Radiometric Thermal Imager

#Fluke Ti20   GBID# 25063626

Everything needed for everyday imaging.

The affordable Fluke Ti20™ Thermal Imager is an unbeatable solution for predictive maintenance and troubleshooting:

Complete imaging solution – The Ti20 thermal imager is packaged with all necessary accessories including unlimited-use InsideIR™ companion software and professional training materials.

Lowest cost of ownership – An exceptional value for a high performance imager, the Ti20 also offers affordable instrument service and calibrations.

Designed for industrial use – Rugged Fluke construction, IP54 rated for use in dust and moisture filled environments

Fast and easy inspection routing – Plan your equipment inspection route, load it once into the imager and then follow the easy, on-camera instructions each time you perform inspections (simply point, focus and pull the trigger)

SPECIFICATIONS:

Detector Type	128 x 96 uncooled focal plane array
Spacial Resolution (IFOV)	2.73 mrad
Thermal Sensitivity (NETD)	≤ 0.2 °C at 30 °C (200mk)
Temperature Range	-10 to 350 °C (14 to 662 °F) without battery
Accuracy	+/- 2 °C or 2% (whichever greater)
Display	Large Color LCD
Optics Field of View	20° horizontal by 15° vertical
Target Sighting	Single laser (IEC & FDA Class II)
Image Capture	50 images stored internally

Power Quality Clamp Meter

#FLUKE-345   GBID# 25091145

The Fluke 345 Power Quality Clamp Meter is the ideal tool for servicing and commissioning electronic switching loads such as drives and UPS systems. For long-term applications, the Fluke 345 records parameters for viewing on-screen or with included Power Log software.

Includes: soft carrying case, voltage leads and clips, universal AC adapter, Power Log software and battery pack

- True rms ac and dc clamp-on current measurements up to 2000A
- Make effective measurements on variable speed drives and other noisy equipment with the help of the switchable low-pass filter
- Highest safety rating in the industry – 600V CAT IV / 1000V CAT III
- Troubleshoot onscreen with color display of waveforms, harmonics and recorded data
- Investigate intermittent issues with logging of min, max and average measurements
- Measures V, A, Hz, CF, THD, DF, W, VA, VAR, kWh and Power Factor even on distorted waveforms
- Assess the effects of loads with dc ripple measurement
- Quantify demand with three-phase power capability for balanced loads
- Inrush mode for troubleshooting nuisance circuit breaker tripping
- View graphs and generate reports with included Power Log software

Earth Ground Clamp Meter

#FLUKE 1630   GBID# 25091144

The Fluke 1630 Earth Ground Clamp is able to measure ground loop resistances – using the Stakeless testing method. This test technique eliminates the dangerous and time consuming activity of disconnecting parallel grounds, as well as the process of finding suitable locations for auxiliary ground stakes. You can also perform earth ground tests in places you have not considered before: inside buildings, on power pylons or anywhere you don't have access to soil.

With the Stakeless testing method, the Fluke 1630 Earth Ground clamp is placed around the earth ground rod or the connecting cable. No earth ground stakes are used at all. A known voltage is induced by one half of the clamp and the current is measured by the other half. The tester automatically determines the ground loop resistance at this grounding connection.

- Quick and easy use – no earth ground stakes are necessary
- Large, 35mm (1.35") jaw opening
- Measures ground resistance from 0.025 to 1500 Ω
- Measures ground leakage current from 0.2 to 30mA
- High and Low alarming
- Automatic self calibration
- Rugged carrying case and resistance check loop included

SPECTRA® III Remote Monitor Kit
#IPS-RMK   GBID# 22122817

Pelco's remote monitor kit is a field service tool designed to assist in the installation and servicing of Spectra®, ExSite™, or any pan/tilt that uses Pelco's D protocol.

The IPS-RMK is a complete kit consisting of a 5.6-inch, TFT-LCD, battery-powered monitor; PDA handheld; carrying case; interface cables; and software. The kit plugs directly into the RJ-45 port of the Spectra dome drive or the data port of the Spectra Mini dome drive for full control, setup, and upgrade capabilities. The IPS-RMK, when used with an IPS-RDPE-2 (remote data port), can also control pan/tilt/zoom functions and program a Spectra, ExSite, or Esprit® positioning system or any other system that runs on Pelco's D protocol.

Use this tool at the installation site to observe video, verify the operation of the PTZ controls, check the address and baud settings, and program the positioning system.

3M™ Dynatel™ Locating and Marking System

3M

The full line of 3M locators and markers helps you quickly and accurately identify underground assets. You can find the exact path and estimated depth of underground utilities, locate buried passive markers and read and write information directly to the new markers. And now, certain Dynatel locators interface with select GPS/GIS field mapping instruments.

3M™ Dynatel™ Electronic Marker System
1420-iD EMS-iD marker locator w/iD read/write

A feature exclusive to the Dynatel EMS locator is the ability to read, write and lock programmed information into 3M™ Electronic Marker System iD Ball Markers 1400 Series. The 1420-iD series also pinpoints the exact depth and location of all existing models of properly installed underground passive EMS markers easily differentiating between standard frequencies. And, detailed information can be read, stored with date/time stamp and transmitted back to your PC for enhanced resource management through a standard RS232 serial port.

The 1420-iD series is now compatible with selected GPS/GIS instruments to greatly simplify the mapping process.

Graybar can provide real-time tracking information with all the details you need: delivery date, time and recipient signature; an aerial view of the delivery location; even a picture of your product as delivered. Just give us a call. Whatever you need to know, we've got you covered.

Whether your material is on our truck en route to you, or it was already delivered but you just didn't know it (bet that never happens), now you have the information you need to keep things moving. To learn more about the Graybar Delivery Advantage, ask your Graybar representative or visit graybar.com/delivery.
