1 Foreign Protocol Discovery with a DMS Sprite2

On 29MAY07 an examination was made of the various serial protocols that the Dedicated Micro Systems (**DMS**) Sprite 2 could produce.

The GlassKeyboard used to control the non-existent domes was the one that is downloadable from a Sprite 2 over an EtherNet connection. The version used was: **NetVu ObserVer V1.6.3**, with a date of 2006. Since there was no connection to real equipment, some of the data collection attempts totally failed and others probably had messages sent that would not be sent if it was a normal installation.

The simulated keyboard as generated by NetVu OvserVer for the Sprite 2 is shown in Figure 1, page 6.

The Sprite 2 was at IP address 192.168.1.101 when on my machine.

The primary purpose of this exercise was to get a “first look” at non-Pelco protocols. And to see what the Sprite 2 does to good old Pelco P Protocol.

Several attempts were made to change the dome address using the Sprite 2’s internal software and there were no successes. The address for P Protocol stayed at 1 (0x00) in the address, through many tries. So the assumption is that all of these commands went to the equivalent address for the other competitors’ Protocols.

When testing was complete, it was discovered that it was possible to send presets with the GlassKeyboard. Due to the timing of this discovery, none were send during the protocol discovery exersize.

There are several mentions of a “Hello Message”. This is the initial set of messages sent by the Sprite 2 when it starts to talk to a PTZ, or other, unit. Usually these tell the unit to stop doing whatever they are currently doing and get into a known state. (This assumption is based on what is sent when starting to work on P Protocol.)

In the included data line captures, an attempt has been made to put a blank line infront of each change in testing. This is to break the test captures down into logical steps that match the test sheet (Figure 2, page 7). Each time that I changed from one key to the next an appreciable amount of time occured. Thus there is usually a gap of over a second at the start of the key push and this was used to identify probable “button down” events. With some of the simulations, the button down had no effect, but the button up did. The records that I kept were not detailed enough to identify these situations.

It appears that for motion commands, the Sprite 2 starts out by sending “stop”, or equivalent, commands. Then it sends out the required command followed by a double stop command. For the non-motion commands it usually does not send as many commands, which includes not usually sending the stop commands.

The captured data was saved is in Table 1, page 4.

The protocols that are built in to the Sprite 2, as listed on the Sprite 2 internal menu system are:

1. AD-Matrix, Section 1.1, page 9.
2. AD-168Matrix, Section 1.2, page 10.
3. BBV-Matrix, Section 1.3, page 10.
4. BBV-RS485, Section 1.4, page 11.
5. Dennard, Section 1.5, page 14.
6. DM-Serial, Section 1.6, page 17.
7. Ernitec, Section 1.7, page 19.
8. JCL, Section 1.8, page 23.
9. Kalatel, Section 1.9, page 26.

Table 1: Capture files from 29MAY07

10. MarkMercer, Section 1.10, page 28.
11. Pelco-P, Section 1.13, page 53.
12. Panasonic-WV-CS600, Section 1.11, page 31.
13. Panasonic-WV-CS850, Section 1.12, page 43.
14. Philips, Section 1.14, page 61.
15. Philips-232, Section 1.15, page 67.
16. Samsung, Section 1.16, page 67.
17. Sensormatic, Section 1.17, page 72.
18. Ultrack, Section 1.18, page 75.
19. Vantage, Section 1.19, page 78.
20. VCL, Section 1.20, page 80.
21. VCL-Matrix, Section 1.21, page 87.
22. Vista, Section 1.22, page 87.

In the Sprite 2 menu system the order of the protocols is: Pelco-P, Philips, Samsung, Sensormatic, Ultrack, Vantage, VCL, Vista, DM-Serial, Philips-232, AD-Matrix, AD-168Matrix, BBV-Matrix, VCL-Matrix, BBV-RS485, Dennard, Ernitec, JCL, Kalatel, MarkMercer, Panasonic-WV-CS600, Panasonic-WV-CS850, and then they repeat.

A sample data acquisition sheet is shown in Figure 2, page 7. The “improved” data acquisition sheet is shown in Figure 3, page 8.

1. Hello message? _____. If so wait at least 5 sec until proceeding.
2. Hello message length: _____
3. Polling? _____
4. Power cycle to get to next protocol? _____
5. Did “nothing” happen? _____
6. Parity if other than none: _____

Figure 3: Sample of second try at getting protocol data

1.1 AD-Matrix

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 1200
2. Parity: None
3. Hello Message Length: Unknown
4. Hello Message last few bytes: —
5. Is the protocol a Polling Protocol?: Yes (0x30)
6. Name of the data capture file: **29MAY07K.txt**
7. Special: Had to select a new protocol and power cycle to get the Sprite 2 to stop sending the Poll character.

1.2 AD-168Matrix

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 1200
2. Parity: None
3. Hello Message Length: Unknown
4. Hello Message last few bytes: —
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: **29MAY07L.txt** File is non-existent.
7. Special: Nothing ever came out of the Sprite 2.

1.3 BBV-Matrix

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: Unknown
4. Hello Message last few bytes: —
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: **29MAY07M.txt** File is non-existent.
7. Special: Nothing ever came out of the Sprite 2.

1.4 BBV-RS485

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: 64
4. Hello Message last few bytes: 0x00 0xBF 0x0F
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY070.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): 8
 - 7.2 ISO Level 1: _____.
 - 7.3 Unique first byte: 0xB0
 - 7.4 Unique last byte: 0xBF as the next to last byte.
 - 7.5 Checksum: XOR of all bytes in message, is the last byte.
 - 7.6 Device address: Byte 2.
 - 7.7 Is similar to P Protocol

156 There were a total of      952 bytes transferred
157
158 There were a total of      0 DCE bytes transferred
159 The first DCE byte came in at 0.000000 seconds from the start of data collection
160 The last DCE byte was at 0.000000 seconds from the start of data collection
161
162 There were a total of      952 DTE bytes transferred
163 The first DTE byte came in at 433.779955 seconds from the start of data collection
164 The last DTE byte was at 557.215426 seconds from the start of data collection
165

```

1.5 Dennard

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: 64
4. Hello Message last few bytes: 0x00 0x9D 0x03
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07P.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): 7, 8
 - 7.2 ISO Level 1: _____.
 - 7.3 Unique first byte: 0x02
 - 7.4 Unique last byte: 0x03
 - 7.5 Checksum: XOR not including the first or last byte (0x02 or 0x03)
 - 7.6 Device address: Byte 3

146 There were a total of      780 DTE bytes transferred
147 The first DTE byte came in at 0.000000 seconds from the start of data collection
148 The last DTE byte was at 132.199167 seconds from the start of data collection
149

```

1.6 DM-Serial

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: Unknown
4. Hello Message last few bytes: —
5. Is the protocol a Polling Protocol?: Yes. (02A) During the testing there was no indication of any “real data” being sent. This was probably due to the Sprite 2 never receiving any replies.
6. Name of the data capture file: **29MAY07I.txt**
7. Special: Sprite 2 never stopped sending polls (0x2A) and I had to select a new protocol and power cycle the system to get it to stop.
8. Protocol Characteristics:
 - 8.1 Message Length(s): _____, _____, _____, _____, _____.
 - 8.2 ISO Level 1: _____.
 - 8.3 Unique first byte: _____.
 - 8.4 Unique last byte: _____.
 - 8.5 Checksum: _____.
 - 8.6 Device address: _____.

```

1.9 Kalatel

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 4800
2. Parity: None
3. Hello Message Length: Unknown due to the quantity of data sent.
4. Hello Message last few bytes: —
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: **29MAY07S.txt**
7. Special: Kalatel sends data continuously, which makes it difficult to find the start of each command.
There are interpreted breakout of the data available.
8. Protocol Characteristics:
 - 8.1 Message Length(s): 3, 6, 9, 12,
 - 8.2 ISO Level 1: _____.
 - 8.3 Unique first byte: _____.
 - 8.4 Unique last byte: _____.
 - 8.5 Checksum: _____.
 - 8.6 Device address: _____.

29
30 There were a total of    51120 bytes transferred
31
32 There were a total of      0 DCE bytes transferred
33 The first DCE byte came in at 0.000000 seconds from the start of data collection
34 The last DCE byte was at 0.000000 seconds from the start of data collection
35
36 There were a total of    51120 DTE bytes transferred
37 The first DTE byte came in at 58.664291 seconds from the start of data collection
38 The last DTE byte was at 176.294892 seconds from the start of data collection
39
```

1.10 Mark Mercer

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: 26
4. Hello Message last few bytes: 0x31 0x3A 0x5D
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07T.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): 6, 8, 11
 - 7.2 ISO Level 1: _____.
 - 7.3 Unique first byte: 5B
 - 7.4 Unique last byte: 5D
 - 7.5 Checksum: None
 - 7.6 Device address: Bytes 3, 4
 - 7.7 ASCII for data capture line 111:

155 There were a total of      781 bytes transferred
156
157 There were a total of      0 DCE bytes transferred
158 The first DCE byte came in at 0.000000 seconds from the start of data collection
159 The last DCE byte was at 0.000000 seconds from the start of data collection
160
161 There were a total of      781 DTE bytes transferred
162 The first DTE byte came in at 0.000000 seconds from the start of data collection
163 The last DTE byte was at 220.884970 seconds from the start of data collection
164

```

1.11 Panasonic-WV-CS600

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 19200
2. Parity: None
3. Hello Message Length: 172
4. Hello Message last few bytes: 0x30 0x34 0x03
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07V.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): _____, _____, _____, _____, _____.
 - 7.2 ISO Level 1: RS-485, 2 and 4 wire versions.
 - 7.3 Unique first byte: 0x02
 - 7.4 Unique last byte: 0x03
 - 7.5 Checksum: No
 - 7.6 Device address: Bytes 4, 5
8. When this data capture was done, the DCE/DTE lines were reversed from the “normal” connection.
9. A translation of the raw file is included after the main capture file. The translation software only translates type “GC7” commands. It ignores all other command types.
10. A TXB-P485 is in development to support this protocol.

1.12 Panasonic-WV-CS850

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 19200
2. Parity: None
3. Hello Message Length: 218
4. Hello Message last few bytes: 0x30 0x30 0x34 0x03
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07V.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): _____, _____, _____, _____, _____.
 - 7.2 ISO Level 1: RS-485, 2 and 4 wire versions.
 - 7.3 Unique first byte: 0x02
 - 7.4 Unique last byte: 0x03
 - 7.5 Checksum: No
 - 7.6 Device address: Bytes 4, 5
8. When this data capture was done, the DCE/DTE lines were reversed from the “normal” connection.
9. A translation of the raw file is included after the main capture file.
10. A TXB-P485 is in development to support this protocol.

1.13 Pelco-P

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 4800
2. Parity: None
3. Hello Message Length: 32
4. Hello Message last few bytes: 0x00 0xAF 0x0F
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07A.txt and 29MAY07AA.txt
7. Protocol Characteristics:
 - 7.1 Message Length: 8 bytes.
 - 7.2 ISO Level 1: RS-422.
 - 7.3 Unique first byte: 0xA0
 - 7.4 Unique last byte: 0xAF
 - 7.5 Checksum: XOR of full message.
 - 7.6 Device address: Byte 2
8. Other: This data capture was the reason that the serial protocol outputs of the Sprite 2 were captured. In the P Protocol commands being sent note the following:
 - 8.1 In the Hello message the following commands are sent:
 - 8.1.1. Stop motion
 - 8.1.2. Pattern Stop
 - 8.1.3. Scan Stop (Preset 96)
 - 8.2 Then before each motion command the following commands are sent:
 - 8.2.1. Set Zoom Speed to 1
 - 8.2.2. Set Focus Speed to 1
 - 8.2.3. Stop motion, twice
 - 8.2.4. The actual motion command always has both pan and tilt speeds set, even when motion is only happening on one axis.

1.13.1 a.out

226 There were a total of      1544 bytes transferred
227
228 There were a total of      0 DCE bytes transferred
229 The first DCE byte came in at 0.000000 seconds from the start of data collection
230 The last DCE byte was at 0.000000 seconds from the start of data collection
231
232 There were a total of      1544 DTE bytes transferred
233 The first DTE byte came in at 248.296950 seconds from the start of data collection
234 The last DTE byte was at 422.811537 seconds from the start of data collection
235
```

1.14 Philips

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: 47
4. Hello Message last few bytes: 0x00 0xD0 0x0C
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07B.txt and 29MAY07BB.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): 7 or 8 bytes.
 - 7.2 ISO Level 1: RS-422.
 - 7.3 Unique first byte: Either 0x87 or 0x86. The first byte is indicated by having its most significant bit set. The other seven bits indicate the length of the message.
 - 7.4 Unique last byte: No
 - 7.5 Checksum: This is the last byte and is the arithmetic sum of all bytes considered as 7-bit values. I.e. the most significant bit on the first byte is not considered.
 - 7.6 Device address: Bytes 2 and 3, as 7-bit values giving a upper range of 16K units.
8. A correct Philips protocol document is available, which is on file here at Pelco, that describes this protocol in detail.
9. A TXB (TXB-B) that implements this protocol is available, **however** it does not run on RS-422 lines. Instead it is based on Philips' (Burle's, Bosch's) implementation over a 32 Kbps Manchester coded communications link.

161 There were a total of      917 bytes transferred
162
163 There were a total of      0 DCE bytes transferred
164 The first DCE byte came in at 0.000000 seconds from the start of data collection
165 The last DCE byte was at 0.000000 seconds from the start of data collection
166
167 There were a total of      917 DTE bytes transferred
168 The first DTE byte came in at 59.747109 seconds from the start of data collection
169 The last DTE byte was at 242.636883 seconds from the start of data collection
170
```

1.15 Philips-232

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: Unknown
4. Hello Message last few bytes: —
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07J.txt (none existent)
7. Special: No data was ever seen on the output of the Sprite 2. This might because testing was done on the RS-422 IO pins, not on the RS-232 pins.

1.16 Samsung

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: 36
4. Hello Message last few bytes: 0x00 0x00 0x00 0xFF
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07C.txt and 29MAY07CC.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): 9
 - 7.2 ISO Level 1: _____.
 - 7.3 Unique first byte: 0xA0
 - 7.4 Unique last byte: No.
 - 7.5 Checksum: _____.
 - 7.6 Device address: Byte 3?

113 There were a total of      648 bytes transferred
114
115 There were a total of      0 DCE bytes transferred
116 The first DCE byte came in at 0.000000 seconds from the start of data collection
117 The last DCE byte was at 0.000000 seconds from the start of data collection
118
119 There were a total of      648 DTE bytes transferred
120 The first DTE byte came in at 118.563720 seconds from the start of data collection
121 The last DTE byte was at 259.998391 seconds from the start of data collection
122
```

1.17 Sensormatic

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 4800
2. Parity: None
3. Hello Message Length: 12
4. Hello Message last few bytes: 0x01 0x93 0x6C
5. Is the protocol a Polling Protocol?: No, in a real Sensormatic system, the headend continuously polls every $\frac{1}{2} \rightarrow 1$ second.
6. Name of the data capture file: 29MAY07D.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): 3, 5.
 - 7.2 ISO Level 1: RS-422.
 - 7.3 Unique first byte: No, the first byte is the device address.
 - 7.4 Unique last byte: No, it is the checksum
 - 7.5 Checksum: Yes, is the complement of the rest of the message. Such that the total 8-bit sum of the bytes of them message is 0x00.
 - 7.6 Device address: Yes, byte 1.
8. There is a Sensormatic protocol document, which is on file at Pelco, that is medium accurate in describing this protocol.
9. The TXB-S422 implements this protocol.

1.18 Ultrack

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: Even
3. Hello Message Length: Yes, didn't get it because parity was incorrectly set and I ran out of time.
4. Hello Message last few bytes: —
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07E.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): 9.
 - 7.2 ISO Level 1: _____.
 - 7.3 Unique first byte: 0x00
 - 7.4 Unique last byte: No
 - 7.5 Checksum: _____.
 - 7.6 Device address: Byte 2?

91 There were a total of          677 bytes transferred
92
93 There were a total of          0 DCE bytes transferred
94 The first DCE byte came in at 0.000000 seconds from the start of data collection
95 The last DCE byte was at 0.000000 seconds from the start of data collection
96
97 There were a total of          677 DTE bytes transferred
98 The first DTE byte came in at 75.826609 seconds from the start of data collection
99 The last DTE byte was at 227.620361 seconds from the start of data collection

```

1.20 VCL

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: 44
4. Hello Message last few bytes: 0x80 0x2F 0x80 0x2E
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07G.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): 2, 3
 - 7.2 ISO Level 1: _____.
 - 7.3 Unique first byte: 0x80, might actually be a first byte indicator of the most significant bit, followed by seven bits of address, starting at 0 for address 1.
 - 7.4 Unique last byte: _____.
 - 7.5 Checksum: No
 - 7.6 Device address: No

389	There were a total of				747 bytes transferred	

390
391 There were a total of 0 DCE bytes transferred
392 The first DCE byte came in at 0.000000 seconds from the start of data collection
393 The last DCE byte was at 0.000000 seconds from the start of data collection
394
395 There were a total of 747 DTE bytes transferred
396 The first DTE byte came in at 0.000000 seconds from the start of data collection
397 The last DTE byte was at 168.569703 seconds from the start of data collection
398

1.21 VCL-Matrix

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: Unknown
4. Hello Message last few bytes: —
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07N.txt File is non-existent.
7. Special: Nothing ever came out of the Sprite 2.

1.22 Vista

This data was collected from a Dedicated Micro Systems Sprite 2 on 29MAY07.

1. Baud rate: 9600
2. Parity: None
3. Hello Message Length: 44
4. Hello Message last few bytes: 0x00 0x00 0x01 0x03
5. Is the protocol a Polling Protocol?: No
6. Name of the data capture file: 29MAY07H.txt
7. Protocol Characteristics:
 - 7.1 Message Length(s): 9
 - 7.2 ISO Level 1: _____.
 - 7.3 Unique first byte: 0xAA, 0x02
 - 7.4 Unique last byte: 0x03
 - 7.5 Checksum: Sum of all but the first two bytes and the last byte.
 - 7.6 Device address: Byte 3?
