system to configure the behaviors for alarm notification.

### OV Security Suite

The OV Security Suite is easy to use and includes Tripwire Detection, Inside Area Detection, and Camera Tamper Detection behaviors.

- Tripwire Detection identifies objects that cross a user-defined line drawn within the camera's field of view.
- Inside Area Detection identifies objects entering, appearing, or moving within a user-defined area.
- Camera Tamper Detection identifies significant contrast changes in the camera's field of view; for example, if the lens is obstructed by spray paint, a cloth, or a lens cap.

### OV Security Suite Plus

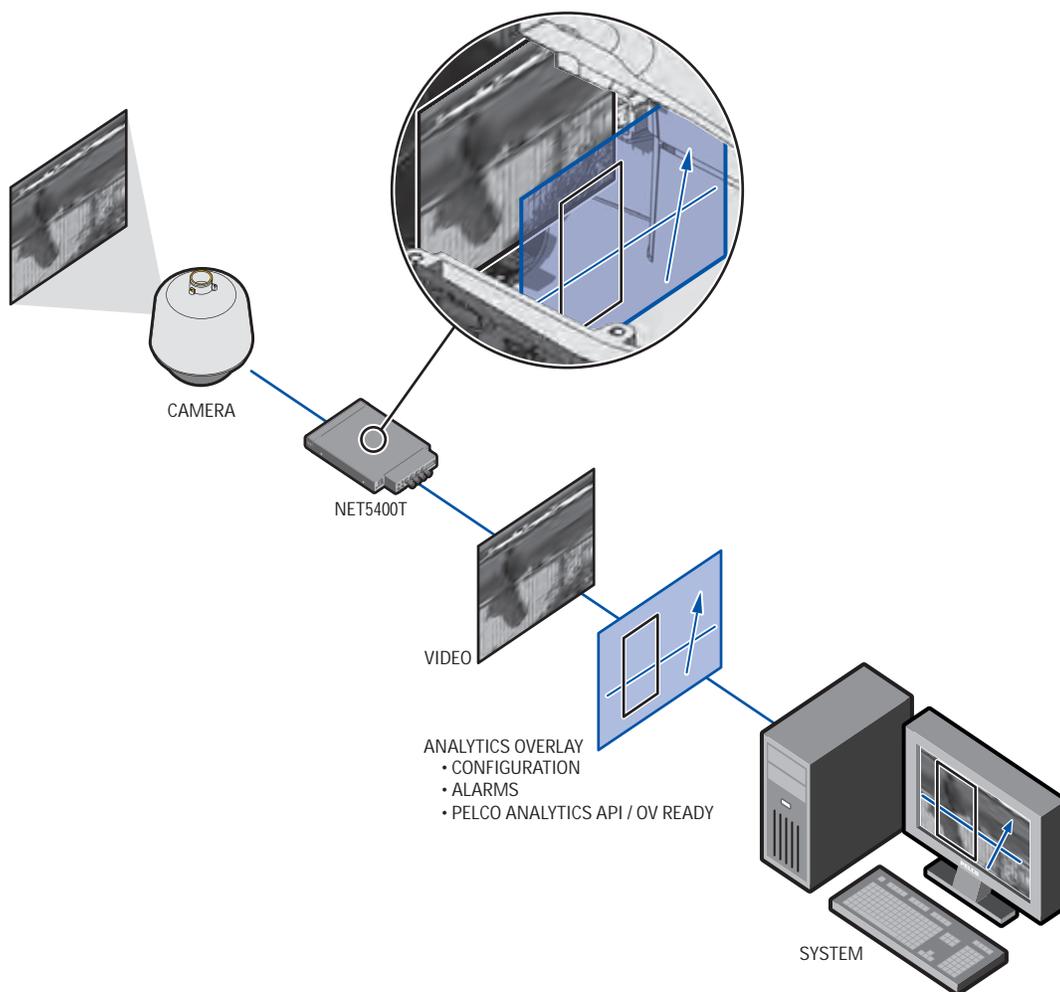

The OV Security Suite Plus includes the behaviors of the OV Security Suite, plus Multi-Line Tripwire Detection, Loitering Detection, and Leave Behind Detection behaviors.

- Multi-Line Tripwire Detection identifies objects that cross two defined lines and generates an event based on defined parameters, including directionality. Defined parameters for this behavior include direction, sequential order, and time between crossing each tripwire.
- Loitering Detection identifies when people or vehicles remain within a defined area beyond a specified period of time. This behavior is effective for real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- Leave Behind Detection detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user defined time allows.

## OV Event Counting Suite

The OV Event Counting Suite uses advanced object calibration and additional features for schedules, parameters, and multiple rules. The suite includes behaviors for Tripwire Counting, Enters/Exits Counting, Loiter Counting, Occupancy Sensing, and Dwell-Time Monitoring.

- Tripwire Counting counts people or objects that cross a user-defined line.
- Enters/Exits Counting calculates the number of people that enter and exit an area without using a tripwire.
- Loiter Counting is useful in analyzing how frequently people stop in front of a product, display, or other area of interest. This feature is also useful in assessing promotion effectiveness and product interest.
- Occupancy Sensing counts people and generates a new value every time the occupancy level changes. Since each occupancy output is time-stamped, the data can be used to determine average occupancy levels or to correlate data to point-of-sale or other business scenarios.
- Dwell-Time Monitoring rules can be set up to record the length of time between when an object enters and then exits an area. Along with queue size information, wait times can also be assessed. This behavior can be used to evaluate consumer interaction for a point-of-sale display or digital advertisement.

# TECHNICAL SPECIFICATIONS

## SYSTEM

Operating System	Linux®
User Interface	Integrated Web browser (requires IE8 or higher) Supported VMS user interfaces

## VIDEO/AUDIO

Analog Video Standards	NTSC/PAL
Compression Standards	MJPEG and H.264 baseline, main, and high profiles
Video Streams	3 independently configurable per video channel; up to 2 unicast streams; unlimited multicast streams
Analog Video Resolutions	NTSC PAL
4CIF	704 x 480 704 x 576
2CIF	704 x 240 704 x 288
CIF	352 x 240 352 x 288
Frame Rates	1, 2, 3, 4, 5, 6, 7.5, 8, 10, 12, 12.5, 15, 24, 25, 30 (varies with stream configurations)
Video Inputs	1, 2, or 4 BNC inputs; 1 Vp-p; Hi-Z/75 ohms impedance
Looping Outputs	On 1- and 2-channel models only
Audio Encoding	G.711
Audio Bit-Rate	64 kbps
Audio Input	Line-in, 3.5 mm connector
Audio Output	Line-out on 1- and 2-channel models only

## ANALYTICS

Required Systems for Pelco Analytic Suite Open API	Pelco analytics streaming information communicate through Pelco's API Guide for Video Analytics version 0.55.30 (or later), available at <a href="http://Pelco.com/IP">Pelco.com/IP</a> .

Ethernet Port 2	Green, amber, red
Video Inputs	Green, red, off

# TECHNICAL SPECIFICATIONS

## POWER

Power Input	
1-Channel	PoE (IEEE 802.3af 2003), 12 VDC or 24 VAC ±10%; power supply sold separately
2-Channel	PoE+ (IEEE 802.3at), 12 VDC or 24 VAC ±10%; power supply sold separately
4-Channel	12 VDC ±10%; power supply sold separately
Power Supply	
1- and 2-Channel Units	4-pin connection to external power supply or PoE
4-Channel Units	4-pin connection to external power supply

## ENVIRONMENTAL

Operating Temperature	
1- and 2-Channel Units	32° to 113°F (0° to 45°C)
4-Channel Units	41° to 95°F (5° to 35°C)
Storage Temperature	-40° to 149°F (-40° to 65°C)
Operating Humidity	20% to 80%, noncondensing
Max. Humidity Gradient	10% per hour
Operating Altitude	-50 to 10,000 ft (-16 to 3,048 m)
Operating Vibration	0.25 G at 3 Hz to 200 Hz at a sweep rate of 0.5 octave/minute

**Note:** The temperature at the unit air intake can be significantly higher than room temperature. Temperature is affected by rack configuration, floor layout, air conditioning strategy, and other issues. To prevent unit damage, make sure the temperature at the air intake of the unit is continuously within the operating temperature range.

## PHYSICAL

Construction	Sheet metal
Finish	Gray metallic with black end caps, black matte finish
Dimensions	10.43" D x 6.55" W x 1.08" H (26.5 x 16.4 x 2.7 cm)
Mounting	
Desktop	Rubber feet provided
Wall or Rack	Optional mounting accessories required
Unit Weight	2.0 lb (0.9 kg)
Shipping Weight	5.0 lb (2.3 kg)

## MODELS

Use the following table to create a model number to specify your NET5400T Series encoder. For example, the model number for a 2-channel encoder with the OV Security Suite and a European Union regional power cord is NET5402T-OS-EU.

**Note:** Units shipped to China do not include power cords.

Model	Description	Country Code
NET540xT	1-, 2-, or 4-channel H.264 encoder with Camera Sabotage	AR = Argentina AU = Australia CN = China EU = European Union UK = United Kingdom US = United States
NET540xT-I	1-, 2-, or 4-channel H.264 encoder with built-in Pelco Standard Suite	
NET540xT-OS	1-, 2-, or 4-channel H.264 encoder with built-in OV Security Suite	
NET540xT-OSP	1-, 2-, or 4-channel H.264 encoder with built-in OV Security Suite Plus	
NET540x-T-OCP	1-, 2-, or 4-channel H.264 encoder with built-in OV Event Counting Suite	

## OPTIONAL ACCESSORIES

RK5200PS-5U	Rack mount with redundant power supply for 12 units
WM5200-4U	Wall mount for single unit (no power supply)
NET5400PS	Single module; 12 VDC 5A, 60 W

## CERTIFICATIONS

- CE, Class A
- FCC, Class A
- UL/cUL Listed
- C-Tick
- CCC\*
- KCC\*

\*As of the date of this publication, these certifications are pending. Please consult the factory, our Web site at [www.pelco.com](http://www.pelco.com), or the most recent B.O.S.S.<sup>®</sup> update for the current status of certifications.

## STANDARDS/ORGANIZATIONS

- Pelco is a member of the MPEG-4 Industry Forum.
- Pelco is a member of the Universal Plug and Play (UPnP) Forum.
- Pelco is a member of the Universal Serial Bus (USB) Implementers Forum.
- Pelco is a contributor to the International Standards for Organization/Electrotechnical Commission (ISO/IEC) Joint Technical Committee 1 (JTC1), "Information Technology," Subcommittee 29, Working Group 11.
- Compliant with ISO/IEC 14496 standard (also known as MPEG-4).
- Compliant with International Telecommunication Union (ITU) Recommendation G.711, "Pulse Code Modulations (PCM) of Voice Frequencies."

# NET5402R-HD Network Video Decoder

## HIGH DEFINITION NETWORK DECODER WITH DUAL MONITOR OUTPUT

### Product Features

- Decode Standard Resolution and Megapixel Resolution Streams
- Simultaneously Drive Two High Definition Monitors From a Single Unit
- Support for MPEG-4, H.264 Baseline, Main, and High Profile Codecs
- Simultaneously View up to Sixteen MPEG-4 Streams at 4CIF Resolution, 30/25 Images Per Second (ips); up to Twelve H.264 Streams at 4CIF Resolution, 30/25 ips; or up to Two 1080P Streams in Real Time
- EnduraView™ Technology Optimizes CPU Load and Bandwidth Utilization when Displaying Multiple Cameras Simultaneously
- Maintains Aspect Ratio of Original Stream
- Supports Monitor-Wall Configurations When Used in Conjunction with an Endura® VCD5202
- Supports Alarm/Spot Monitor Capability, Including Sequencing, When Programmed with Endura Scripts
- Supports User-Specified Language Choices for User Interface Display

The **NET5402R-HD** is a high performance, multistream network decoder capable of displaying streams from IP cameras and video encoders compressed in standards-compliant MPEG-4 or H.264 baseline, main, or high profiles.

The **NET5402R-HD** uniquely addresses the requirements of real-time surveillance installations with the complexity introduced by today's IP and megapixel cameras. Each decoder can simultaneously decode and display up to sixteen MPEG-4 streams at 4CIF resolution, 30/25 ips; up to twelve H.264 baseline streams at 4CIF resolution, 30/25 ips; or two 1080p streams at 30 ips. When additional streams are displayed, the **NET5402R-HD** uses the patent-pending EnduraView™ technology to automatically seek out and display a second stream from the camera. The technology can also reduce the refresh rate automatically to minimize the impact on processing requirements and network overhead.

Different streams can be displayed in 1 x 1, 2 x 2, 3 x 3, 4 x 4, 1 + 5, 1 + 12, and 2 + 8 configurations for 4:3 aspect ratio monitors. In addition, 3 x 2 and 4 x 3 screen configurations are available for 16:9 aspect ratio monitors. Any combination of live and playback streams can be displayed simultaneously, including both live and playback streams from the same camera.

Each **NET5402R-HD** network decoder is capable of driving two high definition displays (monitor resolutions up to 2560 x 1600). The unit's monitors can be integrated into a video wall controlled by the VCD5202. The cameras and configurations of each monitor can be independently changed through the W55000 or the VCD5202.

Finally, the **NET5402R-HD** supports audio output, allowing an operator to monitor audio transmitted by a camera.

# Endura® GW5000 Gateway

## PUBLIC NETWORK INTERFACE, NTSC/PAL

### Product Features

- Delivers Video from an Endura® System to Public Network
- Manages up to 30 Connections Over Non-Endura Networks
- Provides Web Browser Access
- Works with NET5301-TC Video Transcoder
- Transmits Endura System Video in MPEG-4 or JPEG Formats
- Provides System Information Through E-mail and Event Messaging
- 2 Network Interfaces: Public and Private
- Uses Industry Standard Apache Web Server and PHP Engine Technology
- Compatible with Active Directory Networks

The **GW5000** gateway provides an interface to the Endura® system for users communicating through a public network with limited bandwidth, such as a local area network (LAN), wide area network (WAN), or the Internet.

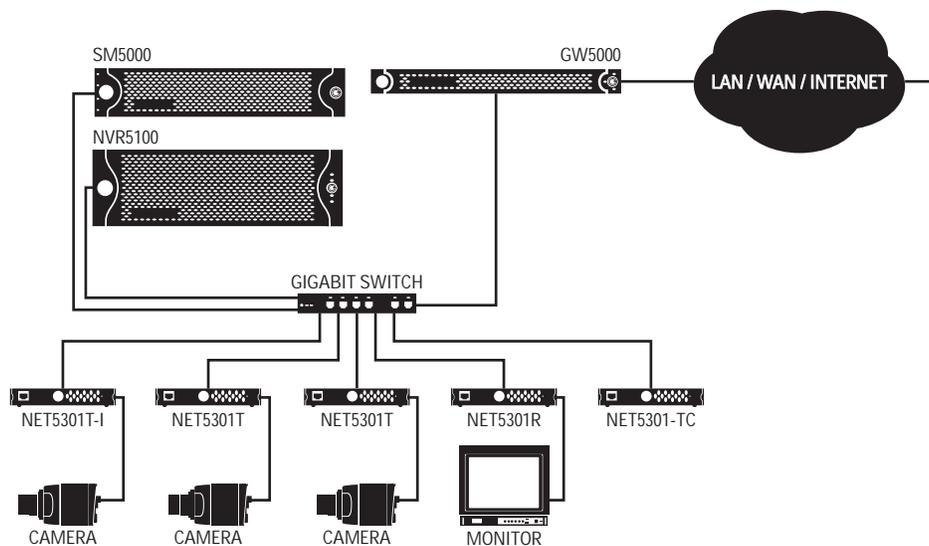

The Endura technology provides high quality digital images that often exceed the bandwidth capabilities of public networks. When this occurs, the gateway receives the video from an Endura system and sends it over a public network for viewing through the Endura Web client.

The **GW5000** supports communication with the Endura network through Microsoft® Internet Explorer® versions 6.0 and 7.0 Web browsers on computers that are running a Windows® operating system.

The **GW5000** accepts Internet connections between bandwidths of 100 Mbps and 56 Kbps.

The Web client is translated into Arabic, Bulgarian, Chinese, Czech, Danish, Dutch, English, Finnish, French, German, Hungarian, Italian, Korean, Lithuanian, Norwegian, Polish, Brazilian Portuguese, Romanian, Russian, Spanish, Swedish, and Turkish.

**IMPORTANT NOTE. PLEASE READ.**

The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

Cable Type 1 USA (117 VAC); 1 European (220 VAC);  
1 UK (250 VAC); all, 3 prongs, molded connector, 6 ft (1.8 m) cord  
Power Consumption 40 W, 137 BTU/H (maximum)

**SECURITY NOTICE:** The Endura GW5000 gateway is designed to serve as a point of access to a Pelco Endura network over a wide area network (WAN) infrastructure. The GW5000 is not intended to prevent unauthorized external access to your network, or to provide an effective method for monitoring or limiting access to the network or network resources. The customer should ensure that any confidential information or resources available on the local area network (LAN) are secured by a third-party firewall to prevent unauthorized access.

The GW5000 is not designed to act as a corporate grade firewall and should not be exposed to Internet access without appropriate security measures. Installations that require greater security measures should consider using a virtual private network (VPN) connection for remote clients that connect to the Endura network. If the GW5000 is not used in conjunction with a secure VPN connection or firewall, it could serve as a point of entry for unauthorized access to your video security system.

## ENVIRONMENTAL

Operating Temperature 32° to 95°F (0° to 35°C) at unit air intake (front of unit)

# Endura® NET5301-TC Transcoder

## VIDEO CONVERTER FOR PUBLIC NETWORKS, NTSC/PAL

### Product Features

- Converts Video from an Endura® System to Smaller Formats for Increased Compatibility with Public Networks
- Works with GW5000 Gateway
- Converts Encoded Endura System Video Streams to MPEG-4 or JPEG Formats
- Accepts Encoded Video from any Endura Video Source (For Example, Encoders and IP Cameras)

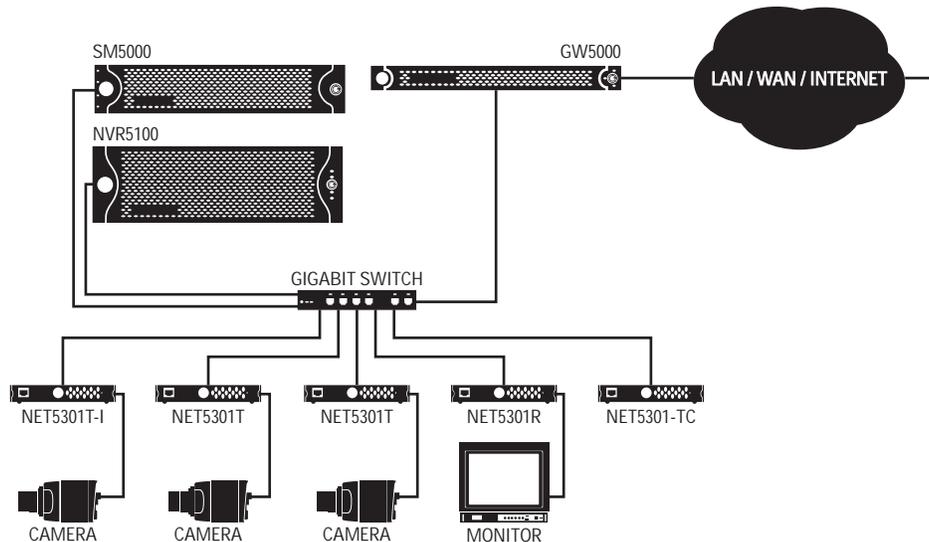

The **NET5301-TC** transcoder converts MPEG-4 video from the Endura® network into formats that are compatible with public networks with limited bandwidth, such as a local area network (LAN), wide area network (WAN), or the Internet.

Endura technology provides high quality digital images that often exceed the bandwidth capabilities of public networks. When this occurs, the **NET5301-TC** converts MPEG-4 video from the Endura network into MPEG-4 or JPEG formats that are suitable for the public network.

The **NET5301-TC** works in conjunction with the GW5000 Endura gateway device, which determines whether the Endura video should pass through the **NET5301-TC** before being placed on the public network.

The **NET5301-TC** accepts (transcodes) one MPEG-4, 4CIF, 30 images per second (ips) video stream from the Endura system.

The video output format, resolution, and frame rate are dynamically configurable. The available compression formats are MPEG-4 or JPEG. The available resolutions are CIF, 2CIF, or 4CIF or the PAL equivalent. The available frame rates are 1, 2, 5, 7 or 15 ips.

**IMPORTANT NOTE. PLEASE READ.**

The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

# Endura<sup>®</sup> Advanced System Management Software

## WS5200 VERSION 2.X MODELS

### Product Features

- Software Runs on a Standard PC with Microsoft<sup>®</sup> Windows<sup>®</sup> XP Professional and 32-Bit Versions of Windows Vista<sup>®</sup> Business, Ultimate, or Enterprise Operating Systems
- Highly Intuitive Graphical User Interface Optimized for the Needs of Surveillance Professionals
- Unrestricted Scalability Easily Manages up to 10,000 Devices Simultaneously
- Optional Mapping Interface Provides Editing and Alarm Monitoring/Management Tools
- Support for Standard Resolution and Megapixel Resolution Cameras
- Support for MPEG-4, H.264 Baseline, Main, and High-Profile Codecs
- Audio Streaming and Playback
- Zone of Interest<sup>™</sup> Allows Independent View and Management of Specified Areas Within a Camera's Field of View in Live or Playback Views
- Synchronized Playback of Multiple Cameras
- Digital Zoom in Live or Playback Views
- Convenient Tear-Off Options to Customize Display
- Maintains Camera's Native Aspect Ratio While Supporting 4:3 or 16:9 Aspect Ratio Monitors and a Mix of SD or Megapixel Video Content
- Capable of up to 16 Simultaneous 4SIF/CIF Resolution, 30/25 Frames per Second (fps) MPEG-4 Decode, 12 H.264 4SIF/CIF Resolution, 30/25 fps H.264 Baseline Decode, or 2 Full 1080 Pixels Decode in Real Time
- EnduraView<sup>™</sup> Technology Mitigates CPU Processing Requirements and Network Bandwidth Consumption for Multiscreen Configurations
- Integrated Configuration and Administration Interface Provides Full-Management Capability for All Components
- Powerful Scripting Engine to Automate Virtual Matrix Functionality
- On-Screen Pan/Tilt/Zoom (PTZ) Controls Including Click to Center and PTZ to Selected Area
- Camera Callup and PTZ Control from KBD5000
- Advanced Search Capabilities Including Motion, Alarm, Event, Camera
- Integrated Event and Alarm Monitoring and Management Interface
- User-Specific Choice of Language, Rights and Permissions, and Screen Configurations
- Export Video and Still Images in Multiple Formats Including PEF, QuickTime<sup>®</sup>, MPEG-4, AVI, PNG, BMP, and JPG

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

by Schneider Electric

C4608 / REVISED 10-31-10

The **WS5200** Advanced System Management Software provides access to all operation and configuration features of the Endura® system in a unified, intuitive, graphical user interface. The interface has been optimized for the demanding needs of surveillance professionals and utilizes drag-and-drop operations, shortcut menus, built-in tooltips, and online Help to enable the most direct, intuitive interactions with cameras and components distributed across the network.

## Video Display Optimized for Surveillance

Surveillance operators require access to real-time live video and instant access to playback. The **WS5200** has been specifically designed to optimize performance, productivity, and effectiveness. Operators can customize up to six active workspaces. Each workspace can have its own screen configuration populated with any grouping of cameras. These workspaces allow the operator to rapidly switch from camera group to camera group. The workspaces and camera associations are automatically loaded upon login, along with the user's language preferences and permission levels. This eliminates any lost time in changing screen layouts or configurations during shift changes.

The second generation of the **WS5200** has also been designed to deliver optimum decoding performance to take advantage of the latest capabilities of analog cameras and advances in compression technology. The **WS5200** supports MPEG-4 as well as all common profiles of the latest H.264 codec. Provided the host PC has enough processing power, users can simultaneously decode sixteen 4CIF, MPEG-4 video streams in real time, or twelve H.264 baseline profile streams in real time, or two 1080p streams in real time. Of course, any combination is also supported. Additionally, more cameras can be viewed simultaneously using the **WS5200's** convenient tear-off tabs and leveraging multiple monitors to display up to 32 cameras concurrently. Endura's patent-pending EnduraView™ technology will manage the CPU processing load and network bandwidth requirements by automatically seeking out and displaying a lower resolution, secondary stream (if one exists), or reducing the refresh rate to ensure that system stabilization is not jeopardized.

To take advantage of the latest developments in monitor technology and camera capabilities, the **WS5200** interface automatically detects the monitor's native resolution and aspect ratio and configures the display to accommodate what the monitor can support. Based on the monitor's native aspect ratio, the **WS5200** supports screen configurations in single-image, 2 x 2, 3 x 3, 4 x 4, 1 + 5, 1 + 12, and 2 + 8 for 4:3 aspect ratio displays and adds 3 x 2 and 4 x 3 for 16:9 aspect ratio displays. As different cameras operate in different aspect ratios, the **WS5200** will maintain the native aspect ratio of the camera to minimize any potential distortion of the image. An innovative Zone of Interest™ feature makes it convenient to leverage the power of today's megapixel cameras to cover a large field of view while allowing a user to independently select certain areas of the scene to get a closer view. The **WS5200's** zone of interest capability consumes no additional processing power or network bandwidth as a user creates up to six independently controlled zones of interest from a single camera.

Recorded footage can be instantly accessed for any camera without impacting the maintenance of live surveillance of other cameras on the same monitor. Flexible synchronous playback allows operators to synchronize the playback of 16 cameras for investigations that require multiple vantage points of the same event. Additionally, the **WS5200** allows users to review recorded footage from any camera while simultaneously viewing the live stream from that camera on the same monitor. Camera controls, PTZ operation, video playback controls, snapshot capture, and export tools all conveniently appear over the video when the cursor is placed on the desired camera's view.

## Fully Integrated Administration and Management

In addition to access to live and recorded video, the **WS5200** also serves as an administration and management console for the Endura system. With proper user credentials, administrative users can easily configure all devices and users on the system. Camera, encoder, recorder, and decoder hardware and software parameters can be accessed and managed from the administrative screens. Software patches and updates can easily be pushed out to select or multiple devices from the same console. User passwords, preferences, and credentials can be centrally managed from one **WS5200**.

All diagnostic messages from every component on the Endura network are available to any user and any viewing device. With proper credentials, administrators can easily configure all users and devices on the system. User actions and system messages are continuously logged and available for audit trail purposes.

## Integrated Alarm Management Engine

The **WS5200** has a built-in alarm management engine. System alarms, motion, and video analytics alarms are displayed in a dedicated alarm workspace. As the alarm is generated, indicators display the type of alarm, the priority level of the alarm, and the current state of the alarm. Users can simply select the alarm and visually verify its cause before determining whether to acknowledge or snooze the alarm. Comments and instructions inserted by an administrator serve to provide more detail about the alarm or to instruct the operator about the next actions taken. Operators can also add their own comments to be logged with the associated alarm.

## Extensible Architecture

The **WS5200** offers an optional interface to Endura Mapping. The mapping extension adds editing and map construction tools while providing for a convenient way to monitor the entire facility for alarms. Multiple layers can be turned on and off to provide access to key devices. In addition, multiple maps can be hyperlinked together to provide for easy navigation between map views.

As a fully integrated component of the **WS5200**, the mapping interface provides a convenient visual verification from a pop-up view. In addition to access to recorded and live video from the pop-up, operators can acknowledge or snooze the alarm, manually execute relays and scripts as a response to the alarm, capture a snapshot, or direct the associated camera onto the Endura monitor wall for further analysis and action.

# TECHNICAL SPECIFICATIONS

## MODELS

WS5200-1	Advanced System Management Software license for 1 seat
WS5200-5	Same as WS5200-1 except for 5 seats
WS5200-10	Same as WS5200-1 except for 10 seats
WS5200-25	Same as WS5200-1 except for 25 seats
WS5200-SITE	Same as WS5200-1 except for site

## OPTIONAL SOFTWARE ACCESSORIES

WS5200-MAP	Endura Mapping interface
------------	--------------------------

## MINIMUM PC SPECIFICATIONS

Processor	Intel® Core™2 Duo, 1.66 GHz or better
Internal Memory	2 GB of RAM or higher
Operating System	Windows XP Professional SP3, 32-bit versions of Windows Vista Business SP1, or Windows Vista Ultimate SP1, or Windows Vista Enterprise SP2
Video System	Graphics card with DirectX 9.x or later, 256 MB of dedicated RAM
Network	1000 Mbps network port

## VIDEO

Video Codecs Supported	MPEG-4 ASP; H.264 baseline, main, and high profiles
Decoding Performance	16X real-time MPEG-4 streams at 704 x 480; 12X real-time H.264 baseline profile streams at 704 x 480; 2X real-time H.264 baseline profile streams at 1080p
Screen Configurations	1 image, 4 images (2 x 2), 9 images (3 x 3), 16 images (4 x 4), 6 images (1 large + 5 small), 10 images (2 large + 8 small), 13 images (1 large + 12 small); High definition monitors can also display 6 images (3 x 2) and 12 images (4 x 3)

## AUDIO

Audio Codec	G.711 ADPCM
Audio Bit-Rate	64 kbps

## NETWORK

Infrastructure	Access to network infrastructure in compliance with the Endura Network Design Guide specifications
----------------	--

# Endura® Mapping

## ENDURA WORKSTATION MAP-BASED EXTENSION

### Product Features

- Designed to Work with the Endura® WS5000 version 2.x Advanced System Management Software for Ease in Creating and Working With Maps
- Access to Mapping Functions and Cameras Managed Through Endura Roles and Permissions
- Import Existing Maps Generated in AutoCAD or as Images in BMP, JPEG, TIF, or GIF Format
- Create Custom Maps Using Integrated Shapes Tools
- Configurable Icons and Easy Association of Endura Devices to Icons
- Embed Hyperlinks in Maps to Link Various Maps, URL Pages, and Network Servers to Map Areas
- Icon Animation to Indicate State of Alarm and Automatic Tally of Types of Alarms per Icon
- Zoom Controls to Quickly Zoom in to a Specific Area on a Map
- Ability to Filter by Shapes and Icons to Quickly Access Required Views or Simply Jump to Predefined Views
- Access Cameras, Relays, Scripts, Alarms, and Video Wall Directly From Mapping Interface
- Access to Playback Video Related to an Alarm or Event with Commands to Mark Video and Take Snapshots

The **Endura® Mapping** interface gives operators the ability to display the physical location of cameras, alarms, and other Endura devices throughout a facility. Careful integration with the Endura WS5000 advanced system software makes setting up a map fast and intuitive. A flexible user interface with powerful filtering and navigation tools makes working with maps an effective way of monitoring a large and disparate system for the operator.

The ability to use maps created in AutoCAD, or available as common graphics files, allows administrators to quickly import an existing map to begin building a graphical representation of the site. Direct access to the Endura system provides a simple click-and-drag operation to assign cameras, alarms, and relays, to map icons. Icons can be customized in size and color to manage clutter on a map while still providing an effective way of determining where key components are located. Hyperlinks can be utilized throughout the map to easily link multiple maps together to create a hierarchy of views. Further, custom shape layers, icon layers, and views can be created to serve the needs of various operators.

Operators can launch the mapping interface through the WS5000 advanced system software. User rights and permissions are managed by the Endura system manager, providing a single database for managing the operator's experience and access in the mapping interface in accordance with the rest of the Endura system. Icons with alarms pulse with different colors to indicate the presence of an alarm. Each alarm severity supported in the Endura system is automatically tallied in their associated icon, providing operators with a quick view of the number of alarms and their severity for a given icon. An intuitive graphical user interface allows operators to access and acknowledge alarms, activate relays, and scripts, view live and recorded video, and even manage monitor wall displays without ever having to leave the application.

Powerful and yet easy to use, **Endura Mapping** provides an effective way of supporting Endura's scalable architecture without diluting an operator's ability to maintain vigilance over the surveillance system.

# WS5070 Endura® Workstation

## WITH WS5200 ADVANCED SYSTEM MANAGEMENT SOFTWARE

### Product Features

- Provides Full Access to Operations and Administration Through User-Friendly and Highly Intuitive Graphical User Interface
- Microsoft® Windows Vista® Business 32-bit Operating System
- Highly Intuitive Graphical User Interface Optimized for Surveillance Professionals
- Unrestricted Scalability Easily Manages 10 to 10,000 Devices Simultaneously
- Optional Endura Mapping Interface Provides Editing and Alarm Monitoring/Management Tools
- Support for Standard Resolution and Megapixel Resolution Cameras
- Support for MPEG-4, H.264 Baseline, Main, and High-Profile Codecs
- Audio Streaming and Playback
- Zone of Interest™ Allows Independent View and Management of Specified Areas Within a Camera's Field of View in Live or Playback Views
- Synchronized Playback of Multiple Cameras
- Digital Zoom in Live or Playback Views
- Convenient Tear-off Options to Customize Display
- Maintains Camera's Native Aspect Ratio While Supporting 4:3 or 16:9 Aspect Ratio Monitors and a Mix of SD or Megapixel Video Content
- Capable of Up to 16 Simultaneous 4SIF/CIF Resolution, 30/25 Frames per Second (fps) MPEG-4 Decode, 12 H.264 4SIF/CIF Resolution, 30/25 fps H.264 Baseline Decode, or 2 Full 1080p

- EnduraView™ Technology Mitigates CPU Processing Requirements and Network Bandwidth Consumption for Multiscreen Configurations
- Integrated Configuration and Administration Interface Provides Full Management Capability for all Components
- Powerful Scripting Engine to Automate Virtual Matrix Functionality
- On-Screen Pan/Tilt/Zoom (PTZ) Controls Including Click to Center and PTZ to Selected Area
- Camera Call Up and PTZ Control from KBD5000
- Advanced Search Capabilities Including Motion, Alarm, Event, and Camera
- Integrated Event and Alarm Monitoring and Management Interface
- User-Specific Choice of Language, Rights and Permissions, and Screen Configurations
- Export Video and Still Images in Multiple Formats Including PEF, QuickTime®, MPEG-4, AVI, PNG, BMP, and JPG

The **Endura® workstation** is a high-end personal computer running Windows Vista® Business edition that is optimized for the **WS5200** advanced system management software. The **Endura workstation** can decode and display up to 16 video streams simultaneously and can process up to 30/25 (NTSC/PAL) images at 4CIF resolution per second, per stream. The **Endura workstation** includes the **WS5200** software package.

The **WS5200** software provides access to all operation and configuration features of the Endura system in a unified, intuitive, graphical user interface. The interface has been optimized for the demanding needs of surveillance professionals and utilizes drag-and-drop operations, shortcut menus, built-in tooltips, and online Help to enable the most direct, intuitive interactions with cameras and components distributed across the network.

### Video Display Optimized for Surveillance

Surveillance operators require access to real-time live video and instant access to playback. The **WS5200** has been specifically designed to optimize performance, productivity, and effectiveness. Operators can customize up to six active workspaces. Each workspace can have its own screen configuration populated with any grouping of cameras. These workspaces allow the operator to rapidly switch from camera group to camera group. The workspaces and camera associations are automatically loaded upon logon, along with the user's language preferences and permission levels. This eliminates any lost time in changing screen layouts or configurations during shift changes.

by Schneider Electric

C4601 / REVISED 10-31-10

The second generation of the **WS5200** has also been designed to deliver optimum decoding performance to take advantage of the latest capabilities of analog cameras and advances in compression technology. The **WS5200** supports MPEG-4 as well as all common profiles of the latest H.264 codec. Provided the host PC has enough processing power, users can simultaneously decode sixteen 4CIF, MPEG-4 video streams in real time, or twelve H.264 baseline profile streams in real time, or two 1080p streams in real time. Of course, any combination is also supported. Additionally, more cameras can be viewed simultaneously using the **WS5200's** convenient tear-off tabs and leveraging multiple monitors to display more content. Endura's patent-pending EnduraView™ technology will manage the CPU processing load and network bandwidth requirements by automatically seeking out and displaying a lower resolution, secondary stream (if one exists), or reducing the refresh rate to ensure that system stabilization is not jeopardized.

To take advantage of the latest developments in monitor technology and camera capabilities, the **WS5200** interface automatically detects the monitor's native resolution and aspect ratio and configures the display to accommodate what the monitor can support. Based on the monitor's native aspect ratio, the **WS5200** supports screen configurations in single-image, 2 x 2, 3 x 3, 4 x 4, 1 + 5, 1 + 12, and 2 + 8 for 4:3 aspect ratio displays and adds 3 x 2 and 4 x 3 for 16:9 aspect ratio displays. As different cameras operate in different aspect ratios, the **WS5200** will maintain the native aspect ratio of the camera to minimize any potential distortion of the image. An innovative Zone of Interest™ feature makes it convenient to leverage the power of today's megapixel cameras to cover a large field of view while allowing a user to independently select certain areas of the scene to get a closer view. The **WS5000's** zone of interest capability consumes no additional processing power or network bandwidth as a user creates up to six independently controlled zones of interest from a single camera.

Recorded footage can be instantly accessed for any camera without impacting the ability to maintain live surveillance over other cameras on the same monitor. Flexible synchronous playback allows operators to synchronize the playback of 16 cameras for investigations that require multiple vantage points of the same event. Additionally, the **WS5200** allows users to review recorded footage from any camera while simultaneously viewing the live stream from that camera on the same monitor. Camera controls, PTZ operation, video playback controls, snapshot capture, and export tools all conveniently appear over the video when the cursor is placed on the desired camera's view.

### Fully Integrated Administration and Management

In addition to access to live and recorded video, the **WS5200** also serves as an administration and management console for the Endura system. With proper user credentials, administrative users can easily configure all devices and users on the system. Camera, encoder, recorder, and decoder hardware and software parameters can be accessed and managed from the administrative screens. Software patches and updates can easily be pushed out to select or multiple devices from the same console. User passwords, preferences, and credentials can be centrally managed from one **WS5200**.

All diagnostic messages from every component on the Endura network are available to any user and any viewing device. With proper credentials, administrators can easily configure all users and devices on the system. User actions and system messages are continuously logged and available for audit trail purposes.

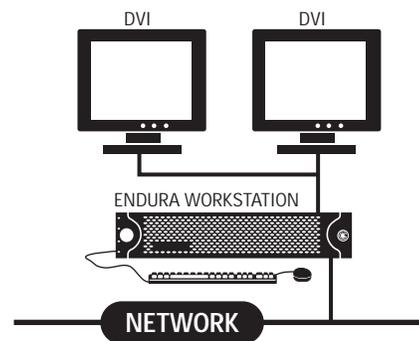

### Integrated Alarm Management Engine

The **WS5200** has a built-in alarm management engine. System alarms, motion, and video analytics alarms are displayed in a dedicated alarm workspace. As the alarm is generated, indicators display the type of alarm, the priority level of the alarm, and the current state of the alarm. Users can simply select the alarm and visually verify its cause before determining whether to acknowledge or snooze the alarm. Comments and instructions inserted by an administrator serve to provide more detail about the alarm or to instruct the operator about the next actions taken. Operators can also add their own comments to be logged with the associated alarm.

### Extensible Architecture

The **WS5200** offers an optional interface to Endura Mapping. The mapping extension adds editing and map construction tools while providing for a convenient way to monitor the entire facility for alarms. Multiple layers can be turned on and off to provide access to key devices. In addition, multiple maps can be hyperlinked together to provide for easy navigation between map views.

As a fully integrated component of the **WS5200**, the mapping interface provides a convenient visual verification from a pop-up view. In addition to access to recorded and live video from the pop-up, operators can acknowledge or snooze the alarm, manually execute relays and scripts as a response to the alarm, capture a snapshot, or direct the associated camera onto the Endura monitor wall for further analysis and action.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

# TECHNICAL SPECIFICATIONS

## WORKSTATION HARDWARE SPECIFICATIONS

Processor	Intel® Core™ 2 Quad Q9400
Internal Memory	4 GB RAM
Operating System	Windows Vista Business SP1, 32-bit version
User Interface	Graphical User Interface, WS5200 version 2.X, advanced system management software
Video System	Graphics card with 512 MB video RAM (nonshared memory), 2560 x 1600 display resolution-capable, and DirectX® 10; true color (32 bit), 2 dual-link DVI outputs

## VIDEO

Video Standards	XVGA (2560 x 1600) 60 Hz capability for NTSC 75 Hz capability for PAL
Video Coding	MPEG-4; H.264 baseline, main, and high profile
Video Display Speed	480/400 fps (NTSC/PAL) in each workspace
Video Display Modes	1 image, 4 images (2 x 2), 9 images (3 x 3), 16 images (4 x 4), 6 images (1 large + 5 small), 10 images (2 large + 8 small), 13 images (1 large + 12 small); High definition monitors can also display 6 images (3 x 2) and 12 images (4 x 3)
Video Decoding Supported	MPEG-4 ASP; H.264 baseline, main and high profiles
Decoding Performance	16x real-time MPEG-4 streams at 704 x 480 12x real-time H.264 baseline profile streams at 704 x 480 2x real-time H.264 baseline profile streams at 1080p
Video Outputs	2 DVI or VGA outputs (2 DVI- to-VGA adapters supplied)

## AUDIO

Audio Decoding	G.711 speech codec
Audio Bit-rate	64 kbps
Audio Levels	
Input	Electret microphone
Output	Up to 3 Vp-p, adjustable, minimum load of 8 ohms
Audio Connectors	3, 3.5 mm stereo jacks
Connector Tip	Signal left (input and output)
Connector Ring	Signal right (input and output)
Connector Sleeve	Common
Audio Inputs	Microphone and line-in
Audio Outputs	Speaker or line out

## PTZ CONTROL

PTZ Interface	On-screen
---------------	-----------

## NETWORK

Interface	Gigabit Ethernet RJ-45 port (1000Base-T)
Security	2 modes: secure mode (device authentication) and unsecure mode

## AUXILIARY INTERFACES

USB Ports	7 USB 2.0 ports (1 front, 6 rear)
-----------	-----------------------------------

## FRONT PANEL

DVD±RW/CD-RW Drive	
CD read/write speed	24X
CD rewrite speed	24X
DVD read/write speed	8X
DVD dual layer read/write speed	8X/6X
Buttons	Power, configuration/reset
Indicators	
Power	Blue if power
Network Activity	Green when activity
Unit Status	Green, yellow, red

## POWER

Power Input	100 to 240 VAC, 50/60 Hz, autoranging
Power Supply	Internal
Power Consumption	Operating Maximum
100 VAC	160 W, 1.60 A, 547 BTU/H
115 VAC	160 W, 1.39 A, 547 BTU/H
220 VAC	160 W, 0.72 A, 547 BTU/H

## ENVIRONMENTAL

Operating Temperature	50° to 95°F (10° to 35°C) at unit air intake (front of unit)
Storage Temperature	-40° to 149°F (-40° to 65°C)
Operating Humidity	20% to 80%, noncondensing
Maximum Humidity Gradient	10% per hour
Operating Altitude	-50 to 10,000 ft (-15 to 3,048 m)
Operating Vibration	0.25 G at 3 Hz to 200 HZ at a sweep rate of 0.5 octave/minute

**Note:** The temperature at the unit air intake can be significantly higher than room temperature. Temperature is affected by rack configuration, floor layout, air conditioning strategy, and other issues. To prevent performance failure and unit damage, make sure the temperature at the unit is continuously within the operating temperature range.

## PHYSICAL

Construction	Steel cabinet
Finish	
Front panel	Gray metallic with black end caps
Chassis	Black matte finish
Dimensions	17.0" D x 17.1" W x 3.5" H (43.2 x 43.4 x 8.9 cm)
Mounting	Desktop (feet) or rack (2 RU per unit)
Unit Weight	28.8 lb (13.06 kg)

# TECHNICAL SPECIFICATIONS

## MODELS

Use the following table to create a model number for your WS5070. For example, the model number for a unit with a United Kingdom power cord would be WS5070-UK.

Model	Country Code	Description
WS5070	US = North America AU = Australia AR = Argentina EU = Europe UK = United Kingdom	Endura Workstation with WS5200 version 2.x advanced system management software package (WS5200-1) and regional power cord
	CN = China	Endura Workstation with WS5200 version 2.x advanced system management software package (WS5200-1) and no power cord

## SUPPLIED ACCESSORIES

Pelco Keyboard  
Pelco Mouse  
Resource Disc  
Recovery Disc  
Nero® StartSmart Disc  
Windows Vista Business Edition Disc  
Rack Mount Kit (for mounting in a 2 RU rack)  
Power Cord

**Note:** Units shipped to China do not include a power cord.

## OPTIONAL SOFTWARE ACCESSORIES

WS5200-MAP                      Endura Mapping interface

## CERTIFICATIONS

# VCD5202 Video Console Display

## MULTICHANNEL VIDEO DISPLAY AND USER INTERFACE

### Product Features

- Optimized Virtual Matrix User Interface Provides Full Operator Access Through a User-Friendly, Icon-based, Semitransparent Heads-up Menu Display
- Optimized to Work with the KBD5000 Endura® Keyboard
- User Specific Language Preferences
- Decodes up to 32 Streams Across 2 High Definition Monitors
- Support for High Definition Monitors Through DVI Video Outputs
- Multiple VCDs and Network Decoders Can Be Configured in a Monitor Wall and Accessed from a Single Keyboard
- Multiple Screen Configurations Support Simultaneous Live and Playback Views
- Exports Video and Still Images to a User-Supplied USB Memory Device or Internal CD/DVD Recorder in Multiple Formats, Including Pelco Native, QuickTime® MPEG-4, PNG, BMP, and JPG

The **VCD5202** video console display (VCD) delivers virtual matrix functionality for surveillance operators. The **VCD5202** uniquely addresses the requirements of real-time surveillance installations while balancing the complexity introduced by today's IP and megapixel cameras. Each **VCD5202** decodes up to 32 streams, manages elaborate video walls, and provides for CCTV-style keyboard control and management functionality.

Each **VCD5202** is capable of simultaneously decoding sixteen MPEG-4 streams at 4CIF resolution and 30/25 images per second (ips), twelve H.264 baseline streams at 4CIF resolution and 30/25 ips, or two full 1080p streams in real time. When additional streams are displayed, the VCD5202 uses the patent-pending EnduraView™ technology to automatically seek out and display a lower resolution, second stream from the camera. The technology can also reduce the refresh rate to minimize the impact on processing requirements and network overhead.

Standard resolution and megapixel video streams can be displayed in single, 2 x 2, 3 x 3, 4 x 4, 1 + 5, 1 + 12, and 2 + 8 configurations on 4:3 aspect ratio monitors. For 16:9 aspect ratio monitors, 3 x 2 and 4 x 3 configurations are also available. Any combination of live or playback streams can be displayed simultaneously, including both live and playback streams from the same camera.

Each **VCD5202** drives two high definition monitors (monitor resolutions up to 2560 x 1600) through DVI-I connections. The VCD5202 can also manage a video wall of monitors attached to network decoders or Microsoft® Windows® workstations.

The **VCD5202** incorporates a heads-up display designed to provide efficient control while allowing the operators to remain focused on the video being observed. Working in conjunction with the optional KBD5000, the icon-based menu structure is blended across the primary monitor's display. Shortcut keys on the KBD5000 allow operators to quickly access critical functionality without having to look away from their monitors.

When exporting video, the **VCD5202** provides a built-in DVD burner and the option of exporting video on a user-supplied USB memory key. Audio monitoring is enabled through a built-in speaker in the KBD5000.

by Schneider Electric

C3696 / REVISED 10-29-10

# TECHNICAL SPECIFICATIONS

## MODELS

The following table describes the VCD5202 model numbers. For example, the model number for a unit with a United Kingdom power cord is VCD5202-UK.

**Note:** Units shipped to China do not include a power cord.

Model	Country Code
VCD5202	US = North America EU = Europe UK = United Kingdom CN = China AU = Australia AR = Argentina

## SUPPLIED ACCESSORIES

Power Cord	1 power cord (based on country designation) <b>Note:</b> Units shipped to China do not include a power cord.
Rack Mount Kit	Brackets, rails, and hardware
Bezel Key	2 bezel keys
DVI to VGA Converters	2 DVI-to-VGA Converters

## SYSTEM

Operating System	Linux®
User Interface	Icon-based, heads-up display

## VIDEO

Video Standards	XVGA (2560 x 1600); 60 Hz capability for NTSC; 75 Hz capability for PAL
Video Coding	MPEG-4, H.264 baseline, main, and high profile
Video Outputs	2 DVI or VGA outputs (2 DVI-to-VGA adapters supplied)

## AUDIO

Audio Decoding	G.711 speech codec
Audio Bit Rate	64 kbps
Audio Inputs	Microphone and line in through KBD5000
Audio Outputs	Speaker or line out through KBD5000

## PTZ CONTROL

PTZ Interface	Through KBD5000
---------------	-----------------

## NETWORK

Interface	Gigabit Ethernet RJ-45 port (1000Base-T)
-----------	--

## AUXILIARY INTERFACES

USB Ports	7 USB 2.0 (1 front, 6 rear)
-----------	-----------------------------

## FRONT PANEL FUNCTIONS/INDICATORS

DVD+/-RW/CD-RW Drive	
CD Read/Write Speed	24X
CD Rewrite Speed	24X
DVD Read/Write Speed	8X
DVD Dual Layer Read/Write Speed	8X/6X
Buttons	Power, configuration/reset
Indicators	
Power	Blue for power
Network Activity	Green or red for activity
Unit Status	Green, yellow, red

## POWER

Power Input	100 to 240 VAC, 50/60 Hz, autoranging
Power Supply	Internal
Power Consumption	Operating Maximum
100 VAC	160 W, 1.60 A, 547 BTU/H
115 VAC	160 W, 1.39 A, 547 BTU/H
220 VAC	160 W, 0.72 A, 547 BTU/H

## ENVIRONMENTAL

Operating Temperature	50° to 95°F (10° to 35°C) at unit air intake (front of unit)
Storage Temperature	-40° to 149°F (-40° to 65°C)
Operating Humidity	20% to 80%, noncondensing
Maximum Humidity Gradient	10% per hour
Operating Altitude	-50 to 10,000 ft (-15 to 3,048 m)
Operating Vibration	0.25 G at 3 Hz to 200 HZ at a sweep rate of 0.5 octave/min.

**Note:** The temperature at the unit air intake can be significantly higher than room temperature. Temperature is affected by rack configuration, floor layout, air conditioning strategy, and other issues. To prevent hard disk drive failure and unit damage, make sure the temperature at the air intake of the unit is continuously within the operating temperature range.

## PHYSICAL

Construction	Steel cabinet
Finish	
Front panel	Gray metallic with black end caps
Chassis	Black matte finish
Dimensions	17.0" D x 17.1" W x 3.5" H (43.2 x 43.4 x 8.9 cm)
Mounting	Desktop (feet) or rack (2 RU per unit)
Unit Weight	28.8 lb (13.06 kg)

## CERTIFICATIONS/RATINGS

- CE, Class A, meets EN50130-r standard requirements
- FCC, Class A
- UL/cUL Listed
- C-Tick
- S-Mark for Argentina
- CCC

**NOTICE:** Judgment as to the suitability of the products for users' purposes is solely the users' responsibility. Users should refer to the Operation manuals for cautionary statements regarding user selected options and how they might affect video quality. Users shall determine the suitability of the products for their own intended application, picture rate and picture quality. In the event users intend to use the video for evidentiary purposes in a judicial proceeding or otherwise, users should consult with their attorney regarding any particular requirements for such use.

# KBD5000 Keyboard

## FULL FUNCTIONALITY, MODULAR CONTROLS, PAN/TILT/ZOOM CONTROL

### Product Features

- Controls Located on 3 Modules in the Keyboard
- Modules Can Be Rotated to Suit User Preference
- 1 Keyboard Can Control All System Cameras Through a VCD5202 Interface
- Built-in USB Hub for Connection of Export Devices
- Variable Speed, Vector-Solving Joystick for Precise Pan/Tilt/Zoom (PTZ) Control
- Jog/Shuttle for Playback Control and Menu Navigation
- Keypad Call-Up of Cameras, Presets, and Patterns
- Built-in Speaker

The **KBD5000** keyboard is optimized for surveillance requirements in controlling virtual matrix cameras. User feedback is provided through the VCD5202's head-up display and built-in LED lighting on the keyboard. It is compatible with the Endura®-distributed IP video surveillance system and Endura-based DVRs. Limited functionality is available for the DS ControlPoint user interface and the Endura WS5200 client interface.

The **KBD5000** is configured with three control modules that can be rotated individually to provide ergonomic comfort for the operator. These modules include:

- A variable speed, vector-solving joystick with keys for lens iris and focus control. The barrel-type joystick provides precise pan and tilt control of fixed speed and variable speed positioning systems. Twisting the joystick zooms the lens in and out. The joystick and control buttons are used for navigating the on-screen configuration menus of the compatible VCD5202.
- A jog dial/shuttle ring for playback and menu navigation. The jog/shuttle contains four illuminated function keys. Each key's color corresponds to the color of the icons displayed on the monitors linked to the user interface. This intuitive color matching design lets users navigate the on-screen menus without taking their eyes off of the video to read keyboard text labels.
- A keypad for camera and monitor control. Keys select cameras and monitors and the number of cameras to view.

The **KBD5000** contains a built-in wrist support for added comfort. The context-sensitive Help key is another unique feature of this keyboard. In addition, easy export is accomplished using the **KBD5000's** USB port.

The **KBD5000** can be logically configured so any number of keyboards can be added to the system. When combined with Pelco's Endura IP video management system, the KBD5000 delivers CCTV-style control for virtual matrix applications.

by Schneider Electric

C1620 / REVISED 10-14-10

# TECHNICAL SPECIFICATIONS

## MODEL

KBD5000 Desktop keyboard with control pods for full switching and configuration capabilities, plus joystick control of PTZ functions and jog/shuttle playback control

## SUPPLIED ACCESSORIES

1 external power supply  
3 power cords (1 USA standard, 1 UK standard, and 1 European standard)

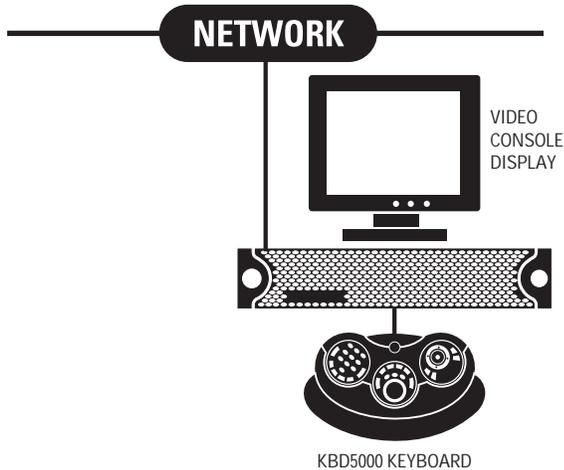

## POWER SUPPLY

Input Voltage	100 to 240 VAC, 50/60 Hz
Output Voltage	12 VDC
Power Output	20 W
Input Connector Type	Universal
Output Connector Type	2.5 mm screw-on barrel

## KEYBOARD BASE

Keyboard Interface	USB 2.0
Cable	USB, captive, 16.4 ft (5.0 m)
Input Voltage	12 VDC
Input Current	1.3 A (maximum)
Upstream Port	USB 2.0 (USB type B connector)
Downstream Port	2, USB 2.0 high/full/low speed (USB type A connector)
Audio Output	Embedded speaker or plug-in headset, 0.5 W into 8-ohm load per channel
Audio Input*	Plug-in microphone, mono, (30 to 350 mVp-p); or line input, stereo (0.35 to 2.0 Vp-p)

\*Reserved for future use.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

## KEYBOARD MODULES

Keyboard Keypad	0 to 9 keys, camera, monitor, and multiple view keys
Joystick	Fully proportional pan/tilt, variable speed; with zoom, iris, and focus controls
Jog/Shuttle	Proportional, fast forward, reverse, and video transport; menu navigation on VCD5202 video console display

## GENERAL

Dimensions	
Without Wrist Support	7.86" D x 14.78" W x 4.6" H (19.96 x 37.54 x 11.68 cm)
With Wrist Support	9.94" D x 16.88" W x 4.6" H (25.25 x 42.88 x 11.68 cm)
Weights	
Unit Weight	
Without Wrist Support	2.68 lb (1.22 kg)
With Wrist Support	3.32 lb (1.51 kg)
Shipping Weight	5 lb (2 kg)

## ENVIRONMENTAL

Operating Temperature	32° to 104°F (0° to 40°C) at unit air intake
Storage Temperature	-40° to 149°F (-40° to 65°C)
Operating Humidity	Up to 96%

# Endura® UDI5000-CAM Universal Device Interface

## FLEXIBLE INTEGRATION PLATFORM FOR ENDURA AND THIRD-PARTY CAMERAS

### Product Features

- Concurrently Runs Disparate Drivers in Support of MPEG4 or H.264 Compliant Third-Party IP Cameras
- Handles Command and Control Translations Between Endura® and Each Third-Party IP Camera in Support of PTZ Protocols
- Accommodates Cameras Supporting RTP, RTSP, TCP, HTTP Polling, and Several Custom Transmission Protocols
- Normalizes Camera Stream Parameters to Support Endura's Scalable, Real-Time Monitoring and Recording Capabilities
- Small, Independently Configured Servers Can Accommodate Up to 16 Standard Resolution Streams or Megapixel Streams (Depending on Camera, Vendor, and Bandwidth)
- No Additional Camera Connection Licenses Required

The **UDI5000-CAM** universal device interface is designed to allow third-party IP cameras to easily and transparently interface to the Endura® system. With the proliferation of IP camera technology, a great deal of variability exists between IP camera vendors in terms of supported protocols for streaming and command and control. While efforts are underway to create an industry standard, each vendor has and may continue to have several disparate protocols and drivers that their family of IP cameras support. The **UDI5000-CAM** provides an efficient way to normalize disparate drivers and protocols into a cohesive set that is compatible with Endura and the rest of Pelco's IP video surveillance portfolio.

### Protocol Conversion and Stream Management

The **UDI5000-CAM** can easily accommodate camera streams that use HTTP polling, TCP, RTP, or RTSP protocols. Regardless of the streaming protocol the camera uses, the **UDI5000-CAM** converts the transmitted stream to an RTP header that is RFC1889/RFC3550-compliant for use by Endura.

Since Endura uses information such as the source time stamp placed in the user data section of the transmission packet, the **UDI5000-CAM** will inject this information if it is missing from the camera. And if the camera does not support multiple outgoing streams or multicast streaming, the **UDI5000-CAM** multiplexes the single stream into streams that can be used by an unlimited number of viewers and recorders.

The **UDI5000-CAM** converts command and control protocols used by the IP cameras into the SOAP/XML protocol used by Endura for camera control.

### Convenient Scalability and Packaging

Endura's promise of unlimited scalability is extended to the use of third-party IP cameras through the **UDI5000-CAM**. Each **UDI5000-CAM** can accommodate up to 16 standard resolution cameras or up to 8 megapixel cameras from most manufacturers. Any combination of camera type and manufacturer is also supported. The built-in bandwidth monitor allows the administrator to maximize the number and type of cameras that each **UDI5000-CAM** can accommodate. To provide unrestricted scalability, each **UDI5000-CAM** is an independent server that can run multiple concurrent disparate drivers and normalization routines. This capacity virtually eliminates undue load on other Endura servers and components.

The **UDI5000-CAM** server is a half-width, 1 RU server. The compact size allows for two **UDI5000-CAMs** to be rack mounted next to each other in just 1 RU of space using the optional rack mount kit.

### Network Administration and Upgradeability

The **UDI5000-CAM** supports Single Network Management Protocol (SNMP) monitoring and traps along with Endura diagnostic monitoring. As such, health status information is available through the Endura workstation or an external SNMP monitoring application.

The **UDI5000-CAM** complies with Endura's firmware upgrade scheme, allowing administrators to easily push out updated drivers and other utilities over the network as they become available from Pelco.

# RK5200PS-5U Rack Mount CHASSIS FOR ENDURA® SYSTEM MODULES

## Product Features

- Mounts in Standard 19-inch (48.26 cm) Rack
- Hot-Swappable Internal Power Supplies
- Thermal Management Included
- Optional Blank Modules
- Integrates with Pelco Endura® Modules
- 5 Rack Units (RU) High

The **RK5200PS-5U** chassis has redundant hot swappable internal power supplies, thermal management, and can contain up to 12 Endura® system modules. The chassis measures 5 RU in height. The internal power supply powers all modules and can be replaced easily if it fails. The Pelco badge on the front of the power supply illuminates blue when the power supply is running, and a status LED provides notification of a power failure on either of the redundant power supplies. The chassis is designed to mount into an EIA-standard, 19-inch (48.26 cm) rack.

The internal power supply has a relay output connector that is directly wired to the power and is a normally closed (N.C.) dry contact. If the power supply fails, the relay opens and the LED above the Pelco badge lights up.

Optional blank modules (RK5001B-4U) can be inserted into empty module slots to create a clean, full-rack look as well as ensure proper airflow if the rack contains fewer than 12 modules.

by Schneider Electric

# WM5200-4U Wall Mount

## WALL MOUNT KITS FOR ENDURA® SYSTEM MODULES

### Product Features

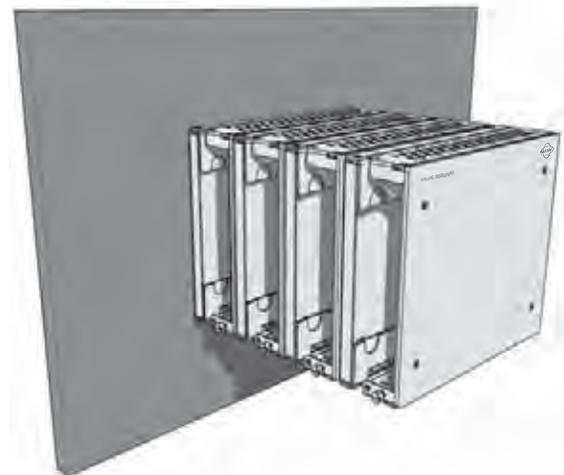

- Any Orientation for Wall-Mounted Modules
- Wall Brackets Accommodate NET5400T Encoders and Single-Width Modules
- Rubber Feet Attached to Wall Brackets for Desktop Placement
- Aesthetic Cover Plates
- Optional Expansion Kit for Applications Where Wall Space Is a Premium
- Integrates with Stand-Alone Power Supplies

Up to four Endura® system modules can be installed when using the **WM5200-4U** wall mount kit. The base kit includes a wall bracket that can be mounted onto a wall in any orientation and a module sleeve with cover plate. The **WM5200-4UEXP** expansion kit includes an additional module sleeve. Three expansion kits can be attached to the base kit for a maximum of four module sleeves.

The module sleeve interlocks with the wall bracket and is secured with thumbscrews. The wall brackets have rubber feet providing for the option of placing them on a desk and stacking the modules.

The **WM5200-4U** facilitates installation into areas that may not have a standard rack available. Its unique design allows for installation in a very small wall space since all of the connections are inside the framework of the module dimensions.

MAXIMUM OF FOUR MODULE SLEEVES ATTACHED TO A WALL.

# WM5300 Wall Mount Kit

## WALL MOUNT FOR ENDURA® NET5308T

### Product Features

- Includes Three Frames for Use with the NET5308T and an Additional NET5308T-EXP
- Frames Can Be Placed On a Wall in Any Orientation
- Supplied Brackets Allow for the Easy Attachment of the Frames
- Maximum Installation of One NET5300B Base Module and Two NET5308T-EXP Video Input Modules
- For Use in Installations That Will Not Accommodate Standard Racks
- Compact, Wall-Hugging Design

A **WM5300** wall mount kit consists of three frames, four brackets, and 24 screws. The frames can be attached to a wall in any orientation providing a maximum of three slots. The NET5308T video encoder includes one NET5300B base module and one NET5308T-EXP video input module, but the **WM5300** can also accommodate an additional NET5308T-EXP module. The captive screws on each module are fastened to the frames ensuring a safe and secure installation.

The **WM5300** facilitates installation into areas that may not have a standard rack available. Its unique design allows for installation in a very small space since all of the connections are inside the framework of the module dimensions.

The **WM5300** was designed with the installer in mind. The wall mount kit allows for any installation challenge.

# SM5000 System Manager

## DISTRIBUTED SYSTEM MANAGEMENT AND SECURITY PLATFORM

### Product Features

- Manages Endura® Products
- Administers Rights and Privileges for All Endura Devices
- Stores and Administers Secure Keys for System Level Security
- Logs Errors and Alarms
- Supports UPnP Architecture
- Provides DHCP Services, Supporting the Dynamic Addition of Network Devices

The **SM5000** system manager is an integrated hardware and software platform that serves as the system management component of the Endura® system. The **SM5000** provides distributed administration of multiple devices on the network.

The **SM5000** manages system security, functioning as a key server for user and device authentication. The **SM5000** routes communication between all devices on large, subnetted security networks.

To ensure integrated devices are synchronized, the **SM5000** functions as the default system time server, using the industry standard NTP protocol. Additionally, the **SM5000** can be directed at an external Network Time Protocol (NTP) time server for synchronization.

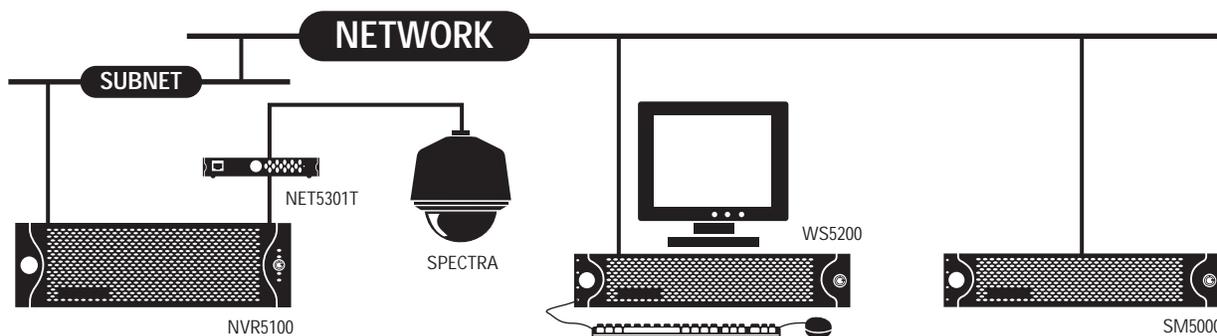

- Functions as System Time Server (NTP)
- Replicates Data to a Backup SM5000

The **SM5000** maintains a database of all system functions including device errors, alarms, and user actions. This comprehensive system log may be accessed and searched through the System Log window in the WS5200 interface.

The **SM5000** system manager can be connected to an intelligent uninterruptible power supply (UPS), not supplied. If the main power fails, an intelligent UPS sends a message to the **SM5000** and provides enough extra battery power to allow the manager to shut down gracefully, thereby preserving the integrity of the system data.

As an additional security feature, the **SM5000** supports data base replication: critical system data can be synchronized with a second **SM5000**. This feature enables a quick and easy failover to backup equipment.

*This Endura distributed, network-based product is available only to certified dealers/integrators. Please contact your local sales representative for details on certification applications and requirements. Additional information on Endura products and certifications may be found at <http://www.pelco.com/endura>.*

**IMPORTANT NOTE: PLEASE READ.**

The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.

C1623 / REVISED 10-25-10

# TECHNICAL SPECIFICATIONS

## MODEL

SM5000 System Manager

## SUPPLIED ACCESSORIES

3 power cables (1 USA standard, 1 European standard, and 1 UK standard)  
1 rack-mounting kit (for mounting in a 2 RU rack)

## SYSTEM

Operating System Linux®  
User Interface Remote operation through WS5200

## NETWORK

Interface Gigabit Ethernet RJ-45 port (1000Base-T)  
Security 2 modes: secure mode (device authentication) and unsecure mode

## AUXILIARY INTERFACES

USB 2.0 7 USB 2.0 ports (1 front, 6 rear)

## FRONT PANEL

DVD/CD-RW Drive  
CD Read/Write Speed 24x  
CD Rewrite Speed 10x  
DVD Read/Write Speed 8x  
DVD Rewrite Speed 4x  
Buttons Power, configuration/reset  
Indicators  
Power Blue if power  
HDD Activity Yellow when activity  
Network Activity Green when activity  
Network Status Green, amber, red  
Unit Status Green, amber, red

## POWER

Power Input 100-240 VAC, 50/60 Hz, autoranging  
Power Supply Internal  
Cable Type 1 USA (117 VAC), 1 European (220 VAC), 1 UK (250 VAC)  
All, 3 prongs, molded connector, 6 ft (1.8 m) cord  
Power Consumption Operating Maximum  
100 VAC 87.2 W, 297.5 BTU/H  
115 VAC 85.3 W, 291.1 BTU/H  
220 VAC 82.5 W, 281.5 BTU/H

## ENVIRONMENTAL

Operating Temperature 50° to 95°F (10° to 35°C) at unit air intake  
Storage Temperature -40° to 149°F (-40° to 65°C)  
Operating Humidity 20% to 80%, noncondensing  
Maximum Humidity Gradient 10% per hour  
Operating Altitude -50 ft to 10,000 ft (-16 m to 3,048 m)  
Operating Vibration 0.25 G at 3 Hz to 200 Hz at a sweep rate of 0.5 octave/minute

**Note:** The temperature at the unit air intake can be significantly higher than room temperature. Temperature is affected by rack configuration, floor layout, air conditioning strategy, and other issues. To prevent performance failure and unit damage, make sure the temperature at the unit is continuously within the operating temperature range.

## PHYSICAL

Construction Steel cabinet  
Finish  
Front Panel Gray metallic with black end caps  
Chassis Black matte finish  
Dimensions 17.0" D x 17.0" W x 3.5" H  
(43.2 x 43.2 x 8.9 cm)  
2 RU per unit  
Mounting Desktop (feet) or rack  
Unit Weight 28.9 kg (13.1 kg)  
Shipping Weight 38 lb (17.24 kg)

## CERTIFICATIONS/PATENTS

- CE, Class A; meets EN50130-4 standard requirements
- FCC, Class A
- UL/cUL Listed
- C-Tick
- S Mark for Argentina
- CCC
- U.S. Patent D527,390 S

## STANDARDS/ORGANIZATIONS

- Pelco is a member of the MPEG-4 Industry Forum
- Pelco is a member of the Universal Plug and Play (UPnP) Forum
- Pelco is a member of the Universal Serial Bus (USB) Implementers Forum
- Pelco is a contributor to the International Standards for Organization/Electrotechnical Commission (ISO/IEC) Joint Technical Committee 1 (JTC1), "Information Technology," Subcommittee 29, Working Group 11
- Compliance, ISO/IEC 14496 standard (also known as MPEG-4)
- Compliance, International Telecommunication Union (ITU) Recommendation G.711, "Pulse Code Modulation (PCM) of Voice Frequencies"

# EDI5000-AD2088 Matrix Keyboard Interface

## INTERFACE BETWEEN ENDURA® AND AMERICAN DYNAMICS™ AD2088

### Product Features

- Provides Interface Between Endura® IP Video Security Systems and the American Dynamics™ AD2088 Keyboard
- Failover of Endura NVRs and DVRs Through the Analog Matrix
- Allows Control of Endura Devices Such as Cameras, PTZ Operation, and Playback from Endura Recorders Using the AD2088 Keyboard to Retain Existing and Familiar User Interfaces
- Allows Expansion of an Existing Matrix System Through Endura IP Video Surveillance Components

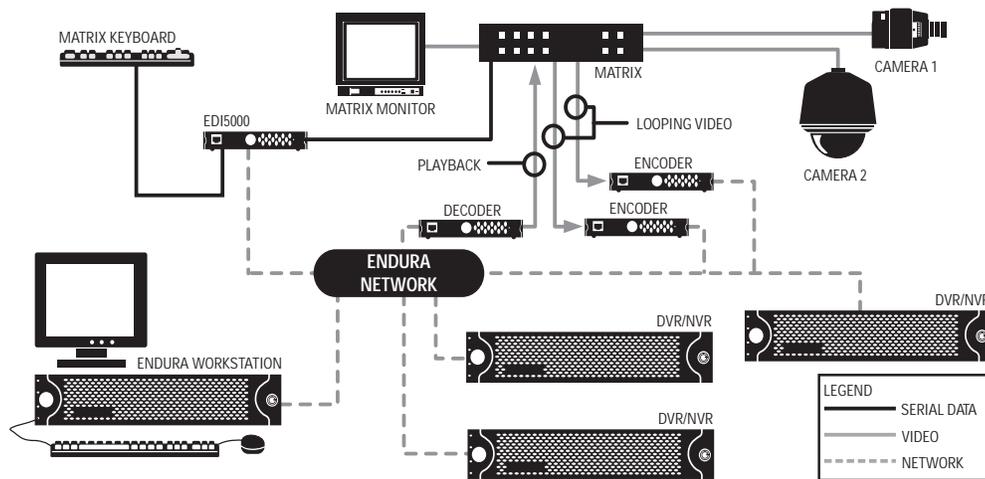

The **EDI5000** provides a flexible integration platform between third-party systems and the Endura® IP Video Surveillance platform. The **EDI5000-AD2088** provides a bidirectional communication path between Endura and the American Dynamics™ AD2088 keyboard.

The **EDI5000-AD2088** allows the existing matrix to access and control Endura cameras and recorders. Matrix keyboard users can retain their existing and familiar user interface while taking advantage of Endura's high quality video recording capability. The **EDI5000-AD2088** allows Endura to be used as a recording system for existing matrix cameras and to expand existing cameras with the use of Endura components.

When used in conjunction with Endura network decoders, video captured by Endura network encoders or IP cameras can be streamed onto matrix monitors in either live or playback mode. When in playback mode, familiar keyboard functions are exposed to help navigate through playback video. Users have access to the same keyboard functions for play, pause, step backward, fast forward, fast rewind, and digital zoom. Additionally, video segments can be marked on the Endura recorders for later search and retrieval.

When in live mode, network video from IP cameras or Endura encoders is streamed to the matrix monitors. The keyboard's joystick can be used to operate pan/tilt/zoom (PTZ) cameras, if available, and users can start an Endura script to automate a preprogrammed action directly from the keyboard.

SAMPLE EDI5000 SYSTEM USING ENDURA FOR RECORDING

# TECHNICAL SPECIFICATIONS

## MODEL

EDI5000-AD2088

Interface that allows serial data communication between an American Dynamics matrix system and the Endura video and recording system; security personnel can use the AD2088 keyboard to view and control cameras attached to, and recorded onto, an Endura system through the existing analog matrix.

## GENERAL

Construction	Sheet metal
Finish	Gray metallic with black end caps, black matte finish
Operating System	Linux®
COM Ports	2, RS-232
Other Connectors	Reserved for future use
LED Indicators	Power, COM Port Status, Network Link/Speed, Network Activity
Reset Button	Recessed button with 2 options: reboot and reset factory default settings
Dimensions	8.21" D x 1.08" W x 6.56" H (20.85 x 2.74 x 16.66 cm)
Mounting	Rubber feet (factory-installed) Optional mounting accessories required
Desktop	
Wall or Rack	
Unit Weight	2.2 lb (1.0 kg)
Shipping Weight	6.0 lb (2.7 kg)

## POWER

Power Input	12 VDC or 24 VAC
Power Consumption	6 W, 0.50 A, 20 BTU/H
Power Connectors	
4-pin	For RK5200PS-5U or NET5301PS
4-pin to 2-pin adapter	For user-supplied power supply

## ENVIRONMENTAL

Operating Temperature Range	32° to 122°F (0° to 50°C)
Storage Temperature Range	-40° to 149°F (-40° to 65°C)
Operating Humidity	20% to 80%, noncondensing

## COMPATIBLE PRODUCTS

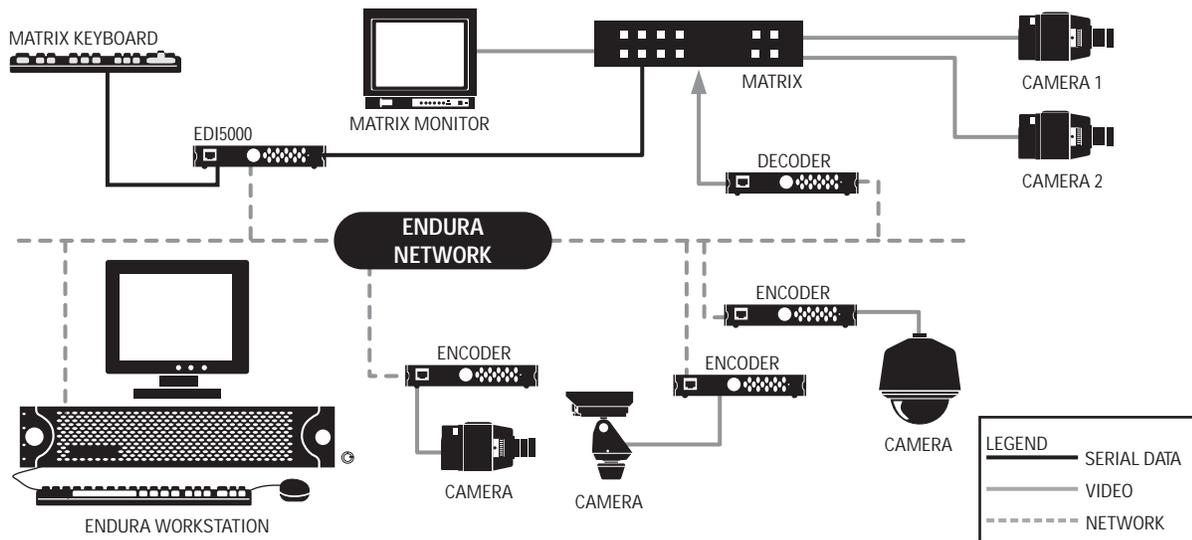

Endura System Components	The EDI5000 is compatible with Endura version 1.03 or later components (NVR5100 and SM5000). Endura decoders must be version 1.04.0032 or later.
--------------------------	--

## POWER SUPPLIES AND ACCESSORIES

RK5200PS-5U	Rack mount with power supply (12 units)
NET5301PS	Power supply for one data interface (4-pin connector)
TF2000	Power supply for one data interface (4-pin to 2-pin adapter)
MCS Series	Multiple unit power supply, indoor
WM5200-4U	Wall mount without power supply (1 unit)
WM5200-4UEXP	Wall mount expansion (1 unit)

## CERTIFICATIONS

- CE, Class B
- FCC, Class B
- UL/cUL Listed
- C-Tick

# MCS Series Power Supply

## MULTIPLE 24 VAC POWER SUPPLY, INDOOR

### Product Features

- 2, 5, 10, or 20 A Capacities
- 4, 8, or 16 Outputs
- Fuse or Circuit Breaker Protection;  
Spare Fuses Included with Fused Models Only
- 120 VAC or 240 VAC Selectable Input
- 24 VAC Output or 28 VAC Output for Longer Wire Runs
- AC Power Indicator with Power On/Off Switch
- Compatible with Cameras, Domes, and Pan/Tilts
- Models with Circuit Breakers Have Class 2 Rated Outputs

MCS16-10

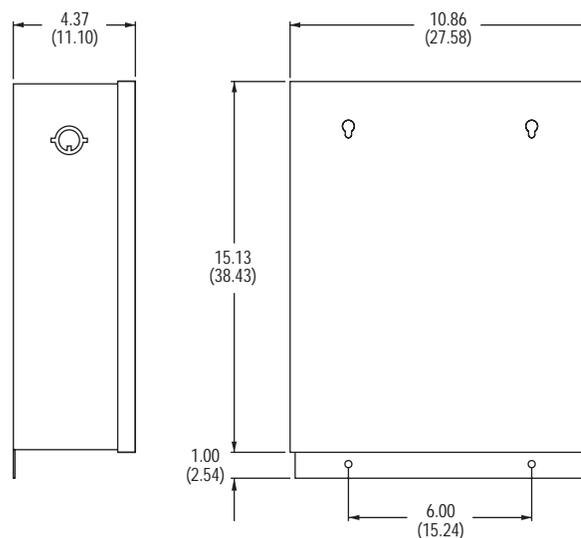

Power supplies in the **MCS Series** offer a variety of configurations for powering up to 16 units from a single power source.

The power supplies provide 24 VAC output for 4, 8, or 16 units. To compensate for voltage losses over long wire runs, 28 VAC outputs also are available on most models. The power supplies have a selectable input of 120 or 240 VAC and are packaged in an easy-to-install metal enclosure that has ample room for wiring connections and conduit entries.

For integrated systems such as Spectra® and Esprit®, the higher capacity models are capable of handling pan/tilt and receiver operation in addition to camera functions. (See product capacity chart.)

Models are available with either fuses or self-resetting circuit breakers on each output. Fused models provide a greater degree of protection for the camera because they are faster acting and more precise. Circuit breakers will self-reset when the fault is corrected, eliminating the need for replacing fuses. However, the amount of current required to trip a circuit breaker can vary as much as 100 percent depending on temperature. In the fused models, the values of fuses can be changed depending upon the specific current requirements of the equipment connected.

The **MCS16-10S**, **MCS16-10SB**, **MCS16-20S**, and **MCS16-20SB** are 16-output supplies that have individual power switches and LEDs on each output. This is a popular feature in larger systems where it is frequently necessary to power down individual units.

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS;  
ALL OTHERS ARE INCHES.

C653 / REVISED 10-20-10

# TECHNICAL SPECIFICATIONS

## MODELS

MCS4-2	Indoor multiple power supply, 120/240 VAC input. 4 fused 24 VAC outputs, total current capacity of 2 A (48 VA).
MCS4-2B	Same as MCS4-2 except has circuit breakers.
MCS8-5	Indoor multiple power supply, 120/240 VAC input. 8 fused 24/28 VAC outputs, total current capacity of 5 A (120 VA).
MCS8-5B	Same as MCS8-5B except has circuit breakers.
MCS16-10	Indoor multiple power supply, 120/240 VAC input. 16 fused 24/28 VAC outputs, total current capacity of 10 A (240 VA).
MCS16-10B	Same as MCS16-10 except has circuit breakers.
MCS16-10S	Same as MCS16-10 except each output has a power switch and power indication LED.
MCS16-10SB	Same as MCS16-10S except has circuit breakers.
MCS16-20	Indoor multiple camera power supply, 120/240 VAC input. 16 fused 24/28 VAC outputs, total current capacity of 20A (480 VA).
MCS16-20B	Same as MCS16-20 except has circuit breakers.
MCS16-20S	Same as MCS16-20 except each output has a power switch and power indication LED.
MCS16-20SB	Same as MCS16-20S except has circuit breakers.

### Product Capacity Chart

A partial list of compatible products and the number of units that may be powered by each power supply are listed below. Capacity is based on the VA rating of each product to be used with the power supply.

Product	Power Supply Model			
	MCS4-2/ 4-2B (48 VA)	MCS8-5/ 8-5B (120 VA)	MCS16-10/ 16-10B (240 VA)	MCS16-20/ 16-20B (480 VA)
CCD Camera (12 VA)	4	8	16	16
Indoor DF5 with camera (3 VA)	4	8	16	16
Indoor DF8 with camera (12 VA)	4	8	16	16
Indoor Spectra (25 VA)	1	4	8	16
Esprit (70 VA)	–	1	3	6

## MECHANICAL

Cable Entry 4 knockouts for either 1/2-inch (1.27 cm) or 3/4-inch (1.91 cm) conduit

## ELECTRICAL

Input Voltage 120 or 240 VAC, 50/60 Hz  
 Output Voltage  
 MCS4-2 24 VAC  
 All Other Models 24/28 VAC

Output Fuse/ Circuit Breaker Ratings	MCS4-2, MCS4-2B 1.5 A* All other models 3 A*
Input Connectors	Wire nut
Output Connectors	Screw-type barrier strips; models with circuit breakers are suitable for Class 2 wiring
Input Wire Size	12-16 gauge solid wire
Output Wire Size	12-22 gauge solid or stranded wire
Recommended	
Wiring Distances	See chart below

The following are the recommended maximum distances (transformer to load) and are calculated with a 10% voltage drop. (10% is generally the maximum allowable voltage drop for AC-powered devices.) Distances are calculated in feet; values in parentheses are meters.

### Recommended Wiring Distance Chart

Input Voltage	Total VA Consumed	Wire Gauge		
		20 AWG (0.5 mm <sup>2</sup> )	18 AWG (1.0 mm <sup>2</sup> )	16 AWG (1.5 mm <sup>2</sup> )
24 VAC	10	283 (86)	451 (137)	716 (218)
	20	141 (42)	225 (68)	358 (109)
	30	94 (28)	150 (45)	238 (72)
	50	56 (17)	90 (27)	143 (43)
28 VAC	10	386 (117)	614 (187)	975 (297)
	20	193 (58)	307 (93)	487 (148)
	30	128 (39)	204 (62)	325 (99)
	50	77 (23)	122 (37)	195 (59)

## GENERAL

Construction	Steel
Finish	Charcoal black polyester powder coat
Environment	Indoor
Operating Temperature	32° to 120°F (0° to 49°C)
Weights	Unit Shipping
MCS4-2	14.10 lb (6.40 kg) 17 lb (7.71 kg)
MCS4-2B	13.89 lb (6.30 kg) 17 lb (7.71 kg)
MCS8-5	17.05 lb (7.73 kg) 20 lb (9.07 kg)
MCS8-5B	16.85 lb (7.64 kg) 20 lb (9.07 kg)
MCS16-10	20.72 lb (9.40 kg) 24 lb (10.89 kg)
MCS16-10B	20.72 lb (9.40 kg) 24 lb (10.89 kg)
MCS16-10S	20.35 lb (9.23 kg) 23 lb (10.43 kg)
MCS16-10SB	20.48 lb (9.29 kg) 23 lb (10.43 kg)
MCS16-20	22.50 lb (10.21 kg) 26 lb (11.79 kg)
MCS16-20B	22.47 lb (10.19 kg) 26 lb (11.79 kg)
MCS16-20S	22.27 lb (10.10 kg) 25 lb (11.33 kg)
MCS16-20SB	22.28 lb (10.11 kg) 25 lb (11.33 kg)

## CERTIFICATIONS/RATINGS

- CE
- UL/cUL Listed
- Meets NEMA Type 1 standards

\*Individual output cannot exceed this rating, and the total of all outputs cannot exceed the overall rating of the power supply (see the Models section).

# WCS Series Power Supply

## 24 VAC POWER SUPPLY, OUTDOOR

### Product Features

- 4 A or 20 A Capacities
- 1–4 Outputs
- Selectable Input Voltage
- 24 VAC Output or 28 VAC Output for Longer Wire Runs
- Meets NEMA Type 4X/IP66 Standards for Weatherproof Enclosure
- AC Power Indicator with Power On/Off Switch
- Compatible with Cameras, Domes, and Pan/Tilts
- WCS4-20B Has Class 2 Rated Outputs

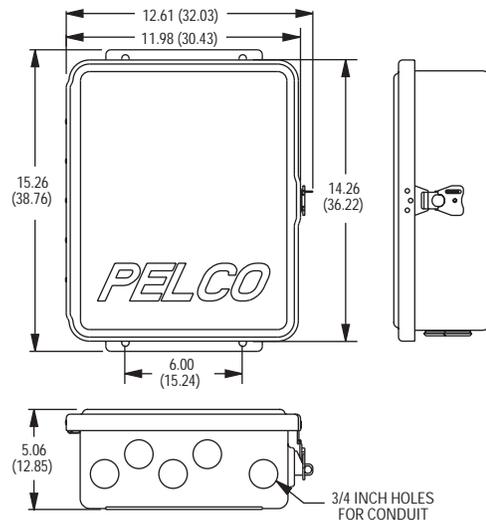

WCS4-20/WCS4-20B

Power supplies in the **WCS Series** offer a variety of configurations for powering up to four outdoor units from a single power source.

The power supplies provide 24 VAC output for 1–4 units, depending on the model selected. To compensate for voltage losses over long wire runs, 28 VAC outputs are available on all models. The input voltage of all models is also selectable.

For integrated systems such as Spectra® and Esprit®, the power supplies are capable of handling pan/tilt, heater, and blower operation in addition to the camera.

The **WCS1-4** has one fused output and is capable of handling up to 4 A (100 VA) of total load. The **WCS4-20** has four fused outputs and is capable of handling up to 20 A (480 VA) of total load. The **WCS4-20B** has four protected outputs with self-resetting circuit breakers and is capable of handling up to 12 A (288 VA) of total load. Fuses provide a greater degree of protection for the unit because they are faster acting and more precise. Circuit breakers will self-reset when the fault is corrected, eliminating the need for replacing fuses. However, the amount of current required to trip a circuit breaker can vary as much as 100 percent, depending on temperature. In the fused models, the values of fuses can be changed depending upon the specific current requirements of the equipment connected.
